American Railroad Journal.

Saturday, August 8, 1868.

Stock Exchange and Money Market.

The Money Market has been uniformly well supplied all through the week, now under review. The offerings, particularly on call, have been decidedly liberal, both on bank and on private account. The demand from speculative sources has been somewhat brisker, but has been promptly responded to at from 3@4 per cent. as the ruling figures. The mercantile inquiry from local and country borrowers has likewise been more animated; but all the really choice to good business paper that has been offered in the street has been readily discounted at from 5@7, chiefly at from 6 @7 per cent. per annum. The city banks made a further handsome addition to their deposit and legal tender averages, in each instance, to an amount exceeding 1⅜ millions; while they reported a loss of only a small sum, in the specie line. On the other hand, they were obliged to contract their loans over a million dollars, because of the diminished call for aid from their customers. A slight reduction was also made in their circulation. The U. S. Sub-Treasury has disbursed, since our last, some four and a half millions more than it received from all sources. It held a cash balance on Tuesday evening of $78,421,279, against $80,133,186 on the 1st inst., and $89,125,661 on the 1st of July. The business of the office on Monday of this week was unusually heavy in both lines of income and expenditure. On Monday, a draft for the $7,200,000 appropriated to pay for Alaska, was provided for at the Bank of Commerce. This amount was, of course, in coin, or the certificates representing coin.

The specie reserve of the city banks is now $20,502,787, against $6,461,949 same time last year. The city bank deposits are now $228,104,754, against $201,153,754 week ending Aug. 3, 1867. The legal tender reserve amounts to $73,638,061, against $75,098,762 same time last year. The circulation now stands at $33,957,305, against $23,559,117 same time last year. The loans are now $279,311,357, against $254,940,016 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $74,855,699 a day, against a daily average of $81,196,000 the preceding week, and $84,243,743 the week ending with July 18, 1868. The current week's exchanges average about $104,656,384 a day. The city banks, last week, gained $1,402,475 of legal tender, and $1,343,205 of deposits. They lost $301,364 of specie, while they reduced their loans, $1,033,598; and their circulation, $6,068.

The New York Gold Exchange Bank reports for the week ending Saturday, the 1st day of Aug., 1868, the average amount of loans and discounts as $1,121,434; average amount of specie, $869,981; average amount of deposits, $1,443,468.

The Philadelphia Bank movement the past week shows an increase in loans of $316,800; a decrease of $8,605 in specie; an increase in legal tenders of $546,283; an increase of $1,121,946 in deposits; and an increase of $1,399 in circulation. The Bank Clearings show a decrease of $2,707,278, and the balances, a decrease of $575,307.

The U. S. Sub-Treasury receipts, week ending with Aug. 3, were $15,677,954, including $2,430,801 from customs duties; payments, $15,000,825, including $92,000 of coin interest; balance at the close of the week, $82,041,604, against $81,364,472, at the close of the preceding week, showing a decrease of $677,129. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $16,517,789 including $353,468 from customs; and payments, $18,930,507; on Tuesday, receipts, $4,875,225 including $574,000 from customs, and payments, $8,580,831. The balance at the close of business on Tuesday stood at $78,421,279, against $82,904,000, a week previous; and $81,916,656, on July 22, 1868. The aggregate receipts of the office from all sources in July, were $94,561,982; aggregate payments, $103,554,458. The balance on the 1st inst., was about nine millions below that on the 1st ult., which amounted to $89,125,661.

The outstanding amount of coin certificates on the 1st of June, was $20,298,180, against $19,357,900 on the 1st of May, 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $708,000, and retired $2,336,800 through the receipts for customs.

The coin certificates issued by the Sub-Treasury office, during July, reached $8,939,060.

National Bank notes to the amount of $123,500 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,106,116, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,198,898, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,907,218. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,611,800; and for the public deposits, $38,047,950—making a total of $379,659,750. The Treasury Department last week redeemed and destroyed $563,158 of worn and mutilated fractional currency, and issued $498,778 of new. The outstanding amount of fractional currency on the 1st of June was $32,531,590, against $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government derived a moderate income, last week, from both excises and customs. The excises, last week, yielded some three millions; customs at the port of New York, $2,430,801, and at the outports about $800,000 (in coin) more, making the grand total income for the week equal to about $7,685,950 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $13,500,000. Special Commissioner Wells, in a late official summary, says the National income from all sources, year ending with June 30, 1868, was $406,300,000 (including ($163,500,000 from customs, $193,000,000 from excises, and $49,800,000 from miscellaneous sources,) against expenditures of $371,550,223, (including $146,231,380 of ordinary, and $225,318,845 of extraordinary disbursements,) in the same fiscal year. He estimates the aggregate expenses of the Government for the current fiscal year of 1868–'69, ending with June 30, 1869, at about $289,000,000. He further estimates the amount of taxes abated or repealed, since the close of the war, at $167,269,000.

The Gold speculation has been quite spirited, since our last, the operators for a rise having been sturdily pushing their interest. The demand has been mainly from investment sources. The reduction, real or apparent, of the coin reserve of the Government, by the large appropriation of specie, to pay for Alaska, and the anticipated outflow of this amount, have been made use of as circumstances favorable to the purposes of the inflationists. The crop advices, particularly from the South, and the reports of the political situation have been interpreted adversely to the public credit. The export and customs drain of specie, however, has been moderate, the former unusually so. The range of the price of gold, during the week, has been from 144⅝@148¼, and the closing figures on Wednesday were 148@148⅛. The exports of specie last week considerably under a million; thus far this week, they have been $1,093,000, including $93,000 on Tuesday, and $1,000,000 on Wednesday. The customs revenue of the Government at this port in July amounted to $9,555,594, against $9,794,404 same month in 1867.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $4,214,256, against $1,743,560 same time last year. The customs demand for Gold last week, averaged $405,133 a day; thus far, this week, it has been equal to $418,750 a day, or equal to a weekly aggregate of $2,512,500. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $56,756 and from California, $1,275,075. The total customs revenue of the Government, in coin, at this port, during the fiscal year ending with June 30, 1868, was $113,529,891, against $122,667,016 in the preceding fiscal year. The customs revenue in coin at this port, since Jan. 1, 1868, has been $66,470,956, against $71,260,915 same time in 1867. The total receipts of California gold at this port, in the last fiscal year, ending with July 1, 1868, were $36,726,790, against $38,338,762 in the preceding fiscal year, showing a decrease of $1,611,972 in 1867–'68. The receipts from the same source, since Jan. 1, 1868, have been $25,557,477, against $17,823,182, in 1867, showing an increase thus far in 1868, of $7,734,295. The exports of specie, hence, year ending with July 1, 1868, were $76,256,594, against $41,366,932 same time in 1866–'7. The exports of specie from this port, last week, were only $715,592, against $1,161,806 same week last year; total, since Jan. 1, 1868, $59,688,157, against $37,427,856 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $92,000; since Jan. 1, 1868, $59,065,580, against $39,157,199; and during the last fiscal year, ending with June 30, 1868, $73,485,386, against $54,218,392 in 1866–'7. The specie exports from San Francisco, from Jan. 1, to July 20, 1868, were $22,906,125, against $22,927,189 same time last year.

Government received $4,601,413 from customs at the port of San Francisco, from Jan. 1, to July 20, against $4,061,881 same time in the preceding year.

Foreign exchange has been quite slow of sale, most of the week, on a comparatively liberal offering of bills, particularly of second class, the presence of which on the market has been operating against the interests of drawers. Bankers' prime sixty day bills on London closed on Wednesday at 109¾@110¼, and on Paris to 5.18¾c.@5.13¾; sight bills on London to 110⅛@110⅜, and on Paris to 5.13¾c.@5.12½. The offering of produce bills has been light this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,505,994, against $1,615,117 same week last year; total, since Jan., 1, 1868, $99,079,058, against $112,534,844 in 1867; and grand total, during the fiscal year ending July 1, 1868, $179,784,280, against $195,544,905 in 1866–'67.

Government securities have been only moderately active, most of the week. The six per cent. coin bearing bonds of 1881, and the Five-Twenties of 1862, together with the coupon Ten-Forties have been in most favor, particularly for shipment to Europe. The later issues of the Five-Twenties have been in rather limited request for home investment purposes. The Seven-Thirties of all denominations have practically disappeared from the market. The most extended privilege of converting these notes into Five-Twenty bonds—that on the last or July issue—matured on the 1st inst. The small amount of the notes now outstanding will be redeemed in currency, exclusively. The conversions of the notes in July, through the U. S. Sub Treasury in this city, amounted to $15,585,650, or equal to about half a million a day for each of the 31 days in the month. The later dealings in the funds, on Wednesday, indicated more firmness and animation. A considerable *short* interest has been made in Ten-Forties, which have not been plenty, and which have been advanced to a relatively extravagant price.

U. S. sixes of 1881 closed here on Wednesday at 115⅞@116; U. S. Five-twenties of 1862, 114⅝@114¾; U. S. Five-twenties of 1864 at 111@111⅛; U. S. Five-twenties of 1865 at 112⅜@112½; U. S. Five-twenties of 1865, consolidated, 108⅝@108⅛; U. S. Five-twenties of 1867, 108⅞@109; U. S. Five-twenties of 1868, 108⅞@109; U. S. Ten-forties at 109⅜@109⅝, U. S. Six per cent. currency bonds, 102⅝@102⅞. The brokers are buying the compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

August, 1865....119	October, 1865....118
September, 1865..118½	

U. S. three per cent. certificates 100¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 22.	July 29.	Aug. 5.
Consols	94¾	94½	94⅜
U. S. 5-20's of 1862	72⅞	72½	71½
Erie	42¾	43¾	37¼
Ill. Central	96	94⅝	92⅝

The railway and miscellaneous share market has been violently disturbed by a vigorous *bear* movement against Erie common stock, which carried down the going rate for this property fully 11 per cent. in two days, the severe depression in this particular instance operating quite adversely on the whole list. The transactions in all share property were on a restricted scale, and the general market closed very feverishly.

The bond and mortgage dealings of the week have been comparatively fair in amount.

In domestic produce, more activity has been noticed, particularly in Breadstuffs, Provisions and Tobacco, at generally advancing prices. Cotton has been less sought after. Middling upland cotton closed heavily on Wednesday at 29@29¼ cents per lb. The stock of cotton now here is estimated at about 45,000 bales. The receipts at the port this week, have averaged only about 1,100 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,189,000 bales, against 1,871,000 bales same time last year; exports, same time 1,706,500 bales, against 1,555,000 bales same time last year; stock on hand at latest dates, 60,000 bales, against 135,000 bales same date last year. At the Live Stock market, this week, Beeves have been in much better supply and less demand at from 12@17c. per lb.; week's receipts, 7,078. Veal calves in fair request, but quoted heavy at from 7@11½c. per lb.; receipts, 1,138. Sheep and lambs have been unusually abundant and decidedly lower, ranging from 4@6¾c., and 8½@9½, respectively, per lb.; on a restricted trade; receipts, 22,933. Swine have been in in fair demand and rather firmer, at from 10½@11c. per lb., all live weight; receipts, 18,550. Foreign merchandise has been in moderate

supply, as a rule; but the demand has not been active; and the changes in prices have not been important.. The total imports of foreign dry goods, last week, were $2,185,819, and the total amount marketed $1,745,717. The value of foreign merchandise imported last week, was $3,509,347—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $5,695,166, against $3,488,374 same week last year; from Jan. 1, 1868, $145,173,534, against $149,888,106 same time in 1867; and year ending July 1, 1868, $238,283,518, against $269,831,007 in 1866–'67. The freight market has been less active and rates have been quoted lower, chiefly on grain freight for British ports. For Liverpool we quote flour at 1s. 4½d. @1s. 6d. by sail, and 1s. 7½d.@1s. 9d. by steamer, per bbl.; grain at 4@4½d. by sail, and 5@5½d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{16}$d. by sail, and $\frac{3}{16}$d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday 507.

The New York exports, exclusive of specie, for the week ending Aug. 4, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$1,615,117	$2,505,994
Prev. reported	110,919,727	96,573,586
Since January 1	$112,534,844	$99,079,058

The imports for the week ending August 1, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,382,127	$2,185,819
Gen. merchandise	2,106,247	3,509,347
Total for the week	$3,488,374	$5,695,166
Previously reported	146,399,732	139,478,368
Since January 1	$149,888,106	$155,173,534

The balance in the Sub-Treasury on Wednesday was $78,582,601 08.

Pacific Railroad Mortgage.

The mortgage for $7,000,000, which has recently been executed by this company, is to secure the bonds issued by the company to pay the five millions purchase money for the road, under the legislative act of last winter, and one million and a half of bonds known as the Dresden bonds, given some time ago for work on that part of the road west of Dresden; and the remainder is to be applied to change the gauge of the road so as to conform with the Kansas Pacific Railway, and place the road in complete and effective working order. The amount of the purchase money will probably be paid in Missouri State bonds, which will reduce the State debt to that amount. The mortgage is in favor of Uriel A. Murdock, James Punnett and Luther C. Clark. The bonds are to run twenty years, are payable in gold at New York, and bear six per cent. interest. A copy of the act above alluded to will be found in another part of this week's issue.

☞ The Housatonic Railroad Company has been compelled to pass the July dividend on the preferred stock. The reason is the large amount of broken rails which must be replaced by new ones.

☞ Work has been resumed at the western end of the Hartford Providence and Fishkill Railroad.

Railroad Earnings.—Weekly.

The earnings of the Western Union Railroad for the 4th week in July, 1868 ..... $18,958 60
Corresponding week previous year 18,018 56

Increase $940 04

The earnings of the Chicago and Northwestern Railroad for the 4th week in July, 1868. $381,610 93
Corresponding week previous year .. 293,632 95

Increase $87,977 98

The earnings of the Chicago and Alton Railroad for the 4th week in July, 1868.. $123,803 71
Corresponding period previous year . 95,889 27

Increase $27,914 44

The earnings of the Detroit and Milwaukee Railroad for the fourth week in July, 1868, were $29,604 53
Corresponding week of 1867 ..... 29,978 15

Decrease $373 62

The earnings of the Michigan Southern and Northern Indiana Railroad for the 4th week in July, 1868, were. $98,671 70
Corresponding week of 1867 ..... 116,702 44

Decrease $18,030 74

The earnings of the Chicago and Rock Island Railroad for the fourth week in July, 1868, were $82,100 00
Corresponding week of previous year.. 67,339 00

Increase $14,761 00

The earnings of the Milwaukee and St. Paul Railroad for the fourth week in July, 1868, were $122,600 00
Corresponding week of previous year 104,303 00

Increase $18,297 00

Intercolonial Railway Loan.

This loan, tenders for which have just been received in London, consists of £1,500,000 Canada 4 per cent. bonds, guaranteed by the home Government, and £500,000 Canada 5 per cent. bonds, both to be repaid October 1, 1893. Interest to commence July 1. The loan is payable in instalments, as follows: 20 per cent. on allotment, 25 per cent. on 13th October, 25 per cent. on 12th January, 1869, and the balance (30 per cent.) on 13th April, 1869. The bonds are in sums of £100, £500, and £1,000, and will be delivered in exchange for scrip as soon as practicable. The present £2,000,000 thus raised is a half of that to be had for the line, all of which is already authorized—£3,000,000 under the Imperial Government guarantee of 4 per cent., and £1,000,000 under the Canadian 5 per cent.

The tenders for the above were numerous, the total applications reaching to about £8,000,000. The entire loan, except £73,200, which was taken by various parties at prices ranging from 105¾ to 106½, was allotted to Messrs. Cazenove & Co., on a tender for £2,000,000 at £105⅝, which was stated to be made for Messrs. Rothschild.

☞ The citizens of Houlton, Me., have in contemplation the construction of a railroad from that town to connect with the St. Andrews Railway at the nearest station. The distance is eight and a half miles, and the estimated cost, by the engineer, is but little over $17,000 per mile.

☞ We learn that the location of the Knox and Lincoln Railroad has been completed, and that the directors are now ready to receive proposals to build sections of one mile or more from Bath to Rockland, a distance of forty-six miles.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of July, were:

☞ The Darlington (Wis.) *Union* says that the project of building a railroad from Gratiot to Shullsburg, and thence to the Mississippi river, has been revived, and it is reported that Shullsburg has raised, by tax and by private subscription, the sum necessary to insure its success—$100,000.

Grain Trade of Buffalo.

The eastward movement of flour and grain, through Buffalo, from January 1st, to August 1st, 1868, shows an increase over last year of 164,344 barrels, and 8,275,487 bushels of grain. The following table showing the imports of flour and grain at Buffalo from the West, by lake and Grand Trunk Railway, for the month of July, and since January 1, 1868, as compared with previous years:

FOR THE MONTH OF JULY.

	Flour, bbls.	Grain, bush.	Grain, includ'g Flour, bush.
1868.....	66,222	4,119,665	4,450,775
1867.....	70,694	4,945,333	5,298,803
1866.....	132,265	7,854,136	8,517,261
1865.....	183,988	5,300,073	6,220,013
1864.....	242,831	4,911,734	6,125,889
1863.....	226,787	8,380,142	9,514,077
1862.....	294,844	8,612,215	10,076,435
1861.....	197,274	6,025,309	7,911,679

FROM JANUARY 1ST TO AUGUST 1ST.

	Flour, bbls.	Grain, bush.	Grain, includ'g Flour, bush.
1868....	421,552	14,809,756	16,417,516
1867....	257,208	11,034,269	12,320,309

Total grain, bu.	18,287,989	7,866,263	11,605,047

Georgia Air Line Railroad.

We notice that a bill has been introduced in the Legislature of this State to aid in the building of the Georgia Air Line Railroad. This road will start at Atlanta and take the straightest and most feasible route through Northeast Georgia, requiring about one hundred and ten miles of road in this State. This road will afford employment to thousands of persons, and open a market for the surplus produce of the counties of De Kalb, Gwinnett, Jackson, Hall, Banks, Franklin, Hart, Madison, Habersham, White, Rabun, Towns, Milton, Fanin, Gilmer, Forsyth and other counties which heretofore have been shut out from market, giving them the privilege of a home or more eastern market. This is to be a part of the great Southern Pacific road, which will be tapped at hundreds of points, and will bring all Georgians to a nearness with each other. The aid asked does not require the State to advance or pay one dollar; but merely lend its countenance, after twenty miles of the road are built and equipped, to indorse bonds to the value of about one-third of the road when finished, and take a first class mortgage on the same, to enable the company to build another twenty miles. The security offered is ample, and places it beyond a probability of ever causing the State to advance or lose one cent. In view of these considerations, we hope that no sectional feelings will spring up, and that members will rise superior to such thoughts, and with one united struggle give the old ship-of-state a new launch in another direction, and let her sail on gloriously as she did in the days of her former prosperity.—*Atlanta Constitution*.

Pacific Railroad of Missouri.

This company having been requested, by resolution of the House of Representatives, to report what measures, if any, had been taken by it to conform the gauge of said road to the gauge of the Union Pacific Railway, and what the probable cost of such a change would amount to, as well as the time necessary to accomplish the same, replied through the president, under date January 10, 1868, as follows:

That the subject of the change of gauge has been heretofore frequently and seriously discussed, and the necessity of such change has been decided by this Board as imperatively demanded by every consideration of policy and interest, and such change this road has unanimously decided to make at the earliest possible moment. The change involves much expense and time, neither of which can this company feel justified in undertaking while the present relation of this road to the State continues, meaning, hereby, to refer to the power the State may have to dispose of her claim at any time; which power operates to depress the credit of the company whenever they attempt to negotiate largely to carry out such expensive alterations as the "change of gauge." With the above remarks, the Directors beg leave, respectfully, to say that the cost of locomotives, originally new, to supply the absence of old, while being altered, would be $300,000. These would not be lost, as shortly after the whole change is made they would be probably required for increased business. Alterations of rolling stock would cost, economically done, say $850,000; labor in withdrawing the rail, say $80,000; new iron required, $200,000, or an aggregate of $930,000.

The interruption to business would be serious for a short time, and cannot be estimated with accuracy. The time required to make this change would be economized much by dividing the road into three sections, say from Kansas City to Warrensburg, Warrensburg to Jefferson City, and from Jefferson City to St. Louis, doing the work by three sections, and arranging for transfers at unfinished points. The change might be fully effected within one year.

☞ The breaking of the ground on the Belfast and Moosehead Lake Railroad was celebrated at Belfast Me., on the 4th inst., by the ringing of bells, firing of cannon, and a procession. Addresses were delivered by several gentlemen. A large concourse of people was present.

☞ The construction of the Plymouth and Vineyard Sound Railroad has recently been proposed to the president and directors of the Old Colony and Newport Railroad Company. After a thorough discussion, general conclusions were reached favorable to the building of the road. Experienced contractors are to examine the route with a view to verify the estimates.

☞ The survey of the route of the Frederick and Pennsylvania Line Railroad has been commenced, under direction of Captain Robert Irwin, of Baltimore. The road will connect with the Western Maryland Railroad at Monocacy, to which point the latter road will be completed in three months.

☞ The subscription books for stock in the Portland and Ogdensburg Railroad will be opened on the 20th inst. at Portland, Westbrook, Gorham, Standish, Baldwin, Sebago, Cornish, Hiram, Denmark, Brownfield, Fryeburg, Bridgton—towns in Maine on the proposed route. Indications are that the subscriptions will be large and speedily made.

Macon and Brunswick Railroad.

The grand measures for the immediate completion of this road have been inaugurated, and the work will now go forward as rapidly as human hands can make it. The company hope to have it ready to transport the cotton crop of 1869, but this is too short a time to do such an amount of work. If we go through by next Christmas year, it will be the quickest road of the length ever built. We cannot too often congratulate our city upon the early prospects of securing the new outlet to the sea. It will give it, together with other roads now in successful operation, advantages over every other city in the State, and at once infuse new life into every other branch of business and trade.—*Macon (Ga.) Journal, July 30.*

☞ A new suspension bridge is being constructed over the Niagara River, and the cables will be stretched across the river some time next week. A large force is engaged in the work of construction, and it is believed that the bridge will be ready for the use of the public by the middle of October.

☞ The directors of the Portland and Kennebec Railroad are putting the road in fine order. Some 25,000 new sleepers and nearly 800 tons of new rail are being laid along their line, besides new station houses, cattle sheds, and other buildings at various places.

☞ The surveys on the Nashua and Rochester route are all made, and as soon as the Portland and Rochester road is completed to Rochester, the building of the Nashua and Rochester will be put under contract. The Portland and Rochester Railroad is now completed to Waterborough, and the prospects of its early completion to Alfred are good.

☞ The Mount Washington Railroad will be completed to the top of "Jacob's Ladder," within three-fourths of a mile of the summit, by Monday next. Length of road now completed, two miles.

☞ Track laying has commenced on the Winneconne division of the St. Paul road. The arrangements for work are such that in two weeks the iron will be laid and the cars running to Winneconne. The iron for the road is all on the ground. It is hoped by the people on the line that the road will be extended to Neenah and Menasha as soon as possible.

☞ There are now on the line of the Boston, Hartford and Erie Railroad, between Williamantic and Putnam, five construction trains, three steam excavators and over one hundred cars, at work grading the road.

☞ Mr. Crosby, of Williamsburg, Mass., has been elected president of the Williamsburg and North Adams Railroad Company, and Henry J. Barker of South Adams, surveyor. Work is to be immediately commenced on the road.

☞ The following gentlemen have been elected directors of the Leeds and Farmington Railroad Company: Wm. J. Rotch, of New Bedford, Henry M. Payson and John W. Perkins of Portland, Daniel Holland of Lewiston and Joseph Pettingill of Livermore.

☞ The Northeast and Southwest Alabama Railroad, with its appurtenances, is to be sold at Montgomery, Ala., on the 10th of September.

☞ The rails on the Dexter and Newport Railroad have nearly reached Dexter.

"English Copper Co." Rails.

2,000 TONS of this well known make, fifty-six pounds per yard "Erie" pattern, to arrive at this port, and for sale by

HEYERDAHL, SCHONBERG & CO.,
4t32 23 William street, New York.

"EBBW VALE"
50 lbs. Erie Pattern.

1,000 TONS for sale from yard, 26 feet and shorter bars.

HEYERDAHL, SCHONBERG & CO.,

OFFICE NEW ORLEANS, OPELOUSAS AND GREAT WESTERN RAILROAD COMPANY.

New Orleans, June 6th, 1868.

The New Orleans, Opelousas and Great Western Railroad Company desiring that a connection shall be formed between their present terminus at Berwick's Bay, and the Houston and New Orleans Railroad, which terminates at the Sabine River, and which when completed, the (distance being 163 miles,) will connect New Orleans with almost the entire railroad system of Texas, the President and Directors of said Company, therefore propose to such party or parties as may undertake to fill up such gap, the following terms and conditions, to wit:

1. Will lease the right of way and the franchises now possessed by said company from their present terminus at Berwick's Bay to the town of Vermilionville, the grading of which is almost entirely completed for these 63 miles, and will, at the same time, lease the right under their charter to build the branch railroad from Vermilionville to the Sabine River, at or near Orange, the same having been already located by resolution of the Board of Directors. The distance between these points is 100 miles. The Company reserving to itself the right of way and transportation on payment of proportionate freights and passage money from the present terminus of the road to any extension towards Opelousas, of its road beyond Vermilionville.

2. The said lease to continue for a term of years to be agreed upon between the Company and the Lessees. At the end of the lease the property to be valued by disinterested parties, the Railroad Company to select three, and the Lessees three, the two, if need be, to call in an umpire whose decision will be final. The Railroad Company reserving the right to purchase said property at such valuation, but if not then promptly paid for by said Company, the lease to be extended for a further term of years, and so on, until finally purchased and paid for by said New Orleans, Opelousas and Great Western Railroad Company. The grading already made between Berwick's Bay and Vermilionville, to be valued by competent engineers at the time of entering into a contract, but not to be paid for by lessees until the end of the first lease, herein provided for.

3. The parties leasing to obligate themselves to connect with no other railroad which might hereafter be built, terminating at or near the City of New Orleans, and further obligating themselves to do no act which will infringe the rights under the present charter of said Company, and also to hold said company harmless against any loss which might result from acts committed on that portion of road now proposed to be leased.

4. Should the Lessees succeed in obtaining a land grant on the line of railroad beyond Berwick's Bay, it will be and remain the property of said lessees, this Company claiming none of its benefits, and incurring no portion of the responsibility attending it.

5. Transportation to be furnished said Lessees over the Company's road, as follows, viz:

The President, Directors and officers of the road, including engineers, superintendents, road masters and bridge builders free of charge. Transportation of laborers going out to be charged one-third the regular fare. Provisions and supplies to be charged one half of regular rates. Material, other than iron and cross-ties, to be charged one half of regular rates. Iron to be charged one dollar per ton, and cross-ties (if any) fifteen cents each. Lessees to load and unload the cars.

6. The road thus to be built shall be a first class railroad in every respect. The gauge to be the same as the Company's road—say 5 feet 6 inches. The iron used not to be less than 58 lbs. per yard.

7. The said Lessees to obligate themselves to commence said road within four months, and have it finished and in running order to the Sabine River, connecting with the Houston road at or near Orange, within three years from date of signing the lease.

8. In order to ensure the faithful performance of the contract the Lessee will be required to execute a bond to an amount, and with good and satisfactory security to the satisfaction of the Board of Directors.

9. The Company reserves the right to reject any and all bids.

Another proposition and for which proposals are also invited, is to lease the road, including depots, stations, rolling stock, etc., from Algiers, opposite New Orleans, to Brashear City, including the franchises of the Company beyond to Texas, under the following conditions:

1. That the party or parties proposing to lease shall state the least number of years he or they will lease the road, on the following conditions:

2. The accrued interest to October the 1st, 1868, on the mortgage bonds, (said bonds maturing in 1889,) to be provided for by the lessee.

3. The semi-annual interest on same bonds, accruing yearly after date, and payable on the first days of April and October of each year, say $160,000 per annum, to be also provided for by said lessee.

4. The road to be built over the route from Berwick's Bay to New Iberia, thence to a point at or near Vermilionville, thence in a westerly direction to a point on the Sabine River, connecting with the Houston and Beaumont road.

5. The building of the road to be commenced within four months after signing the contract of lease, to be prosecuted with all dispatch, and to be fully and finally constructed within three years from the signing of the lease.

6. The grading, culverts, etc., now made beyond Berwick's Bay, to be taken by the Lessee at a valuation to be ascertained by experts, one to be appointed by each party, in case of disagreement they to select an umpire, and to be paid for on such terms as shall be hereafter agreed on.

7. The road to be built, equipped and maintained during the entire lease as a first class road in every respect.

8. At the close of said lease, the said road, depots, stations, rolling stock, etc., from Berwick's Bay to the Texas line, shall be valued by experts, one to be appointed by each of the parties thereto, and in the event of disagreement, the two to select an umpire, whose decision shall be final. The value thereof thus ascertained shall be subscribed as stock in the present Company, it being well understood that all costs of maintenance, as well as expenses of operating the road, shall be at the exclusive charge of the Lessees.

9. The contract with Charles Morgon for running a line of steamers to Texas, extending to 1871, to be carried out by the Lessee in every respect.

10. The present road to Berwick's Bay, including depots, machine shops, rolling stock, bridges, etc., to be turned over to the Lessee after inventory and appraisement, and the said property, or property of like character and value, and like condition and good order, to be returned to the company at the expiration of said lease.

11. The Lessees, to ensure the faithful performance of the contract, to furnish security to the satisfaction of Board of Directors.

12. The said Lessees shall contribute and pay each year the sum of $5000, payable quarterly, to keep up and maintain the organization of the Railroad Company during the existence of this lease.

13. The said Lessees obligate themselves to do no act which may operate a forfeiture of the charter, and shall hold the said N. O., O. and G. W. R. R. Co. harmless against any and all acts of theirs.

Sealed proposals will be received at the office of the Company in New Orleans, No. 69 Canal street, until the first day of September next, at 12 o'clock, M., the Company reserving the right of rejecting any or all bids.

RAILROAD SCREW SPIKE.

HENRY YOUNG, President.
G. B. HUBBELL, Secretary
HUBBELL & VANHOESEN, Agents.

Works at
OSSINING,
Westchester Co., N. Y.

We respectfully call the attention of all persons engaged in the construction and management of railroads, to the double hook headed Screw Spike, for fastening rails and chairs to ties. The above cut represents the size and shape of the screw, which weighs eight ounces. It has been thoroughly tested on the Erie, New York Central, and other Railways, from one to three years, and in every case it has stood the test satisfactorily, having performed its work perfectly.

The Screw Spike possesses the following important advantages over the common spike:

First.—They are made of the best refined Iron, and the thread, being forged (not cut), imparts additional strength and stiffness to them.

Second.—INCREASED SECURITY. The holding power of the screw is many times greater than that of the spike, and it is not liable to break nor become loosened by the jar of the cars, nor by the upward or lateral strain even on the steepest grades and sharpest curves—the holding capacity of each screw being from four to five tons, and the side pressure from three to four tons.

In three years' experience no screw has removed from its place, and the rails in every case have been held as firmly to the ties as when first put down. By its use, therefore, the numerous accidents constantly occurring from loose and broken spikes, and consequent loose and broken rails, shaky roads, and the spreading of the rails, will be obviated.

Third.—GREATER ECONOMY. In order to remove the rail it will only be necessary to reverse the screw one-quarter; and when replacing it, turn the screw back to its original position, when the rail will be held as firmly as before. The ties will thus be saved from the injury of splits, checks, and the numerous holes made in them by repeatedly drawing and replacing spikes, in which water will collect, causing their rapid decay. By the use of the screws, therefore, the durability of the ties will be greatly increased and equalized.

Besides, when the rails are loose the ties are cut by the repeated blows made on them by the rails, and are thereby materially damaged; on the contrary, where the screw is used, the rails are held so firmly in their place, that this injury is prevented. The saving to railway companies in ties alone, it is estimated will more than pay the whole cost of the screws. Where none but soft wood can be obtained for ties, the screw manifestly possesses a still greater advantage over the spike.

It is also calculated, that in consequence of the screws holding the rails to the ties so firmly, a less number will be required than of ordinary spikes, also a very great saving will be realized in the wear of the rolling stock and rails. The considerable loss arising from loose, bent, broken and missing spikes, will be almost entirely prevented. Besides, where the screw is in use, in addition to the saving of time in relaying rails, a much less number of men are required to watch the track and keep it in repair, thereby causing a great saving.

While the first cost of the screw is somewhat higher than the spike, *in the end they will be very much cheaper.* The screw therefore being *more economical*, and by its use in place of the spike, *making the roads more secure*, besides "giving to the track an easy and connected spring so much desired," it must entirely supersede the common spike.

In corroboration of the foregoing, we present the testimony of several of the most experienced Track Masters in this country.

Mr. JAMES R. HILLIARD, Track Master on the Erie Railway, (Union Division), who has had twenty-four years' experience as Master of Track-Repairs, after testing the screws makes the following report:

"When I first saw your Screw Spike I pronounced it just the article wanted, and since I have seen it in use I still hold the same opinion.

Mr. P. Featherly, Track Master on the New York Central Railroad, (Albany and Schenectady Division,) says, January 9th, 1866:—

"I put down your Screw Spikes sixteen months ago, on a section of our road where our heaviest work is done, viz., a steep grade on the main track, three miles from Albany, one-quarter of a mile above West Albany, and they are there to-day, firm and as secure as when first put down, while the adjacent track, fastened with common spikes, has been respiked several times during that time."

Mr. E. T. MARBLE, Track Master on the Albany and Saratoga Railroad, says:

"On examining the Screw Spikes put down by me September 16th, 1863, I find they have not started either upward or sideways, that they still hold the rail to the ties as securely as when first put down; while great numbers of common spikes are loose and out of place. And on examination I find the threads are bright and clean."

Mr. E. H. DE VERNE, Track Master on the Shore Line Railroad, writes:—

"Having examined and tested your Screw Spikes on our road, I feel satisfied that they are more durable, safer and more reliable than common spikes. By their use our Railroads would be perfectly safe so far as the track is concerned. Although it requires somewhat more time to drive them than it does the common spike, yet it is more than counterbalanced by their greater durability and safety, and saving of time in relaying rails. With practice and the use of proper tools, even that objection can be overcome."

Mr. A. F. SNYDER, Track Master, Albany, January, 1867, writes as follows:

"This is to certify that the screw Spikes put down on the bridge over the Hudson River at Albany, N. Y., by the U. S. R. R. Screw Spike Co., February, 1866, have done their work perfectly—holding the rails securely and firmly to the ties—not having started in the least, while the ordinary spikes, which were put down on the bridge at the same time, have, many of them, started up, and are quite loose and useless."

Mr. J. W. POTTER, Superintendent of the Cincinnati, Dayton, and Eastern Rail Road, says, January 9th, 1867:—

"The Screw Spikes manufactured by your Company have thus far given entire satisfaction, more than equaling our expectations. We have had them tested at our crossings for the past six months, and find them solid in the tie as the day they were put in. I consider them invaluable for crossings and bridges."

Swaged Wrought-Iron Rail Chairs

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

Massawippi Valley Railroad.

A meeting of the committees selected from the directors of the Connecticut and Passumpsic Rivers and Massawippi Valley Railroad Companies was recently held at Newport, Vt., at which certain documents relating to leasing the latter road, were submitted, and agreed to. They were afterwards submitted to a full board of the Passumpsic directors, and adopted. The main features of this agreement are, that the Massawippi corporation, through a contractor, engage to build the entire line from the Boundary to Lennoxville (including the spur,) by the 1st July, 1870 for a country subscription of $165,000, an equal amount to be furnished by parties South, $400,000 in bonds and 70,000 in stock, making a capital stock of 800,000 dols. The Passumpsic company as a corporation, lease the road for 999 years, agreeing to pay the same stock dividends as they do on their own road, to pay the interest on the bonds, and retire the bonds at maturity. The Passumpsic corporation, on the signing of the agreements are to have a majority of the board of directors of the Massawippi corporation.

The terms of agreement, a mere outline of which are here given, are considered fair and advantageous to both parties, If carried into execution, the Passumpsic Railroad will be extended to Lennoxville to a connection with the Grand Trunk, and the moment it is ready, it will be equipped with the rolling stock of the Passumpsic, and the subscribers to its stock will commence drawing dividends upon it from the day regular business commences upon it. Of course its stock and bonds will be just as valuable as those of the Passumpsic road. It is understood that the work of construction will be proceeded with this fall.

Baltimore and Potomac Railroad.

At a meeting of the President and Directors of this company, held in Baltimore on the 17th ult., a contract for building and equipping the projected railroad from Baltimore city to the Potomac River was made and signed, with the following conditions:

1st. The contractor agrees to complete the main line of the Baltimore and Potomac Railroad, from and south of the Annapolis and Elkridge Railroad, through the counties of Anne Arundel and Prince George's to the line of Charles county, and as much more of said main stem to the Potomac as may be practicable, by the first day of August, 1870, and failing to do so, then the said contractor to pay to the Baltimore and Potomac Railroad Company the sum of ten thousand dollars per month until the terms of said contract are complied with.

2d. The President and Directors of the Baltimore and Potomac Railroad Company to locate the depots and stations on said main line and branches.

3d. The Baltimore and Potomac Railroad Company shall retain ten per cent. of convertible and mortgaged bonds, amounting in the aggregate to $550,000, which amount shall be forfeited to the Baltimore and Potomac Railroad Company on the failure of the contractor to build and complete said road according to the terms of contract.

Virginia Central Railroad.

An important announcement is made by the authorities of the Virginia Central Railroad. It seems that the postponement of the vote on the proposed subscription by Augusta county has delayed the consolidation of the company into the Chesapeake and Ohio Company, but it is believed that this delay will not long continue. In the meantime the Central Railroad Company propose to complete the road from Covington to the White Sulphur Springs without delay, and now advertise for proposals to do the grading, under authority already granted by law.

South Carolina Railroad.

The earnings of this road for the years ending December 31, 1866 and 1867, were as follows:

	1866.	1867.
From passengers	$413,372 53	$355,599 92
" freight	877,416 79	940,549 26
" mails	20,349 20	18,947 36
" other sources	1,000 00	909 96
	$1,312,738 52	$1,316,006 50
Expenses, viz:		
Salaries, etc.	$15,919 28	$15,354 73
Transportation	387,866 73	359,817 56
Machinery	152,271 48	174,705 99
Roadway	123,399 46	152,351 06
	$679,456 95	$702,229 34
Earnings less expenses	$633,281 57	$613,777 16
From which deduct—		
Interest—sterling	$126,006 81	$114,305 64
" domestic	98,674 65	132,840 03
Damages	16,818 56	10,621 96
Stock killed	1,560 50	2,395 55
Sundries	2,289 39	.....
	$245,449 91	$260,163 18
Net income	$387,831 66	$353,613 98

Compared with the previous year, the gross earnings of 1867 show an increase of $3,267 98; with an increase in operating expenses of $22,772 39—making the decrease of net earnings, $19,504 41. The net income, after payment of interest, damages, etc., is $34,217 68 less.

The equipment of the road, December 31, 1866 and 1867, is thus compared:

	1866.	1867.
Locomotives—in order	31	35
" waiting repairs	16	8
Total	47	43
Passenger cars, 1st class	22	22
" 2d class	12	17
Box freight	263	263
Platform	79	76
Stock	1	4
Total	377	382
Number of miles run	304,122	609,871
Passengers carried	109,711	112,043
Tons moved	73,486	126,222

Showing an increase in mileage of 305,749, equal to 50.13 per cent.; in the number of passengers carried, 2,332; and in the tonnage movement, 52,736—while the increase in operating ex-

penses is equal to only 3.24 per cent. Locomotives condemned, 4; cars condemned, unfit for repairs, 57; do., built (new,) 62. The President in his report says:

The gross income of the year, though good, and under the circumstances to which we will presently refer, very satisfactory, is nevertheless considerably below the expectations of the Board at the commencement of the year. For a large increase of business over 1866, we felt warranted in calculating upon abundant crops, an easier money market, the completion of the Macon and Augusta Railroad, and a better system of Western connexions. With a single exception, none of these conditions of increased earnings have been realized. The crop though fair, has been sold at unremunerative prices, and was moved late to market, thus contributing to increase the ratio of expenses to earnings, not only by diminishing the means by which supplies in return could be purchased, but by requiring transportation at seasons when it could only be afforded by moving empty trains to interior points. The almost intolerable stringency of the money market, viewed in either aspect of cause or effect, and keeping pace with the movement of the year, needs no illustration here. Every individual's personal experience sufficiently attests it.

The Macon and Augusta Railroad, in which we have so large an interest, and which has cost and is costing us annually so heavy an outly for a subscription made six years since without any return so far, after the utmost efforts of its management, succeeded only in reaching Milledgeville very late in the year, and there for the present stops, thirty-five miles from its proposed terminus —comparatively useless to us. How reasonable our estimates of increased income from this source in particular were, and how very important this connexion is to the company, will readily appear from the following statement taken from the Central Railroad Report of the past year:

Amount of freight from Savannah to and through Macon	$536,000
Amount of freight to Savannah from Macon	677,000
Bales cotton 213,000. Freight money.	$1,213,000

With lines to Northern cities, hardly inferior, and a consequent ability to make at least as good time between all the important points thus made common, we cannot regard our expectation of receiving twenty-five per cent. of all the freight, passing to and through Macon, other than exceedingly moderate.

Potential as these causes have been in their influence upon our business, there is now little room to doubt that even in *spite* of them, a large increase of earnings would have been realized, but for the active opposition against which the management has had to contend at all important points.

This competition, always vigorous, occasionally bitter, could have but one result—greatly to reduce rates of transportation. Hence, whilst we see by our tables, that though our efforts to work back our old business have been successful, beyond reasonable expectation, the money gain has been inconsiderable. If the situation could have been reversed, and the increased tonnage moved been made to pay fair rates, it is hardly necessary to say a very different result would have been achieved.

Therefore, the Board feel justified in repeating the declaration with which they commenced this review—that under all the circumstances referred to, it is quite satisfactory to be able to report to you an amount of income even *in excess* of the previous year. This excess, apparently very small, should in reality be increased about $30,000, being about the sum of the credits introduced into the accounts of the year 1866, but justly creditable to 1865.

The operating expenses amount to $702,229 84, and are 53.36 per cent. of earnings. This proportion will be found not to exceed the usual percentage of important roads, even without regard to the circumstances tending to increase the expense of management, already referred to by the Board.

The net earnings of the year are stated at $613,777 16. As compared with gross earnings they exhibit the proportion of 46.64 per cent. As compared with the net earnings of the previous year, they show a falling off.

The explanation of this difference is at hand in what has been already stated in this report. It can be made still clearer by reference to the table exhibiting the mileage made by the locomotives of the company during the year. There it will be seen that the mileage of 1867, exceeds that of 1866 about one half or (in round numbers) about 300,000 miles. So great an increase of service could not be performed without a considerable increase of expense, though performed without a proportionate increase of compensation. The expense, however, is in no wise proportioned to the increase of service performed.

The wants of the road department for the year 1868, as was the case last year, are chiefly for rails, to the extent of 500 tons each for the three divisions of the road. The Board have recently entered into contracts for the delivery early of 680 tons; (100 tons are already received,) but fear that beyond this, considerations of prudence if not necessity, forbid them to go, unless indeed it should prove unsafe to continue in use the present rail. They are perfectly satisfied of the value of a good track, and of the worn condition of a large portion of the old road, which (it is quite true,) has for years been without proper renewal; but their means are limited to their earnings, and no further debt can be incurred, save under a most pressing necessity.

It is not only in this direction, however, that a liberal expenditure (if practicable) could be found judicious and profitable. An outlay for cars, equal in part to the wants of our connections in this State, just now unequal financially to meet the expense, would, we feel assured, powerfully aid us in controlling the direction of business near, and increasing that at a distance.

In part accounting for increase of bonds, will be found the items $95,000 and $30,000. These figures represent the company's subscription this year to the New York and Charleston, and Baltimore and Charleston Steamship Lines. The investment was made at cash cost of the ships, with our bonds at par. The operation, apart from other considerations, is regarded very favorably, for the original purchase of the ships was low. This, however, is really the least important view in which the subscription is to be regarded. Such have been the changes in the movements of produce and merchandise—so vast the increase of *through* over *local* freight—that, in very plain language, we could not have conducted the business of the company upon a scale of any magnitude without this or similar assistance.

In their last report, the Board took occasion to inform the stockholders that the foreign bondholders had accepted their proposals for a renewal of the 5 per cent. sterlings, due January 1st, 1866. Subsequently to that report a considerable number of the holders of that class of bonds, in this country, declined (not to extend,) but to part with the original guaranty, for reasons not necessary to be related here. Those holders, then and now, express the same willingness to accept the company's proposals, if the difficulties they connect with the exchange can be removed. That, so far, it has not been in our power to do, simply, because the "Act" authorizing the guaranty imperatively calls for the "old" when the "new" bond is issued. Up to the present time, therefore, the exchange has been principally confined to the English holders, (whose ready acceptance of the situation, commands our warmest thanks,) and amounts to £250,000, leaving unexchanged about £203,000.

The domestic bond debt then past due and not exchanged, amounted to $133,687. It has been reduced to $66,000.

On the 1st inst., of another class of domestic bonds (6 per cts.) $86,500 fell due. To the published invitation of the Board to exchange this issue upon the same terms, hitherto generally accepted, there has not yet been any considerable response. But it is hoped, that the same generous sentiments which have prevailed so largely in other instances, will not be wanting in this; and that notwithstanding the attractions which other employments of money hold out, the holders of our bonds will not forget that we are deriving no profit from our investment, and that, in view of the unhappy circumstances which surround us, will not impede or retard our efforts to build up, substantially and comprehensively, our old communication with the interior country, upon which every interest so greatly depends.

Influenced, perhaps somewhat too hastily, by their sanguine views of the future, but more by their conviction of duty, in the direction of making the earliest effort to meet the expectations of bondholders, the Board resumed the general payment of interest on January last. The domestic interest has been punctually met; and so would the foreign have been, but for circumstances beyond the possibility of control.

Early in the year, the sum of £7,000 was invested for account of the January, 1867, interest abroad, and again £4,000 in advance of the July interest. The bills in which these sums were invested, were those of the strongest and most undoubted character; but the Board have had notice, that in consequence of heavy misfortunes, the drawers of the exchange in question, have been unable to meet them at maturity.

Whilst the disappointment of the Board has been very great in this connexion, and of course, no little embarrassment occasioned them, they have not the slightest expectation that a single dollar will be lost. For such portions of the foreign interest, as were not embraced in the provision above referred to, the Board, from time to time, invested in advance in such securities, as promised most safety as well as stability. Such, however, has been the condition of the money market, that it was found impossible to realize, except at such sacrifice, as the Board regard not warranted under the circumstances. The reserve, however, which amounts to $107,000, it is intended to apply at the earliest practicable moment.

The Board in their last annual report, in referring to the subject of dividends, used the following language:

"The Board is not willing to close its annual report, without a word upon a subject which they have reason to believe has been regarded with great interest—the dividends. The statements abundantly show, that the income of the property has reached figures which unmistakably indicate a dividend earned. But the wants of the operative departments, indicate the necessity of a similar application of the earnings for another year. Should it be found practicable to dispense with any portion thereof, it will be equally the pleasure and duty of the Board, to distribute the same in dividends to the stockholders."

It has been already shown, that the net earnings of the year as anticipated, were needed, and have been applied to the heavy work, reported to have been executed during the year. The most, if not the whole of such work, indispensably necessary, may now be regarded completed; and the Board can now turn their attention to the floating debt, and the arrangement of the company's finances.

With an income as large *only* as that of the year just past, they can see no difficulty in greatly reducing, if not entirely extinguishing, the floating debt. That accomplished, and such an arrangement of the past due bonds realized as will enable the Board to act without embarrassment or apprehension, no reasonable difficulty would be in the way of commencing the payment of dividends, and to this end the earnest labors of the Board will be directed.

The results of the operations of the road for the year ending December 31, 1867, are as follows:

Gross income, as above	$1,316,006 50
Sales of old materials	15,066 18
" locomotives	15,420 00
Materials recovered from old stock and carried to supply of materials for general application	10,966 40
Decrease of commissary stores	1,080 22
Increase of balance of indebtedness	127,692 98
	$1,486,232 28
Current expenses, as above	$702,229 34
Sterling interest, payable in London	100,647 24
" " " Charleston	13,658 49
Domestic interest	132,840 03
Damage, etc.	13,017 51
Restoration of property	339,626 50
Cars built at company's shops	70,623 44
Land purchased	4,000 00
Permanent tools at Locomotive Works	10,250 00
Adjustment of claims prior to June 19, 1865	99,339 82
	$1,486,232 28

The debt and property accounts of the company at the close of the last and preceding years, were as follows:

	1866.	1867.
Capital stock	$5,819,275 00	$5,819,275 00
Sterling bonds	2,286,111 42	2,275,310 88
Domestic "	1,248,687 50	1,492,632 92
Certificates of indebtedness, receivables and change notes	19,571 00	27,980 00
Bills payable	269,273 96	317,186 10
Coupons, sterling	78,729 03	169,764 00
" domestic	79,917 50	59,712 50
Pay rolls	17,148 84	17,551 89
Transient creditors	170,559 38	66,605 86
Net income from June 19, 1865	549,109 98	938,430 64
	$10,538,383 61	$11,184,449 79
Roadway, track, depots, etc	$6,462,664 45	$6,472,914 45
Lands	428,879 43	432,879 43
Cars	220,630 21	253,803 65
Locomotives	418,313 18	393,893 18
Machinery, etc.	154,268 32	84,940 88
Supply of materials	103,865 86	106,213 39
Commissary stores	1,397 77	317 55
Invoices to arrive	17,619 06	
Restoration of property	704,318 35	1,043,944 85
Adjustm't of claims		99,339 82
Loss of property	1,316,018 84	1,456,741 91
Cash	124,199 48	89,533 95
Bonds and bills receivable	25,687 48	28,667 95
Post office depart	20,349 20	6,568 75
Agents	99,041 53	76,185 08
Railroad companies	20,344 35	20,344 35
Stocks of other Co.'s	279,262 50	404,062 50
Transient debtors	141,723 60	214,098 10
	$10,538,383 61	$11,184,449 79

The following is a statement of sterling bonds, to conform to the arrangement for renewing the same, and funding arrears of interest thereon:

Bonds payable in London Jan. 1, '66.		£374,500 00
Arrears of interest to July 1, 1866		78,412 10
Total London debt ($2,012,944 46)		£452,912 10
Bonds payable in Charleston, Jan. 1, 1866		£51,000 00
Interest to July 1, 1866	£10,462 12	
Coupons retired, 1867	2,431 05	
		8,031 07
Total Charleston debt ($262,366 42		£59,031 17
Total foreign and domestic ($2,275,310 88)		£511,943 17

The interest on the renewed debt is to be at the same rate as it was upon the original debt, viz., 5 per cent. per annum, payable semi-annually (January and July,) in London and Charleston as above indicated. Payments on account of the principal of the debt are to be made semi-annually, commencing January 1, 1871, in the manner following—2 per cent. semi-annually for five years, and 4 per cent. semi-annually for ten years. At this rate the sterling debt will be entirely extinguished by July 1, 1885.

The domestic funded debt as it stood on the 31st December, 1866 and 1867, compares as follows:

	1866.	1867.
Past due bonds & interest	$133,687	$65,966 25
7 p. ct. bonds due Jan.,'68	.....	1,333 33
6 p. ct. bonds due Jan.,'68	101.000	87,500 00
" " " Oct.,'68	86,000	86,000 00
7 p. ct. bonds due Jan.,'69	.....	1,333 34
" " " Apr.,'69	124,500	124,000 00
" " " '70	110,500	111,000 00
" " " '71	114,000	114,000 00
" " " Sept.,'71	.....	30,000 00
" " " Apr.,'72	114.000	214,500 00
6 p. ct. bonds due Jan.,'73	125.000	125,000 00
" " " '74	159,000	125,000 00
" " " Jul.,'74	.....	127,000 00
7 per ct. bonds due April, 1888-'91	180,500	280,000 00
Total domestic funded debt	$1,248,687	$1,492,632 92

President—W. J. MAGRATH.

Directors.—W. J. Magrath, Geo. A. Trenholm, L. D. De Saussure, John Hanckel, A. J. Simonds, Geo. W. Williams, Henry Gourdin, F. J. Pelzer, C. M. Furman, B. H. Rice, H. H. De Leon, James Rose, Alfred Huger, W. A. Courtenay, J. S. Gibbes.

Gen'l Superintendent.—H. T. PEAKE.

Auditor.—J. R. EMERY.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st July, inclusive, during the years 1867 and 1868, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1867	54,000	286,000	4,812,300	30,100
1868	115,900	4,993,000	7,313,900	326,500
Inc.	61,900	4,707,000	2,501,600	296,400

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase of 963,300 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of July, in the years indicated:

	1866.	1867.	1868.
Canal opened—	May 1.	May 6.	May 6.
Flour, bbls.	108,300	54,000	115,900
Wheat, bushels.	1,372,000	286,000	4,993,000
Corn, bushels	9,999,400	4,812,300	7,313,900
Barley, bushels.	105,300	30,100	326,500
Oats, bushels	3,679,900	1,551,100	3,956,600
Rye, bushels.	410,600	125,800	159,500
Malt, bushels	103,700	116,700	217,300
Beef, bbls.	100	.....	700
Pork, bbls.	7	523	104
Bacon, lbs.	.....	34,400	.....
Butter, lbs	39,600	19,400	2,700
Lard, lbs.	56,900	176,400	54,100
Cheese, lbs	126,600	97,800	272,900
Wool, lbs.	104,400	47,600	31,400

☞ Upwards of $262 000 have been subscribed to the capital stock of the Chartiers Valley Railroad.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States June 1, and August 1, 1868:

DEBT BEARING COIN INTEREST.

	June 1, 1868	August 1, 1868
Five per cent. bonds	$220,812,400 00	$221,588,400 00
Six per cent. bonds of 1867 and 1868	8,582,641 80	Matured.
Six per cent. bonds of 1881	283,677,200 00	283,677,300 00
Six per cent. Five-twenty bonds	1,494,755,600 00	1,583,106,100 00
Total	$2,007,827,841 80	$2,088,371,800 00

DEBT BEARING CURRENCY INTEREST.

Six per cent. Pacific R. R. bonds	$25,902,000 00	$32,210,000 00
Three-year compound interest notes	21,604,890 00	21,604,890 00
Three-year seven-thirty notes	105,610,650 00	Matured.
Three per cent. certificates	50,000,000 00	50,000,000 00
Navy pension 3 p. ct.	13,000,000 00	13,000,000 00
Total	$216,117,540 00	$84,604,890 00

MATURED DEBT NOT PRESENTED FOR PAYMENT.

Three years Seven-thirty notes, due Aug. 1, 1867, June and July 15, 1868	$947,500 00	$8,433,900 00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867, and May 15, 1868	8,012,360 00	6,013,910 00
Bonds of (Texas indemnity)	256,000 00	256,000 00
Treasury notes, (acts July 17, 1861, and prior thereto)	155,211 64	154,511 64
Bonds April 15, 1842, Jan. 28, 1847, and March 31, 1848	6,000 00	1,925,941 80
Treasury notes, March 3, 1863	555,492 00	555,492 00
Temporary loan	883,639 00	746,520 00
Certificates of indebtedness	18,000 00	13,000 00
Total	$10,834 202 64	$18,099,175 44

DEBT BEARING NO INTEREST.

United States notes	$356,144,212 00	$356,021,073 00
Fractional currency	32,531,589 94	31,867,818 37
Gold certificates of deposit	20,298,180 00	22,414,000 00
Total	$408,973,981 94	$410,302,891 37
Total debt	$2,643,753,566 38	$2 633,588,756 81

AMOUNT IN THE TREASURY.

Coin	$90,228,559 31	$83,409,917 93
Currency	43,279,120 33	26,644,358 21
Total	$133,507,679 64	$110,054,276 14
Debt less cash in the Treasury	$2,510,245,886 74	$2,523,534,480 67

By comparing this with the statement of June 1, it is shown that the debt bearing coin interest has increased $80,543,958 20; the debt bearing currency interest has decreased $131,512,650; the matured debt not presented for payment has increased $7,264,972 80; and the debt bearing no interest has increased $1,328,909 43—making the decrease in the total debt since June 1, 1868, $10,164,809 57. The amount of coin in the Treasury during the same period has decreased $6,818,641 38, and the amount of currency has decreased $16,634,762 12—leaving the amount of debt less cash in the Treasury August 1, $13,288,593 93 more than on June 1st.

☞ The Central Pacific Railroad is now built to Humboldt river, 250 miles east of Sacramento. The earnings for July were $260,000 in gold, the road being operated from 154 to 190 miles during the period.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterisk* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that book, in "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, August 15, 1868.

Stock Exchange and Money Market.

There has been rather more animation in the Money Market since our last. The Stock and Gold operators have been more urgent in their applications for aid. Their wants have been readily supplied, however, within a range of from 3 to 5 per ct., generally at 4 per cent. on call. The large dealers in the public funds have had more money placed under their control at 3 per cent., than they have been enabled to employ profitably. The demand from produce and merchandise houses has been on the increase, likewise; but the offerings of strictly prime to good business paper yet continue on a very moderate scale, and they find a prompt market at from 5@7, mostly 6@7 per cent. per annum. The city banks, in their last weekly return, exhibited a general increase in all the leading items, including $4,281,690 in the specie reserve, $3,611,625 in the deposits, $413,487 in the legal tender hoard, $444,129 in the loan averages, and $118,769 in circulation. The city bank clearances, last week, reached $587,004,381, against $449,184,198 the preceding week. Showing an increase of $137,870,183 in a week. The business of the U. S. Sub Treasury, last week, was quite heavy again, in both forms of receipts and disbursements. Included in its disbursements was the Alaska purchase money, two millions of which (in American gold coin, and gold-bars) were shipped to Europe, during the week. The mercantile exports of specie were light, having been less than $900,000. As compared with the cash reserve of the 4th inst., the Government office closes on a balance of coin and currency, about a million larger than was then reported. According to the public debt statement of August 1, the U. S. Treasury held a reserve of $83,409,915 in coin last Saturday week against $90,228,559 on June 1, 1868. Its currency reserve was $26,644,358 on the 1st inst., against $48,279,120 on the 1st of June, 1868. There were $356,021,078 of U. S. legal tender notes in circulation on the 1st inst., against $356,144,212 on the 1st inst of June 1868.

The specie reserve of the city banks is now $24,784,427, against $5,311,997 same time last year. The city bank deposits are now $231,716,492, against $198,408,705 week ending Aug. 10, 1867. The legal tender reserve amounts to $74,051,548, against $76,047,421 same time last year. The circulation now stands at $34,074,374, against $23,565,278 same time last year. The loans are now $279,755,786, against $253,427,240 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $97,834,064 a day, against a daily average of $74,855,699 the preceding week, and $81,195,000 the week ending with July 25, 1868. The current week's exchanges average about $84,350,000 a day. The city banks, last week, gained $4,281,690 of specie, $413,487 of legal tender, and $3,611,625 of deposits. They increased their loans, $444,129; and their circulation, $117,069.

The New York Gold Exchange Bank reports for the week ending Saturday, the 8th day of Aug., 1868. the average amount of loans and discounts as $1,057,751; average amount of specie, $911,701; average amount of deposits, $1,510,957.

The Philadelphia Bank movement the past week shows an increase in loans of $250,852; a decrease of $3,274 in specie; an increase in legal tenders of $390,331; a decrease of $84,380 in deposits; and a decrease of $895 in circulation. The Bank Clearings show an increase of $2,178,131, and the balances, an increase of $804,741.

The outstanding amount of coin certificates on the 1st of Aug., was $22,414,000, against $20,298,180 on the 1st of June, 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $7,218,000, and retired $2,385,378 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during July, reached $8,939,060.

The U. S. Sub-Treasury receipts, week ending with Aug. 10, were $32,072,836, including $2,493,373 from customs duties; payments, $35,125,667, including $414,000 of coin interest; balance at the close of the week, $78,988,272, against $82,041,604, at the close of the preceding week, showing a decrease of $3,053,331. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $6,713,874 including $336,266 from customs; and payments, $6,676,263; on Tuesday, receipts, $1,580,823 including $561,000 from customs, and

payments, $1,137,821. The balance at the close of business on Tuesday stood at $79,418,886, against $78,421,279, a week previous; and $82,-904,000, on July 29, 1868. The aggregate receipts of the office from all sources in July, were $94,-561,982; aggregate payments, $103,554,458. The balance on the 1st inst., was about nine millions below that on the 1st ult., which amounted to $89,125,661.

National Bank notes to the amount of $75,210 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,181,826, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,248,548, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,982,778. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,623,-300; and for the public deposits, $38,037,950—making a total of $379,661,250. The Treasury Department last week redeemed and destroyed $441,100 of worn and mutilated fractional currency, and issued $634,186 of new. The outstanding amount of fractional currency on the 1st of August was $31,867,818, against $32,581,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Moderate receipts from excises and customs have been reported by the Government offices since our last. The customs are yielding more liberally, as the preparations for the fall trade progress. The excises, last week, yielded some 2½ millions; customs at the port of New York, $2,493,373, and at the outports about $820,000 (in coin) more, making the grand total income for the week equal to about $7,329,500 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $16,000,000.

Gold has been quite variable all through the week, on an excited market. The opening dealings were of the most confident nature, carrying the price up to 150⅛@150¼ as against 148¼ as the highest figures of the preceding week. Subsequently, the speculative element found the offering for gold for immediate delivery, chiefly from private sources, more liberal than they had calculated on, stimulated, in part, by the rapid rise in the premium, and the disposition to purchase experienced a decided check. The abundance of sterling exchange at reduced rates, and the consequent activity in it, together with the unexpectedly favorable exhibit of the public indebtedness, especially as regards the specie reserve of the Treasury Department, combined to depress the Gold movement, and the later transactions were at a notable decline, running at one time on Tuesday, as low as 145½@145⅝. The closing quotations on Wednesday were 146¾@146⅞, the range of that day having been from 146⅛@146⅞. According to the last national statement, for Aug. 1, it appears that on Saturday week the Treasury held about $83,500,000 in gold of which $61,000,000 was the ownership, and that after allowing for the Alaska debt, the latter sum would only be reduced to $54,000,000, without counting the customs thus far in August, which at all the ports, up to Saturday last, amounted to about $4,000,000. Allowing for further small Gold payments upon the overdue Principal and for July Coupons presented in August, the Government is to-day in the ownership of $56,000,000, and holds altogether over 80 millions in gold. The city banks, last week, added over 4¼ millions to their reserve of specie. The mercantile exports of specie, last week, were considerably under a million; thus far, this week, they have been only $359,000 all on Tuesday.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $4,413,262, against $1,289,396 same time last year. The customs demand for Gold last week, averaged $415,563 a day; thus far, this week, it has been equal to $448,-650 a day, or equal to a weekly aggregate of $2,691,900. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $199,006 and from California, $806,351. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $69,019,966, against $73,965,915 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $26,363,-828, against $17,823,182, in 1867, showing an increase thus far in 1868, of $8,540,646. The exports of specie, from this port, last week, were $2,896,-532, against $413,382 same week last year; total, since Jan. 1, 1868, $62,584,689, against $38,-674,712 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $414,000; since Jan. 1, 1868, $59,479,580, against $39,331,199 The specie exports from San Francisco, from Jan. 1, to July 23, 1868, were $22,-384,285, against $24,994,670 same time last year.

Government received $4,854,786 from customs at the port of San Francisco, from Jan. 1, to July 28, against $4,184,000 same time in the preceding year.

An unusually liberal supply of bills of exchange has been available, since our last, particularly in the form of drafts against exports of U.S. Securities, and under the pressure of these bills on the market, rates have declined sharply, leading to a more active business. Bankers' prime sixty day bills on London closed on Wednesday at 109@109½, and on Paris to 5.21¼c.@5.16¼; sight bills on London to 109⅜@109⅞, and on Paris to 5.15c.@5.13¾. The offering of produce bills has been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,209,312, against $3,928,544 same week last year; total, since Jan., 1, 1868, $102,288,892 against $116,463,388 in 1867; and grand total, during the fiscal year ending July 1, 1868, $179,-784,280, against $195,544,905 in 1866–'67.

Government securities have been in fair though not active demand, all through the week. Prices have been generally well maintained, and toward the close, the market exhibited rather more buoyancy, on quite moderate offerings of interest bearing obligations. According to the last debt statement, August 1st, the coin bearing debt has been increased some 67⅛ millions, since June 1, whilst the currency interest portion of the debt has been reduced nearly 86½ millions. During the past two months a trifle over 105½ millions of Seven-thirties were retired, either by conversion or direct purchase, leaving outstanding on the 1st inst., only about 8½ millions out of the grand aggregate of 830 millions of these notes originally issued, mainly through the Loan Agency of Mr. Jay Cooke. Thus was nearly all of this gigantic popular loan provided for, almost all before its full maturity, without a perceptible disturbance of the money markets of the country. All this work was accomplished under Secretary McCulloch's administration of the National finances. To the outstanding volume of 5-20 bonds, $88,350,500 were added in June and July, leaving the aggregate on Aug. 1, $1,583,106,100, against $1,494,755,600 on June 1, 1868. The outstanding Five per cents were increased about ¾ths of a million. The total of the coin bearing debt on the 1st inst., was $2,088,871,800, against $2,007,827,842 on the 1st of June. Some 6½ millions of 6 per cent. currency bonds were issued during June and July, in aid of the several Pacific Railroad enterprises, chiefly to the Union, and the Central Pacific Railroads. About 6½ millions of matured 1867 and 1868 bonds were redeemed in the same period. The total of the currency bearing portion of the debt on the 1st inst., was $84,-604,890, against $216,117,540 on the 1st of June. The Navy Pension fund, heretofore classed as coin bearing, has been transferred to the currency bearing table.

U. S. sixes of 1881 closed here on Wednesday at 115¾@116; U. S. Five-twenties of 1862, 114¾@114⅞; U.S. Five twenties of 1864 at 110⅞@111⅛; U. S. Five-twenties of 1865 at 112⅜@112⅝; U. S. Five-twenties of 1865, consolidated, 109¼@109⅜; U. S. Five-twenties of 1867, 109¼@109⅜; U. S. Five-twenties of 1868, 109⅜@109½; U.S. Ten-forties at 109⅜@109⅝. U.S. Six per cent. currency bonds, 102⅝@102⅞. The brokers are buying the outstanding compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

September, 1865..118½ | October, 1865....118

The latest quotations at the London Stock Exchange compare as follows with former returns:

	July 29.	Aug. 5.	Aug. 12.
Consols	94½	94⅜	93⅞
U.S. 5-20's of 1862	72⅛	71½	72
Erie	43¾	37¼	36¾
Ill. Central	94⅝	92⅝	92½

The railway and miscellaneous share speculation has been much less spirited, on either *bull* or *bear* side, since our last, and the market has been devoid of firmness or buoyancy. Tuesday's dealings indicated much hesitancy and depression, Wednesday's operations were on a more confident basis, the market closing buoyantly.

A less active produce trade has been reported, since our last, though prices of breadstuffs, provisions, petroleum, and cotton have generally favored buyers. Middling upland cotton closed tamely on Wednesday at 29@29½ cents per lb. The stock of cotton now here is estimated at about 42,500 bales. The receipts at the port this week, have averaged only about 150 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,189,500 bales, against 1,871,000 bales same time last year; exports, same time 1,876,000

bales, against 1,555,000 bales same time last year; stock on hand at latest dates, 60,000 bales, against 115,000 bales same date last year. At the Live Stock market, this week, Beeves have been in good supply and limited demand at from 10@16¾c. per lb.; week's receipts, 6,654. Veal calves continue in fair request, but quoted heavy at from 7@11½c. per lb.; receipts, 1,628. Sheep and lambs have been in less demand ranging from 4@7c., and 7½@8½, respectively, per lb.; receipts, 30,440. Swine have been more sought after and firmer, at from 10½@11¼c. per lb., all live weight; receipts, 11,851. The merchandise markets have been comparatively tame and devoid of buoyancy. There has been only a restricted movement in dry goods, yet holders of desirable fabrics have been firm in their views. The total imports of foreign dry goods, last week, were $2,534,163, and the total amount marketed $2,227 084. The value of foreign merchandise imported last week, was $3,511,930—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $6,046,093, against $5,977,654 same week last year; from Jan. 1, 1868, $151,219,627, against $155,865,760 same time in 1867; and year ending July 1, 1868, $288,283,518, against $269 881,007 in 1866-'67. The freight market has been less active, closing heavily. For Liverpool we quote flour at 1s. 4½d. @1s. 6d. by sail, and 1s. 7½d.@1s. 9d. by steamer, per bbl.; grain at 4@4½d. by sail, and 5@5½d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{16}$d. by sail, and $\frac{3}{16}$d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 464.

The New York exports, exclusive of specie, for the week ending Aug. 11, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$3,928,544	$3,209.312
Prev. reported.....	112,534,844	99,079,580
Since January 1.....	$116.463,388	$102 288,892

The imports for the week ending August 8, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$2.933,148	$2,534,163
Gen. merchandise.....	3,044,506	3,511,930
Total for the week.....	$5,977,654	$6,046,093
Previously reported....	149,888 106	155,173,534
Since January 1.....	$155,865,760	$151,219,627

The balance in the Sub-Treasury on Wednesday was $80,716,242 07.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns —

Rockford, Rock Island and St. Louis R. R.

First mortgage, 50 years, 7 per cent. Convertible Sinking Fund, Bonds of the Rockford, Rock Island and St. Louis Railroad Company, principal and interest payable in Gold, free of Government tax.

For sale at 95 and accrued interest in currency, at the office of the Company, 12 Wall st.

Governments and other securities received in exchange.

H. H. BOODY,
Treasurer.

Novelty Iron Works.

These works are situated at the foot of 12th street, East River, N. Y. It will be seen by reference to their advertisements in another column, that they manufacture Iron Piers and Bridges, and all kinds of Architectural Iron Work. Also, Steam Engines, Machinery, Iron Steamers and Vessels, Turbine Water Wheels, Crane Engines, Moveable Cranes, Cocks, Valves, Whistles, Gauges, Saw Mills, Sugar Mills, Leather Belting, etc., etc., etc. Gear and Wheel Book furnished on application.

☞ It is said the "jar" caused by the frequent passage to and fro of the heavy engines and trains on the underground railroads in London is gradually but surely loosening and making unsound the foundations of the superstructures in the vicinity.

Railroad Earnings.—Weekly.

The earnings of the Michigan Central Railroad for the 1st week in Aug., 1868, were..$75,025 09
Corresponding week of previous year.. 68,342 65

Decrease $6,682 44

The earnings of the Chicago and Northwestern Railroad for the 1st week in Aug.,1868.$240,574 27
Corresponding week previous year .. 190,170 56

Increase $50,403 71

The earnings of the Western Union Railroad for the 1st week in Aug., 1868.....$11,192 79
Corresponding week previous year.... 11,671 92

Decrease $479 13

The earnings of the Chicago and Alton Railroad for the 1st week in Aug., 1868..$108,000 00
Corresponding period previous year . 84,726 00

Increase $23,275 00

The earnings of the Chicago and Rock Island Railroad for the first week in Aug., 1868, were.....$95,500 00

Increase..... $388 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week in Aug., 1868, were..... $82,431 00
Corresponding week of 1867..... 82,810 00

Decrease $379 00

The Red River Route.

Report on the Line of Route between Lake Superior and the Red River settlement.—By S. J. Dawson, Esq., Civil Engineer.

RAILROADS.

It has been urged that a railroad from Lake Superior to Red River would afford the best and easiest means of communication, and that it would form a link in the great railway system which it is believed will, at no distant day, span the continent from the Atlantic to the Pacific within British territory.

Now, while admitting the great advantages which would result from a work of this kind, it must be borne in mind that the means for its construction cannot at present be obtained. There is no amount of argument as to prospective advantages which could procure the investment of twenty millions of dollars, which would be about its cost in an undeveloped region, such as that through which it would pass. Theoretically, the idea may be a good one, but practically it is at least premature.

Moreover, a railroad between the points indicated would be isolated as regards other railways, and being available only during the season of navigation would be without one of the chief advantages of a railroad, which is that it can be kept in operation independently of the navigation.

It has been suggested that whatever objections might attach to the project of a railway all the way to Red River, a comparatively short line would best overcome the rough and difficult section intervening between Lake Superior and Rainy Lake. But the same objections which present themselves in regard to the former apply to the latter.

Its length, that is of a line from Lake Superior to Rainy Lake, allowing for deviations, would not be greatly less than two hundred miles, and its cost would far exceed any means which there is a probability of obtaining.

It would absorb an amount of capital more than sufficient to provide for the lockage required to connect the navigable reaches between Dog Lake and Lake Winnipeg, and form a canal, which, in the present state of the country, or any state of development to which it can attain for a considerable period would be of greater utility than a railroad.

Finally, before such a work was undertaken the country would have to be rendered accessible, as I have already said, by some such means of communication as I have suggested.

It will not be understood, however, from what I have said that a railway is impracticable. In fact, with the exception of the section between Lake Superior and Rainy Lake, which is rough and broken and has never yet been explored with a view to a work of the kind, the ground is not unfavorable, but, as I have said, the idea of such a work is premature.

CANALS.

On reference to what I have already stated, it will be seen that from Dog Lake north-westward to the Lake of the Woods long, navigable reaches occur in continuous succession, separated by short intervals of rapid water or other impediments. From the Height of Land Portage, where it strikes the Savane River, to the north-west angle of the Lake of the Woods, the distance is 304 miles, and the total amount of lockage that would be required 425 feet, being somewhat less than that of the Rideau Canal. By means of lock and dam, the whole of this distance might be rendered navigable without a break, at comparatively small cost, if wooden locks were adopted. The river channels between the navigable sections are everywhere of rock and generally favorable for the construction of such works as would be required.

With this extent of navigation might be connected the navigable water east of the Height of Land, having a length in Dog Lake and River of 35 miles.

When the dam now in progress at Dog Lake is completed, the difference in level between the waters of Dog River and the Savane will be about a hundred feet, and a canal with locks, by way of Muskaig Lake, might be constructed to connect the two. Lac des Mille Lacs would be the summit level, and it has sufficient water for a canal both ways,

This would give three hundred and fifty miles of unbroken navigation, approaching at its eastern extremity to within twenty-five miles of Lake Superior, and at its western to within ninety miles of Fort Garry.

All the lockage required would cost less than would a railroad of two hundred miles to Rainy Lake, and it would be of vastly greater utility.

A short railway of twenty-five miles, from Dog Lake to Thunder Bay, would connect the navigation with Lake Superior; while a similar work of ninety miles, from Fort Garry to the North-West angle of the Lake of the Woods, would join it to the Red River settlement. The latter railway would be over very even ground.

I have offered these suggestions, not with a view of conveying the impression that they should be immediately acted upon, but to show what is practicable and what would be the true way of opening a line adapted for heavy traffic when the country has attained a stage of development to warrant the expenditure which it would involve.

THE INDIAN ELEMENT.

In opening the communication to Red River, the country will be brought to some extent into contact with the Indians, who have their hunting grounds on the line of route.

Hitherto Canada has been fortunate in dealing with the Indian element; and, in the present case, I see no reason for anticipating greater difficulty than has arisen in the past.

The only localties where the Indians are at all numerous are at the Lake of the Woods and Rainy River, but the entire population does not greatly exceed three thousand. They can, however, collect in summer in larger numbers than Indians usually do from the fact that they have abundance of food. This is afforded by the wild rice of the country, which they collect, and by the fish which literally swarm in the lakes and rivers; some industry practised on their own part, too, in raising Indian corn serves to supply them to a small extent. I have seen as many as five or six hundred of them collected at one time at the rapids on Rainy River, engaged in catching sturgeon, the flesh of which they preserve by drying it like pemican and then pounding it up and putting it, with a due mixture of oil, into bags made of sturgeon's skin.

They have a rude sort of government, and the regulations made by their chiefs are observed, it is said, better than laws usually are where there are no great means of enforcing them.

They are very intelligent and are extremely jealous as to their right of soil and authority over the country which they occupy.

When the Red River expedition first came in contact with them they manifested some displeasure, and were not slow to express it, at parties being sent through their country to explore and examine it without their consent being asked and obtained. On becoming better acquainted with them, we found it to our advantage to keep up a little friendly intercourse with the chiefs, calling upon them as we passed and interchanging a few presents of no great value. When we had adopted this course all difficulties vanished and, ere the explorations were brought to a close, they manifested and expressed an earnest wish to see the communication opened.

The chief danger which could arise of coming into unfriendly relations with the Indians would be from having parties of workmen in the vicinity of their encampments. Now this is a contingency not likely to arise from the fact that where the Indians are numerous the navigation is unimpeded and but little work required; but, as a rule, extreme prudence will always have to be observed by the officers in charge of men to keep them from coming in contact with the Indians.

These Indians are all heathens, and never seem to have been in the slightest degree impressed by the missionaries who have attempted their conversion. They are, however, very pious in their own way, and much of their time seems to be occupied in religious observances, which have their manifestation in long fasts and nights of watching, when they pretend to hold familiar intercourse with spirits, whose presence in the secret recesses of their lodges is indicated by drum beating, chanting, incantations, and many unearthly noises besides. At stated intervals, the greatest and most solemn ceremony of the tribe, the mystical feast of the white dog, is held at Fort Frances, and at such times, the gravity and terrible earnestness of their demeanor would do no discredit to more civilised congregations.

In appearance these Indians are tall and well formed, and in bearing independent and sometimes even a little saucy, but in their intercourse with strangers they are hospitable and kind. Their morality is said to be of a high order as compared to that of the Indians of the Plains.

They are, in general, keen traders, and seem to know the value of what they get and give as well as any people in the world. Some of those who assemble at Rainy River for the sturgeon fishing in summer come from Red Lake, in the neighboring state of Minnesota, where they possess hunting grounds; and among these latter are some who have been parties to treaties with the United States for relinquishing certain tracts for settlement, for which they are now in receipt of annual payments. The experience they have thus gained has rendered them expert diplomatists as compared to Indians who have never had such advantages, and they have not failed to impress on

their kindred and tribe on Rainy River the value of the lands which they hold on the line of route to Red River.

Any one who, in negotiating with these Indians, should suppose he had mere children to deal with, would find himself mistaken. In their manner of expressing themselves, indeed, they make a great deal of allegory, and their illustrations may at times appear childish enough, but in their actual dealings they are shrewd and sufficiently awake to their own interests, and, if the matter should be one of importance, affecting the general interests of the tribe, they neither reply to a proposition nor make one themselves until it is fully discussed and deliberated upon in council of all the chiefs.

THE TREATY.

From what I have said, I trust that it will be seen that some sort of a treaty should be arrived at with the Indians. They are, as I have stated, desirous of seeing the communication opened, believing that it will conduce to their advantage, and I think a treaty with them should, in the first instance be confined to this one point, namely, right of way. This they expressed their willingness to accord many years ago, but the question of relinquishing land for settlement was always taken by them *en delibre*. In this latter respect, what they are afraid of is that settlers would interfere with the fisheries, from which they derive their chief means of subsistence, and I think it would in the first instance, be imprudent to introduce settlement into the particular settlement which they occupy. The first great point is to get the communication opened, and the first treaty should be confined, as I have said, simply to right of way. By combining it with the land question, surveys of townships for settlement, reserves for the Indians, and so forth, complications might arise which would prove embarrassing.

AGRICULTURAL RESOURCES.—LAKE SUPERIOR SECTION.

In this section the cultivable areas are of limited extent and confined chiefly to the valleys of the streams. There are, however, occasional plateaux at a considerable elevation, showing a moderate depth of loam. In the vicinity of the line of route the best locations will be found in the valley of the Kaministiquia and on the shores of Thunder Bay. The climate of the country bordering on the lake shore is favorable to the growth of cereals and all kinds of vegetables which are usually raised in other parts of Canada. When the mines at Thunder Bay, and on the north shore of Lake Superior generally, become developed they will create a market for all kinds of agricultural produce, and this must render of great value such lands as are susceptible of cultivation.

Around the shores of Dog Lake there are occasional patches of fair land, but the elevation of the country is such as to render the climate rather cold. On Dog River and at the plateaux at the Height of Land there is any amount of pasturage, and oats, potatoes, &c., might easily be raised.

THE LAKE REGION.

The eastern section of this region is cold, on account of its great elevation, but on descending to the westward the climate rapidly improves and, by the time Sturgeon Lake is reached, the summers are as long as at Lake Superior and I think somewhat warmer.

Eastward of Sturgeon Lake the rock formation is Laurentian and, as usual in regions occupied by that series, the cultivable areas are limited in extent, although where they do occur the soil is often very rich. It is such a country as that now being settled on the Gatineau or Upper Ottawa, with this difference, that whereas on the Gatineau and Ottawa the valleys present rivers bordered with alluvial soil, the valleys in this region are occupied by lakes. There are, nevertheless, occasional spots occurring at intervals throughout the whole region where the soil is good and of sufficient extent for farms, but, as a rule, speaking generally, the country never can become an agricultural district.

There are those, however, who would prefer a mountainous and diversified region of this kind to the level areas which are spread out like oceans a little further to the west. Among the Laurentian hills and on the borders of lakes studded with wooded islands there are situations of surpassing beauty and magnificence. The forests abound in game and the rivers and lakes are teeming with fish, water power is unlimited, and timber, which will yet find a market in the prairies of the west, is abundant.

A farmer who should establish himself on any of the carrying places with horses and wagons would soon realise an independence, as many have done in similar situations on the Ottawa. The first to locate themselves would have the advantage, and might hope soon to see villages growing up around them. No more advantageous situations could be desired than Jourdan's Rapids, the Prairie Portage, where there is an abundance of grass, or the French or Deux Rivieres Portages, all of which, until a canal is made, must be places of land carriage and transhipment. Here, then, in the event of the communication being opened, would be a field for enterprise to steady and industrious farmers, who could combine the cultivation of the land with the profitable employment of carrying freight over the portages.

In such situations, too, the growing wants of a new settlement would soon create a demand for various branches of industry. Boat builders, blacksmiths, and carpenters would find ready employment where small crafts had to be provided for such a length of inland navigation, and saw mills would be required to supply them with material.

But to proceed, in regard to the capacity of the country for agriculture, on getting to Sturgeon Lake the climate is improved, but the ground is still rough and broken, as it is also at Nequaquon and Nameukan Lakes. Rainy Lake is so much indented with bays that in passing through it, only headlands and islands can be seen, and these are often rocky, but I have heard it reported by the Indians that there are areas of very fine land about Rainy Lake.

LAKE OF THE WOODS AND FORT GARRY SECTION.

Arrived at Fort Frances, 190 miles in an air line from Thunder Bay, the mountainous region is passed and, commencing here, a beautiful tract of land extends along the bank of Rainy River to the Lake of the Woods. This tract is of the very richest alluvial soil, and in the whole distance there is not apparently an acre unsusceptible of cultivation. Old Indian gardens, growing vetches, and wild grass are met with at intervals on the banks, and the forests present basswood, oak, and elm, with occasional white pines of gigantic proportions.

To this succeeds the Lake of the Woods, with fifty miles of navigation among islands varying in character, some fertile and others barren, but on some of which the Indians have grown maize from time immemorial. The section which comes next, that between the north west angle and the prairie, as already described, is swampy. There are, nevertheless, occasional portions of it well adapted for settlement.

The wooded region ends with the section just referred to, and from this point westward to the Rocky Mountains and north-westward to Peace River the prevailing characteristic is prairie. These prairies are for the most part of rich alluvial loam, but they are in some places sandy, as on the upper portion of the south branch of the Saskatchewan. So vast is the region, and the soil throughout the greater part of its extent so good, that it is no exaggeration to say the cultivable areas may be reckoned by hundreds of millions of acres.

The country is intersected by rivers, one of which, the Saskatchewan, drains an area greater than does the St. Lawrence and is navigable for 700 miles of its course. From the south branch of this great river, north-west to Peace River, the climate is adapted to the growth of wheat. Coal, salt, iron, gold, and bitumen are among the minerals to be found. Over the untilled fields which nature has spread out, the wild cattle of the plains roam in countless herds, and for hundreds of miles together may be seen grazing like domestic cattle in a field of pasture. A region which thus in a state of nature supports animal life in profusion must be naturally rich as regards its soil and climate. It is, in fact, fitted to sustain as dense an agricultural population as any area of equal extent on the face of the globe.

Such, in a brief view, is the country with which it is proposed to open communication, but to describe it further would be beyond the scope of this report.

Journal of Railroad Law.

WHEN COUPONS OF RAILROAD BONDS DRAW INTEREST.

The facts in the late case of the North Pennsylvania Railroad Company *vs.* Adams (54 Penn. St. R. 94,) were as follows: In 1866, Adams brought an action against the North Penn. R. R. Co. to recover the amount of 11 coupons of $30 each payable respectively Jan. 1st and July 1, 1861, and Jan. 1, 1862. The coupons read in the usual way. Copies were filed with the affidavit of Adams, that at the time the coupons fell due the company was unable to pay them; that he believed they were presented to the company's office for payment, but if not, it was because they had refused to pay other coupons of the same date, that the company paid one-sixth of the face of the coupons due Jan. 1st, but no more. The company also, by an affidavit by their president, denied any knowledge of the presentation of the coupons for payment, except those on which a payment of one-sixth had been made; that after this payment the coupons sued on were presented and the amount due on their face was offered to Adams, who refused to accept it, unless interest from the maturity of the coupons was also paid. Judgment was rendered in favor of Adams in the court below, and the company took a writ of error.

The opinion of the court was delivered by Agnew, J.—The affidavit of defence in this case avers no possession of funds, and readiness to pay the coupons at the time and place they were payable. The objection to the payment of interest is rested solely on the ground of non-presentation when due at the place appointed. But payment tender, and readiness to pay are all affirmative pleas, casting the burden of proof upon the defendant. It has been decided, therefore in this State and elsewhere, that presentation and demand at the place of payment are unnecessary to entitle the plaintiff to recover, where the defendant has shown no readiness on his part to pay at the place.

That coupons bear interest is decided in the County of Beaver *vs.* Armstrong, 8 Wright, 63. In the opinion of Justice Read the language used is, after demand and refusal, indicating the time of the running of interest to be from presentation. But the fact in that case was that interest was recovered from the time the coupons fell due. The 4th assignment in error shows this. The coupons never were presented in New York for payment, the company having provided no funds to meet the interest on their bonds. There being no readiness to pay averred in this case, the court below was right in allowing interest from the time

the coupons fell due. The case of Emlen *vs.* Lehigh Coal and Nav. Co., 11 Wright 76, was decided on the ground that the company had in bank, as found by the special verdict, cash to their credit sufficient to pay the loan to plaintiff, principal and interest and all other debts of the company. There was no question as to the readiness or ability of the company to pay.

Illinois Central Railroad.

The statement of this Company for the month ending July 31, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	10,607.90 for	$104,751 98
Acres Int. Fund Lands sold	40.00 for	585 20
Acres Free Lands sold	2,259.29 for	30,987 83
Total sales during month of July, 1868	12,907.19 for	$136,325 01
To which add Town Lot Sales		968 00
Total of all	12,907.19 for	$137,293 01
Cash collected in July		$169,120 90

TRAFFIC DEPARTMENT.

Receipts from Freight		$306,045 00
do. Passengers		122,752 79
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		70,000 00
Total Receipts in July, 1868		$509,156 12
Total Receipts in July, 1867		$497,520 81
Estimated earnings in the month of July, on the D. & S. C. R. R., not included above		$67,301 58

Union Pacific Railroad.

The Commissioners of the Union Pacific Railroad have examined the twenty-fourth section of twenty miles of that road, commencing at the six hundred and eightieth and terminating at the seven hundredth mile post west from the initial point on the Missouri River, near Omaha Nebraska, and have forwarded their report to the Interior Department. The President of the United States has approved the report and directed the issue to the company of the bonds, and patents for the land due on the completion of said section.

☞ The directors of the Worcester and Somerset Railroad Company will receive proposals up to the first day of September, for the construction of this road from King's Creek, on the line of the Eastern Shore Railroad, distance 8½ miles from Newtown. The sum of $5 500 per mile to be paid in cash, the balance to be secured by the bonds of the company, bearing interest at six per cent.

☞ General Burnside, Colonel Davidson and Mr. Matthews, the Board of Engineers appointed by the Superior Court to locate the Shore Line Railway Bridge at Saybrook, Ct., and prepare plans for its construction, have designated the place for the bridge and located the abutments and centre piers. The central piers are located so as to provide for a draw 120 feet wide, and the distance between the other piers is to be 200 feet.

☞ The Manassas Gap Railroad is nearly completed to Mount Jackson, and trains will commence running to that point on the 15th. The distance between Woodstock, the present terminus of the road, and Mount Jackson is eleven miles.

7-30 Notes.

It appears from the books of the Treasury Department that there are outstanding of the various issue of 7 30 notes the following amounts. The time for their conversion into 5 20s having expired they are therefore payable in currency: First issue, August 1864, $614,200. The time for conversion of this issue expired one year ago. Second issue, of June 1865, $2,327,850. The time for conversion of this issue expired July 1. Third issue, of July 1865, $4,863,800. The time for the conversion of which expired August 1. The total amount outstanding is $7,805,950.

Interest on Registered Bonds.

The Secretary of the Treasury has issued instructions concerning the payment of the interest on registered bonds. All parties entitled to receive interest on such bonds must, within ninety days from the date when such interest is due, collect it of the assistant treasurer or depositary whose duty it is to pay the same. After ninety days their claims will be referred to the treasury for settlement.

☞ The Deed of Trust of the Connellsville Railroad Company, for $4,000,000, in accordance with the ordinance of waiver of priority by the City of Baltimore, has been executed by the Trustees, Messrs. B. F. Newcomer, John W. Garrett, and Wm. T. Walters, and the mortgage bonds issued thereunder will be ready for delivery by the President of the company, Wm. O. Hughart, Esq., during the coming week.

☞ The work of grading for the extension of the South Side (L. I.) Railroad between Sayvill and Patchogue has been commenced, and it is thought that the road will be completed to the latter point before winter sets in.

☞ The surveys for the extension of the New Bedford and Taunton Railroad from the latter place to Hebronville, will soon commence. The road will shorten the distance from Boston to Providence ten miles.

☞ The rails on the Troy and Greenfield Railroad are laid to the Tunnel station, within half or three-quarters of a mile of the tunnel.

☞ The railroad from St. Joseph to Council Bluff was completed, and the trains commenced running on the 11th inst.

CAR PLUSHES.

Best French and German makes.

THE
NOVELTY IRON WORKS,
NEW YORK,
Manufacture
Iron Piers and Bridges,
and all kinds of
ARCHITECTURAL IRON WORK.

Notice to Contractors.

PROPOSALS will be received for Grading and Bridging the third (3d) Division of the Junction and Breakwater Railroad, from Georgetown, Delaware, to the Bay Shore at Lewes, 15½ miles, until the 22d day of August, 1868. For specifications, plans, &c., &c., call on Hon. JOHN W. HOUSTON, Prest., at Milford, Delaware, or M. C. CONWELL, Engr., at Georgetown, Delaware.
Aug. 3, 1868. JOHN W. HOUSTON, Prest.

Mathematical Instruments
OF BEST SWISS, FRENCH & AMERICAN MANUFACTURE.
T. H McALLISTER,
49 Nassau street, N. Y.

Godeffroy Brancker & Co.
42 Exchange Place, New York,
are prepared, as Sole Agents in the United States for the Prussian Mining and Iron Co., of Duisburg, Westphalia, to contract or sell in quantities to suit purchasers (delivered in either New York or Philadelphia) the celebrated
V. H. SPIEGELEISEN
used so extensively for the manufacturing of
Bessemer Steel.
This iron is free from Sulphur and Phosphorous, and contains a heavy percentage of Manganese. The above are also ready to contract for, or sell to arrive,
STEEL RAILS
Manufactured by
G. ARNDT & CO.,
of Dortmund, for which latter firm they also have the Sole Agency in the United States.
For particulars, samples, prices, or chemical analysis will be promptly forwarded on application. 3m32

Post-Office Box 4781, New York City.

SPECIFICATIONS
FOR
PROPOSALS.

OFFICE NEW ORLEANS, OPELOUSAS AND GREAT WESTERN RAILROAD COMPANY.

New Orleans, June 6th, 1868.

The New Orleans, Opelousas and Great Western Railroad Company desiring that a connection shall be formed between their present terminus at Berwick's Bay, and the Houston and New Orleans Railroad, which terminates at the Sabine River, and which when completed, the (distance being 163 miles,) will connect New Orleans with almost the entire railroad system of Texas, the President and Directors of said Company, therefore propose to such party or parties as may undertake to fill up such gap, the following terms and conditions, to wit:

1. Will lease the right of way and the franchises now possessed by said company from their present terminus at Berwick's Bay to the town of Vermilionville, the grading of which is almost entirely completed for these 63 miles, and will, at the same time, lease the right under their charter to build the branch railroad from Vermilionville to the Sabine River, at or near Orange, the same having been already located by resolution of the Board of Directors. The distance between these points is 100 miles. The Company reserving to itself the right of way and transportation on payment of proportionate freights and passage money from the present terminus of the road to any extension towards Opelousas, of its road beyond Vermilionville.

2. The said lease to continue for a term of years to be agreed upon between the Company and the Lessees. At the end of the lease the property to be valued by disinterested parties, the Railroad Company to select three, and the Lessees three, the two, if need be, to call in an umpire whose decision will be final. The Railroad Company reserving the right to purchase said property at such valuation, but if not then promptly paid for by said Company, the lease to be extended for a further term of years, and so on, until finally purchased and paid for by said New Orleans, Opelousas and Great Western Railroad Company. The grading already made between Berwick's Bay and Vermilionville, to be valued by competent engineers at the time of entering into a contract, but not to be paid for by lessees until the end of the first lease, herein provided for.

3. The parties leasing to obligate themselves to connect with no other railroad which might hereafter be built, terminating at or near the City of New Orleans, and further obligating themselves to do no act which will infringe the rights under the present charter of said Company, and also to hold said company harmless against any loss which might result from acts committed on that portion of road now proposed to be leased.

4. Should the Lessees succeed in obtaining a land grant on the line of railroad beyond Berwick's Bay, it will be and remain the property of said lessees, this Company claiming none of its benefits, and incurring no portion of the responsibility attending it.

5. Transportation to be furnished said Lessees over the Company's road, as follows, viz:

The President, Directors and officers of the road, including engineers, superintendents, road masters and bridge builders free of charge. Transportation of laborers going out to be charged one-third the regular fare. Provisions and supplies to be charged one half of regular rates. Material, other than iron and cross-ties, to be charged one half of regular rates. Iron to be charged one dollar per ton, and cross-ties (if any) fifteen cents each. Lessees to load and unload the cars.

6. The road thus to be built shall be a first class railroad in every respect. The gauge to be the same as the Company's road—say 5 feet 6 inches. The iron used not to be less than 58 lbs. per yard.

7. The said Lessees to obligate themselves to commence said road within four months, and have it finished and in running order to the Sabine River, connecting with the Houston road at or near Orange, within three years from date of signing the lease.

8. In order to ensure the faithful performance of the contract the Lessee will be required to execute a bond to an amount, and with good and satisfactory security to the satisfaction of the Board of Directors.

9. The Company reserves the right to reject any and all bids.

Another proposition and for which proposals are also invited, is to lease the road, including depots, stations, rolling stock, etc., from Algiers, opposite New Orleans, to Brashear City, including the franchises of the Company beyond to Texas, under the following conditions:

1. That the party or parties proposing to lease shall state the least number of years he or they will lease the road, on the following conditions:

2. The accrued interest to October the 1st, 1868, on the mortgage bonds, (said bonds maturing in 1889,) to be provided for by the lessee.

3. The semi-annual interest on same bonds, accruing yearly after date, and payable on the first days of April and October of each year, say $160,000 per annum, to be also provided for by said lessee.

4. The road to be built over the route from Berwick's Bay to New Iberia, thence to a point at or near Vermilionville, thence in a westerly direction to a point on the Sabine River, connecting with the Houston and Beaumont road.

5. The building of the road to be commenced within four months after signing the contract of lease, to be prosecuted with all dispatch, and to be fully and finally constructed within three years from the signing of the lease.

6. The grading, culverts, etc., now made beyond Berwick's Bay, to be taken by the Lessee at a valuation to be ascertained by experts, one to be appointed by each party, in case of disagreement they to select an umpire, and to be paid for on such terms as shall be hereafter agreed on.

7. The road to be built, equipped and maintained during the entire lease as a first class road in every respect.

8. At the close of said lease, the said road, depots, stations, rolling stock, etc., from Berwick's Bay to the Texas line, shall be valued by experts, one to be appointed by each of the parties thereto, and in the event of disagreement, the two to select an umpire, whose decision shall be final. The value thereof thus ascertained shall be subscribed as stock in the present Company, it being well understood that all costs of maintenance, as well as expenses of operating the road, shall be at the exclusive charge of the Lessees.

9. The contract with Charles Morgon for running a line of steamers to Texas, extending to 1871, to be carried out by the Lessee in every respect.

10. The present road to Berwick's Bay, including depots, machine shops, rolling stock, bridges, etc., to be turned over to the Lessee after inventory and appraisement, and the said property, or property of like character and value, and like condition and good order, to be returned to the company at the expiration of said lease.

11. The Lessees, to ensure the faithful performance of the contract, to furnish security to the satisfaction of Board of Directors.

12. The said Lessees shall contribute and pay each year the sum of $5000, payable quarterly, to keep up and maintain the organization of the Railroad Company during the existence of this lease.

13. The said Lessees obligate themselves to do no act which may operate a forfeiture of the charter, and shall hold the said N. O., O. and G. W. R. R. Co. harmless against any and all acts of theirs.

Sealed proposals will be received at the office of the Company in New Orleans, No. 69 Canal street, until the first day of September next, at 12 o'clock, M., the Company reserving the right of rejecting any or all bids.

Swaged Wrought-Iron Rail Chairs

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

Railroads in Peru.

A letter to the *N. Y. Times*, dated Lima, Peru, S. A., July 22, 1868, says: The new railroad under contract with Mr. Meiggs, is being pushed forward rapidly. Fourteen miles are already graded and awaiting the sleepers and rails. A very formidable piece of work has been encountered, which is the opening of a tunnel to be cut through a solid granite rock of two thousand feet, the tunnel leading to a precipice seven hundred feet high. Here an immense chasm is encountered, over which a bridge must be constructed of trestle work, the bridge to be sixteen hundred feet long. This will be done and the road finished within the given time.

The Peruvian Government has also opened proposals for the construction of three other new and important railroads. These proposals will be open until Aug. 5, when the satisfactory one being accepted, the work will be rapidly pushed forward. The most important of these three new railroads is the one intending to start from the port of Iquique to run direct to the saltpetre mines of La Noria. Another one is intended to lead from Pisco into the sugar estates of the interior as far as Ica, and the last one will lead from Lima to Chancay. The line of telegraph in Peru is also to be extended some six hundred miles and a submarine cable is to be laid connecting the Chincha Islands with Pisco.

☞ TO INVESTORS.

SEVEN PER CENT. INTEREST IN GOLD.

PRINCIPAL ALSO PAYABLE IN GOLD.

The First Mortgage Bonds of the Rockford, Rock Island and St. Louis Railroad Company, as an INVESTMENT SECURITY, combining perfect safety, cheapness and profit, are unequaled by anything offered in the market.

They pay seven per cent. interest—Feb. 1, and Aug. 1—in gold coin, *free of Government tax*. The principal also is payable in gold.

The bonds have fifty years to run, and are convertible into stock at the option of the holder. A sinking fund is provided sufficient to pay off the whole mortgage at maturity.

Each bond is for $1,000, or £200 sterling. Interest is payable in New York or London, at the option of the holder.

These bonds are fully secured, being a first lien of $5,000,000 upon 200 miles of railway, costing $10,000,000, and traveling the finest district of Illinois; also upon 20,000 ACRES OF LAND, estimated to contain 100,000,000 tons of coal. These lands, on the completion of the railroad through them, will be worth more than the whole amount of the mortgage.

For all the coal this Company can produce there is a ready market; 1,000 miles of railway and the population of 30,000 square miles of territory can be supplied with fuel from its mines, more readily and cheaply than from any other quarter.

One-half the means required for the construction and equipment of the railroad, and for the purchase of coal lands, is derived from the sale of capital stock, to which large subscriptions are made along the line of road and elsewhere.

The work of construction is proceeding with great rapidity, and the first division of fifty miles, giving an outlet to the coal, will be in full operation by 1st January next.

The estimated earnings of this line of railway, with its coal business, are threefold what will be required to pay interest on its bonds.

The trustee for the bondholders is the UNION TRUST COMPANY of New York.

At 95, the present price, and with gold at 40 premium, the bonds pay an income of over 10 per cent. per annum.

For sale at the office of the Company, No. 12 Wall street.

Governments and other securities received in exchange. H. H. BOODY, Treasurer.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of July, as compared with the same period of the year 1867:

	1868.	1867.
From freight	$347,622 54	$322,253 92
" passengers	189,851 60	186,827 09
" express matter	18,451 50	8,669 99
" mail	7,825 00	7,825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	1,000 00	4,721 94
Total	$571,833 97	$537,381 27
Expenses	364,877 32	367,842 17
Net earnings	$206,956 65	$169,539 10

This shows an increase in earnings of $34,452 70; with a decrease in expenses of $2,964 85—making the increase in net earnings, $37,417 55.

The earnings and expenses, from January 1 to July 31, compare as follows:

	1868.	1867.
Earnings	$4,354,086 12	$3,917,746 01
Expenses	2,790,159 71	2,824,827 64
Net earnings	$1,563,926 41	$1,092,918 37

This shows an increase in earnings of $436,340 11; with a decrease in expenses of $34,667 93—making the increase in net earnings, $471,008 04.

Canadian Railways.

The Great Western Railway shows a falling off of twenty-five thousand dollars; the Grand Trunk an increase of thirty thousand dollars; the Welland an increase of $2,000; and the Northern R. R. nearly $2,000 in July this year as compared with the same month last year. The Brockville and Ottawa, and New Brunswick and Canada Railways, also show an increase of five thousand dollars for the same period. Slight advances on all other roads, except the London and Port Stanley.

☞ The next Legislature of Vermont will be petitioned for a railroad from some point on the line of the Rutland and Washington Railroad in Poultney, through the towns of Fairhaven, Westhaven, Benson and Orwell, to some point in Orwell or Shoreham.

Connecticut and Passumpsic Rivers R. R.

The receipts from operation of this road for the fiscal years ending May 31, 1867 and 1868, have been as follows:

	1867.	1868.
From passengers	$175,952 27	$170,172 10
" freights	301,533 76	302,418 55
" mails	10,600 00	11,160 09
" express	4,200 00	4,950 00
" rents	1,419 83	3,107 96
	$493,705 86	$481,808 70
Expenses, viz:		
Maintenance of road	$88,724 48	$94,332 77
Motive power	79,791 52	88,389 31
Fuel	38,498 01	37,466 38
Oil and waste	8,497 68	4,521 74
Passenger department	14,823 43	18,315 88
Freight "	24,737 02	27,141 25
Loss and damage	2,974 11	4,053 27
Repairs of buildings	5,622 98	3,208 65
Insurance	1,605 17	2,654 61
Tools and machinery	27,395 38	7,910 24
Miscellaneous expenses	18,383 52	31,900 36
	$309,053 30	$319,894 46
Net earnings	$184,652 56	$171,914 24

A comparison of the earnings of the past with those of the preceding year, show a decrease of $11,897 16, with an increase in expenses of $10,841 16.

The company have 12 locomotives, 11 passenger, 6 baggage and mail, 126 box, 68 rack, 12 coal, 81 platform, 10 ore, 2 derrick, 10 gravel, 28 hand, 12 wood, and 1 drovers' cars, valued at $288,125. Value of materials on hand, $151,118 20.

There have been added to the equipment during the year, 1 freight locomotive, 1 smoking and post office car, 10 ore, and 2 derrick cars. Four locomotives, 1 baggage, 10 platform, 29 box, 2 rack and 7 hand cars have been thoroughly repaired; and 1 passenger, 11 box and 4 platform cars rebuilt. A car house, office, and other new buildings have been constructed at Lyndonville. In repairs of track, 130 tons of new and re-rolled iron, 5,226 repaired rails, and 36,848 sleepers have been used.

The track and road bed are in a good condition. The rolling stock has improved $6,950, as per appraisal. $24,050 has been expended the past year in new equipment.

The amount expended at Lyndon to May 31, 1868, exclusive of real estate, is $194,905 73, and comprises round house, machine shops and buildings connected, four double houses, six cottage houses, aqueduct with iron pipes and reservoir, holding over 70,000 gallons, on an elevation of one hundred and fifty feet above the shops.

The original purchase of 334½ acres of land at Lyndon, at a cost of $16,000 has furnished the corporation with all the accommodations anticipated. Of the foregoing expenditure $10,000 has been realized from the sale of real estate, leaving about 300 acres for our own use and for sale. In addition to above, the corporation have 2,000 acres of wood and timbered land lying near their track, from which lumber, wood and sleepers can be obtained advantageously.

Two dividends of three per cent. have been declared during the year amounting to $115,080, including Government tax ($5,574.)

The bonded debt of the company has been reduced $20,000, leaving outstanding, $553,800, of which $10,700 are in hands of trustees of sinking fund.

The charges for "additional equipment" and "new shop," as per last report, and the expenditures for same accounts the past year, together with the credit to "extension," have all been transferred to "construction."

The new shops at Lyndon will enable the company to make their repairs economically and manufacture their engines and cars as low as can be done by any corporation, and of a quality superior, in point of durability, to any that can be purchased for the same amount of money.

The Directors of the Massawippi Railroad give us the strongest assurance that they shall soon commence the construction of their road, which, when completed, will give us a good connection with Quebec and Montreal *via* the Grand Trunk Railway.

The number of miles run by passenger trains during the year has been 85,696; by freight trains, 73,017; by other trains, 26,679—total, 185,392. Number of passengers carried, 112,817; do., carried one mile, 3,518,057. Tons of freight carried, 74,757; do., carried one mile, 3,712,070.

TRIAL BALANCE, JULY 14, 1868.

Russian Railways.

The receipts of the Great Russian Railway show a sensible progress this year. Up to the close of May, 1868, the Warsaw line, with its Prussian branches had acquired the sum of 5,131,863 roubles, against 4,158,096 roubles in the corresponding period of 1867—the advance for the first five months of this year being 978,767 roubles.

The works on the line from Catherinburg to Tumen (Siberia) have been commenced.

A direct service now exists between France and Russia. To attain this object it was necessary to discuss arrangements between no less than ten different administrations—viz., the Great Russian, the East Prussian, the Berlin, Potsdam and Magdeburg, the Magdeburg and Halberstadt, the Duchy of Brunswick, the Hanover, the Cologne and Minden, the Rhenish, the Belgian State lines, and the Northern of France. The distance between Paris and St. Petersburg is 1,759⅜ miles, of which 150⅝ miles are in France, 105⅝ miles in Belgium, 944⅜ miles in Germany, and 558¾ miles in Russia. The service is stated to be well conducted, and it is expected to result in the development of a large business.

Ogdensburg and Lake Champlain R. R.

The earnings of this road for the years ending March 31, 1867 and 1868, were as follows:

	1867.	1868.
From freight	$680,075 48	$701,462 28
" passengers	168,040 31	173,227 99

		274,422 81
Balance		$27,319 71
Add balance from previous year		172,151 05
Total, as in General Balance Sheet		$199,470 76

Compared with the previous year, the gross earnings of 1867-'68 show an increase of $26,996; with a decrease in expenses of $3,046 71—making the increase in net earnings $30,042 71. The report says:

This difference will be more apparent, by taking into account the increased expenditure for iron, amounting to 1,750 tons, against 1,150 the year previous, the improved condition of our rolling stock, and the fact that, in 1866, the quantity of freight carried was equivalent to hauling 22,378,886 tons one mile, while, in 1867, it was equivalent to hauling 26,654,154 tons the same distance,

showing an excess hauled the entire length of the road, of 37,500 tons in 1867 over 1866.

As was predicted in our last annual report, in consequence of the small amount of grain awaiting shipment at the opening of navigation, rates for through freight were materially less than the year previous, while from the fact that navigation closed thirty days earlier than it has for many years, as well as the general depression in trade last autumn, our winter traffic was greatly diminished. In this connection, it is proper to add, that while our winter earnings were so materially diminished, we were able to make more than a corresponding reduction in expenses; thereby, making a net gain in those months over the previous year.

This spring, navigation has opened early, and with an increased business, so that our entire motive power is put in requisition to move it.

The local business of the road is steadily increasing, and it is reasonable to expect that in the future, as in the past, our earnings will increase year by year, as we add to our facilities for transportation.

NEW CONNECTIONS.

The road running from Mooer's Junction to Plattsburgh, has been purchased by responsible parties, and a Steam Ferry-Boat, capable of receiving fourteen cars, will be put on the route between Plattsburgh and Burlington, in June, to connect with the Rutland and Burlington road. This will open to us a new and important field of traffic, which has heretofore been confined to other routes, and from which we may reasonably expect a large increase of business, without diminishing or interfering with that we now have by the Vermont Central Line.

The Plattsburgh and Whitehall road, the construction of which has been commenced, will, when completed, give us a new and valuable connection to New York, and intermediate points.

The Portland and Ogdensburgh road is receiving, as it justly should, the attention of the people of Portland and the line of country through which it is proposed to run. This enterprise is one in which we have a direct interest, and when built, will add materially to our earnings. The distance from Portland to Ogdensburgh, by the route contemplated, is about 350 miles, thus giving Portland the best water and rail communication with the West, of any city in the East, bringing her nearer by rail to Chicago than Boston, and making her one of the most convenient ports for the shipment of breadstuffs to Europe, as well as for the receipt and distribution of foreign merchandise all over the West, and it is not a matter of surprise that the people of Portland should devote all their energies to the completion of this great work.

The Board have received a delegation of gentlemen engaged in this enterprise, who laid before them their plans, accompanied by an application for aid in building the road; no response has been given to this application, and it is yet to be determined in what manner the aid asked for can be afforded, without embarrassment to ourselves.

The Northern Transportation Company will, the present and ensuing season, add ten new propellers to their fleet, thus nearly doubling their means of transportation, running two boats daily from Ogdensburgh to the upper and lower lakes. This addition to their line is intended to accommodate the through business, which is now mainly confined to supplying the home consumption of Boston and vicinity; now that these additional facilities are being afforded, if the metropolis of New England expects to participate in the foreign trade in breadstuffs it will be necessary that the trunk roads should have access to deep water, where their freights can be delivered into elevators and warehouses, and from thence transferred to steamers.

While there are no facilities for loading steamers, it is useless for Boston to build them, and they will be found in the future, as in the past, an unprofitable investment; but let these facilities be afforded, and steamers will be found at her wharves competing for the freight which this line of communication from the West will bring to her, and for which the roads between Boston and Ogdensburgh were originally constructed.

NEW EQUIPMENT.

It has been manifest to the directors, that in order to develop the resources of the road, a large addition to our equipment was required; to make this addition from the earnings, seemed not only unfair to the stockholders, but was too slow a process. *We need the equipment now.*

The Board, therefore, have authorized the issue of three hundred thousand dollars of bonds, secured by the equipment furnished, bearing an interest of eight per cent. per annum, free of government tax, and payable in ten annual instalments.

These bonds have been sold at from par, to two per cent. premium and the proceeds are in the hands of Trustees, who will disburse them for the objects contemplated.

An additional equipment of two locomotives, and about four hundred cars will be furnished, and the road placed in a strong condition for doing the business that has heretofore offered, and which we have been compelled to turn away.

FIRST MORTGAGE BONDS.

$509,900 of these bonds have been exchanged for Preferred Stock, leaving outstanding $985,000; and there is in the treasury, $27,100, proceeds of the sale of Preferred Stock to be applied to the liquidation of these bonds.

SECOND MORTGAGE BONDS.

$3,024,000 of these bonds have been converted into Common Stock, leaving outstanding $53,000.

PREFERRED STOCK.

$1,037,000 of this stock has been issued, of which $500,000 has been applied to new equipment, the elevator, and other objects authorized in its issue; the balance has been applied to the liquidation of First Mortgage Bonds, with the exception of $27,100 now in the treasury, to be applied to that object. There is remaining unissued, an amount sufficient to pay the bonds now outstanding.

NEW ELEVATOR.

This structure, which was in process of erection a year ago, was completed, and ready for use early in the autumn; it is built of brick, with a capacity for storing over 600,000 bushels of grain, and competent judges pronounce it the best elevator in the United States. Although for reasons given in a preceding page, we did not fill it at the close of navigation, its utility was made manifest; but for the facilities which this gave us for receiving grain, twice during the pressure of business in September and October, owing to a deficiency of cars, vessels would have been unable to discharge their freights, and the information would have gone back to Western ports, that Ogdensburgh was "blocked," which would have stopped further shipments, and ruined our fall business. Its great value to the road cannot be questioned. With this and our floating elevator, we can receive from vessels 15,000 bushels of grain per hour, and have storage capacity for 900,000.

TRACK.

The track is in better condition than it has been for many years, and will compare favorably with most of the New England and New York roads; but there is still room for improvement.

In no department can money be expended to better advantage, than in the purchase of iron. A poor track is sensibly felt in the wear and tear of machinery, and in the expenditures of the repair shops.

The past year, 1,750 tons of new iron (a larger quantity than it has received in any one year since it was completed) has been placed in the track, and 50,000 ties.

BRIDGES.

Public safety requires that these structures should be kept in good condition. Very few of the bridges have been rebuilt since they were first laid down, and the process of rebuilding must be gradually prosecuted for the next few years. This can be done without entailing any very large special expenditures.

The rebuilding of a considerable portion of the bridge at Rouse's Point was rendered necessary the past season, by the building of a draw by the Vermont Central Road, to give passage to vessels through the Lake, thus displacing the large and unwieldy boat which has heretofore been used.

This is an improvement that has long been called for, and will prove more convenient to navigation, and add to the safety of trains.

Two substantial stone piers have been placed under the high bridge at Malone, to facilitate rebuilding in case of its destruction by fire; subject to great exposure, its construction, until the erection of these piers, would have involved an interruption of several weeks to our business, whereas it can now be speedily replaced.

The equipment of the road consists of 30 locomotives; 16 passenger, 8 baggage and 519 freight cars.

TRIAL BALANCE, MARCH 31, 1868.

Cost of road, including disbursements of preferred stock for equipment and other purposes	$5,071,900	00
Bills receivable	46,270	37

President.—JOHN C. PRATT.

Directors.—John C. Pratt, Jacob W. Pierce, John S. Farlow, George M. Barnard, Hollis Hunnewell, Thomas Upham, Samuel M. Felton, E. T. Farrington, William C. Brown, I. D. Farnsworth, Arthur Williams, Calvin T. Hulburd, Albert Andrus.

Treasurer.—HENRY A. CHURCH.

Gen'l Superintendent.—DEWITT C. BROWN.

St. Louis, Vandalia and Terre Haute R. R.

The stockholders of the Columbus, Chicago and Indiana Central Railroad Co., have ratified the contracts with the companies owning the lines of road between Philadelphia and Terre Haute for the completion of the St. Louis, Vandalia and Terre Haute Railroad. This road now becomes the joint property of the Columbus, Chicago and Indiana Central, the Terre Haute and Indianapolis, and the St. Louis, Pittsburg and Cincinnati roads, the former company owning three-tenths of the road.

☞ The Baltimore and Ohio Railroad Directors have determined to build the Point of Rocks branch at once. It has been decided to construct a single track from the Point of Rocks direct to Baltimore for the accommodation of freight, and the main road to go by Washington and Laurel Cut-off.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 22, 1868.

Stock Exchange and Money Market.

The Money Market has been more active, and a point firmer, since our last. The city banks have been losing strength in their deposit and currency lines, mainly through remittances to the interior, in aid of the produce movement. Last week, the various express companies carried off about eleven millions, chiefly of National bank notes to the West, where a lively inquiry prevails for accommodation. The current week's outflow also promises to be very heavy. Call loans have been quoted up to 4@5 per cent., with rather more doing at the higher figure, which is now the fixed price with several city banks. Prime discounts have been current to a moderate extent at 6½@7 per cent. per annum. The banks have been more prudent in their dealings in produce paper. The city banks in their last week return, show a loss of $8,155,405 of deposits, $1,830,577 of specie, and $1,116,067 of legal tender notes; with a contraction of $1,947,166 in the loan averages. The United States Sub-Treasury added over five millions to its cash balances as the result of the past week's business, which embraced receipts from all sources of $19,638,370, against disbursements on all accounts of $14,336,420. The bank Clearing house reported the exchanges for the week at $482,533,952.

The specie reserve of the city banks is now $22,953,850, against $5,920,557 same time last year. The city bank deposits are now $223,561,087, against $194,046,591 week ending Aug. 17, 1867. The legal tender reserve amounts to $72,935,481, against $69,473,793 same time last year. The circulation now stands at $34,114,087, against $33,669,757 same time last year. The loans are now $277,808,620, against $253,232,411 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $80,422,160 a day, against a daily average of $97,834,064 the preceding week, and $74,855,699 the week ending with Aug. 1, 1868. The current week's exchanges average about $93,500,646 a day. The city banks, last week, lost $1,830,577 of specie, $1,116,067 of legal tender, and $8,155,405 of deposits. They reduced their loans, $1,947,166; and increased their circulation, $39,713.

The New York Gold Exchange Bank reports for the week ending Saturday, the 15th day of Aug., 1868, the average amount of loans and discounts as $1,061,924; average amount of specie, $1,048,180; average amount of deposits, $1,564,866.

The Philadelphia Bank movement the past week shows an increase in loans of $82,743; an increase of $12,523 in specie; an increase in legal tenders of $26,792; a decrease of $658,589 in deposits; and an increase of $2,021 in circulation. The Bank Clearings show a decrease of $453,756, and the balances, a decrease of $646,747.

The outstanding amount of coin certificates on the 1st of Aug., was $22,414,000, against $20,298,180 on the 1st of June, 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $969,000, and retired $2,718,150 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during July, reached $8,939,060.

The U. S. Sub-Treasury receipts, week ending with Aug. 15, were $19,638,389, including $2,829,150 from customs duties; payments, $14,336,441, including $278,000 of coin interest; balance at the close of the week, $84,290,221, against $78,988,273, at the close of the preceding week, showing an increase of $5,301,948. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $2,268,029 including $368,263 from customs; and payments, $3,272,911; on Tuesday, receipts, $3,287,577 including $450,028 from customs, and payments, $2,879,480. The balance at the close of business on Tuesday stood at $83,693,437, against $79,418,886, a week previous; and $78,421,279, on Aug. 5, 1868. The aggregate receipts of the office from all sources in July, were $94,561,982; aggregate payments, $103,554,458. The balance on the 1st inst., was about nine millions below that on the 1st ult., which amounted to $89,125,661.

National Bank notes to the amount of $117,380 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,298,706, against $282,555,440 at the close of the fiscal year ending

June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,389,836, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,908,870. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,643,300; and for the public deposits, $38,052,350—making a total of $379,705,650. The Treasury Department last week redeemed and destroyed $478,800 of worn and mutilated fractional currency, and issued $540,806 of new. The outstanding amount of fractional currency on the 1st of August was $31,867,818, against $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been on a more liberal scale, since our last, in both forms of customs and excises. The excises, last week, yielded some 4½ millions; customs at the port of New York, $2,829,150, and at the outports about $950,000 (in coin) more, making the grand total income for the week equal to about $9,980,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $25,830,000, or equal to about 3½ millions a week.

Gold has receded over three per cent., during the week, or from 148⅛ as the highest point on Friday last, to 144¾ as the lowest, on Wednesday of the current week. The offerings have been more extensive, largely on speculative account, while the demand from all sources has been less animated. The export inquiry has been limited. It fell short of a million last week. Thus far this week, it has taken only $259,671. The customs drain has been on the increase, adding to the coin reserve of the Treasury Department. There were some reports in circulation toward the close of a small amount of specie having been imported from Great Britain within a few days. These reports were only deemed of consequence as suggesting the probability of a considerable importation of coin later in the season, as the result of the augmented foreign call for our produce, which will add largely to the available supply of sterling exchange, to the depression of exchange values. The latest transactions in Gold indicated a little more firmness, the closing quotation on Wednesday having been 145⅜.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $4,673,364, against $1,315,000 same time last year. The customs demand for Gold last week, averaged $471,525 a day; thus far, this week, it has been equal to $409,195 a day, or equal to a weekly aggregate of $2,455,170. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $260,102 and from California, $1,191,895. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $71,896,966, against $77,035,915 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $27,455,126, against $18,995,126, in 1867, showing an increase thus far in 1868, of $8,460,597. The exports of specie, from this port, last week, were $653,498, against $601,888 same week last year; total, since Jan. 1, 1868, $63,288,187, against $39,276,638 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $278,000; since Jan. 1, 1868, $59,757,581, against $39,483,199. The specie exports from San Francisco, from Jan. 1, to July 23, 1868, were $22,384,285, against $24,994,670 same time last year.

Government received $4,854,786 from customs at the port of San Francisco, from Jan. 1, to July 28, against $4,184,000 same time in the preceding year.

An augmented supply of foreign exchange has been available to buyers at slightly reduced rates, yet the demand has been on a restricted scale, and the market closed dull and weak. Bankers' prime sixty day bills on London closed on Wednesday at 109@109⅜, and on Paris to 5.22½c.@5.17¾; sight bills on London to 109⅜@109¾, and on Paris to 5.15c.@5.13¾. The offering of produce bills has been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,772,663, against $2,962,501 same week last year; total, since Jan., 1, 1868, $105,061,555 against $119,425,889 in 1867; and grand total, during the fiscal year ending July 1, 1868, $179,784,280, against $195,544,905 in 1866–'67.

Government securities have been in quite limited request for all purposes, since our last, and prices have declined materially, under a pressure to realize, partly on account of city banks, having Western connections, and needing currency to respond to the increasing calls of their correspondents. The dealings on Wednesday showed more animation in the market at a fractional rally from the lowest figures, which were made on the forenoon of that day.

U. S. sixes of 1881 closed here on Wednesday at 113½@113¾; U. S. Five-twenties of 1862, 113@113⅛; U. S. Five-twenties of 1864 at 108⅜@108⅞; U. S. Five-twenties of 1865 at 110¾@110⅞; U. S. Five-twenties of 1865, consolidated, 107⅞@108; U. S. Five-twenties of 1867, 107⅜@107½; U. S. Five-twenties of 1868, 107¼@107½; U.S. Ten-forties at 108¼@108½, U.S. Six per cent. currency bonds, 102@102½. The brokers are buying the outstanding compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures: September, 1865..118½ | October, 1865....118

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 5.	Aug. 12.	Aug. 19.
Consols	94⅜	93⅞	94⅛
U.S. 5-20's of 1862	71½	72	71⅝
Erie	37¼	36¾	31¾
Ill. Central	92⅝	92½	91¼

The railway and miscellaneous shares market has been excited and decidedly lower for all the active stocks, under very extensive realizations, largely on account of the *bear* interest. Erie and New York Central have been the most severely hammered, the former having fallen 9@10 per cent., and the latter 6@7 per cent. At the close, the market was dull, weak, and feverish.

Domestic produce has been generally in moderate demand, since our last. Breadstuffs and Provisions have been quoted lower. Cotton has improved ⅛@1ct. per lb. Middling upland cotton closed buoyantly on Wednesday at 30 cents per lb. The stock of cotton now here is estimated at about 42,500 bales. The receipts at the port this week, have averaged only about 250 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,189,500 bales, against 1,871,000 bales same time last year; exports, same time 1,676,000 bales, against 1,555,000 bales same time last year; stock on hand at latest dates, 60,000 bales, against 105,000 bales same date last year. At the Live Stock market, this week, Beeves have been in moderate demand at from 10@16¾c. per lb.; week's receipts, 7,060. Veal calves have been in less demand at from 7@11c. per lb.; receipts, 1,846. Sheep and lambs have been plenty and heavy ranging from 4@6½c., and 6@8¼, respectively, per lb.; receipts, 85,905. Swine have been moderately active but lower selling at from 9¼@10⅜c. per lb., all live weight; receipts, 18,854. General merchandise have been comparatively tame and weak, influenced in part, by the decline in Gold. Dry Goods have been lightly dealt in; desirable fabrics have varied little in value. The total imports of foreign dry goods, last week, were $1,933,412, and the total amount marketed $2,071,676. The value of foreign merchandise imported last week, was $2,379,486—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,312,898, against $4,673,114 same week last year; from Jan. 1, 1868, $155,532,525, against $160,538,874 same time in 1867; and year ending July 1, 1868, $238,283,518, against $269,831,007 in 1866–'67. The freight market has been moderately active, but rates have been quoted lower. For Liverpool we quote flour at 1s. 4½d.@1s. 6d. by sail, and 1s. 7½d.@1s. 9d. by steamer, per bbl.; grain at 3d. by sail, and 3@3½d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{16}$d. by sail, and $\frac{3}{16}$d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 455.

The New York exports, exclusive of specie, for the week ending Aug. 18, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$2,962,501	$2,772,663
Prev. reported	116,463,388	102,288,892
Since January 1	$119,425,889	$105,061,555

The imports for the week ending August 15, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$1,831,803	$1,933,412
Gen. merchandise	2,841,311	2,379,486
Total for the week	$4,673,114	$4,312,898
Previously reported	155,865,760	151,219,627
Since January 1	$160,538,874	$155,532,525

The balance in the Sub-Treasury on Wednesday was $84,249,779.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns —

Rockford, Rock Island and St. Louis R. R.

First mortgage, 50 years, 7 per cent. Convertible Sinking Fund, Bonds of the Rockford, Rock Island and St. Louis Railroad Company, principal and interest payable in Gold, free of Government tax.

For sale at 95 and accrued interest in currency, at the office of the Company, 12 Wall st.

Governments and other securities received in exchange.

H. H. BOODY,
Treasurer.

☞ The directors of the Mount Washington R. R. Co. are: John E. Lyon of Boston; Sylvester Marsh, Henry Keyes of Newbury, Vt.; Onslow Stearns, N. White, and J. Minot of Concord; and E. A. Straw of Manchester. Mr. Marsh is President, and Mr. Lyon, Treasurer.

Brockville and Ottawa Railway.

The receipts of the Brockville and Ottawa Railway for the six months ending July 1, 1868, were $73,348 71. The operating expenses were $38,950 05. For the half year ending July 1, 1867, the receipts were $52,598 63; and the operating expenses, $28,974 63. The increase in receipts has thus been $20,750 08; and the increase in expenses, $9,975 42. The whole expenses of operating the road in 1868, including all actual renewals, amounted to $46,087 55, or 62.8 per cent. of receipts. The ordinary working expenses were 53.1 per cent. In 1867 they were 54.7. The renewals in 1868 amounted to $10,748 33; in 1867 they were $38,375 28. The gross receipts in cash for the year 1867 were $146,209 39, and the percentage for operating expenses in the proportion of 48.11 of gross receipts. Cash on hand July 1, 1868, $24,479 02. It is proposed by the manager to build a new iron girder bridge at Carlton Place, and a turn-table at Perth, which, it is expected, will be all the renewals necessary this year.

Western Maryland Railroad.

At a recent conference of the President and directors of this road with the county commissioners of Washington Co., says the Hagerstown *Mail*, "arrangements were made for the prosecution of the work with redoubled energy, with an assured prospect of its speedy completion. The estimates due contractors will be discharged in a few days. It is contemplated to finish the grading of the line to Mechanicstown within a month, and in a short time thereafter the cars will be running to that point, which will temporarily be the western terminus of the line. At this end very little work is required to finish up the grading of the road. The completion of the road to Mechanicstown will add immensely to the receipts of the road—the business of which is now so great as to require additional rolling stock. Negotiations for the cars required are now going on, and will be completed immediately upon the return of the president to Baltimore."

Union Pacific Railroad.

Sixty additional miles of the Union Pacific Railroad are now finished, making 960 from Omaha. It now seems probable that nearly 1,000 miles will be in running order before the close of the year, and the whole line to the Pacific will be open for business during 1869.

☞ The following gentlemen have been elect directors of the Frederick and Pennsylvania Line Railroad Company; John Loats, John Reifsnider, David J. Markey, J. Alfred Ritter, Lewis Bruner, John Sifford, W. H. Falconer, of Frederick, and Capt. A. W. Eichelberger and William Rinedoller, of Pennsylvania. John Loats, Esq., was elected President.

☞ The work of arching the Albany and Susquehanna Railroad tunnel has been resumed, and will be completed by the 1st of November. As an inducement to finish the grading of the road between Harpersville and Binghamton by that date, an additional compensation to contractors of $10,000 has been pledged.

☞ The receipts of the European and North American Railway in July, 1868, were $17,537 32; in July 1867, $16,030 05—increase, $1,507 27.

Railroad Earnings.—Weekly.

The earnings of the Michigan Central Railroad for the 2d week in Aug., 1868, were...$74,238 24
Corresponding week of previous year.. 76,638 07

Decrease $2,399 83

The earnings of the Chicago and Northwestern Railroad for the 2d week in Aug.,1868..$271,842 98
Corresponding week previous year .. 194,628 44

Increase $77,214 54

The earnings of the Chicago and Rock Island Railroad for the second week in Aug., 1868, were.... ....$102,400 00
Corresponding week of previous year. 78,063 00

Increase $24,337 00

The earnings of the Western Union Railroad for the 2d week in Aug., 1868,.... ....$14,159 71
Corresponding week previous year.... 11,580 53

Increase $2,579 18

The earnings of the Chicago and Alton Railroad for the 2d week in Aug., 1868..$162,985 00
Corresponding period previous year . 105,562 00

Increase $57,423 00

The earnings of the Detroit and Milwaukee Railroad for the second week in Aug., 1868, were $36,832 73
Corresponding week of 1867.... .... 35,764 91

Increase..... .... $1,067 82

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week in Aug., 1868, were.. ....$90,894 00
Corresponding week of 1867.... .... 98,071 00

Decrease $7,177 00

The earnings of the Marietta and Cincinnati Railroad the 2d week in Aug., 1868..$30,077 00
Corresponding week previous year.... 25,055 00

Increase $5,022 00

Rockford, Rock Island and St. Louis R.R.

Work on the line of this road is proceeding with vigor. Nearly 20 miles of the track south of Sterling are graded, and the bridge over the Rock river is under construction and will be ready for use by November next, while 50 miles of the road will, it is stated, be in operation by the 1st of January. About 200 men are now employed upon the work, and a larger force will be put in requisition as soon as the harvest is over.

☞ The Ogdensburg and Lake Champlain Railroad Company will pay $200,000 of the 1st mortgage bonds of the Northern (Ogdensburg) Railroad Company on the 1st of September next, with accrued interest—less Government tax—to parties who desire to surrender the same. Address Henry A. Church, Treasurer, Boston, Mass.

☞ Wm. Janvier, Esq., has been elected President of the Kent County Railroad, vice T. W. Eliason, resigned. The company have been engaged during the past two weeks condemning land by the assessment of juries. The work upon the road may now be considered as fairly inaugurated.

☞ The following gentlemen have been elected directors of the Lexington and Arlington Railroad Company for the ensuing year: George F. Fay, Charles T. Crocker, R. D. Blinn, W. E. Parmenter and Geo. O. Davis. R. D. Blinn was unanimously re-elected President, and Geo. O. Davis Treasurer and Clerk.

Journal of Railroad Law:

CONSTRUCTION OF RAILROAD CHARTERS—WHEN RIGHT IMPLIED TO CONSTRUCT STATIONS, ENGINE HOUSES, &C.—WHEN POWER TO TAKE LAND, GIVES POWER TO TAKE A RIGHT OF WAY OVER IT. WHEN OWNER OF LAND TAKEN FOR RIGHT OF WAY BY A RAILROAD MAY HAVE DAMAGES THEREFOR ASSESSED.—REMEDY FOR OBSTRUCTING A RIGHT OF WAY BY A RAILROAD TRACK.

The facts in the late case of Phil., Wil. and Balt. R.R. Co. *vs.* Williams, 54 Penn.St. R. 103 are fully state in the following able opinion of the court by

AGNEW, J.—A parcel of ground was laid out into lots, leaving a strip four feet wide in the rear of the lots to be used by the lot owners as a passage out to Washington Avenue. The deed conveying to defendant one of these lots, granted also the free and common use, right, &c., of said four feet wide alley as and for a passage-way, and watercourse at all times hereafter, forever, and subject to the payment of a proportionate part of the expenses of keeping said alley in good order and repair at all times hereafter forever. The track in question was a turnout and siding from the defendants' main track on Washington Avenue to their engine house, built upon a lot of their own near Washington Avenue, and adjoining the four feet alley on the opposite side from the plaintiff's lot. The form of the action involves the right of the railroad company to obstruct the plaintiff's way and watercourse by means of the track laid across it. The authority to do this, claimed by the company is found in certain acts of the Legislature, and in an ordinance of the city councils. The tenth section of the act of 1831 authorized the company "*as soon as they conveniently can*, to locate and construct a railroad of one or more tracks," and "to make, construct and erect such warehouses, toll houses, carriages, cars and all the works and appendages necessary for the convenience of the said company for the use of said railroad." The oath of the viewers contained in the 12th section requires them to assess the damages caused by the construction of the railroad and other works. This grant of power unquestionably carries with it the right to construct turnouts, sidings, stations and engine-houses, and all works and appendages usual in the convenient operation of a railroad. A railroad without switches, sidings, turnouts and buildings for fuel, water engines, stations, &c., would be useless in a great measure. They are essential to the operation of the road and the transportation of freight and passengers with security and dispatch. The expression "*as soon as they can conveniently* locate and construct" is not a limitation upon the power to compel the company to exercise its whole authority in the very beginning, when the demands of business are few.

It would be an unreasonable construction of its charter to require provision to be made for all the unknown wants of the future. The increase in trade and business, and the changes taking place, often require new and increased facilities. The argument that the track and engine-house is the private way of the railroad company, not used by the public, and therefore no part of the public highway is ingenious but unsound. Admitting that it is not a part of the public highway, in the sense that it is not used immediately by the public, but by the company only, it does not follow that the ground is not taken for public use under the power of eminent domain. It is not the special use made of it which characterizes it, but its convenient necessity to that part which is for the public use. The principle of the argument would leave the state without power to take any land except that occupied by the main track of the railroad, and compel the company to operate it without the works and appendages necessary for the public safety and convenience.

It is said this is not a case of consequential damages, the taking being direct, and that the charter provides for compensation to the owner of land only. It is argued, therefore, in the absence of a provision for compensation to the owner of the right of way, the taking is contrary to the 10th section of the 9th article of the constitution. It is unnecessary to doubt or consider the authority of the cases referred to by counsel, the difference between the rights of the owner of a ground rent being so clearly distinguishable from those of the owner of a right of way and water-course. It is true that they are alike in the fact that they are incorporeal hereditaments but in nothing else; a ground rent issues out of the land and is charged upon it, but it has no particular *situs* upon it, and requires no use of it for its enjoyment. It is a pecuniary burden only, the only ligament between the tenant and ground landlord being the reservation or covenant for its payment. Having no connection with the soil, it remains totally untouched by any use the railroad company can make of it. Apportionment of the rent, because of the taking of the land, is solely an equity arising between the tenant and the landlord. Hence the conclusions drawn in the cases referred to.

But the nature of a private right of way is different. A way has its defined route upon the land itself. *Ex vi termini* it imports a right of passing in a particular line. Washb. on Easement, ed. 1868, p. 160. It carries all rights to the use of the soil which are properly incident to its enjoyment. For instance, the grantee of the right of way over such an alley in a city may enter and pave and repair it. Id. 190, 196, 198, 199. The deed in this case expressly subjects the grantee to her proportion of the expenses of keeping it in repair.

The right carries with it a qualified use or occupancy of the ground itself. For an obstruction to a right of way, the owner of it has an action directly against the wrong doer, distinct and independent of the action of the owner of the land for an injury done to his possession. Id. 158. These being the rights of an owner of a right of way and water course, it seems to me it would go too far to say that he cannot have a view to assess his damage, caused by taking, which directly obstructs the enjoyment of his way. A private road (says Black, J., in Carver *vs.* Paul 12 Harris 211) is private property, and an act of assembly to close it up, without paying for it, would be depriving the owner of his property. Having decided that the charter gives an authority to enter upon land and locate and construct a railroad, even against the right of an owner of an incorporeal hereditament issuing or served out of it, we must necessarily say that this carries with it a right to a view to assess damages whenever that right is directly injured by the entry and use of the land.

In 10 Wright 229 a covenant of general warranty was decided to be broken by the entry of the owner of a private way who threw down the fences to enable him to exercise his right of passage on the land. This was held to be an actual *eviction* under title which enabled the defendants to set up the break of the warranty as a defence to the payment of the purchase money. We hold, therefore, in this case, that the legislature meant by the terms "owner or owners of such required land" to include all owners of titles in or growing out of land whose rights are capable of actual privation by the taking. The proper remedy of the plaintiffs below was not by an action, denying the right of entry to take the land, but by an application for the assessment of damages.

The judgment is reversed.

The Character of the Union Pacific R. R.

While every person who has followed the progress of that wonderful undertaking, the Union Pacific Railroad, has marvelled at the unparalleled rapidity with which it has been constructed, some have felt skeptical as to the *character* of the work which was being done with such apparently headlong speed. Was it possible to build seven hundred miles of railroad in two years, and do it well? Could a railroad from New York to Chicago be well built in two years' time? And if not here, where all the appliances needed were at hand, or could be obtained at a day's notice, then how much less in a region beyond settlement beyond civilization, and where laborers, supplies, tools, and all else, except the land upon which the road was built, must be transported hundreds of miles before reaching the spot where they were wanted. In short, the question, "Is the road well built?" has been the one for whose satisfactory solution many have waited before investing their means in the Company's securities, which are liberal in their provisions, and safe beyond peradventure, *if* an affirmative answer to this question can be fully established.

Upon this point we must take the testimony of personal witnesses, who have been upon the ground and examined the work. Fortunately, an opportunity has just been afforded and improved for a full inspection of the road and its belongings, by a party of gentlemen who represent the reading and thinking people. Thirty gentlemen, representing as many of the leading journals of the eastern cities, have just returned from a trip which included over seven hundred miles of the Union Pacific Railroad. They had a special train at their disposal, to stop where they wished, to run fast or slow as they might desire, and which gave them far better opportunity to see both the good parts of the road, and the bad ones—if any exist—than the ordinary traveler by regular trains. These witnesses are men of judgment and discrimination, and their personal characters, as well as the names of the journals which they represented, are guarantee that they write only what their convictions dictate. Let us see what some of these gentlemen say of the character of the Union Pacific Railroad:

Hon. Charles A. Dana, of the New York *Sun*, late Assistant Secretary of War, says:

"A party of thirty gentlemen * * * have just returned from an excursion to the present terminus of the Union Pacific Railroad at the Rocky Mountains. Their unanimous opinion is that the road is constructed in the most thorough and solid manner, and that it is superior in firmness, smoothness, and capacity for rapid running, to any other new road which they have ever seen. This is true of the parts of the track which were laid only the day before the excursion train passed over them, as well as those at the eastern end of the line which have been in use for some two years. The work is well done, both as respects the judgment with which it is laid out, and the thoroughness of its construction; and there is no part of it which could, under the circumstances, be better than it is: all reports to the contrary are erroneous and mistaken."

The editor of the Boston *Traveller* says:

"It is built in the best and most substantial manner possible, and will compare favorably with any other road in the United States. For a new road, I do not remember ever having traveled on its superior. * * * The road is well ballasted, and except in seasons of extreme drought, must be comparatively free from dust. * * * Few of the old roads of the country are so easy to ride over as this new one."

The editor of the Philadelphia *Bulletin* says:

"So far from imperfect and superficial workmanship being put upon the road, everything indicates a determination that the work now done shall be as durable as human ingenuity and enprise can make it. The workshops, engine houses and other structures at Omaha, Cheyenne, North Platte and Laramie, are all handsome stone and brick edifices, that will last without repair or reconstruction for generations; while the road itself is as solidly and substantially built as any railroad in America. * * * In short, the closest scrutiny has failed to detect any signs of hasty or imperfect construction."

The editor of the N. Y. *Express* says:

"Firm, solid, substantial, we have now as fine a track as can be found on almost any road in the country, while the traveling accommodations are full of ease and comfort. * * * A visit to the wilds of the Rocky Mountains will convince the traveler that the Pacific Railroad is neither a myth nor a Brummagen affair, gotten up for purely speculative purposes."

The editor of the Boston *Transcript* says:

"The Union Pacific is a first-class road; finely graded, thoroughly tied, well ironed and ballasted, and substantially bridged."

The editor of the Baltimore *American* says of the Road:

"It is well and substantially built and ballasted, and rides more easily than two-thirds of the roads east of the Mississippi."

And again he speaks in the following unqualified commendation:

"I must reserve for another occasion some remarks upon the character of the road, its financial basis, present business, and future prospects. But it is proper to say just here that the rumors that have been put afloat at the East that the Company is a party of speculators, putting down a rude and poorly constructed road, that will be useless, or nearly so, when completed, is a falsehood that could only have been deliberately concocted and put in circulation for reasons which would not bear examination. The road is a good one, well and solidly laid, with heavy rail, and twenty-six hundred cross-ties to the mile over which the cars travel with remarkable smoothness, and the equipments, station-houses and work-shops of which all show that it is being built for use and not for speculation."

The editor of the New Haven *Palladium* says of the most extensive and difficult bridge upon the route:

"It is constructed with admirable skill, and is capable of bearing a weight forty times greater than will ever be placed upon it. * * * A careful examination of this magnificent structure convinced every member of the party that the marvelous speed with which the road has been built, has not been achieved by any sacrifice of security."

The editor of the New York *Times* refers to the fast running done on a portion of the trip, and says:

"The locomotive tore along at a speed of over 40 miles an hour, and smoothly enough we traveled, even at that high rate, proving conclusively that the Union Pacific Railroad is substantially built."

Of the Company's shops at Omaha, the same authority says:

"The first-class cars manufactured here are equal to any cars to be found on any of the eastern railroads, and indeed, the whole rolling stock of the Company will compare with that of any other road in the country."

The editor of the Philadelphia *Age* says:

"It might be supposed, from the rapidity with which the work was done, that it was of a temporary and perishable character. But such is not the case. * * * Of the roadway it is enough to say that we traversed it smoothly, safely and steadily for five successive days, at a rate of speed varying from twenty to fifty miles per hour, and between the old track and that at the western terminus, which had been finished but an hour or two, no discrepancy was perceptible."

The editor of the Philadelphia *Bulletin* gives the following spirited description of the way the track is being laid:

"Track-laying on the Union Pacific is a science, and we pundits, of the Far East, stood on that embankment, only about a thousand miles this side of sunset, and backed westward before that hurrying corps of sturdy operators, with a mingled feeling of amusement, curiosity and profound respect. On they came. A light car, drawn by a single horse, gallops up to the front with its load of rails. Two men seize the end of a rail and start forward, the rest of the gang taking hold by twos, until it is clear of the car. Then they come forward at a run. At the word of command the rail is dropped in its place, right side up with care, while the same process goes on at the other side of the car. Less than thirty seconds to a rail for each gang, and so four rails go down to the minute! Quick work, you say, but the fellows on the U. P. are tremendously in earnest. The moment the car is empty it is tipped on the other side of the track to let the next loaded car pass it, and then it is tipped back again, and it is a sight to see it go flying back for another load, propelled by a horse at full gallop at the end of sixty or eighty feet of rope, ridden by a young Jehu, who drives furiously. Close behind the first gang come the gaugers, spikers, and bolters, and a lively time they make of it. It is a grand Anvil Chorus that those sturdy sledges are playing across the plains, It is in triple time, three strokes to a spike. There are ten spikes to a rail, four hundred rails to the mile, eighteen hundred miles to San Francisco. That's the sum, what is the quotient? Twenty-one million times are those sledges to be swung—twenty-one million times are they to come down with their sharp punctuation before the great work of modern America is complete."

These quotations might be greatly extended, but all the members of the editorial party bear similar testimony to the thoroughness of construction of the Union Pacific Railroad, and the permanent character of all its equipment and appurtenances. They are all equally positive concerning the great business future which the road must have as the outlet for the vast region west of the Missouri awaiting development.

We learn from the Treasurer of the Company that the earnings of the road for the past year exceeded four million dollars. Great as this sum is, it must be considered as only the beginning of

the immense traffic which will pass over the road when the whole line shall be finished.

Chenango Valley Railroad.

We have been shown a paper signed by a number of our moneyed citizens, pledging themselves to pay certain amounts "when the Chenango Valley Railroad shall be located through Cazenovia," and the necessary papers shall have been perfected for that object. We are told the towns of Nelson, Lebanon and Eaton feel much interested in the construction of this road. This road, if built, is to start at Syracuse, and run from thence to Cazenovia, through Nelson and Eaton, and intersect the Midland road at Smith's Valley, in the town of Lebanon.—*Cazenovia Republican.*

☞ We learn that arrangements have been completed in England for the construction of the New Lisbon Railroad, which, though a separate organization from the Atlantic and Great Western, will, when finished, form a very important branch, and afford a large traffic to the main road, leading as it does into one of the finest beds of coal as yet discovered, and easily mined.

☞ The gross receipts of the Northern (Ca.) Railroad for the half year ending July 1, 1868, were $275,073 34, against $271,306 55, being an increase of 2.81 per cent. over the corresponding period of 1867. The net revenue available for dividend was likewise considerably increased, it amounting $79,274 24, against $75,835 40, besides paying interest. The dividends of the company's bonds leaves a balance of $29,567 28, to be carried forward to the credit of interest fund.

☞ E. W. Cole has been elected President of the Nashville and Chattanooga Railroad Co.

TO RAILWAY CONTRACTORS.

THE GRADUATION, MASONRY AND BALLASTING of the following enumerated sections of the

Pittsburgh and Connellsville Railroad,

Are advertised for contract, and proposals for the same will be received at the Company's Office, in Pittsburgh, up to the

20th of SEPTEMBER, inclusive.

Commencing at the Uniontown Branch Junction, about a mile east of Connellsville, Sections 59 to 64 inclusive. Then Sections 65, 73, 74, 76, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 106, 110, 112, 115, 116, 117, 118, 119, 122, 128, 129, 130, 133, 140. All of these Sections are in the valley of the Youghiogheny River, up to Section 112 inclusive. Sections 115, 116, 117 are on the Summit, and embrace the Sand Patch Tunnel; and the remainder are in the valley of Wills Creek, Section 140 being about 5 miles from Cumberland.

Specifications of the work on the above Sections will be ready for delivery on the 1st of September, at the offices of the Company, at Pittsburgh and Cumberland, where contractors will obtain all necessary information to enable them to examine the line.

The Company reserves the right to reject all or a part of each bid.

B. H. LATROBE,
Civil Engineer.

August 10th, 1868. 5t34

WANTED IMMEDIATELY.—Three 33 inch eight-wheel railway cars, gauge 4 ft. 8½ inches. One passenger, one box and one platform freight car, new, or second hand if in good order, and of the best material and workmanship. Address "Cars," Post Office Box 3805, New York City, with full particulars as to description, price, and time and place of delivery. 33

750 MILES
OF THE
UNION PACIFIC
RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **103**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,
And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
AUGUST 12, 1868.

Notice to Contractors.

PROPOSALS will be received for Grading and Bridging the third (3d) Division of the Junction and Breakwater Railroad, from Georgetown, Delaware, to the Bay Shore at Lewes, 15¼ miles, until the 22d day of August, 1868. For specifications, plans, &c., &c., call on Hon. JOHN W. HOUSTON, Prest., at Milford, Delaware, or M. C. CONWELL, Engr., at Georgetown, Delaware.

Aug. 3, 1868. JOHN W. HOUSTON, Prest.

SPECIFICATIONS
FOR
PROPOSALS.

OFFICE NEW ORLEANS, OPELOUSAS AND GREAT WESTERN RAILROAD COMPANY.
New Orleans, June 6th, 1868.

The New Orleans, Opelousas and Great Western Railroad Company desiring that a connection shall be formed between their present terminus at Berwick's Bay, and the Houston and New Orleans Railroad, which terminates at the Sabine River, and which when completed, the (distance being 163 miles,) will connect New Orleans with almost the entire railroad system of Texas, the President and Directors of said Company, therefore propose to such party or parties as may undertake to fill up such gap, the following terms and conditions, to wit:

1. Will lease the right of way and the franchises now possessed by said company from their present terminus at Berwick's Bay to the town of Vermillionville, the grading of which is almost entirely completed for these 63 miles, and will, at the same time, lease the right under their charter to build the branch railroad from Vermillionville to the Sabine River, at or near Orange, the same having been already located by resolution of the Board of Directors. The distance between these points is 100 miles. The Company reserving to itself the right of way and transportation on payment of proportionate freights and passage money from the present terminus of the road to any extension towards Opelousas, of its road beyond Vermillionville.

2. The said lease to continue for a term of years to be agreed upon between the Company and the Lessees. At the end of the lease the property to be valued by disinterested parties, the Railroad Company to select three, and the Lessees three, the two, if need be, to call in an umpire whose decision will be final. The Railroad Company reserving the right to purchase said property at such valuation, but if not then promptly paid for by said Company, the lease to be extended for a further term of years, and so on, until finally purchased and paid for by said New Orleans, Opelousas and Great Western Railroad Company. The grading already made between Berwick's Bay and Vermillionville, to be valued by competent engineers at the time of entering into a contract, but not to be paid for by lessees until the end of the first lease, herein provided for.

3. The parties leasing to obligate themselves to connect with no other railroad which might hereafter be built, terminating at or near the City of New Orleans, and further obligating themselves to do no act which will infringe the rights under the present charter of said Company, and also to hold said company harmless against any loss which might result from acts committed on that portion of road now proposed to be leased.

4. Should the Lessees succeed in obtaining a land grant on the line of railroad beyond Berwick's Bay, it will be and remain the property of said lessees, this Company claiming none of its benefits, and incurring no portion of the responsibility attending it.

5. Transportation to be furnished said Lessees over the Company's road, as follows, viz:

The President, Directors and officers of the road, including engineers, superintendents, road masters and bridge builders free of charge. Transportation of laborers going out to be charged one-third the regular fare. Provisions and supplies to be charged one half of regular rates. Material, other than iron and cross-ties, to be charged one half of regular rates. Iron to be charged one dollar per ton, and cross-ties (if any) fifteen cents each. Lessees to load and unload the cars.

6. The road thus to be built shall be a first class railroad in every respect. The gauge to be the same as the Company's road—say 5 feet 6 inches. The iron used not to be less than 58 lbs. per yard.

7. The said Lessees to obligate themselves to commence said road within four months, and have it finished and in running order to the Sabine River, connecting with the Houston road at or near Orange, within three years from date of signing the lease.

8. In order to ensure the faithful performance of the contract the Lessee will be required to execute a bond to an amount, and with good and satisfactory security to the satisfaction of the Board of Directors.

9. The Company reserves the right to reject any and all bids.

Another proposition and for which proposals are also invited, is to lease the road, including depots, stations, rolling stock, etc., from Algiers, opposite New Orleans, to Brashear City, including the franchises of the Company beyond to Texas, under the following conditions:

1. That the party or parties proposing to lease shall state the least number of years he or they will lease the road, on the following conditions:

2. The accrued interest to October the 1st, 1868, on the mortgage bonds, (said bonds maturing in 1889,) to be provided for by the lessee.

3. The semi-annual interest on same bonds, accruing yearly after date, and payable on the first days of April and October of each year, say $160,000 per annum, to be also provided for by said lessee.

4. The road to be built over the route from Berwick's Bay to New Iberia, thence to a point at or near Vermillionville, thence in a westerly direction to a point on the Sabine River, connecting with the Houston and Beaumont road.

5. The building of the road to be commenced within four months after signing the contract of lease, to be prosecuted with all dispatch, and to be fully and finally constructed within three years from the signing of the lease.

6. The grading, culverts, etc., now made beyond Berwick's Bay, to be taken by the Lessee at a valuation to be ascertained by experts, one to be appointed by each party, in case of disagreement they to select an umpire, and to be paid for on such terms as shall be hereafter agreed on.

7. The road to be built, equipped and maintained during the entire lease as a first class road in every respect.

8. At the close of said lease, the said road, depots, stations, rolling stock, etc., from Berwick's Bay to the Texas line, shall be valued by experts, one to be appointed by each of the parties thereto, and in the event of disagreement, the two to select an umpire, whose decision shall be final. The value thereof thus ascertained shall be subscribed as stock in the present Company, it being well understood that all costs of maintenance, as well as expenses of operating the road, shall be at the exclusive charge of the Lessees.

9. The contract with Charles Morgon for running a line of steamers to Texas, extending to 1871, to be carried out by the Lessee in every respect.

10. The present road to Berwick's Bay, including depots, machine shops, rolling stock, bridges, etc., to be turned over to the Lessee after inventory and appraisement, and the said property, or property of like character and value, and like condition and good order, to be returned to the company at the expiration of said lease.

11. The Lessees, to ensure the faithful performance of the contract, to furnish security to the satisfaction of Board of Directors.

12. The said Lessees shall contribute and pay each year the sum of $5000, payable quarterly, to keep up and maintain the organization of the Railroad Company during the existence of this lease.

13. The said Lessees obligate themselves to do no act which may operate a forfeiture of the charter, and shall hold the said N. O., O. and G. W. R. R. Co. harmless against any and all acts of theirs.

Sealed proposals will be received at the office of the Company in New Orleans, No. 69 Canal street, until the first day of September next, at 12 o'clock, M., the Company reserving the right of rejecting any or all bids.

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

OFFICE No. 410 WALNUT STREET,
PHILADELPHIA.
Rolled or Hammered Car Axles, Bar Iron and Forgings.

RAILROAD TIES.

The undersigned are prepared to furnish Railroad Ties of **Hackmatack, Cedar, Pine, Hemlock** and **Spruce** in any quantity. Also every description of **Northern** and **Southern Pine, Oak** and **Spruce** for **Railroad Cars, Bridges, &c., &c.**

BRADFORD & RENICK,
71 Broadway, New York.

WILLIAM A. GUEST,

Banker and Broker,

25 Wall Street, N. Y.,

NEGOTIATES LOANS FOR
RAILROAD COMPANIES.
BUYS AND SELLS
RAILROAD SECURITIES
ON COMMISSION.
ALSO,
State, City & County Bonds.

IRON AND STEEL WIRE ROPE,

MANUFACTURED BY

JOHN A. ROEBLING,

TRENTON, N. J.,

FOR

INCLINED PLANES, MINING,
STANDING SHIP RIGGING,
SUSPENSION BRIDGES, FERRIES,
STAYS AND GUYS ON DERRICKS,
CRANES & SHEARS, ELEVATORS,
TILLERS, &c.

A large stock of Wire Rope constantly on hand. Orders filled with dispatch.

☞ For strength, size and cost see circular, which will be sent on application.

IRON BRIDGES, PIVOT BRIDGES,

AND

TURN TABLES.

F. C. LOWTHORP,

CIVIL ENGINEER,
Patentee and Builder,
TRENTON, N. J.

CHAPIN & WELLS,

BRIDGE BUILDERS,

86 Dearborn street,
CHICAGO, ILLINOIS.

Mill and Machine Shops, 721 & 723 S. Clark street,

Dock and Bridge Bolts, Bridge Materials and Dimension Timber, promptly furnished.

C. SHALER SMITH. CHAS. H LATROBE.

SMITH & LATROBE,

CIVIL ENGINEERS
AND

BRIDGE BUILDERS,

No. 49 Lexington Street,
Baltimore.

Design and superintend, or contract, for Iron and Wooden Bridges of all kinds, Turn Tables, Roofs of any width of span.

Particular attention paid to Hydraulic Engineering.

WILLARD FELT & CO.,

Stationers, Printers,

AND

BLANK BOOK MANUFACTURERS,

47 & 49 Liberty St., opp. Post Office, N. Y.

IMPORTERS & DEALERS

In Artists' and Engineers' Materials. Whatman's Drawing Paper; French, English and German roll Drawing Paper, white and tinted; Tracing Paper, in rolls and sheets; Tracing membrane; Tracing Vellum; Brown's, Hufty's and other Cross Section and Profile Papers. Profile Paper in continuous rolls; Water Colors; Lead Pencils; Field and Transit Books, &c., &c.

ENGINEERS' STATIONERY
AND
MATHEMATICAL INSTRUMENTS of all KINDS,
Long Profile and S Cross Section Paper, for sale by
JAMES W. QUEEN & CO.,
924 Chestnut, St., Phila.

A descriptive manual of Mathematical Instruments (a pamphlet of 112 pages) sent free on application.

New York, Saturday, August 29, 1868.

Railways in India.

Mr. Julian Danvers, the Government director in India, reports that there have been 349 miles of new railway opened for traffic during the year ending March 31, 1868. making the whole extent of line then opened 3,943 miles.

Upwards of 9,000,000*l.* has been added to the capital accounts of the companies during the year, making the whole amount of cupital which has been raised for railways in India to the close of March, 1868, to be 76,579,016*l.* Of this sum 60,048,871*l.* consists of shares or stock, and 16,530,145*l.* of debentures.

The total expenditure on the railways which have been opened, and on those which are now in course of construction, amounted during the same period to 75,071,656*l.*

The expenditure during the past year was about 7,000,000*l.*, and of this upwards of 4,000,000*l.* was expended in England for permanent way materials, locomotives, stores, &c., sent out from that country. This is the largest expenditure which has been incurred in any one year in England.

The estimated expenditure for the current year is 5,177,000*l.*, of which 1,791,000*l.* will be required in England, and 3,386,000*l.* in India.

The 75,000,000*l.* just mentioned as the amount which has already been expended does not, however, represent the whole cost of the undertakings. It shows only what the railway companies have paid. In addition to that, Government has granted all the land, the value of which cannot be taken at less than 2,500,000*l.* Inasmuch, too, as the rate of exchange for converting the pound sterling, subscribed by the companies, into rupees is fixed by the contracts at 1s. 10d. the rupee, and the value of the rupee has, during the construction of the works, averaged about 2s., the Government has contributed about 8 per cent. to the capital expended in India. This upon 45,000,000*l.* would amount to 3,600,000*l.* The actual cost of the railways is thus raised from 75 to 81 millions.

The revenue from the railways for the years 1866–'67 was only 32,337*l.* in excess of the previous year; but there was an increase of 962,984*l.* in that year's receipts over those of 1864–'65; so that in two years the revenue has increased upwards of 1,000,000*l.*

The gross receipts for the year ending 30th June, 1867, were 4,878,527*l.*, as compared with 4,537,235*l.* of the previous year. The working expenses were 2,537,812*l.* and 2,225,495*l.* respectively. The net receipts in 1867 were 2,337,300*l.* and 2,304,534*l.* in 1866. In 1867 the number of passengers was 13,746,354, of whom 13,074,980 were third class. In 1866 the number was 12,867,000. The sum paid by passengers last year for fares was 1,376,812*l.*, as against 1,278,580*l.* of the previous year; and the amount received for the conveyance of goods was 3,320,607*l.*, as against 3,091,723*l.* The train miles run were 10,980,319, and 10,120,920 respectively.

Some idea of the progress which has been going on may be formed by bringing the present in juxtaposition with ten years ago. Then about 300 miles of railway were open throughout all India, and about 2,000,000 people traveled on them; now there are nearly 4,000 miles, traversed by 13,746,300. The capital expended ten years ago amounted to about 20,000,000*l.*; now it amounts to upwards of 75,000,000*l.*

In 1857–'58 the net revenue derived from the railways was 111,446*l.*; last year it was 2,336,871*l.*; and, what is more remarkable, although the capital had increased from 20 to 75 millions, and the guaranteed interest in proportion, the net amount paid by the Government for guaranteed interest in the ten years 1857–'67 was about the same, viz.: 700,000*l.*

The amount for which the Government was last year responsible on account of guaranteed interest was 3,237,937*l.* Of this sum, however, about 2,500,000*l.* was paid by the companies themselves, so that the advances by Government really only amounted to little more than 700,000*l.* In the previous year the net amount so advanced was 800,000*l.*, and for the year before that 1,450,000*l.*

The whole sum which has been paid by Government for guaranteed interest since the commencement of the guarantee system now amounts to 22,215,505*l.*, of which about 9,500,000*l.* has been recovered from the railway companies, leaving about 12,000,000*l.* as their present debt, which is chargeable against the half surplus profits over 5 per cent. This sum represents the amount which the Government has actually paid. Spread over eighteen years it gives an average annual charge upon the revenues of India of 666,666*l.*

Mr. Danvers observes that one great advantage of the guarantee system is that it provides effectual means for keeping the capital and revenue accounts perfectly distinct. Every sixpence which is advanced by the Government for interest on the capital, both before and after the lines are opened, is charged against revenue. An account is kept of the sums so advanced, and the Government is reimbursed, under the terms of the contracts, out of the half excess profits over 5 per cent. Rules have, moreover, been laid down for the guidance of those who have to make up and examine the half yearly revenue accounts. True and real profits are carefully defined, and it is shown how they are to be ascertained. The confusion between capital and revenue accounts, which has prevailed so much among railways in England, and which has led to the undue increase of capital, and to the conferring upon the undertakings a deceptive value, is thus rendered impossible. Under these rules all the proper and legitimate outgoings and charges of a half year, whether applicable to the working or maintenance of the line, have to be determined and paid, or, if not actually paid, laid aside out of the receipts, before the amount applicable to dividend is

arrived at. Some companies have gone even beyond this, and have, Mr. Danvers thinks, wisely established reserve funds for maintenance purposes, the expenses attending the repairs and revenues of a railway being thus more equally and therefore more justly distributed.

☞ The Illinois Central Railroad Company will, on the 1st of October next, pay its seven per cent. Construction Bonds for $1,000 each, numbered from 3,001 to 4,000 inclusive, with 20 per cent. added to the principal thereof, upon their surrender at its office, in New York; after which day interest upon said $1,000 bonds will cease.

Produce and Provision Trade of Chicago.

The tenth annual report of the Chicago Board of Trade is just published. That part of the report which relates to the produce and provision market is of general interest, and we, therefore, give its statements under these heads as follows:

FLOUR.

The movement in flour during the past year shows a slight falling off, as compared with that of the previous year. The receipts for the twelve months ending March 31, 1868, were 1,648,906 barrels; manufactured by city millers during the same time, 609,606 barrels; stock on hand March 31, 1867, 62,693 barrels, making a total of 2,321,205 barrels. Of this amount 1,917,925 barrels were exported, and 328,355 barrels were consumed in the city, leaving 74,925 barrels as the stock on hand at the close of the fiscal year ending March 31, 1868.

The following shows the receipts (including that manufactured in the city) and shipments of flour for seven years:

	Received. Barrels.	Forwarded. Barrels.
1861	1,479,384	1,603,920
1862	1,927,371	1,828,164
1863	1,647,187	1,507,816
1864-'5	1,484,111	1,287,545
1865-'6	1,553,892	1,523,876
1866-'7	2,022,060	2,179,785
1867-'8	2,258,512	1,917,925

WHEAT.

The following shows the receipts and shipments of wheat during the past seven years:

	Receipts. Bushels.	Shipments. Bushels.
1861	17,385,002	15,835,953
1862	13,978,116	13,808,898
1863	12,461,554	10,759,152
1864-'5	10,887,436	10,249,330
1865-'6	9,242,108	8,098,968
1866-'7	12,286,287	10,341,549
1867-'8	13,483,261	10,050,451

CORN.

The following table exhibits the receipts and shipments of corn during the past seven years:

	Received. Bushels.	Forwarded. Bushels.
1861	26,369,989	24,372,725
1862	29,574,328	29,452,610
1863	25,160,516	24,906,934
1864-'5	13,197,340	14,182,644
1865-'6	26,100,319	25,228,526
1866-'7	33,929,632	32,953,530
1867-'8	25,223,468	21,880,682

OATS.

The following are the receipts and shipments of oats for seven years:

	Received. Bushels.	Shipped. Bushels.
1861	2,067,018	1,633,237
1862	4,688,722	3,112,366
1863	11,005,743	9,909,175
1864-'5	16,365,440	16,470,929
1865-'6	10,393,936	10,598,061
1866-'7	10,713,981	9,564,223
1867-'8	12,659,745	10,309,063

RYE.

The following show the receipts and shipments of rye for seven years:

	Received. Bushels.	Shipped. Bushels.
1861	490,989	393,818
1862	1,088,825	871,796
1863	747,295	683,946
1864-'5	1,077,776	898,536
1865-'6	1,169,180	1,022,200
1866-'7	1,683,925	1,489,895
1867-'8	1,276,614	1,130,782

BARLEY.

The following shows the receipts and shipments of barley for a series of years:

	Receipts.	Shipments.
1861	449,488	226,534
1862	872,053	532,195
1863	1,244,584	943,252
1864-'5	893,000	327,431
1865-'6	1,667,668	945,089
1866 '7	1,834,418	4,398,528
1867-'8	2,300,178	1,755,583

THE PROVISION TRADE.

The following shows the receipts and shipments of hogs, live and dressed, for seven years:

RECEIVED.

	Live.	Dressed.	Total.
1861	549,039	126,863	675,902
1862	1,110,971	237,919	1,348,890
1863	1,343,863	333,894	1,677,757
1864-'5	1,267,097	143,223	1,410,320
1865-'6	871,468	327,364	1,178,832
1866-'7	1,071,399	270,257	1,341,656
1867-'8	1,617,851	265,522	1,883,373

FORWARDED.

	Live.	Dressed.	Total.
1861	216,982	72,112	289,094
1862	446,506	44,629	491,135
1863	733,213	123,272	856,485
1864-'5	517,656	18,781	536,437
1865-'6	538,035	125,531	663,566
1866-'7	549,499	123,270	672,769
1867-'8	808,965	224,153	1,033,118

The following shows the number of hogs packed in this city during the past seventeen seasons:

	Number.		Number.
1851-'2	22,036	1860-'1	271,805
1852-'3	44,156	1861-'2	505,691
1853-'4	52,849	1862-'3	970,264
1854-'5	73,694	1863-'4	904,659
1855-'6	80,380	1864-'5	760,514
1856-'7	74,000	1865-'6	507,355
1857-'8	99,262	1866-'7	635,732
1858-'9	179,684	1867-'8	796,225
1859-'60	151,329		

The following shows the movement in beef cattle for seven years:

	Receipts.	Shipments.
1861	204,579	124,145
1862	209,655	112,745
1863	300,622	187,068
1864-'5	303,726	262,446
1865-'6	348,928	310,444
1866-'7	373,277	260,833
1867-'8	313,797	203,564

The following is the number of cattle packed in this city during seventeen seasons:

1851	21,806	1860	34,623
1852	24,663	1861	53,754
1853	25,431	1862	59,687
1854	23,691	1863	70,086
1855	28,972	1864-'5	92,459
1856	14,971	1865-'6	27,172
1857	34,675	1866 '7	26,998
1858	45,503	1867-'8	35,346
1859	51,606		

☞ The Birdsboro' and Wilmington Railroad is going ahead rapidly. The grading is pretty far advanced all along the line. The piers and abutments of the bridge over the Schuylkill at Birdsboro' are nearly finished.

North Eastern (S. C.) Railroad.

The earnings of this road for the years ending February 28, 1867, and February 29, 1868, have been as follows:

	1867.	1868.
From passengers	$120,018 40	$92,088 76
" freight	177,629 28	172,648 32
" Express Co.	12,355 75	6,723 53
" mails	7,771 92	7,772 14
	$317,775 85	$279,232 75
Expenses, viz:		
Maintenance of road	$83,861 57	$43,265 84
Motive power	66,012 72	57,813 13
Repairs of cars	45,379 50	20,912 57
Transportation exp.	39,069 65	37,346 76
Salaries & general exp.	16,764 60	14,317 52
	$251,088 04	$173,655 82
Earnings less expenses.	$66,687 31	$105,576 93
Add balance from previous year		8,460 27
Sales of old material		8,119 93
		$122,157 13
Against which there has been charged—		
Reconstruction	$9,683 85	
Adjusted claims during the war	11,212 55	
Interest on indebtedness and current interest	90,851 59	
		111,747 99
Leaving a balance of		$10,409 14

The total amount expended upon the reconstruction of the road, since the close of the war, has been $215,398 61 of which $102,398 49 was derived from sales of material, and the balance, $113,000 12, from transportation. This account, is now permanently closed.

The amount of second mortgage bonds, originally issued, was $300,000, of which $145,000 were sold; the remaining $155,000 were subsequently, pledged, and deposited with three trustees, as a security for a corresponding amount of preferred stock, say $155,000 on which an interest at the rate of 8 per cent. per annum, was guaranteed. This preferred stock is then virtually, a substitute for that amount of second mortgage bonds. Of the outstanding interest ($123,095,) about $100,000 has been placed in a temporary shape, satisfactory to the parties to whom it is due, and with whom, it is hoped, arrangements may ultimately be made for its permanent funding. The annual interest for which the company is responsible is $89,500. The report says:

It is proper that your attention should be directed to the early maturity of the company's bonds. A portion of the second mortgage bonds 145,000, becomes payable on the 1st September, 1868. We are under the impression that these can be extended, by the payment of the interest as usual, to the 1st September, 1869, on which date the first mortgage bonds will also mature. The renewal of the *entire* debt will then become necessary, but, under what forms and conditions it would be premature on this occasion to discuss, as our action at that time, will necessarily be determined by circumstances, of which we cannot now judge. This point will, therefore, be reserved for your future consideration.

It affords us pleasure to confirm to you the generally good condition of the road—indeed we believe there are few in the South, with which it will not favorably compare. Its machinery consists of twelve locomotives, all in fair order—one of these has been recently rebuilt, and may be considered a new machine; and the others, though advanced in age and service, can be kept in an efficient condition for another year, at a very moderate cost. We have sixty-seven box,

and forty-three platform cars; eight passenger, four second class, three baggage, and two mail and express cars. No addition to this equipment will be required the ensuing year, and our expenditures in this department, will be confined simply to keeping up to its present standard. The shops of the company are still retained at Florence, in the temporary buildings erected there several years ago. Although on a limited scale, they will answer our purposes, until the company's means shall permit their enlargement and removal to the city. The depots, station houses, tanks, &c., will be found in proper order.

But while the road is thus physically competent to meet every demand upon its facilities, the fact is not to be disguised, that the necessity for them *to any remunerative extent* does not *at present*, exist. Our road as you are aware, is essentially local in its character, and dependent for its income, upon a comparatively limited section; it has no extended links or feeders to widen the field of its operations, and consequently when from any causes, the business of the country thus tributary to it, is unfavorably affected, a severe reaction upon our revenues inevitably follows. As all are familiar with the circumstances which have brought about and are still contributing to this result, it would be needless to refer to them, or their probable duration.

So far as the probable results of the coming year are concerned, we apprehend, that the losses of the past will deter many planters from repeating, and others from extending, their operations, and hence, the probability of a curtailment, rather than an increase in the quantity of cotton and upward freights, to be transported the ensuing season. We shall be agreeably disappointed at finding it otherwise, but it seems to us, that this is already foreshadowed, in the limited quantities of guano and other fertilizers, now being sent into the interior, as compared with previous years. The prevailing difficulty has been, a want of capital; could this have been had at reasonable rates, the removal of the late tax on cotton, and its recently enhanced value, might have encouraged our planters to further experiments with the labor at their command, but while it is only to be reached by high rates of interest, and the pledge of securities outside of the crops to be grown, the recuperative process must be slow, and confined mainly to those who can comply with these stringent conditions. In this state of things, our policy is clear. We must conform to what we cannot alter. We should make every reasonable and proper concession to the development of the local business of the road, by as low tariffs as our necessities will permit, the encouragement of immigration and, in short, by every measure which would foster new enterprises, and diversify the products requiring our transportation. The opportunities for its application, have, so far, been rare, but whenever presented, we have sought to improve them. It is to be regretted that our financial condition is not one, to warrant the application of this policy to our tariffs, in its widest and most liberal sense. The latter are to a great extent, controlled by competing routes, and are so adjusted as to draw towards us all the produce fairly within our reach; still they are, and, of necessity, must be, somewhat higher than on longer and more favorably situated roads, with a much larger business. The common argument that, because we have them, our facilities should be employed at, or even less than their cost, rather than lose their immediate product, and the chances of future business, is not without weight, but an intelligent management will readily discriminate between those cases, when it can be judiciously applied, and others, where it simply covers a disposition to subordinate the interests of the company to those of the individual. All know that any business conducted barely at its cost, or under a competition only permitting a minimum and uncertain profit, cannot end favorably, *unless* its proportions are to be largely and speedily swelled thereby. It would seem reasonable then, that while our tariffs are only producing an income equal to our requirements, and are yielding no dividends to stockholders, they should be generally recognized and submitted to, as an unavoidable necessity. Our first obligations are to the company's bondholders, and its tariffs should be so arranged, as not to jeopardize the ability to meet them.

But while the income of the road may fluctuate with the varying conditions of the country—its expenses are measurably, under our control. At no period since its opening, have we been in a better position for their reduction, than at present. The recent renewals of many of the most costly portions of the road—its generally good condition, and the fair order of its equipment, should render this practicable for the ensuing year at least, without materially impairing the value of the property, or the safety and regularity of our trains. A rigid economy has been introduced into every department of the company's service, and as our expenditures will be confined only to such work as is absolutely necessary, we hope to accomplish a saving of twenty-five per cent. in this direction.

The equipment of the road consists of 12 locomotives, 8 first class and 4 second class passenger cars, 3 baggage, 2 mail and express, 67 box and 43 platform cars. Number of miles run, 166,800. Number of through passengers, 13,988; do., way, 27,992. Bales of cotton transported, 26,961. Bbls. naval stores, 34,072. Feet of lumber, 2,286,000.

The assets and liabilities of the company, February 29, 1868, were as follows:

Assets:	
Construction, equipment, right of way, &c	$2,148,130 65
Bills receivable	8,687 50
Stock in Cheraw and Coalfields Railroad, par value, $25,400	4,064 00
Post Office dues	1,295 32
United States Government dues	2,856 76
Southern express due	400 46
Stock in Society Hill and Marlboro' Bridge	2,300 00
Real estate	21,998 46
Cash	13,040 05
Balance of open accounts due to the company	1,268 42
	$2,204,041 62
Liabilities:	
Bonds given in part payment for real estate	$28,000 00
1st mort. bonds due Sept. 1, 1869	700,000 00
2d " " " " 1868	145,000 00
Preferred stock	155,000 00
Instalments on stock	898,950 00
Bills payable	33,341 44
Interest outstanding to be funded	123,095 43
Interest funded in certificates of indebtedness	104,990 80
Interest outstanding since 1st March, 1867, due in cash	5,254 81
Balance to credit of profit and loss	10,409 14
	$2,204,041 62

President.—A. F. RAVENEL.

Directors.—Hon. C. Macbeth, Daniel Ravenel, A. Macfarland, L. D. Mowry, J. R. Dukes, D. L. McKay.

Superintendent.—S. S. SOLOMONS.

Treasurer.—C. WILLIMAN.

☞ The Wellington, Gray and Bruce Railroad Company will receive proposals until the 10th of October, for the construction of the first section of the road from Guelph, Canada, to Fergus. Immediately on the passage of the by-law transferring the stock of the Great Western Railway held by the city of Hamilton to the credit of the new road, the work will be put under contract. The line is to be surveyed through to Lake Huron.

☞ TO INVESTORS.

SEVEN PER CENT. INTEREST IN GOLD.

PRINCIPAL ALSO PAYABLE IN GOLD.

The First Mortgage Bonds of the Rockford, Rock Island and St. Louis Railroad Company, as an INVESTMENT SECURITY, combining perfect safety, cheapness and profit, are unequaled by anything offered in the market.

They pay seven per cent. interest—Feb. 1, and Aug. 1—in gold coin, *free of Government tax.* The principal also is payable in gold.

The bonds have fifty years to run, and are convertible into stock at the option of the holder. A sinking fund is provided sufficient to pay off the whole mortgage at maturity.

Each bond is for $1,000, or £200 sterling. Interest is payable in New York or London, at the option of the holder.

These bonds are fully secured, being a first lien of $5,000,000 upon 200 miles of railway, costing $10,000,000, and traveling the finest district of Illinois; also upon 20,000 ACRES OF LAND, estimated to contain 100,000,000 tons of coal. These lands, on the completion of the railroad through them, will be worth more than the whole amount of the mortgage.

For all the coal this Company can produce there is a ready market; 1,000 miles of railway and the population of 30,000 square miles of territory can be supplied with fuel from its mines, more readily and cheaply than from any other quarter.

One-half the means required for the construction and equipment of the railroad, and for the purchase of coal lands, is derived from the sale of capital stock, to which large subscriptions are made along the line of road and elsewhere.

The work of construction is proceeding with great rapidity, and the first division of fifty miles, giving an outlet to the coal, will be in full operation by 1st January next.

The estimated earnings of this line of railway, with its coal business, are threefold what will be required to pay interest on its bonds.

The trustee for the bondholders is the UNION TRUST COMPANY of New York.

At 95, the present price, and with gold at 40 premium, the bonds pay an income of over 10 per cent. per annum.

For sale at the office of the Company, No. 12 Wall street.

Governments and other securities received in exchange. H. H. BOODY, Treasurer.

Central Argentine Railroad.

A letter to the N. Y. *Herald*, dated Rosario, July 16, says the Central Argentine Railroad will soon resume its course towards its inland terminus—Cordera—and when it reaches that point it will be a happy day for the interior provinces. The receipts of this road have been trebled during the six months ending July 1, as compared with the six months previous. This railroad is a boon to the republic, which the people poorly appreciate as yet; but they are gradually opening their eyes to its advantages, and it is infusing fresh life among the people and is rousing them from the dormant apathy which has heretofore characterized the native population of the provinces.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, August 29, 1868.

Stock Exchange and Money Market.

There has been much less animation in the Money line, since our last. The outflow of currency to the interior has been on a less extensive scale. The local demand from speculative and mercantile sources has been quite moderate for the season. Rates have been more favorable to responsible borrowers, call loans closing at 3@5, generally 4; and prime discounts at 6@7 per cent. per annum. The city banks have been losing specie, lawful money, and deposits quite heavily; while the U. S. Sub-Treasury has been enabled to largely augment its cash reserves, which are now some seven millions more than they were at the date of our last review. The deposits of the city banks, on the other hand, fell off about 7⅛ millions; and the legal tender and specie hoards were respectively reduced over three millions. The offerings of money on call have nevertheless been more liberal, especially on private account. Failing to find adequate employment for their balances, money lenders have been investing quite freely, within a day or two, in the public funds at the low ruling figures, in the hope of being enable to market them later in the season at a handsome profit.

The specie reserve of the city banks is now $19,768,681, against $6,028,535 same time last year. The city bank deposits are now $216,435,405, against $188,744,101 week ending Aug. 24, 1867. The legal tender reserve amounts to $69,757,645, against $64,960,030 same time last year. The circulation now stands at $34,137,627, against $23,736,249 same time last year. The loans are now $275,245,781, against $250,697,679 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $101,718,092 a day, against a daily average of $80,422,325 the preceding week, and $97,834,064 the week ending with Aug. 8, 1868. The current week's exchanges average about $88,263,129 a day. The city banks, last week, lost $3,185,169 of specie, $3,177,836 of legal tender, and $7,125,682 of deposits. They reduced their loans, $2,562,839; and increased their circulation, $23,640.

The New York Gold Exchange Bank reports for the week ending Saturday, the 22d day of Aug., 1868. the average amount of loans and discounts as $1,034,112; average amount of specie, $917,328; average amount of deposits, $1,380,014.

The Philadelphia Bank movement the past week shows an increase in loans of $476,966; a decrease of $11,344 in specie; a decrease in legal tenders of $5,105; a decrease of $605,927 in deposits; and a decrease of $1,412 in circulation. The Bank Clearings show a decrease of $453,358, and the balances, a decrease of $567,131.

The outstanding amount of coin certificates on the 1st of Aug., was $22,414,000, against $20,298,180 on the 1st of June, 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $382,000, and retired $2,791,485 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during July, reached $8,939,060.

The U. S. Sub-Treasury receipts, week ending with Aug. 22, were $11,420,480, including $2,904,486 from customs duties; payments, $9,834,009, including $208,000 of coin interest; balance at the close of the week, $85,876,692, against $84,290,221, at the close of the preceding week, showing an increase of $1,586,471. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $3,775,865 including $611,000 from customs; and payments, $2,447,865; on Tuesday, receipts, $4,344,871 including $681,794 from customs, and payments, $1,232,905. The balance at the close of business on Tuesday stood at $90,416,660, against $83,693,437, a week previous; and $79,418,886, on Aug. 12, 1868. The aggregate receipts of the office from all sources in July, were $94,561,982; aggregate payments, $103,554,458. The balance on the 1st inst., was about nine millions below that on the 1st ult., which amounted to $89,125,661.

National Bank notes to the amount of $83,300 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,382,006, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,465,136, leaving, with the

existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,917,870. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,824,300; and for the public deposits, $38,052,350—making a total of $379,876,650. The Treasury Department last week redeemed and destroyed $537,000 of worn and mutilated fractional currency, and issued $1,695,627 of new. The outstanding amount of fractional currency on the 1st of August was $31,867,818, against $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been up to a fair average, in their yield, during the week. The customs are increasing quite encouragingly. The excises, last week, yielded some four millions; customs at the port of New York, $2,904,486, and at the outports about $975,000 (in coin) more, making the grand total income for the week equal to about $9,624,275 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $29,500,000.

Gold has been less confidently dealt in. The speculative inquiry has been much less active. There has been only a light export drain. The demand for custom house purposes, however, has been quite active. The extremes of the week have been 146⅛ and 143½, and the latest quotations on Wednesday were 144⅝@144¾. There were some imports of specie from Great Britain reported, during the week. The California steamer delivered $844,325 on Saturday. The exports of specie, last week, were less than $650,000. Thus far, this week, they have been confined to $17,000 on Monday to Havana, and $390,686 on Tuesday to Hamburgh. No shipments were reported on Wednesday.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $4,956,109, against $2,021,420 same time last year. The customs demand for Gold last week, averaged $494,333 a day; thus far, this week, it has been equal to $646,397 a day, or equal to a weekly aggregate of $3,878,382. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $282,745 and from California, $844,325. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $74,862,966, against $80,062,915 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $28,300,048, against $19,939,520, in 1867, showing an increase thus far in 1868, of $8,360,528. The exports of specie, from this port, last week, were $648,923, against $595,533 same week last year; total, since Jan. 1, 1868, $63,887,110, against $39,872,171 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $208,000; since Jan. 1, 1868, $59,965,581, against $39,617,199. The specie exports from San Francisco, from Jan. 1, to July 23, 1868, were $22,384,285, against $24,994,670 same time last year.

Government received $4,854,786 from customs at the port of San Francisco, from Jan. 1, to July 28, against $4,184,000 same time in the preceding year.

Foreign exchange has been in better supply and less request at slightly modified prices. There has been a heavier amount of produce bills on the market, with comparative little call from buyers. Bankers' prime sixty day bills on London closed on Wednesday at 109@109⅜, and on Paris to 5.21¼c.@5.16¼; sight bills on London to 109⅜@109⅝, and on Paris to 5.16¼c.@5.13¾. The offering of produce bills has been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,568,654, against $2,994,242 same week last year; total, since Jan. 1, 1868, $108,630,209, against $122,420,131 in 1867; and grand total, during the fiscal year ending July 1, 1868, $179,784,280, against $195,544,905 in 1866–'67.

Government securities were quite heavy, and pressed for sale most of the week. In the absence of any considerable demand, prices declined materially. The lowest sales were made during the forenoon of Tuesday. Through the afternoon of that day, and all of Wednesday, the dealings were unusually extensive, leading to a rise of fully ¾@1¼ per cent. The transactions were particularly heavy in the later issues of the Five-twenties, which showed the most notable improvement. A majority of the recent street sellers were free buyers at the ruling quotations. The ease in money favored buoyancy in the funded obligations. The offerings of bonds were not as urgent as they had been through the past week. Very few orders to sell were received by mail, and the few that came to hand were of little moment. Many of the banking institutions evinced a disposition to purchase the six per cents at current low prices, rather than loan their means on call at three or four per cent. Some importations of 1862 Five-twenties were reported, within the week. These imports were mostly exchanged for the later issues, directly, or indirectly, by sale and purchase.

U. S. sixes of 1881 closed here on Wednesday at 113½@113⅝; U. S. Five-twenties of 1862, 113⅛@113¼; U.S. Five-twenties of 1864 at 109⅝@109¾; U. S. Five-twenties of 1865 at 110¾@111; U. S. Five-twenties of 1865, consolidated, 108¼@108⅜; U. S. Five-twenties of 1867, 108⅛@108¼; U. S. Five-twenties of 1868, 108⅛@108⅜; U.S. Ten-forties at 108¼@108⅜, U.S. Six per cent. currency bonds, 100¾@101¾. The brokers are buying the outstanding compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

September, 1865..118¾ | October, 1865....118¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 12.	Aug. 19.	Aug. 26.
Consols	93⅞	94⅛	94¼
U.S. 5-20's of 1862	72	71⅝	71¾
Erie	36¾	31¾	32
Ill. Central	92½	91¼	91¾

The railway and miscellaneous share property broke down severely in price, early in the week, under the hammering process, as applied to Erie more particularly, and the market became quite feverish and panicky. Erie shares were depressed to 44 last Thursday. Subsequently, there was a sharp, though fitful improvement, and the market closed with reviving animation and buoyancy.

General business has been less active in the produce line. Breadstuffs have declined, provisions have advanced. Cotton has been in fair request, closing more firmly. Middling upland cotton closed steadily, but rather tamely on Wednesday at 30½ cents per lb. The stock of cotton now here is estimated at about 32,500 bales. The receipts at the port this week, have averaged only about 300 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,189,500 bales, against 1,871,000 bales same time last year; exports, same time 1,676,000 bales, against 1,555,000 bales same time last year; stock on hand at latest dates, 52,500 bales, against 97,500 bales same date last year. At the Live Stock market, this week, Beeves have been slow of sale at from 10@16½c. per lb.; week's receipts, 5,583. Veal calves have been less plenty, and have been in good request at from 6@12c. per lb.; receipts, 2,212. Sheep and lambs in large supply and depressed, ranging from 3@7½c., and 5@8½c., respectively; receipts, 40,965. Swine have been fairly active at from 9@11⅝c. per lb., all live weight; receipts, 18,739. At the monthly auction sale of Scranton coal, 50,000 tons were disposed of at much firmer prices, ranging from 4.32½@5.55 per ton of 2,240 lbs., deliverable at Elizabethport, N. J. Foreign merchandise has been moderately inquired for at generally uniform quotations. The total imports of foreign dry goods, last week, were $2,897,131, and the total amount marketed $2,702,300. The value of foreign merchandise imported last week, was $3,747,159—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $6,644,290, against $4,276,594 same week last year; from Jan. 1, 1868, $165,142,622, against $172,953,818 same time in 1867; and year ending July 1, 1868, $238,283,518, against $269,831,007 in 1866–'67. The freight market has been less active, and rates have been quoted lower. For Liverpool we quote flour at 1s. 4½d. by sail, and 1s. 6d.@1s. 7½d. by steamer, per bbl.; grain at 2d. by sail, and 2½@3d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{16}$d. by sail, and $\frac{3}{16}$d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 445.

The New York exports, exclusive of specie, for the week ending Aug. 25, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$2,994,242	$3,568,654
Prev. reported	119,425,889	105,061,555
Since January 1	$122,420,131	$108,630,209

The imports for the week ending August 22, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$2,318,692	$2,897,131
Gen. merchandise	1,957,902	3,747,159
Total for the week	$4,276,594	$6,644,290
Previously reported	160,538,874	155,532,525
Since January 1	$164,815,468	$162,176,815

The balance in the Sub-Treasury on Wednesday was $91,293,577 56.

Rockford, Rock Island and St. Louis R. R.

First mortgage, 50 years, 7 per cent. Convertible Sinking Fund, Bonds of the Rockford, Rock Island and St. Louis Railroad Company, principal and interest payable in Gold, free of Government tax.

For sale at 95 and accrued interest in currency, at the office of the Company, 12 Wall st.

Governments and other securities received in exchange.

H. H. BOODY,
Treasurer.

Woodstock Branch Railway.

The work is rapidly approaching completion. It is now ballasted to within a mile of the junction of the St. Andrews Line, and will be open for traffic by the last of the present month. Two Excursion Trains have passed over it to St. Stephen, and the Government engineer has examined the road, and lodged in the hands of the President a certificate of approval. The distance from the junction into Woodstock is 11 miles. The Houlton Branch Railway as surveyed will join the St. Andrews Line at Debeck Station a few miles below Richmond.

Pittsburg and Connellsville Railroad.

The Cumberland (Md.) *Union* calls attention to the fact that the chief engineer of the Pittsburg and Connellsville Railroad Company has invited proposals until the 15th of September for the graduation, masonry and ballasting upon the unfinished sections between Cumberland and the Uniontown junction, one mile from Connellsville, and adds:

The sections to be let include all the heavy work on the road, and eight of them lie between this and Sand Patch Tunnel. Section 140 is the nearest to this point, being about five miles from town, in the Will's Creek valley. It will be peculiarly gratifying to our citizens to know that this work is to be commenced with such a degree of energy, and more so that this end of the road is to be pushed forward at once. Our fellow-citizen, Mr. John Humbird, is working the tunnel, and we have no doubt others of our citizens will secure contracts. The company have the means to build their road now, and they will do it. In two years we may certainly expect to have trains running between this city and Pittsburg, and then will be opened up the shortest route between the West and the sea coast—a route which must of necessity eclipse all others.

Intercolonial Railway.

The Newcastle *Union Advertiser—Extra* says that the "Major Robinson route for the Intercolonial Railway has been chosen, the formal consent of the British Government given, and the money partly borrowed already.

"The work commences at the Nova Scotia boundary, Metapedia and River du Loup immediately. Large party now locating the track at Metapedia. Commissioners to be appointed first meeting of Ottawa Cabinet—probably in three weeks.

"Railway office now opened in Dalhousie for Surveyors, &c. Contracts to be given out at River du Loup and Metapedia soon; also at Miramichi soon as crossing located.

"In honor of the news the town of Dalhousie is gaily decorated with flags, and one hundred cannon shots fired."

Harlem River and Portchester Railroad.

The directors of this road are: N. A. Cowdry, Francis Morris, John Hunter, John Schuyler, Matthew Taylor, N. W. Stuyvesant, J. H. Wainwright, James H. Benedict, James S. Wells, Le Grand Lockwood, Lewis B. Brown, Julius Wadsworth, and E. C. Benedict. President, N. A. Cowdry; Secretary, John Schuyler; Chief Engineer, John C. Campbell. The final surveys for the route are now being made by Mr. Campbell, and thus far he has made very satisfactory progress. Many persons, whom it was supposed would oppose the construction of the road, now manifest the most friendly spirit in the matter, and cheerfully concede the free right of way. It is expected that the surveys will be completed, and the specifications prepared in time to give out the work very early the ensuing Fall.

☞ The Grand Trunk Railroad of Michigan and the Grand Trunk Railroad of Northern Indiana, have consolidated, the new company taking the name of the Michigan Air Line Railroad.

Railroad Earnings.--Weekly.

The earnings of the Michigan Central Railroad for the 3d week in Aug., 1868, were... $92,571 85
Corresponding week of previous year.. 94,630 19

Decrease $2,058 34

The earnings of the Chicago and Rock Island Railroad for the third week in Aug., 1868, were..... $125,900 00
Corresponding week of previous year. 125,226 00

Increase $674 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week in Aug., 1868, were..... $101,344 10
Corresponding week of 1867..... 97,729 00

Increase $3,615 10

The earnings of the Chicago and Northwestern Railroad for the 3d week in Aug., 1868. $299,788 79
Corresponding week previous year .. 226,275 08

Increase $73,513 71

The earnings of the Marietta and Cincinnati Railroad the 3d week in Aug., 1868.. $31,022 00
Corresponding week previous year.... 24,996 00

Increase $6,026 00

The earnings of the Chicago and Alton Railroad for the 3d week in Aug., 1868.. $131,164 00
Corresponding period previous year . 112,000 00

Increase $19,164 00

The earnings of the Detroit and Milwaukee Railroad for the third week in Aug., 1868, were $39,674 34
Corresponding week of 1867..... 37,520 84

Increase..... $2,153 50

The earnings of the Western Union Railroad for the 3d week in Aug., 1868,..... $21,025 99
Corresponding week previous year.... 17,177 49

Increase $3,848 50

Canals and Government Roads in Ohio.

The Columbus *Ohio Statesman* gives the following statement of the length of canals and government roads in that State:

	Miles.
Ohio canals and appendages	342
Miami and Erie	316
Walhnoding	25
Hocking	56
Muskingum improvement	91
Total	830
Western Reserved and Maumee road	31
National road	191
Total	222

☞ Ground has been broken for the Short Cut Railroad, between Newburgh and Turner's, on the Erie Railway. The distance from Newburgh to New York *via* this road, will be nearly the same as by the Hudson River Railroad. The right of way for nearly the whole length of the route was ceded free to the company by the owners of the property through which the road passes.

☞ The town of Middletown, Conn., has voted, 468 to 70 to take $200,000 of the New Haven, Middletown and Williamantic Railroad stock, and appointed an agent to make the subscriptions.

☞ The Chicago, Rock Island and Pacific Railroad is now running fifty-two miles west of Des Moines, and will soon reach Council Bluffs.

From the Troy Daily Times.

The Bessemer Process.

PRODUCTION OF CHEAP STEEL IN AMERICA.—COMPLETION OF THE GREAT WORKS AT TROY.—DESCRIPTION OF THE VARIOUS BESSEMER WORKS IN THIS COUNTRY.—THE NATURE AND VALUE OF THE IMPROVEMENT.

The changes beheld by Rip Van Winkle when he last descended the Kattskills, are hardly remarkable when compared with the chemical and engineering wonders to which we have awakened after twenty years of comparative lethargy. All on a sudden, fresh fountains of force and new veins of precious material seem to have burst out of the earth; already they have possessed every artificial motion and structure, and are embodied in the organization of every-day life. Among the more remarkable of these changes—ocean telegraphy, steam transportation, and engineering construction—the most wonderful and far reaching—the realization of the alchemists' dreams, is Chemical Transformation. All the world is the stage upon which its wonders are the glittering spectacle, and we turn rather to the Arabian Nights than to sober history for an index to the coming acts. Yet the powers behind the scenes are neither furies nor fairies, but brains and brawn. It is neither magic nor alchemy, but straightforward inductive reasoning, and downright, patient, organized, costly work that lays open the great unknown and utilizes its treasures.

The modern revolution in metalurgy is, perhaps, less striking, but more wonderful than all the others. The wonder of ocean telegraphy is new every morning, while the furnace smokes silently and unobserved. But the smoke of the furnace will tell you tales of nature's secrets unlocked, of startling transformation, of fathomless search, of baffling experiment, of patient endeavor, of endless obstacles, of intellects gone mad, of money burned up, of a forlorn hope fighting against the Powers of the Air, but fighting to win.

Of all the agencies in the material progress of the times, iron, in its various forms and combinations, holds the first place. Its loss would be a calamity only surpassed by the loss of bread; while its cheaper, wider, and better production would electrify every human enterprise. But cheap iron is not to be had for the asking. Nature has surrounded it with every poison and subjected it to every malady. Sulphur, phosphorus, silicium, and endless impurities hang about it from the ore-mine to the market, and its medicines—Manganese, Chromium, Aluminium, and its various healthful alloys, are subtle and intractable. Too little carbon is as injurious as too much; combinations helpful for one use are hurtful for another.

And the production of cheap iron draws not only upon chemistry but on engineering for constant and vital aid. The production and maintenance of uniform and excessive heat; the quality and structure of vessels to resist it; the multiform and powerful enginery to handle and fashion the incandecent masses, the strength and quality of materials and proportion to resist the strain and wear; the toilsome and hazardous searches for knowledge; the education of labor; the liberal risks of money, the conservation of capital—these are some of the clashing and difficult problems that beset the production of iron in the form of cheap and useful alloys.

We have thus briefly referred to the grandeur and the difficulty of the great material problem of the age, not to account for failure, but to celebrate success. Among the many workers who have steadily advanced the art, a few strong men have revolutionized it; and the names of Cort, Neilson, Siemens, and foremost of all Bessemer, will be landmarks in its history wherever and as long as iron is used.

We purpose to allude briefly to the composition and production of iron and steel, and to the nature, conduct, value, and history of the Bessemer Process, and to describe in some detail the Bessemer works and manufacture in this country, and more especially as established in this place by our distinguished citizen, the Hon. JOHN A. GRISWOLD, upon the occasion of the first production of steel rails at his works.

THE OLD PROCESSES.

The ore of the mines is iron combined with an excess of oxygen and mixed with numerous impurities. The great body of white hot coal in the blast furnace not only melts the ore, but sublimates its volatile parts, liquefies others, and gives to others still the power to combine with the fluxes put in with the ore and to run away in slag. But in clearing one obstacle the iron thus set afloat grounds on another. The carbon of the coal only turns out the oxygen from the ore to sit down in its place; so that the crude or pig iron of commerce is a compound of iron with say five per centum of carbon and two or three of silicium and other metals and minerals, helpful or hurtful as the case may be, which the blast furnace process either put in or failed to remove. Cast iron is comparatively weak, fatally brittle, and utterly incapable of being wrought. To render it strong, ductile, and malleable, the carbon, silicium, and other impurities must be removed; but the poison of yesterday is the medicine of to-day, and we now put it into the bed of a reverberatory furnace and doctor it with oxygen, externally applied in draughts of air, and taken internally in powders of ore and forge scale. The patient is meanwhile kept very warm, about 3,000 degrees Fahrenheit, which so relaxes the hold of the disease that the oxygen easily spirits it away in the form of gases, and the squeezers and rolls bleed it off in the form of slag. This is puddling, and the rejuvenated product is wrought-iron, which is the nearest approach to pure iron that we have in the engineering arts.

Wrought-iron, however, is not cast into solid homogeneous masses of any dimensions like steel—it is only produced in small masses which must be welded together; but the high plastic heat necessary to squeeze the particles into contact, is also the temperature of spontaneous chemical change; so that the ever-lurking oxygen of the air again seizes the iron and reconverts its surface into a kind of ore, and therefore welds are uncertain. Wrought-iron is soft, it is not sound and homogeneous, and compared with steel, it is weak. To produce steel, then, we again retrace our steps and put in carbon, of which we just now had too much. The wrought-iron is broken up, mixed with carbon and manganese in a crucible, melted, and cast into ingots of steel—the highest refinement?—no, pure iron would be utterly unfit for the engineering arts: but the highest combination of natural substances known in the arts—steel, an alloy of iron, and from a quarter to a whole per centum of carbon, according to the hardness required, and traces of other metals.

You will thus observe that to make steel, you take a little iron and a little carbon and a few condiments, apply a hot fire, and there you have it—steel—as simple as the cookery book. But oh! the years of conflict with elements all too subtle and poisons all too willing, before the little niceties that make the difference between success and dead failure were found out at all—and the labor, the care, the skill, the fuel, the machinery, the power—not in a little labratory upon which you can turn the key, but throughout acres of bricks and mortar, boilers and engines, rolls and hammers, furnaces and crucibles, all surging with pent-up energy and fervent heat, day and night, year after year. So that the receipt for making steel would rather be, take great perseverance and equal portions of the knowledge of books and the knowledge of practice—mix them well with

no end of money, and then if you know how and have good luck, you can make a grand success of it.

THE BESSEMER PROCESS.

In the year 1855, Mr. Henry Bessemer of London, aware, indeed, of certain attempts at a cross-cut from pig iron to steel, but rather discouraged than stimulated by previous failure, determined to avoid the roundabout and costly process heretofore pursued. He said crude pig iron is iron and much carbon—steel is iron and little carbon. I will burn out the excess of carbon, and with it the other impurities; and the carbon itself shall be the fuel to burn them out. I will blow air into the liquid iron; the oxygen of the air at that temperature has greater affinity for the silicium and the carbon than it has for the iron, and so will take them away, and leave either pure iron, or iron carburized to any degree required, in proportion to the extent of the blowing, which is steel—steel of every quality, from hard and white for tools, to soft and gray for the ten thousand purposes of machinery.

To the hearing of practical iron workers, a man never told a more splendid nor a wilder dream than this. But he fought it out on that line. He spent a large fortune of his own, and the fortunes of his sanguine friends. He struggled with every variety of failure and embarrassment. He smarted under jeers and opposition. He saw rivals toiling on every hand to mend the weak places in his system, and call it their own. He has not, indeed, realized quite all he set out for, in its perfection, nor has he avoided nor ignored the help of other men. But although the Bessemer process to-day cannot turn every variety of pig iron into steel, it is applicable to three-quarters of the good irons of commerce; it is, with fair materials, less liable to uncertainty, and less dependant upon skill than the processes it avoids; it produces, at a slightly increased cost, a material twice as strong as wrought-iron, and what is of vastly greater importance, perfectly solid and homogeneous—a material singularly well adapted to rails, axles, shafting, boiler and ship plates, and heavy machinery. Already the product in various countries is some two hundred and fifty thousand tons per year.

EARLY DIFFICULTIES OVERCOME.

Before considering the conduct of the Bessemer process, it is necessary to bear in mind, 1st, that the grand value of Bessemer metal over puddled metal, is due to its being produced in a *fluid state*; 2d, that while cast-iron is easily liquefied at a temperature of 3,000 degrees, wrought iron or soft steel can only be kept liquid at a temperature of at least 5,000 degrees, which is quite beyond the convenient and practicable capacities of fuel and furnace material as ordinarily employed.

For nearly a century, the partial decarburization of pig iron has been accomplished by blowing air upon (and in some cases into) a melted mass of it. But the liquidity of the mass was only maintained by contact with an intense coal fire. The combustion of the carbon by the air was so slow and so limited in extent, that the iron was rather chilled than heated by it. This was the "finery" process, and was merely preparatory to puddling; the product was still cast iron.

Some years before Bessemer began his experiments, Mr. William Kelly of Kentucky advanced the finery process by a great stride, but left it still far short of practical steel making. He blew air into the iron just smelted from the ore, and lying in the hearth of a blast furnace, and partially decarburized it, but not without the liquefying agency of the mass of fuel above. He afterwards blew streams of air into melted iron contained in a covered brick vessel or chamber, without fuel. The almost invariable chilling of the iron, after repeated experiments with various forms of apparatus, and extending over several years, led to the suspension of further trial in this direction. The subsequent success of the Bessemer process, however, revived the claims of Mr. Kelly. The precise legal status of the two inventors has not, fortunately for the public as well as for the parties immediately interested, been brought to test, the various interests having been combined.

At this point we are prepared for the inquiry—What *is* the Bessemer process? If the old finery did not fulfill the theoretical specification, Kelly's certainly did. Here were carbon and silicium in the iron, but all ready to leave it upon the heated appeal of oxygen; here was plentiful oxygen spread over and bubbling through it, and here was the ample heat of three thousand degrees. Still the reactions were irregular, and impracticable.

Just here Mr. Bessemer introduced a radically new element, that made all the difference between failure and success. To describe his process as the introduction of oxygen into melted iron, is to play Hamlet without the prince. Bessemer's is not strictly a chemical process. The chemical reactions will look out for themselves, but they must have an adequate chance, and this is what Bessemer for the first time gave them, by mechanical means, viz.: *the mechanical force of numerous blasts*—not sluggish drafts, but roaring *blasts* of air, blowing the melted iron all into spray, so as to give the oxygen and the carbon hundreds of square feet of surface contact, so that every drop of iron should be enveloped with air. Thus, and thus only, the combustion is so perfect and rapid, and so diffused throughout the whole mass, that the two grand desiderata are attained—1st, the decarburization is effected without the use of other fuel; and 2d, the product is liquid and can be cast into homogenous masses.

To accomplish these results, Mr. Bessemer developed the radically new machinery and apparatus which, with various extensions and modifications, is everywhere used. It consists principally, of the converting vessels mounted on trunnions, and so shaped that the liquid metal can lie quietly in it while the tuyeres (air admission) and the entrance or mouth of the vessel lie above the metal line, and so that the mouth becomes a chimney and the tuyeres are brought beneath the metal, when the converter is turned upright. He also, after great trouble, developed a refractory material (chiefly silicious stone), and a mode of lining the converter adequate to the great heat and wear. The general arrangement of casting pit, ladle, ladle and ingot cranes, regulator and other plan to be hereinafter described, were rapidly developed by Mr. Bessemer. During ten years of his first practice, he advanced the machinery of the new art to a much higher degree of perfection than has yet been attained to in the old processes.

But Mr. Bessemer had no sooner conquered this difficulty than he encountered another and equally serious one. Except when a few of the choicer irons were employed, entire decarburization left the product "red-short," or incapable of malleability at a red heat, and therefore utterly useless. To stop the blowing at such a point as should leave in sufficient carbon to cure the red-shortedness and constitute a mild steel, was on the whole impracticable, because there is no adequate indication of *degrees* in decarburization, and the accuracy of blowing through a fixed time, would be impaired by varying heat and other circumstances. Here, then, were the impossibility of definite degrees of decarburization on the one hand, and the spoiling of the product by complete decarburization on the other hand.

In studying Mr. Bessemer's numerous patents and writings, we observe that he clearly understood this difficulty, and approached very near to its solution. Indeed, he rather vaguely described, in several patents, perhaps without seeing the end from the beginning, substantially the remedy afterwards patented by Mr. Robert Mushet.

The indications of complete decarburization by blowing air into melted iron, are as distinct as the time of day on a clock. The flame at the converter mouth suddenly decreases in volume and loses—not its own brightness, but its power of illuminating other things. But the product is valueless. Mr. Bessemer vaguely conceived, and Mr. Mushet definitely specified the finishing touch in the great art—*re-carburization*. A definite weight (three or seven per centum) of a pig iron, containing not only carbon but manganese (either Franklinite or Spiegeleisen), is melted and run into the decarburized iron. At this excessive temperature—not less than five thousand degrees—the oxygen and other impurities that make the iron red short, come out of it with great commotion, and enter into the carbon and manganese thus added, forming an intense flame and copious slag. A part of the carbon combines with the iron, thus producing steel. All this is the work of a moment, and the thorough reaction is due to the excessive temperature. The oxygen which is removed by the carbon (or chiefly by the manganese), was produced by the oxydation of some of the iron, by the blast of air. This, and the sulphur, and some other impurities, now removed by the manganese, were what made the product red-short before recarburization. The steel is now cast into ingots, which are malleable at a high heat.

But Mr. Bessemer's troubles did not end here. The product was still uncertain, though often uniform and excellent. Some subtle impurity was still lurking in some obscure corner—now appearing and now retiring. To find it, Mr. Bessemer put every iron and material employed, through a costly and thorough course of chemical analysis and so discovered phosphorous to be the arch-enemy. And to this day, irons containing above two hundreths of one per centum of phospherous cannot be employed to advantage. Experiments to remove or neutralize it are in progress, and greater obstacles than this have been overcome. Mr. Bessemer also determined the amounts of other materials—silicium, sulphur, etc—that affected his process, and with Mr. Mushet's assistance (satisfactorily acknowledged) has presented to the world, not merely a theory, but a perfected process and adequate machinery, for carrying it out. It will thus be observed, that however greatly the public is indebted to Mr. Bessemer's inventive powers, it owes still more to his indomitable *pluck*.

To be continued.

Welland Railway.

The annual meeting of this company was held in London, July 1. The revenue account showed that the receipts for the year 1867 amounted to 14,099*l*. The working expenses to 13,717*l*., and the loss on American currency to 1,019*l*., making 14,736*l*., showing a deficiency or loss on working the railway of 637*l*. The total receipts for propellers or steamboat service during the year amounted to 7,094*l*. The expenses on working them to 8,787*l*.. and the discount on United States currency to 1,999*l*., together 10,786*l*., showing a loss on working the (propellers) steamboats for the year 1867 of 3,692*l*., which, added to the loss on working the railway, amounted to 4,329*l*. The expenditure on capital account amounted to 329,608*l*. The report of the managing director stated that the decrease in the grain traffic over the line had been 1,569,554 bushels, representing 9,215*l* loss in receipts as compared with 1866, and also a decrease of 12,665 barrels of flour as compared with the quantity carried in 1866. The earnings of the company's steamboats for the past year as compared with 1866, showed a decrease of 12,007*l*.

☞ A special meeting of the Boston, Concord and Montreal Railroad Company will be held at Concord, N. H., on the 31st inst., to see if the Stockholders will vote to approve the arrangements proposed between this corporation and the White Mountains, N. H., Railroad, relative to aid by this corporation to that railroad to extend its road from Littleton toward Northumberland, as authorized by the Act of July 6, 1867, and to

take such action thereon as may be thought proper.

ENGINEERING.

AN ILLUSTRATED WEEKLY JOURNAL,

Conducted by

ZERAH COLBURN, LONDON.

This is the ablest Engineering paper published, and is edited by one of the best known scientific men of the day. It is finely and profusely illustrated and printed in the best manner, containing 32 p. folio.

It is promptly received here by weekly steamers.

Subscription price $10 per annum.

Numbers can now be furnished from July 1, being the commencement of Vol. 6.

D. VAN NOSTRAND,
Sole Agent for the U. S.,
192 Broadway.

RAILROAD TIES.

100,000 Superior Oak, Chestnut, Pine and Hemlock Ties, 7, 8 and 9 feet long for Steam and Horse Railroads.

D. N. BEARDSLEY,
3m33 **251 West street, N. Y.**

To Railroad Contractors.

Sealed proposals will be received until noon of WEDNESDAY, Sept. 9, 1868, for the graduation and masonry of that portion of the SOUTH PACIFIC RAILROAD, in the State of Missouri, between the present terminus of Little Piney and a point fifty miles southwest of said terminus. The work to be contracted for by sections according to the plans of the Chief Engineer.

Work to be commenced forthwith, and payments to be made monthly in cash.

The Company reserves the right to reject any and all bids.

Proposals to be directed to ANDREW PEIRCE, Jr., Managing Director at the office of the Company, corner of 6th and Walnut streets, St. Louis, Missouri, where all profiles will be exhibited and information given by T. W. KISSOCK, Chief Engineer, or C. B. FISK, Vice President.

FRANCIS B. HAYES, President.

Boston, Aug. 22, 1868.

TO RAILWAY CONTRACTORS.

THE GRADUATION, MASONRY AND BALLASTING of the following enumerated sections of the

Pittsburgh and Connellsville Railroad,

Are advertised for contract, and proposals for the same will be received at the Company's Office, in Pittsburgh, up to the

20th of SEPTEMBER, inclusive.

Commencing at the Uniontown Branch Junction, about a mile east of Connellsville, Sections 59 to 64 inclusive. Then Sections 65, 73, 74, 76, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 106, 110, 112, 115, 116, 117, 118, 119, 122, 128, 129, 130, 133, 140. All of these Sections are in the valley of the Youghiogheny River, up to Section 112 inclusive. Sections 115, 116, 117 are on the Summit, and embrace the Sand Patch Tunnel; and the remainder are in the valley of Wills Creek, Section 140 being about 5 miles from Cumberland.

Specifications of the work on the above Sections will be ready for delivery on the 1st of September, at the offices of the Company, at Pittsburgh and Cumberland, where contractors will obtain all necessary information to enable them to examine the line.

The Company reserves the right to reject all or a part of each bid.

B. H. LATROBE,
Civil Engineer.

August 10th, 1868. 5t34

WANTED IMMEDIATELY.—Three 33 inch eight-wheel railway cars, gauge 4 ft. 8½ inches. One passenger, one box and one platform freight car, new, or second hand if in good order, and of the best material and workmanship. Address "Cars," Post Office Box 3805, New York City, with full particulars as to description, price, and time and place of delivery. 33

OFFICES TO LET.

BROADWAY COR. WARREN ST.,
Opposite the City Hall Park.

To Let for a term of years—24 offices in the above Buildings singly, or in suits, each room communicating with the main Hall. For Light, Ventilation and Central Position unsurpassed by any in the city. Apply to JOHN LLOYD & SONS, 7 and 9 Warren street.

are prepared, as Sole Agents in the United States for the Prussian Mining and Iron Co., of Duisburg, Westphalia, to contract or sell in quantities to suit purchasers (delivered in either New York or Philadelphia) the celebrated

V. H. SPIEGELEISEN

used so extensively for the manufacturing of

Bessemer Steel.

This iron is free from Sulphur and Phosphorous, and contains a heavy percentage of Manganese. The above are also ready to contract for, or sell to arrive,

STEEL RAILS

Manufactured by

G. ARN[illegible]T & CO.,

of Dortmund, for which latter firm they also have the Sole Agency in the United States.

For particulars, samples, prices, or chemical analysis will be promptly forwarded on application. 3m32

750 MILES

OF THE

UNION PACIFIC

RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **103**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

FOR

PROPOSALS.

OFFICE NEW ORLEANS, OPELOUSAS AND GREAT WESTERN RAILROAD COMPANY.

New Orleans, June 6th, 1868.

The New Orleans, Opelousas and Great Western Railroad Company desiring that a connection shall be formed between their present terminus at Berwick's Bay, and the Houston and New Orleans Railroad, which terminates at the Sabine River, and which when completed, the (distance being 163 miles,) will connect New Orleans with almost the entire railroad system of Texas, the President and Directors of said Company, therefore propose to such party or parties as may undertake to fill up such gap, the following terms and conditions, to wit:

1. Will lease the right of way and the franchises now possessed by said company from their present terminus at Berwick's Bay to the town of Vermilionville, the grading of which is almost entirely completed for these 63 miles, and will, at the same time, lease the right under their charter to build the branch railroad from Vermilionville to the Sabine River, at or near Orange, the same having been already located by resolution of the Board of Directors. The distance between these points is 100 miles. The Company reserving to itself the right of way and transportation on payment of proportionate freights and passage money from the present terminus of the road to any extension towards Opelousas, of its road beyond Vermilionville.

2. The said lease to continue for a term of years to be agreed upon between the Company and the Lessees. At the end of the lease the property to be valued by disinterested parties, the Railroad Company to select three, and the Lessees three, the two, if need be, to call in an umpire whose decision will be final. The Railroad Company reserving the right to purchase said property at such valuation, but if not then promptly paid for by said Company, the lease to be extended for a further term of years, and so on, until finally purchased and paid for by said New Orleans, Opelousas and Great Western Railroad Company. The grading already made between Berwick's Bay and Vermilionville, to be valued by competent engineers at the time of entering into a contract, but not to be paid for by lessees until the end of the first lease, herein provided for.

3. The parties leasing to obligate themselves to connect with no other railroad which might hereafter be built, terminating at or near the City of New Orleans, and further obligating themselves to do no act which will infringe the rights under the present charter of said Company, and also to hold said company harmless against any loss which might result from acts committed on that portion of road now proposed to be leased.

4. Should the Lessees succeed in obtaining a land grant on the line of railroad beyond Berwick's Bay, it will be and remain the property of said lessees, this Company claiming none of its benefits, and incurring no portion of the responsibility attending it.

5. Transportation to be furnished said Lessees over the Company's road, as follows, viz:

The President, Directors and officers of the road, including engineers, superintendents, road masters and bridge builders free of charge. Transportation of laborers going out to be charged one-third the regular fare. Provisions and supplies to be charged one half of regular rates. Material, other than iron and cross-ties, to be charged one half of regular rates. Iron to be charged one dollar per ton, and cross-ties (if any) fifteen cents each. Lessees to load and unload the cars.

6. The road thus to be built shall be a first class railroad in every respect. The gauge to be the same as the Company's road—say 5 feet 6 inches. The iron used not to be less than 58 lbs. per yard.

7. The said Lessees to obligate themselves to commence said road within four months, and have it finished and in running order to the Sabine River, connecting with the Houston road at or near Orange, within three years from date of signing the lease.

8. In order to ensure the faithful performance of the contract the Lessee will be required to execute a bond to an amount, and with good and satisfactory security to the satisfaction of the Board of Directors.

9. The Company reserves the right to reject any and all bids.

Another proposition and for which proposals are also invited, is to lease the road, including depots, stations, rolling stock, etc., from Algiers, opposite New Orleans, to Brashear City, including the franchises of the Company beyond to Texas, under the following conditions:

1. That the party or parties proposing to lease shall state the least number of years he or they will lease the road, on the following conditions:

2. The accrued interest to October the 1st, 1868, on the mortgage bonds, (said bonds maturing in 1889,) to be provided for by the lessee.

3. The semi-annual interest on same bonds, accruing yearly after date, and payable on the first days of April and October of each year, say $160,000 per annum, to be also provided for by said lessee.

4. The road to be built over the route from Berwick's Bay to New Iberia, thence to a point at or near Vermilionville, thence in a westerly direction to a point on the Sabine River, connecting with the Houston and Beaumont road.

5. The building of the road to be commenced within four months after signing the contract of lease, to be prosecuted with all dispatch, and to be fully and finally constructed within three years from the signing of the lease.

6. The grading, culverts, etc., now made beyond Berwick's Bay, to be taken by the Lessee at a valuation to be ascertained by experts, one to be appointed by each party, in case of disagreement they to select an umpire, and to be paid for on such terms as shall be hereafter agreed on.

7. The road to be built, equipped and maintained during the entire lease as a first class road in every respect.

8. At the close of said lease, the said road, depots, stations, rolling stock, etc., from Berwick's Bay to the Texas line, shall be valued by experts, one to be appointed by each of the parties thereto, and in the event of disagreement, the two to select an umpire, whose decision shall be final. The value thereof thus ascertained shall be subscribed as stock in the present Company, it being well understood that all costs of maintenance, as well as expenses of operating the road, shall be at the exclusive charge of the Lessees.

9. The contract with Charles Morgon for running a line of steamers to Texas, extending to 1871, to be carried out by the Lessee in every respect.

10. The present road to Berwick's Bay, including depots, machine shops, rolling stock, bridges, etc., to be turned over to the Lessee after inventory and appraisement, and the said property, or property of like character and value, and like condition and good order, to be returned to the company at the expiration of said lease.

11. The Lessees, to ensure the faithful performance of the contract, to furnish security to the satisfaction of Board of Directors.

12. The said Lessees shall contribute and pay each year the sum of $5000, payable quarterly, to keep up and maintain the organization of the Railroad Company during the existence of this lease.

13. The said Lessees obligate themselves to do no act which may operate a forfeiture of the charter, and shall hold the said N. O., O. and G. W. R. R. Co. harmless against any and all acts of theirs.

Sealed proposals will be received at the office of the Company in New Orleans, No. 69 Canal street, until the first day of September next, at 12 o'clock, M., the Company reserving the right of rejecting any or all bids.

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN,* and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

The Steel Capped Rail.

The destruction of iron upon railways is enormous, and the cost of upholding the rails is the great drawback upon the profits and earnings of the railroad stockholders. Motives of economy as well as of safety are constantly urging railroad men to look for something better than the common T rail which is the best that was known until a recent period. Steel rails have been tested here and there as a matter of experiment, but not with satisfactory results. The cost is double that of iron, and when no longer useful as a rail the material is of little use for other purposes. It is wholly wasted. Steel rails are sometimes brittle, and in countries where the temperature runs low in winter they are quite as liable to break as iron.

Then what is to be done for rails? If what has already been invented will not present sufficient advantages to enable it to supercede the rails in present use, then ingenuity must be further taxed and continue to be taxed till it does yield what is demanded. We are persuaded that a rail has been invented that will meet the want in most or all respects. It is the Duplex Steel and Iron Rail, invented by our townsman, J. L. Booth. Mr. B. has an establishment for the production of this rail at Brighton village, three miles east of the city and at the junction of the two branches of the Central Railroad leading eastward. Here, at an expense of $15,000 or more, a building has been erected and supplied with the requisite machinery for compounding and finishing this rail. Curiosity led us recently to visit this establishment, and the undertaking was amply repaid by what was exhibited.

Mr. Booth's rail is nearly in the form of a common T rail. The bottom, upright standard and a small head is made of iron; over this head is laid a cap or tread-piece of steel, which forms the face of the rail, and is held in its place by clenching the head under on either side. These steel caps are rolled into place when the iron rail is cold, and are as firm as though the rail was one solid piece instead of two. If the caps are laid loosely upon the rail, experiment has demonstrated that the tread of the car wheels will in a short time make them tight. The iron rails and the steel caps are brought here from the factories and put together at the Brighton establishment, and the rail is finished ready for use. The bars are put into acid and the scale removed before they are put together. The ends are then ground and made true, thus producing a finished rail.

But in rails as most all else, theory is of little use without practice. This rail appears to be what is wanted, but will it stand the test of use? Some eighteen months since a couple of these rails were laid in the Central track near State street, where they would be subjected to much use. They are to-day apparently as perfect as when first laid, while the opposite rails of iron have been four times renewed. A similar experiment was made on the Lake Shore track at Buffalo with similar results. The caps of these rails are not laminated, and the ends are not flattened or depressed. Such results, with such tests, would seem to settle the question as to the value of this rail.

The economy of this rail is found in its long endurance. That it will wear five or ten times as long as the iron rail is already proven, but to determine how long it will last is impossible till years have passed away in making the test. Assuming that these steel caps may wear out at some day however distant, the iron part of the rail, the body, will be sound and fit for a new cap of steel, or if abandoned for rails it may be remolded under the hammer and rollers, into other forms while a steel rail cannot.

The cost of this rail is about fifty per cent. above that of iron, while all steel rails cost about one hundred per cent. above iron.

Viewed from the point of safety to the public, this rail must commend itself, for it is not likely that from frost or other cause, the iron body and steel cap would break at the same time or at the same place. If either broke, the other would sustain the car and keep the track in place.

Mr. Booth is turning out a quantity of these rails to fill a contract with the Central Railroad Company made last year before he had erected his works, but after the experiments made by that company had justified them in the opinion that it would be the best rail yet invented. Some of the most prominent railroad companies in the United States have signified a desire to introduce this new rail, and the facilities for making it will doubtless be largely increased, as they may be in a short time.—*Rochester Union.*

Chesapeake and Ohio Railroad.

At a meeting of the Commissioners of the States of Virginia and West Virginia at Green Briar Springs, West Virginia, on the 29th ult., a contract was concluded with the Virginia Central Railroad Company, by which that company, in consideration of a free gift of the State works on the Covington and Ohio line, agreed to complete the line of the Railroad from its present terminus at Covington to the Ohio River, making a total distance of 429 miles, with a branch line to Point Pleasant, 40 miles. The title of the Virginia Central Railroad Company by the Merger has been changed to the Chesapeake and Ohio Railroad Company. Operations will be commenced immediately, and the road will be completed in three years.

This is one of the most important railway enterprises on the American Continent, inasmuch as the line occupies the only remaining eligible pass across the Alleghany Mountains. The Baltimore and Ohio Company and the Pennsylvania Company control all the other passes. The Chesapeake and Ohio line is the shortest route from Chicago, St. Louis and Cincinnati to the Atlantic seaboard, and owing to its lighter gradients and longer curvatures has greater advantages for speed and economy of traffic than any line south of the New York Central, and it has advantages over that line, for the reason that the moderate climate of Virginia renders the working expenses and maintenance of way much less.

Exeter (N. H.) Railway.

A meeting of the corporators of the Exeter Railway was held at Exeter, N. H., on the 15th ult., at which the act of incorporation was accepted, and the following board of directors chosen: J. H. Butler of Nottingham, Stephen Kendrick of Franklin, Thomas J. Clark, of Salisbury, Albert Currier of Newburyport, W. A. Currier, N. G. Gilman and Nathaniel Gordon of Exeter. The route as projected will connect Amesbury and Salisbury with Exeter, and extend thence to some point, not

yet designated, on the Concord and Portsmouth Railroad. The distance will be about twelve or fourteen miles, and the cost two hundred thousand dollars.

Georgia Railroad and Banking Co.

The receipts from operations of this road for the fiscal years ending March 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$429,024 92	$288,365 28
" freight	676,509 31	694,321 38

	$1,136,141 95	$1,003,723 66
Expenses, viz:		
Conducting transp	$142,524 79	$129,228 87
Motive power	249,265 21	203,841 44
Maintenance of way	163,605 92	132,509 69
Maintenance of cars	67,677 34	46,254 28
	$623,073 26	$511,834 28
Net earnings	$513,068 69	$491,889 38

It will be seen that while the gross receipts have fallen off $132,418 29 as compared with the previous year, there has been a saving in operating expenses of $111,238 98, resulting in a reduction of net earnings of only $21,179 31. The operating expenses are about 51 per cent. of the gross earnings. The net earnings about 49 per cent., or 11 per cent. on the capital stock and bonded debt of the company.

The following payments have been made on account of new rolling stock, bridges, buildings, track, &c., in the restoration of the company's property—damages growing out of the late war, and Government tax:

Renewing locomotives	$59,914 31
New cars, and re-building cars	74,668 61
New round House at Atlanta	37,084 48
New tools for machine shops	17,471 48
New engines for water stations	3,450 00
New railroad iron, chairs and spikes	50,000 00
Timber	12,000 00
Labor and incidentals—laying new track	9,610 00
Expense of extra ditching	7,060 00
New bridges—balance	8,780 22
Government tax	16,486 15
Payment on damages caused during war	10,552 96
	$307,078 21

During the past year, we have laid down 12½ miles of *new iron* on the main line, and 2¾ miles on the Athens Branch—making in all 35 miles of *new iron* laid down since the close of the war. The track, while safe, is yet rough in many places, from the worn condition of old iron still in the track, which will be replaced with new iron as rapidly as can be done with due regard to necessary economy. If arrangements for re-rolling iron at Atlanta are promptly met, it will, to some extent, reduce the cost of renewing track in future. We have also arranged, with an expert, for the repairing of rails, (which has given eminent satisfaction on other roads where tried,) and hope soon to have the work under way on your road, which I doubt not will prove to be economy in the maintenance of track.

The bridges on main line are all in first class condition, as are the depots, except at some unimportant points, were we are still using temporary houses. During the past year, we have built a very substantial and useful round house at Atlanta, at a cost of about $40,000, which will answer all demands, from both the Georgia Railroad and the Atlanta and West Point Railroad, in which your road has so large an interest.

A larger and more convenient freight house is needed at Atlanta. Some of the trestle bridges on the branches will require extraordinary repairs during the next year.

During the year nine engines have been put in first class order, requiring, in most instances, almost entire rebuilding. Two have been thoroughly repaired, besides heavy ordinary repairs to other engines. Two freight locomotives had been ordered from the Rogers Locomotive and Machine Works, upon the most favorable terms, to be delivered in August, which are the first engines ordered by the company in the last eight years. Several of the old cars on hand at the close of the war have been rebuilt, besides which there have been turned out at the company's shops during the year 59 box cars, 1 first class passenger car, 2 baggage cars, and 3 second class passenger cars rebuilt.

The company have 43 engines, 23 passenger, 10 baggage, 269 box, 14 cab, 27 stock, 105 platform, 12 coal and 15 shanty cars. Miles run by engines, 657,607. Miles of road in use, 231. Bales of cotton transported, 112,708. Bushels of grain, 665,662. Barrels of flour, 14,059.

Since the close of the war, about 2½ years, beside the dividends paid to stockholders, about $700,000 of the circulation of the Bank have been redeemed, and $656,173 18 paid on account of reconstruction, or restoration of property, and taxes, all out of the net earnings of the road.

The following is a condensed statement of the condition of the Georgia Railroad and Banking Company, on the 31st of March, 1868:

The road and its outfit		$4,156,000 00
Real estate		134,858 66
Banking house and lot		35,000 00
Road expenses		873,003 19
Incidental expenses and salaries		9,658 29
Interest on bonds		28,278 44
Tax on dividend No. 48		6,738 37
Materials on hand for road		84,547 68

Dividends, April and October, 1867, 5 per cent. each and U. S. Tax	957,821 10	
		1,659,061 10
Surplus		$609,086 74
Of which there has been expended in construction repairs		82,174 69
Leaving a balance of		$526,912 05
Add balance April 1, 1867		624,753 12
Total, as in Balance Sheet		$1,151,665 17

There has been expended during the year on account of construction and equipment, the following:

Land and land damages	$68,022 45
Equipment	250,242 08
Engineering & contingent construction	34,881 99
Grading	660,420 96
Superstruction and bridging	475,739 45
Fencing	9,960 08
Station buildings, etc	57,335 75
New shops, Chicago	251,615 22
New passenger depot, Chicago	58,040 15
Construction repairs	82,174 69
	$1,943,422 82

The leading items of expenditure for renewal of track, during the year, have been:

156,931 ties	$80,932 29
1,355 19/20 tons new iron rails	129,516 75
1,878 1463/2240 tons re-rolled rails	71,808 59
22,020 lbs. wrought chairs	1,343 25
191,200 " railroad spikes	11,461 74
224,537 " fish bars	11,444 22
66,786 " fish bolts	5,202 76
	$311,709 60

The number of miles relaid during the year was

35, viz.: with new iron, 14½ miles; re-rolled iron, 20 miles; steel, 56-100 mile. The number of rails repaired at the company's shops was 23,508, costing $19,359 40—an average for each rail repaired of 85.32c. The report says:

Since the last report made to you, your railroad has been extended to Des Moines (the capital of the State of Iowa,) opened for business Sept. 9th, 1867, and has been successfully operated with satisfactory results. Contracts have been made for the grading and bridging of the line from Des Moines to the Missouri river, to connect with the Union Pacific Railroad, and the whole work is rapidly progressing.* The road is being constructed in the very best manner, and the work will be hastened to completion with as much rapidity as is consistent with with proper economy in its construction. It is believed that the road from the Missouri river to the Pacific ocean will be completed during the next year, that a bridge will be built over the Missouri river to connect your road with the Union Pacific, thus making an unbroken line of railroad from the Atlantic to the Pacific. It may be confidently asserted, that with the road completed, you will have, in proportion to its cost, one of the best railroad properties in the West.

The equipment upon the road has been increased during the past year, and it is designed to continue to add to it by construction and purchase as the increasing business of the road may require.

Thirty acres of land, situated about four and a half miles south of passenger depot, in Chicago, and adjoining the track, was purchased; the erection of shops began in the month of June. $251,615 22 have been expended towards their completion. The principal buildings will consist of machine shop, 336 feet long by 112 feet wide; blacksmith and boiler shop, 344 feet long by 80 feet wide; car shop, 253 feet long by 80 feet wide, and a wing 200 feet by 80 feet; round house, total diameter, 278 feet, with stalls for forty engines. Tools and machinery have been contracted for, and it is anticipated to occupy the shops this fall.

On the 17th of March a tornado passed over the new shops at Chicago unroofing a large portion of the machine shop, and destroying about 300 feet of main wall, demolishing the blacksmith and boiler shop. It will cost about $40,000 to repair this damage.

The company have 95 engines, of which 58 are coal burners and 37 wood burners. Three new engines have been purchased during the year, twelve have been changed from wood to coal burners, one has been re-built, new entire, with copper fire-box, eleven have been thoroughly repaired, adding new boilers, seventeen have had general repairs. Of the whole number, fifty-seven now have steel tires, nine have had new steel driving axles, and six, new driving wheels. The general condition of the engines has been fully kept up.

The company own 48 passenger coaches, 22 baggage, mail and express, 210 stock, 1,305 box, 491 flat, 1 pay and 3 drovers' cars. There has been purchased of this number, 50 box cars, and built at the company's shops, 2 new coaches, 7 re-built, 146 new box cars added, and 36 new to fill old numbers, 8 new stock cars added, and 7 new to fill old numbers, 23 new flat cars added, and 19 new to fill old numbers.

The number of miles run by locomotives with passenger trains was 575,213; with freight trains, 1,150,489; with wood and gravel trains, 171,235—total, 1,896,937, at an average cost per mile run for enginemen, firemen and wipers, oil, waste, fuel and repairs, of 32.64c.

The whole amount of freight transported during the year was 1,308,870,362 lbs., an increase over the previous year of 111,043,204 lbs. Number of loaded cars going east; 39,359; do., west 35,746—total, 75,105. Average tonnage to each car, 8.1427. Freight carried one mile, 87,522,492 tons. Average earnings per ton per mile 3.35c.

The number of passengers transported during the year was 560,304, of which 555,431 were first class, and 4,873 second class; of these 52,833 were through, and 507,471 way; 271,253 going east, and 289,051 west. Passengers carried one mile, 28,175,470. Average rate per mile for transporting passengers, 4.192c.

The number of lbs. freight transported over the Mississippi bridge during the year was 434,498,870—an increase over the previous year of 10,199,570. The number of loaded cars passing for the same time was 24,361. Number of foot passengers, 74,670. Number of boats, barges and rafts passing the draw, 2,096. New work charged to construction repairs, $82,174 69.

* At the present time (Aug. 1), the track is laid about 30 miles from Des Moines, and the grading and bridging completed to Middle river, about 22 miles further, to which point the track is expected to be completed by the 15th.

Georgetown and Leesburg Railroad.

The committee of the corporation of Georgetown have submitted to the directors of the Alexandria, Loudoun and Hampshire Railroad Company the following propositions, with the view of effecting an arrangement for the construction of a branch road from Leesburg to Georgetown:

We will make a connection with the Loudoun and Hampshire Railroad by the way of the Pimmit Run, and will for that purpose raise the sum of $300,000. We will subscribe to the common stock of the Loudoun and Hampshire Railroad the amount required: Provided, That the branch so built shall never carry freight or passengers to any point beyond Georgetown at any less pro rata tariff than to Georgetown. That the road shall not be extended beyond Georgetown, or connection made beyond that town, without the consent of the city. Freights to be as favorable to Georgetown as to Alexandria.

These propositions having been considered by the directors of the railroad company, a resolution was adopted agreeing that surveys and estimates of cost shall be made, jointly, by two engineers, (one to be appointed by the board and the other by the corporate authorities of Georgetown,) of the most advantageous route for a branch of the road to Georgetown; such route to be so located as to be as nearly as practicable equally beneficial to Alexandria and Georgetown; the expenses of such surveys to be equally defrayed by Georgetown and the company; and that the board adhere to their resolution of the 21st of November, 1867, in relation to equal charges upon persons and things carried to Georgetown and Alexandria from the point of divergence.

St. Louis, Vandalia and Terre Haute R. R.

Contracts have recently been ratified for the perpetual lease of the St. Louis, Vandalia and Terre Haute road, now under construction and to be completed in 1869 to the Terre Haute and Indianapolis; the Columbus, Chicago and Indiana Central; the Pittsburg, Cincinnati and St. Louis (known as the Pan-Handle route,) and the Pennsylvania Central. The through traffic is to be managed under a distinct organization over all these roads, and forming one unbroken line between St. Louis and Philadelphia (998 miles,) and New York, 1,074 miles.

Contracts have also been ratified for the perpetual lease of the new line now being built from Indianapolis to Vincennes and Cairo (known as Burnside's road) to the Indianapolis, Cincinnati and La Fayette, the Columbus, Chicago and Indiana Central, the Pittsburg, Cincinnati and St. Louis, and the Pennsylvania Central.

These contracts will probably secure to the roads in interest, taken in connection with the new line from Columbus to Chicago, a more complete and perfect system of through routes between the Atlantic cities and the West than is now possessed by any other of the great trunk lines.

☞ At a meeting of the friends of the Peachbottom Railroad, recently held at Peachbottom, York Co., Pa., it was decided to defer the opening of subscription books until the two different routes had been surveyed. It is the intention to have each route surveyed as soon as possible, the cost of each estimated, and reports published, so that a proper decision relative to the best route, can be arrived at.

yet designated, on the Concord and Portsmouth Railroad. The distance will be about twelve or fourteen miles, and the cost two hundred thousand dollars.

Georgia Railroad and Banking Co.

The receipts from operations of this road for the fiscal years ending March 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers	$429,024 92	$288,365 28
" freight	676,509 31	694,321 38
" mail	30,607 72	21,037 00
	$1,136,141 95	$1,003,723 66
Expenses, viz:		
Conducting transp	$142,524 79	$129,228 87
Motive power	249,265 21	203,841 44
Maintenance of way	163,606 92	132,509 69
Maintenance of cars	67,677 34	46,254 28
	$623,073 26	$511,834 28
Net earnings	$513,068 69	$491,889 38

It will be seen that while the gross receipts have fallen off $132,418 29 as compared with the previous year, there has been a saving in operating expenses of $111,238 98, resulting in a reduction of net earnings of only $21,179 31. The operating expenses are about 51 per cent. of the gross earnings. The net earnings about 49 per cent., or 11 per cent. on the capital stock and bonded debt of the company.

The following payments have been made on account of new rolling stock, bridges, buildings, track, &c., in the restoration of the company's property—damages growing out of the late war, and Government tax:

Renewing locomotives	$59,914 31
New cars, and re-building cars	74,668 61
New round House at Atlanta	37,084 48
New tools for machine shops	17,471 48
New engines for water stations	3,450 00
New railroad iron, chairs and spikes.	50,000 00
Timber	12,000 00
Labor and incidentals—laying new track	9,610 00
Expense of extra ditching	7,060 00
New bridges—balance	8,780 22
Government tax	16,486 15
Payment on damages caused during war	10,552 96
	$307,078 21

During the past year, we have laid down 12½ miles of *new iron* on the main line, and 2¾ miles on the Athens Branch—making in all 35 miles of *new iron* laid down since the close of the war. The track, while safe, is yet rough in many places, from the worn condition of old iron still in the track, which will be replaced with new iron as rapidly as can be done with due regard to necessary economy. If arrangements for re-rolling iron at Atlanta are promptly met, it will, to some extent, reduce the cost of renewing track in future. We have also arranged, with an expert, for the repairing of rails, (which has given eminent satisfaction on other roads where tried,) and hope soon to have the work under way on your road, which I doubt not will prove to be economy in the maintenance of track.

The bridges on main line are all in first class condition, as are the depots, except at some unimportant points, were we are still using temporary houses. During the past year, we have built a very substantial and useful round house at Atlanta, at a cost of about $40,000, which will answer all demands, from both the Georgia Railroad and the Atlanta and West Point Railroad, in which your road has so large an interest.

A larger and more convenient freight house is needed at Atlanta. Some of the trestle bridges on the branches will require extraordinary repairs during the next year.

During the year nine engines have been put in first class order, requiring, in most instances, almost entire rebuilding. Two have been thoroughly repaired, besides heavy ordinary repairs to other engines. Two freight locomotives had been ordered from the Rogers Locomotive and Machine Works, upon the most favorable terms, to be delivered in August, which are the first engines ordered by the company in the last eight years. Several of the old cars on hand at the close of the war have been rebuilt, besides which there have been turned out at the company's shops during the year 59 box cars, 1 first class passenger car, 2 baggage cars, and 3 second class passenger cars rebuilt.

The company have 43 engines, 23 passenger, 10 baggage, 269 box, 14 cab, 27 stock, 105 platform, 12 coal and 15 shanty cars. Miles run by engines, 657,607. Miles of road in use, 231. Bales of cotton transported, 112,708. Bushels of grain, 665,662. Barrels of flour, 14,059.

Since the close of the war, about 2½ years, beside the dividends paid to stockholders, about $700,000 of the circulation of the Bank have been redeemed, and $656,173 18 paid on account of reconstruction, or restoration of property, and taxes, all out of the net earnings of the road.

The following is a condensed statement of the condition of the Georgia Railroad and Banking Company, on the 31st of March, 1868:

The road and its outfit		$4,156,000 00

Repairs of road	$347,462 97	
Cost of iron for repairs	227,901 77	
Repairs of engines	204,625 40	
Repairs of cars	194,985 45	
Tools and machinery	12,974 58	
Repairs of bridges	44,325 73	
Repairs of buildings	29,380 70	
Repairs of fences	20,935 45	
Fuel account	251,354 80	
Handling freight, etc	157,518 14	
Loss and damage	39,178 55	
Oil and waste	27,975 10	
Train hands	257,381 18	
Station expenses	37,948 58	
Stationery	19,162 84	
Salaries of agents, etc	113,103 94	
Contingent account	32,761 08	
Car service account	1,266 11	
		2,020,192 07
Earnings less operating expenses		$2,431,782 22
Legal expenses	$23,593 95	
Taxes on real estate	107,929 89	
U. S. Government tax	32,110 54	
		163,634 38
Net earnings		$2,268,147 84
Rent of Peoria and Bureau Valley Railroad	$125,000 00	
Interest on bonds	576,240 00	
Dividends, April and October, 1867, 5 per cent. each and U. S. Tax	957,821 10	
		1,659,061 10
Surplus		$609,086 74
Of which there has been expended in construction repairs		82,174 69
Leaving a balance of		$526,912 05
Add balance April 1, 1867		624,753 12
Total, as in Balance Sheet		$1,151,665 17

There has been expended during the year on account of construction and equipment, the following:

Land and land damages	$68,022 45
Equipment	250,242 08
Engineering & contingent construction	34,881 99
Grading	660,420 96
Superstruction and bridging	475,739 45
Fencing	9,950 08
Station buildings, etc	57,336 75
New shops, Chicago	251,615 22
New passenger depot, Chicago	53,040 15
Construction repairs	82,174 69
	$1,943,422 82

The leading items of expenditure for renewal of track, during the year, have been:

156,931 ties	$80,982 29
1,855 tons new iron rails	129,516 75
1,878 tons re-rolled rails	71,808 59
22,020 lbs. wrought chairs	1,348 25
191,200 " railroad spikes	11,461 74
224,537 " fish bars	11,444 22
66,786 " fish bolts	5,202 76
	$311,709 60

The number of miles relaid during the year was

35, viz.: with new iron, 14½ miles; re-rolled iron, 20 miles; steel, 56-100 mile. The number of rails repaired at the company's shops was 23,508, costing $19,359 40—an average for each rail repaired of 85.32c. The report says:

Since the last report made to you, your railroad has been extended to Des Moines (the capital of the State of Iowa,) opened for business Sept. 9th, 1867, and has been successfully operated with satisfactory results. Contracts have been made for the grading and bridging of the line from Des Moines to the Missouri river, to connect with the Union Pacific Railroad, and the whole work is rapidly progressing.* The road is being constructed in the very best manner, and the work will be hastened to completion with as much rapidity as is consistent with with proper economy in its construction. It is believed that the road from the Missouri river to the Pacific ocean will be completed during the next year, that a bridge will be built over the Missouri river to connect your road with the Union Pacific, thus making an unbroken line of railroad from the Atlantic to the Pacific. It may be confidently asserted, that with the road completed, you will have, in proportion to its cost, one of the best railroad properties in the West.

The equipment upon the road has been increased during the past year, and it is designed to continue to add to it by construction and purchase as the increasing business of the road may require.

Thirty acres of land, situated about four and a half miles south of passenger depot, in Chicago, and adjoining the track, was purchased; the erection of shops began in the month of June. $251,615 22 have been expended towards their completion. The principal buildings will consist of machine shop, 336 feet long by 112 feet wide; blacksmith and boiler shop, 344 feet long by 80 feet wide; car shop, 253 feet long by 80 feet wide, and a wing 200 feet by 80 feet; round house, total diameter, 278 feet, with stalls for forty engines. Tools and machinery have been contracted for, and it is anticipated to occupy the shops this fall.

On the 17th of March a tornado passed over the new shops at Chicago unroofing a large portion of the machine shop, and destroying about 300 feet of main wall, demolishing the blacksmith and boiler shop. It will cost about $40,000 to repair this damage.

The company have 95 engines, of which 58 are coal burners and 37 wood burners. Three new engines have been purchased during the year, twelve have been changed from wood to coal burners, one has been re-built, new entire, with copper fire-box, eleven have been thoroughly repaired, adding new boilers, seventeen have had general repairs. Of the whole number, fifty-seven now have steel tires, nine have had new steel driving axles, and six, new driving wheels. The general condition of the engines has been fully kept up.

The company own 48 passenger coaches, 22 baggage, mail and express, 210 stock, 1,305 box, 491 flat, 1 pay and 3 drovers' cars. There has been purchased of this number, 50 box cars, and built at the company's shops, 2 new coaches, 7 re-built, 146 new box cars added, and 36 new to fill old numbers, 8 new stock cars added, and 7 new to fill old numbers, 23 new flat cars added, and 19 new to fill old numbers.

The number of miles run by locomotives with passenger trains was 575,213; with freight trains, 1,150,489; with wood and gravel trains, 171,235—total, 1,896,937, at an average cost per mile run for enginemen, firemen and wipers, oil, waste, fuel and repairs, of 32.64c.

The whole amount of freight transported during the year was 1,308,870,862 lbs., an increase over the previous year of 111,043,204 lbs. Number of loaded cars going east; 39,359; do., west 35,746—total, 75,105. Average tonnage to each car, 8.1427. Freight carried one mile, 87,522,492 tons. Average earnings per ton per mile 3.35c.

The number of passengers transported during the year was 560,304, of which 555,431 were first class, and 4,873 second class; of these 52,833 were through, and 507,471 way; 271,253 going east, and 289,051 west. Passengers carried one mile, 28,175,470. Average rate per mile for transporting passengers, 4.192c.

The number of lbs. freight transported over the Mississippi bridge during the year was 434,498,870—an increase over the previous year of 10,199,570. The number of loaded cars passing for the same time was 24,361. Number of foot passengers, 74,670. Number of boats, barges and rafts passing the draw, 2,096. New work charged to construction repairs, $82,174 69.

* At the present time (Aug. 1), the track is laid about 30 miles from Des Moines, and the grading and bridging completed to Middle river, about 22 miles further, to which point the track is expected to be completed by the 15th.

Directors.—Francis H. Tows, David Dows, William H. Appleton, Wilson G. Hunt, David Crawford, Jr., Rob't A. Forsyth, Oliver Charlick, John F. Tracy, W. F. Coolbaugh, N. B. Curtis, Ebenezer Cook, George L. Davenport, B. F. Allen.

Treasurer.—W. F. COOLBAUGH.

Secretary.—EBENEZER COOK.

Ass't Secretary.—FRANCIS H. TOWS.

Ass't Gen'l Superintendent.—P. A. HALL.

Georgetown and Leesburg Railroad.

The committee of the corporation of Georgetown have submitted to the directors of the Alexandria, Loudoun and Hampshire Railroad Company the following propositions, with the view of effecting an arrangement for the construction of a branch road from Leesburg to Georgetown:

We will make a connection with the Loudoun and Hampshire Railroad by the way of the Pimmit Run, and will for that purpose raise the sum of $300,000. We will subscribe to the common stock of the Loudoun and Hampshire Railroad the amount required: Provided, That the branch so built shall never carry freight or passengers to any point beyond Georgetown at any less pro rata tariff than to Georgetown. That the road shall not be extended beyond Georgetown, or connection made beyond that town, without the consent of the city. Freights to be as favorable to Georgetown as to Alexandria.

These propositions having been considered by the directors of the railroad company, a resolution was adopted agreeing that surveys and estimates of cost shall be made, jointly, by two engineers, (one to be appointed by the board and the other by the corporate authorities of Georgetown,) of the most advantageous route for a branch of the road to Georgetown; such route to be so located as to be as nearly as practicable equally beneficial to Alexandria and Georgetown; the expenses of such surveys to be equally defrayed by Georgetown and the company; and that the board adhere to their resolution of the 21st of November, 1867, in relation to equal charges upon persons and things carried to Georgetown and Alexandria from the point of divergence.

St. Louis, Vandalia and Terre Haute R. R.

Contracts have recently been ratified for the perpetual lease of the St. Louis, Vandalia and Terre Haute road, now under construction and to be completed in 1869 to the Terre Haute and Indianapolis; the Columbus, Chicago and Indiana Central; the Pittsburg, Cincinnati and St. Louis (known as the Pan-Handle route,) and the Pennsylvania Central. The through traffic is to be managed under a distinct organization over all these roads, and forming one unbroken line between St. Louis and Philadelphia (998 miles,) and New York, 1,074 miles.

Contracts have also been ratified for the perpetual lease of the new line now being built from Indianapolis to Vincennes and Cairo (known as Burnside's road) to the Indianapolis, Cincinnati and La Fayette, the Columbus, Chicago and Indiana Central, the Pittsburg, Cincinnati and St. Louis, and the Pennsylvania Central.

These contracts will probably secure to the roads in interest, taken in connection with the new line from Columbus to Chicago, a more complete and perfect system of through routes between the Atlantic cities and the West than is now possessed by any other of the great trunk lines.

☞ At a meeting of the friends of the Peachbottom Railroad, recently held at Peachbottom, York Co., Pa., it was decided to defer the opening of subscription books until the two different routes had been surveyed. It is the intention to have each route surveyed as soon as possible, the cost of each estimated, and reports published, so that a proper decision relative to the best route, can be arrived at.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

Saturday, September 5, 1868.

Stock Exchange and Money Market.

The Money Market has been working in favor of borrowers, since our last. The offerings of capital have been on the increase, and lenders have been more eager to place balances in a temporary form, even at the low rates, now current in the street. The West has ceased, at least, for the present, to draw on this point for currency, to any considerable extent, and no further important remittances to the interior are likely to be made before the middle or close of the month. The demand for and from speculative sources has been moderate, and has been freely met at from 3@5, generally at 3@4 per cent. per annum. There has been comparatively little activity in the discount line. The available supply of prime short date business paper has been quite moderate, while the inquiry for it has been light at from 6@7 per cent. per annum. The U. S. Sub-Treasury augmented its cash reserve over 6¼ millions, during the week. The city banks, on the other hand, reported a decrease of $6,100,759 in deposits, $2,819,573 in the specie hoard, and $2,000,269 in the legal tender reserve. They reduced their loans nearly 3½ millions, and their circulation $25,488. The banks now owe on account of deposit, and circulation $244,446,785, while they hold of gold and legal tender notes, the sum of $84,706,484, or about 23½ millions more than the amount required by law to be kept in reserve, to meet anticipated claims.

The specie reserve of the city banks is now $16,949,108, against $7,271,595 same time last year. The city bank deposits are now $210,334,646, against $190,832,315 week ending Aug. 31, 1867. The legal tender reserve amounts to $67,757,376, against $67,932,571 same time last year. The circulation now stands at $34,112,139, against $23,715,128 same time last year. The loans are now $271,780,726, against $247,877,662 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $80,130,844 a day, against a daily average of $101,718,092 the preceding week, and $80,422,325 the week ending with Aug. 15, 1868. The current week's exchanges average about $78,000,000 a day. The city banks, last week, lost $2,819,573 of specie, $2,000,269 of legal tender, and $6,100,759 of deposits. They reduced their loans, $3,465,055; and their circulation, $25,488.

The New York Gold Exchange Bank reports for the week ending Saturday, the 29th day of Aug., 1868, the average amount of loans and discounts as $1,145,504; average amount of specie, $594,893; average amount of deposits, $1,177,547.

The Philadelphia Bank movement the past week shows an increase in loans of $103,750; a decrease of $2,918 in specie; a decrease in legal tenders of $197,370; a decrease of $474,870 in deposits; and a decrease of $779 in circulation. The Bank Clearings show a decrease of $1,355,402, and the balances, an increase of $491,581.

The outstanding amount of coin certificates on the 1st of Aug., was $22,414,000, against $20,298,180 on the 1st of June, 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $407,000, and retired $2,911,881 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during August, reached $9,075,920.

The U. S. Sub-Treasury receipts, week ending with Aug. 29, were $14,009,491, including $3,039,881 from customs duties; payments, $7,722,382, including $165,000 of coin interest; balance at the close of the week, $92,163,852, against $85,876,692, at the close of the preceding week, showing an increase of $6,287,159. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,350,944 including $533,000 from customs; and payments, $5,959,342; on Tuesday, receipts, $1,467,580 including $533,854 from customs, and payments, $1,094,253. The balance at the close of business on Tuesday stood at $87,298,778, against $90,416,660, a week previous; and $88,693,437, on Aug. 19, 1868. The aggregate receipts of the office from all sources in August, were $81,253,235; aggregate payments, $78,830,968. The balance on the 1st inst., was about 7¼ millions more than on the 1st ult., which amounted to $80,133,186.

National Bank notes to the amount of $83,600 were issued last week by the Treasury Department, making the total issue to 1,673 banks

thus far, amount to $309,465,606, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,567,036, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,898,570. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,823,-300; and for the public deposits, $38,052,350—making a total of $379,875,650. The Treasury Department last week redeemed and destroyed $500,500 of worn and mutilated fractional currency, and issued $411,591 of new. The outstanding amount of fractional currency on the 1st of August was $31,867,818, against $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been fairly productive, through the past week, in both forms of excises and customs. The excises, last week, yielded some 4½ millions; customs at the port of New York, $3,039,881, and at the outports about $1,-000,000 (in coin) more, making the grand total income for the week equal to about $10,358,000 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $34,000,000.

Gold has been much less freely dealt in, and there has been less buoyancy in the speculation. The demand from importers for custom house purposes has been the main regular call for coin. The export inquiry has been quite limited, and there has been very little doing on speculative account. The extremes of the week have been 143⅞@145¼, and the latest quotations were 144¾@144⅞. Government withdrew over three millions of coin and coin certificates, from the open market, in the form of customs. It disbursed only $165,000 of coin interest. During the current week it has been paying the September interest on the 10-40 loan, amounting to near five million dollars. The specie exports, last week, were only $492,034, thus far, this week, $350,000. The California steamer delivered here on Saturday $502,376 in gold. On Tuesday the 1st inst., the Government Office disbursed about 1¼ millions of coin interest.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $4,999,333, against $2,149,809 same time last year. The customs demand for Gold last week, averaged $506,647 a day; thus far, this week, it has been equal to $533,-000 a day, or equal to a weekly aggregate of $3,198,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $43,324 and from California, $502,376. The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $77,971,966, against $83,054,655 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $28,862,-424, against $19,939,520, in 1867, showing an increase thus far in 1868, of $8,862,904. The exports of specie, from this port, last week, were $492,-034, against $103,792 same week last year; total, since Jan. 1, 1868, $64,379,144, against $39,-975,963 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $165,000; since Jan. 1, 1868, $60,130,581, against $40,558,765. The specie exports from San Francisco, from Jan. 1, to Aug. 13, 1868, were $25,-762,879, against $26,458,350 same time last year.

Government received $5,173,736 from customs at the port of San Francisco, from Jan. 1, to Aug. 13, against $4,612,598 same time in the preceding year.

Foreign exchange has been in fair supply and light demand at less firm prices. Bankers' prime sixty day bills on London closed on Wednesday at 108⅞@109⅛, and on Paris to 5.22½c.@5.17½; sight bills on London to 109¼@109½, and on Paris to 5.16¼c.@5.15. The offering of produce bills has been moderate this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $2,827,891, against $2,558,807, same week last year; total, since Jan. 1, 1868, $111,458,100, against $124,978,938 in 1867.

Government securities have been fairly active, throughout the week, and were particularly so on the closing day, at generally well supported prices. On Tuesday there were few orders of any considerable magnitude executed, and under a temporary pressure to realize, partly on *short* account, the market yielded a fraction. The following day's transactions were on an extensive scale, particularly in the later issues of the Five-twenties leading to a fresh advance of ¼@⅛ per cent. from the lowest figures of the week. Washington advices intimate that the public debt exhibit, for September 1, will show an increase of about five or six millions in the aggregate of the National obligations.

U. S. sixes of 1881 closed here on Wednesday at 114¼@114⅜; U. S. Five-twenties of 1862, 114@114¼; U. S. Five-twenties of 1864 at 109½@109¾; U. S. Five-twenties of 1865 at 111⅝@111¾; U. S. Five-twenties of 1865, consolidated, 108½@108⅝; U. S. Five-twenties of 1867, 108⅛@108¼; U. S. Five-twenties of 1868, 108⅜@108⅝; U.S. Ten-forties at 105¼@105⅜ ex Sept. interest; U. S. Six per cent. currency bonds, 100@101. The brokers are buying the outstanding compound interest notes at the following rates, and selling at an advance of ⅛@¼ of 1 per cent. on these figures:

September, 1865..118¾ | October, 1865....118¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 19.	Aug. 26.	Sept. 2.
Consols	94⅛	94¼	94
U.S. 5-20's of 1862	71⅝	71¾	71⅝
Erie	31¾	32	31
Ill. Central	91¼	91¾	91½

Railway and miscellaneous stocks have been more confidently dealt in, as a rule, since our last, at generally buoyant prices. The most notable rise and widest fluctuations were in the Western stocks, which were quite freely dealt in. New York Central was firmer, and in much more general request. Erie was unusually variable, and on the whole, weak in price. Outside of a particular clique, few street operations evinced any disposition to deal in it at all.

There has been less activity in domestic produce. Breadstuffs closed in favor of buyers. Provisions have been quoted rather firmer. Cotton has been unusually steady. Middling upland cotton closed pretty briskly on Wednesday at 30½ cents per lb. The stock of cotton now here is estimated at about 24,000 bales. The receipts at the port this week, have averaged only about 400 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,228,194 bales, against 1,892,000 bales same time last year; exports, same time 1,676,000 bales, against 1,555,-000 bales same time last year; stock on hand at latest dates, 40,000 bales, against 80,000 bales same date last year. At the Live Stock market, this week, Beeves have been more active at from 11@17½c. per lb.; week's receipts, 4,967. Veal calves have been in fair request at from 7½@12c. per lb.; receipts, 1,447. Sheep and lambs in good demand, ranging from 3@7c., and 7@8⅜c., respectively; receipts, 31,458. Swine have been quite active at from 9¾@11 15/16c. per lb., all live weight; receipts, 15,242. Foreign merchandise has been more sought after, but buyers have had any existing advantage. The total imports of foreign dry goods, last week, were $3,126,200, and the total amount marketed $3,338,311. The value of foreign merchandise imported last week, was $3,072,307—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $6,198,507, against $6,362,-630 same week last year; from Jan. 1, 1868, $171,-341,129, against $179,3164 48 same time in 1867. The freight market has been fairly, and rates have been quoted rather firmer. For Liverpool we quote flour at 1s. 4½d. by sail, and 1s. 6d. @1s. 7½d. by steamer, per bbl.; grain at 3d. by sail, and 4@4½d. by steamer, per bushel; cotton at 1/16d.@3/32d. by sail, and 3/16d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 458.

The New York exports, exclusive of specie, for the week ending Sept. 1, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$2,558,807	$2,827,891
Prev. reported	122,420,131	108,630,209
Since January 1	$124,978,938	$111,458,100

The imports for the week ending August 31, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$3,311,311	$3,126,200
Gen. merchandise	3,051,279	3,072,307
Total for the week	$6,362,590	$6,198,507
Previously reported	164,815,468	162,176,815
Since January 1	$171,178,058	$168,375,322

The balance in the Sub-Treasury on Wednesday was $87,301,306 13.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Toledo, Peoria and Warsaw 1st mort., W. D., 82¼; do., E. D., 83; Milwaukee and St. Paul 8s, 102⅛; Chicago and Milwaukee 1st mort., 89; Clev., Col. and Ind. Rockford, Rock Island and St. Louis R. R.

First mortgage, 50 years, 7 per cent. Convertible Sinking Fund, Bonds of the Rockford, Rock Island and St. Louis Railroad Company, principal and interest payable in Gold, free of Government tax.

For sale at 95 and accrued interest in currency, at the office of the Company, 12 Wall st.

Governments and other securities received in exchange.

H. H. BOODY,
Treasurer.

Michigan Air Line Railway.

This company is formed by the consolidation of the Grand Trunk Railway Company of Indiana and the Grand Trunk Railway Company of Michigan, each share of the Michigan company to count for one, and each share of the Indiana Company for two in the new association. The road is to be constructed from Port Huron, Mich., to Chicago, 283 miles.

Louisville, Harrodsburg & Virginia R. R.

An adjourned meeting of the commissioners named in the charter of this road was held in Louisville on the 1st inst. The object of the meeting was to hear the report of the engineer, who has just completed an exploration of the proposed route from that city to Cumberland Gap, and hear an interchange of views in regard to the enterprise. The report of the engineer, Mr. H. M. Patton, was submitted and read by the secretary. On motion, an executive committee was appointed, consisting of several gentlemen from the city of Louisville, and the counties of Jefferson, Spencer, Nelson, Washington, Anderson and Mercer, with instructions to order a reconnoissance of railroad routes from Lancaster to Pound Gap and other gaps in the direction of Abingdon and Wytheville, Va., with a view of ascertaining the relative advantage of the proposed connection with Virginia roads. It was also ordered that the Executive Committee immediately proceed to have books opened to take subscription of stock, and lay the matter before the Levy Courts of the countries.

Albany and Susquehanna Railroad.

The following gentlemen have been elected directors of the Albany and Susquehanna Railroad Company for the ensuing year: Joseph H. Ramsey, Jeremiah J. Austin, Jacob Leonard, Wm. A. Rice, of Albany; Charles Coulter, of Cobleskill; John Westover, of Richmondville; John Cook, of Worcester; Azro Chase, of Chaseville; David Wilber, of Milford; Elinkim R. Ford, of Oneonta; Samuel North, of Unadilla; Ira E. Sherman, of Sydney Plains, and Alonzo Everts, of Binghamton. President, Joseph H. Ramsey; Vice President, Jonathan H. Herrick; Secretary and Treasurer, Wm. L. M. Phelps.

Wilmington and Reading Railroad.

This road, which is to connect with the Philadelphia and Reading Railroad at Birdsboro', nine miles south of Reading, is progressing rapidly, the grading of the entire line being nearly completed. The distance is about 60 miles. The road will, for the present, terminate at West street, Wilmington, but it is designed to extend it to the mouth of the Christiana river, where extensive piers are to be erected.

☞ The Pottsville *Standard* says a heavy force has been put to work on the Hazleton Railroad between Sunbury and Hazleton, and the construction is progressing in the most satisfactory manner. It is proposed to have the grading finished by the first of January. By next spring it is probable that cars will be running over the entire length of the road.

☞ A meeting of the stockholders of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company will be held in Cleveland, Ohio, on the 9th inst., to take into consideration and determine as to the propriety of this company's aiding in the construction of a railroad from Indianapolis, Ind., to some point on the St. Louis, Alton and Terre Haute Railroad, in the State of Illinois.

☞ The Boston *Journal* says that every mile of the Boston, Hartford and Erie Railroad, from Boston to Fishkill, is now under contract, and it is confidently asserted that the western end will be completed before the close of 1869.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley, left at tide water from the commencement of navigation to the 31st Aug., inclusive, during the years 1867 and 1868, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1867..	83,100	498,000	8,838,800	62,100
1868..	150,600	5,156,000	10,744,900	326,900
Inc..	67,500	4,658,000	1,906,100	264,900

By reducing the wheat to flour, the quantity of the latter left at tide-water this year, compared with the corresponding period last year, shows an increase of 999,100 bbls. flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of Aug., in the years indicated:

	1866.	1867.	1868.
Canal opened—	May 1.	May 6.	May 6.
Flour, bbls.	136,200	83,100	150,600
Wheat, bushels..	1,763,600	498,000	5,156,000
Corn, bushels...	14,989,900	8,838,800	10,744,900
Barley, bushels.	142,300	62,000	326,900
Oats, bushels...	3,686,500	1,933,100	4,719,900
Rye, bushels....	616,500	156,000	161,600
Malt, bushels...	224,800	177,900	310,000

☞ The Reading *Eagle* says the work on the Port Clinton and Topton Railroad is progressing. The section along the Blue Mountain is nearly finished, and the next is under way. The greater part of this road has been already graded from its eastern terminus, leaving the heaviest sections yet to be graded, which are at its western end, one of which includes a tunnel of about half a mile.

☞ The Commissioner of Patents has granted an extension of seven years to each of the following patents: Haywood's India rubber patent, Tuck's rubber packing for steam engines, and Halliday's improved governor for regulating the motion of windmills.

☞ Seven miles of the Chartiers Valley Railroad, commencing at Mansfield, have been surveyed, and are now ready to be put under contract. The road is expected to be in operation from Pittsburg by the middle of next Summer.

☞ The directors of the Virginia Central Railroad Company have contracted with Mr. Edward McMahon, and others, for the extension of the road from Covington to the Springs, by the 1st of May, 1869.

☞ The Paterson and Newark Railroad is pushed forward as rapidly as the peculiar difficulties in the way of grading will permit, and the contractors are making every effort to have it completed by January 1, 1869.

☞ The double track on the Boston and Albany Railroad has been completed, the last rail being laid between Chester and Middlefield, on the 27th of August.

☞ The track of the Alexandria, Loudoun and Hampshire Railroad is now laid some distance beyond Leesburg, Va. It will reach Bowler Crossing, it is thought, about the first of October.

☞ It is expected that the trains on the European and North American Railway will be running to Lincoln by January next.

☞ The first meeting of the corporators of the New Hampshire Central Railroad will be held at ntre Harbor on the 8th of September.

The Bessemer Process.

PRODUCTION OF CHEAP STEEL IN AMERICA.—COMPLETION OF THE GREAT WORKS AT TROY.—DESCRIPTION OF THE VARIOUS BESSEMER WORKS IN THIS COUNTRY.—THE NATURE AND VALUE OF THE IMPROVEMENT.

Continued from page 841.

The Bessemer patents in England are some twenty in number, and embrace not only the process, but the essential machinery, and many collateral subjects and defensive claims. In European countries the more important features have been secured by letters patent. Complete protection has been obtained in the United States, not only for all the essential parts of the Bessemer plant and process, in ten separate patents, but of the Kelley and Mushet inventions, and of various improvements by Holley and others. All these patents have been combined by purchase and compromise, and are held by Messrs. Winslow, Griswold, and Morrell, trustees for the parties interested. Under them, licenses have been granted to the various establishments to be hereinafter described, viz:

The Bessemer Steel Works, Troy, New York; Messrs. John A. Griswold & Co. Z. S. Durfee, Manager.

The Pennsylvania Steel Works, Harrisburg, Penn.: S. M. Felton, President. A. L. Holley, Chief Engineer.

The Freedom Iron and Steel Works, Lewistown, Penn.; John A. Wright, President, R. H. Lee, Superintendent.

The Cleveland Rolling Mill Company, Cleveland, Ohio; A. B. Stone, President. John C. Thompson, Superintendent.

The Wyandotte Steel Works, Wyandotte, Michigan; E. B. Ward, President.

The National Iron Armor Company, Chester, Penn.; William B. Reaney, President.

The Cambria Iron Works, Johnstown, Penn.; Charles S. Wood, President. George Fritz, Chief Engineer.

The foreign Bessemer works are as follows: In Great Britain, Henry Bessemer & Co., Sheffield; John Brown & Co., Sheffield; Charles Cammell & Co., Sheffield and Penistone; Weardale Iron Co., Tow Law, Durham; Thompson & Armstrong, Normanton; J. M. Rowan, Glasgow; Samuel Fox & Co., Deepcar; Lloyds Forster & Co., Wednesbury; Bolton Steel Works, Bolton le Moors; London and North Western Railway Works, Crewe; Lancashire Steel Company, Gorton; Mersey Steel and Iron Works, Liverpool; Manchester Steel and Railway Plant Company, Ashbury; Barrow Hæmatite Steel Company, Barrow; Guest & Co., Dowlais; Ebbw Vale Co., Ebbw Vale; Bessemer & Sons, Greenwich. In France there are five works; in Belgium one; in Prussia seven, including the celebrated establishments of Krupp and of the Bochum Co.; in Austria ten; in Sweden twelve; in Russia one; in India one. The whole number of converters in use is from one hundred and thirty to one hundred and fifty of various sizes, from one ton to ten tons, and the total annual capacity of them all is not less than half a million of tons.

THE TROY WORKS—HISTORY AND ORGANIZATION.

The Bessemer patents were purchased in England for Messrs. Winslow & Griswold, by Mr. A. L. Holley, and the Mushet patents for other parties (now represented by the Trustees), by Mr. Z. S. Durfee, at about the same time. Mr. Holley built the experimental works at Troy, started them in February, 1865, and completed the new works, or "five-ton plant," early in 1867, Mr. John C. Thompson then being superintendent of manufacture. Mr. Holley then took charge of the Pennsylvania Steel Works, and Mr. Thompson soon after, of the Cleveland works. Mr. Durfee having previously built experimental works at Wyandotte (afterward run with success by Mr. R. W. Hunt, now of the Cambria works), then took the management of the Troy works, built the forge and introduced various improvements to be farther referred to.

SITUATION.

The location of the Troy works upon tidewater and the Erie and Champlain canals, and, therefore, accessible to coal and the general market by of the cheapest transportation, in the centre of a remarkable and varied iron supply, from the Hudson and Housatonic valleys, from Vermont and Lake Champlain, from the promising Adirondack region, and from the markets of the South and West; this general location is not more eligible than the immediate sites of the works controlled by Mr. Griswold. The Bessemer Works are situated on a level plot, some fifteen acres in extent, with a rock bottom for foundations, well above high water, and bounded on one side by one thousand feet of tide-water, and on the other by the same length of Hudson River Railway. The more remarkable feature of such a site, is a constant water-power of one hundred horse, with thirty-four feet fall, supplied by an underground, four and a half feet trunk, from a line of ponds and reservoirs extending for miles above, and conducted from the wheel-pit to the river by a covered brick race-way.

BUILDINGS.

The Bessemer building is of brick, one hundred and seventy-eight feet long by sixty-five feet wide, and twenty-two and a half feet high in the clear. A pair of five-ton converters and their appurtenances occupy one hundred and ten feet of its length. The remainder contains the experimental two-ton converter and its apparatus, and is of sufficient size for a pair of two and a half or three ton converters, soon to be erected. The cupola building, joined to the East or railroad side of the Bessemer building, is a brick structure forty-four by twenty-four feet, and thirty feet high in the clear. At one end of the Bessemer building, and forming a continuation of it, is a wooden building one hundred and sixty feet long by seventy-five feet wide, and twenty-two and a half feet high, designed for hammers and other machinery for working up ingots. The converting building and forge are roofed with slate, and mounted by a continuous lantern three hundred and thirty-eight feet long and twenty-one feet wide. At the other end of the converting building is a four story brick structure sixty-five by thirty-six feet, and thirty-nine feet high from the ground in the clear, covered with a hipped slate roof and a lantern twelve and a half by forty-one feet. The basement contains a fifty horse Collins turbine, employed to drive the machinery and blowers above; also, a machine for grinding stone for converter linings (a nine foot pan and two six feet rolls), and a seventy pound tilt hammer for testing ingots. The second or ground floor is a machine shop fitted with the necessary lathes, planers and tools for the maintenance of the works. The third and fourth floors are for the storage of tuyeres and the miscellaneous materials employed in the manufacture. A power lift operates from cellar to attic. A No. 6 Root pressure blower and a five foot Dimpfel fan and their driving machinery for supplying blast to the cupolas and furnaces, and a No. 2 Bogardus mill for grinding the finer fire materials, are placed upon the third floor.

The above described buildings form a continuous structure of eighty-nine feet maximum width, and four hundred and seventy-four feet length. Upon the West, or river side of these buildings (a sixty feet street lying between), stands a wooden building sixty by sixty-five feet, and sixteen feet high in the clear, with a high attic for storage, and a continuous lantern above. Here are the boilers and the blowing and hydraulic engines. These buildings, with the offices, store bins, and railways, form a complete establishment, capable at present of producing forty tons of ingots per day, or sixty to seventy tons per day of ingots, and a considerable amount of forgings and finished work, when the two ton experimental converter is replaced by a larger plant and the forge is fully occupied.

MACHINERY.

The blowing engine consists of two forty-eight

inch air cylinders, four feet stroke, lying at the two ends of a heavy bed plate, forty-three feet long, five and three-quarter feet wide, and one and three-quarter feet high, and connected to a common crank upon one end of the steam engine shaft. The steam cylinder lies by the side of one of the air cylinders, upon a framing of its own, and is thirty inches in diameter. Its piston, of four feet stroke, is connected to a crank on the other end of the main shaft. The air cylinders being connected to one crank, operate like a single cylinder, and cause a pulsation in the blast, which is in other engines avoided by cranks at right angles. But the large air receiver, eight feet in diameter by eighteen feet high, so equalizes these pulsations that the pressure gauge shows less than a pound variation, and does not at all embarrass the indications at the converter mouth by which the decarburization is determined. The tendency to irregular motion, due to a single steam cylinder, is also corrected by a fly-wheel of twenty-one feet diameter and twenty and a half tons weight. These are valuable results, as they will lead to economy in construction. The steam engine was constructed upon the plans of Mr. Geo. H. Reynolds, and embraces some novel features, among others, a framing peculiarly strong in the line of strain, and a condenser and air pump below the cylinder, formed between the frames; the air pump is double acting, and is driven by an arm from the cross-head. The injection water comes from the reservoirs before referred to. The valve motion is the long slide, with fixed independent slike cut-off. The boilers, four in number, are fifteen feet long by five feet in diameter, having forty-two four and a half inch return flues, five by five and a half feet grate, and three by four feet domes, and form a battery, inclosed in brick, with cast iron fire fronts of novel and good construction. The smoke stack is of sheet iron. The blowing machinery was constructed at the Delamater Iron Works in New York.

The pumping engines for working the cranes and hydraulic machinery in the Bessemer Building is a Worthington "Duplex" with fifteen inch stroke, two twenty inch steam cylinders, and two seven and a quarter inch water cylinders, working at three hundred and fifty pounds pressure per square inch. The feed pump for the boilers is also a Duplex. This is probably the most trustworthy and economical class of hydraulic machinery known.

THE EXPERIMENTAL BESSEMER PLANT

has been variously changed, and has developed a vast amount of useful knowledge concerning irons, materials, and processes, besides producing some thousands of tons of marketable steel. It consists of a two ton vessel, or converter, five feet in diameter, rotated by hand-gearing, and supplied with melted iron by a No. 2 Mackenzie cupola, having a moveable bottom, and thus being *the* equivalent cupolas. The main crane is worked either by hand or by a hydraulic cylinder attached to the crane chain, and lifts the ladle crane as well as the ingots and moulds. The recarburizing material is melted in crucibles instead of air furnaces. This change, developed by Mr. Durfee, promotes the uniformity of the product, and does not greatly, if at all, increase its cost.

The "five-ton plant" consists, firstly, of two cast-iron converters, fourteen and a half feet high by eight feet ten inches diamater, standing side by side. In their rear is the wall of the converting house, pierced with arches leading to the melting house, and supported by heavy buttresses, upon which stand the hoods and chimneys to conduct the flame from the converters. In their front is a circular casting pit, thirty-four feet in diameter and thirty inches deep (having deeper covered pits for large ingots,) with a ladle crane in the centre and three ingot cranes at its sides, upon the general level. The ladle crane, of fifteen tons capacity, is a hollow cast-iron post or ram, standing in a fifteen-inch cylinder (six feet stroke,) and reaching to a support in the roof. It carries a fifteen and a half feet jib, consisting of two wrought-iron arms held up by diagonal tie rods, and forming a railway upon which the carriages supporting the ladle are moved, radially by a rack and pinion. The ladle is removable by one of the ingot cranes (for repairs of lining after each heat,) and is about four feet high and of this same diameter for a five-ton charge, or double the size when it is to receive the product of both converters. It is mounted on trunnions, and rotated by a worm attached to the carriage. It is lined with loam, dried in an oven standing in one corner of the building, and heated by being turned over a small furnace in the pit. The steel is let out of a hole in the bottom of the ladle, into the ingot moulds, by means of a fire-clay nozzle, two inches in diameter, and a fire-clay stopper, operated by a slide and lever fastened to the outside of the ladle. The ladle crane is rotated by hand gearing, and is moved very easily, as it rests upon frictionless water.

The two side ingot cranes are constructed like the ladle crane, except that they have a single carriage on the horizontal jib, with a chain depending. The ram is of twelve inches diameter, the stroke nine feet, the length of jib twenty-two feet, and the capacity eight tons. These cranes swing over the respective converters and over one-third of the pit each, and over a considerable floor space, and are chiefly used for lifting ingots and moulds. The central ingot crane has an eighteen feet jib, a nine-inch ram, and lifts three tons.

All the cranes are operated from a raised platform or "pulpit," by means of geared hand-wheels, opening brass three-way and four-way cocks, like gas cocks, only seven inches in diameter, and thus admitting or exhausting water at the three hundred and fifty pounds pressure of the pumping engine before mentioned. From the same "pulpit" are operated the valves of two hydraulic lifts of twelve inches diameter, fifteen inches stroke, and eight tons capacity, standing under the converters for taking them apart, and also the two eight-inch screw valves for admitting air to the converters, and also the valves of the seventeen inch (six feet stroke) hydraulic cylinders for revolving the converters on their trunnions by means of racks, and pinions of three feet diameter, twelve inch face and five and one eighth inches pitch. The air and water are conveyed from their respective engines to the regulator under the "pulpit," and from the regulator to the cranes, etc., by underground pipes. A boy working the regulator handles can thus not only perform the work of some fifty men, but he can do it with perfect precision and promptness. In fact, men enough could not be got into position to do the work or stand the heat. The hydraulic cylinders are arranged to be "blown out" in freezing weather, by admitting air instead of water.

A railway, with sidings in the building and yard, joins the Hudson river railroad track.

The meeting house contains a No. 6 Makenzie cupola with three revolving bottoms, and is the equivalent of three cupolas. An eight ton crane built like the ingot cranes, but having eleven and a half feet lift, raises a platform with barrows of iron and coal from the ground level (which on this side of the works is four and a half feet higher than the converting floor) to the level of the cupola and air furnace charging floor. The melted iron is tapped out into one of two ladles standing on eight ton scales. When a ladle is filled, it is weighed, so that the exact per centage of the recarburizer may be ascertained, and then raised by the same crane that lifts the materials to the cupola. The ladle hanging by its trunnions in a frame is then turned over by a worm attached to the frame and emptied into a spout that conducts the melted iron to the mouth of the converter. The air furnaces for melting the recarburizer are placed over the oven, at one end of the converting building, in a line with the converters, and at the level of the cupola charging floor. The recarburizer (melted manganesian pig iron) is tapped into a ladle which runs upon an overhead railway from the furnace to the converters.

"*A blow.*"—However interesting the foregoing facts may be to steel makers, or however dull to general readers, a "blow"—the thing itself—is remarkable alike to the scientific and the unprofessional observer, especially at night when the spendor of this intense and concentrated combustion is not rivalled by sunshine, and when the imagination invests each ponderous machine with mysterious life and awful energy. The cavernous room is dark, the air sulphurous, the sounds of suppressed power melancholy and deep; halt revealed monsters with piercing eyes crouch in the corners, spectral shapes ever flit about the walls, and lurid beams of light anon flash in your face as some remorseless beast opens its red-hot jaws for its iron ration. Then the melter thrusts a a spear between the joints of its armor, and a glistening yellow stream spirts out for a moment, and then all is dark once more. Again and again he stabs it till six tons of its hot and smoking blood fill a great cauldron to the brim. Then the foreman shouts to a thirty foot giant in the corner who straightway stretches out his iron arm and gently lifts the cauldron away up into the air and turns out the yellow blood in a hissing, sparkling stream which dives into the white hot jaws of another monster—a monster as big as an elephant with a head like a frog and scally hide. The foreman shouts again, at which up rises the monster on its haunches, growling and snorting sparks and flame.

What a conflict of the elements is going on in that vast laboratory. A million balls of melted iron, tearing away from the liquid mass, surging from side to side, and plunging down again only to be blown out more hot and angry than before—column upon column of air, squeezed solid like rods of glass by the power of five hundred horses, piercing and shattering the iron at every point, chasing it up and down, robbing it of its treasures only to be itself decomposed and hurled out into night in roaring blaze.

As the combustion progresses, the surging mass within the converter grows hotter, throwing out splashes of liquid slag—and the discharge from its mouth changes from sparks and streaks of red and yellow gas, to thick, full, white, howling, dazzling flame. But such battles cannot last long. In a quarter of an hour the iron is stripped of every combustible alloy, and hangs out the white flag. The converter is then turned upon its side, the blast shut off, and the recarburizer run in. Then for a moment the war of the elements rages again; the mass boils and flames with higher intensity, and with a rapidity of chemical reaction, sometimes throwing it violently out of the converter mouth; then all is quiet, and the product is steel—liquid, milky steel, that pours out into the ladle from under its roof of slag, smooth, shining, and almost transparent.

To be continued.

White Mountain Railroad.

At a special meeting of the stockholders of the Boston, Concord and Montreal Railroad, held in Concord, N. H., on the 31st ult., it was voted nearly unanimously to ratify the contract made by the Directors for extending the White Mountain Railroad from Littleton toward the Grand Trunk Railroad at Northumberland. The stockholders of the White Mountain Railroad also held a special meeting, and ratified the action of their Directors for the same object.

☞ The Menomonee (Wis.) *Herald* says there is a fair prospect of the extension of the Chicago and Northwestern Railroad, from Fort Howard to Menomonee River, and that the people there are ready to subscribe to the stock.

☞ Parties representing the Virginia and Tennesse, Southside and Petersburg and Norfolk railroads have recently had a conference at Yellow Sulphur, and virtually agreed to a consolidation of the three lines.

Railroad from Tremont to the Lehigh Valley Railroad.

The surveys of the new line of railway from Tremont to the Lehigh Valley, have been completed so far as to enable the engineers to proceed with the location of the road, which will commence next week, and it is expected that grading will be commenced on the heavier parts of the work in October. Great care has been taken to avoid heavy grades and short curves, and we are informed that the maximum grade running east will not exceed twenty feet to the mile, and the grade running west will not exceed fifty feet to the mile. As the heavy freights will be all eastward, the road will thus possess all the advantages practically of a twenty feet grade. Starting from Tremont, the principal points intersected in Schuylkill will be New Mines, Forestville, Wolf Creek, Mount Laffee, Wadesville, St. Clair (crossing near Johns' breaker,) Windy Harbor, Silver Creek, Kaskawilliam, Tuscarora and Tamaqua (passing between Tamaqua and the old Donaldson shaft,) and thence to intersect the Lehigh Valley road at a point near Lehighton. The length of the road will be 36 or 37 miles, and it is proposed to construct and equip it as a first class coal road. In the surveys, special attention has been given to securing such a level as will best accommodate the present and prospective coal developments of the region lying south of the Mine Hill Mountain. This has been secured to such an extent, we are informed, as will enable every operation in what is known as the Southern coal basin to connect at an easy grade; while the route is such that nearly all the larger operations are either immediately on the line of the road, or within a convenient distance, thus avoiding the expense of long lines of laterals. The managers of this road have done but little talking, but have been pushing the work along as rapidly as the care with which they desire it to be done will admit of. In fact, so little have they made public of their intention that it has only been through the courtesy of a friend (who by the way is accurately posted,) that we have been enabled to get hold of sufficient material for a newspaper paragraph. Of one thing, however, we are fully assured—the road will be built, and will be operated independently of and in competition with all other lines that reach the same territory.—*Pottsville Standard.*

Connecticut Western Railroad.

Although little has been said about this new railway, whose termini will be Fishkill, N. Y., and this city, probably, the project has been pushed steadily along, and there is now fair prospect of an early commencement of the work. In accordance with the provision of the road's charter, the town of Winchester, Ct., has subscribed $116,000 in the stock, and this amount will be increased by private subscription to $200,000. The money to construct the road from the State line to the point of connection with the Dutchess and Columbia road, in New York, has already been pledged, and the town of Salisbury will raise enough to build it from the State line east to Norfolk, 14 miles. President W. H. Barnum is working energetically, and says that the portion of the road from Winsted west can be put under contract by the first of October. The surveys have not yet been completed and the line of the road definitely fixed, but that the eastern terminus will be this city or Hartford is certain.—*Springfield Republican.*

☞ The Boston *Advertiser* says that this proposed route of the Connecticut Western Railroad will extend from Hartford to Millerton, N. Y., on the Harlem road, and will pass through Farmington, the edge of Canton, Winchester, New Hartford, North Canaan, Norfolk and Salisbury.

☞ The Utica, Chenango and Susquehanna Valley Railroad was completed and opened to Smorburne, in Chenango Co., a distance of 43 miles from Utica, on the 19th ult.

Portland and Ogdensburg Railroad.

The enabling act of the Vermont Legislature, requires that the towns in that State, proposing to aid the Portland and Ogdensburg Railroad, shall obtain a majority of the legal voters, a majority of the tax payers, and a majority of the taxable property represented by the entire ownership, male and female. This triple majority has, however, been secured in nearly every town in the State through which the road will pass if constructed.

☞ The proposed Somerset Railroad, from West Waterville to Caratunk Falls, on the Kennebec, in Maine, will cost $600,000—$450,000 of which are subscribed by the towns on the route. The Maine Central Railroad Company have agreed to lease the road, when completed, for fifty years, and pay six per cent. interest on its cost, not to exceed $20,000 per mile.

☞ At a meeting of the Mononahela Valley Railroad Company at West Brownsville on the 29th ult., it was announced that $81,000 had been subscribed leaving $23,000 yet to secure the charter, which was guaranteed by one person before the next meeting. The meeting adjourned to meet in Birmingham, September 11th.

☞ At a recent meeting of the directors of the Erie and Genesee Valley Railroad Company, it was decided to build the road from Mt. Morris to Dansville. Measures will at once be adopted to secure the aid of the several towns through which the road will be laid.

☞ The Little Rock (Ark.) *Gazette* says a company has recently been organized under the provisions of the general railroad law, passed at the last session of the general assembly, for the purpose of constructing a railroad on the most feasible route to be found on the south side of the Arkansas river between Little Rock and Fort Smith.

☞ The contracts for the grading of the Knox and Lincoln Railroad have been made, and the work is to be finished by the middle of June, 1870.

THE LATHE AND ITS USES.

JOHN WILEY & SON,
No. 2 Clinton Hall, Astor Place, New York,
Have just published:

THE LATHE AND ITS USES; or Instructions in the Art of Turning Wood and Metal, including a description of the most modern appliances for the ornamentation of plane and curved surfaces, with a description also of an entirely novel form of "Lathe" for Eccentric and Rose engine turning—a Lathe and Turning Machine combined, and other valuable matter relating to the art. 1 vol. 8vo, copiously illustrated, cloth, $6 50.

*** Mailed and prepaid on receipt of price.

"The most complete work on the subject ever published."—*American Artisan.*

WANTED.—A MASTER MECHANIC to take charge of a Locomotive and Machine Shop. One well accustomed to managing men required.
4136* Address Box 116, N. Y. P. O.

TO RAIWAY CONTRACTORS. Sealed proposals will be received until noon of Tuesday, September 15, 1868, for the building of the Somerset Railway complete and ready for the rolling stock.

Also, separate proposals for the graduation, masonry, bridge work and ballasting of the same.

The line of said railway extends from West Waterville, Maine, to Carratunk Falls in Solon, about 34 miles. Work to be commenced immediately.

The directors reserve the right to reject any and all bids.

Proposals to be directed to the undersigned at West Waterville, Maine, where the plans and profiles can be seen and information had concerning the general extent and character of the work.

JOHN AYER, for the Directors.
West Waterville, Me., Aug. 31.

780 MILES
OF THE
UNION PACIFIC
RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **103**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,
And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
Sept. 1, 1868.

Blowing and Pumping Engines;
Sugar Mills, Engines, Clarifiers, Kettles, Vacuum Pans;
Steam, Vacuum and Water Guages, Indicators, Registers, &c.;
Steam Pipe, Whistles, Cocks, Valves, &c.
Hydrostatic, Lever, Screw, Cotton, Oil and other Presses;
Parkhurst's Saw Mills, Saws, &c.; Leather Belts and Hose.
Extensive stock of Patterns of Spur, Bevel and Mitre Wheels;
Pulleys, Fly Wheels, Racks, Ratchets, &c.
Burnett's Movable Cranes, Crane Engines, Hoisting Gear, &c.
Stevenson's Turbine Water Wheels;
Luther's Turbine Water Wheels.
Gear and Wheel Book furnished on application.

TO RAILWAY CONTRACTORS.

THE GRADUATION, MASONRY AND BALLASTING of the following enumerated sections of the

Pittsburgh and Connellsville Railroad,

Are advertised for contract, and proposals for the same will be received at the Company's Office, in Pittsburgh, up to

30th of SEPTEMBER, inclusive.

Commencing at the Uniontown Branch Junction, about a mile east of Connellsville, Sections 59 to 64 inclusive. Then Sections 65, 73, 74, 76, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 106, 110, 112, 115, 116, 117, 118, 119, 122, 128, 129, 130, 133, 140. All of these Sections are in the valley of the Youghiogheny River, up to Section 112 inclusive. Sections 115, 116, 117 are on the Summit, and embrace the Sand Patch Tunnel; and the remainder are in the valley of Wills Creek, Section 140 being about 5 miles from Cumberland.

Specifications of the work on the above Sections will be ready for delivery on the 1st of September, at the offices of the Company, at Pittsburgh and Cumberland, where contractors will obtain all necessary information to enable them to examine the line.

The Company reserves the right to reject all or a part of each bid.

B. H. LATROBE,
Civil Engineer.

August 10th, 1868. 5t34

To Railroad Contractors.

Sealed proposals will be received until noon of WEDNESDAY, Sept. 9, 1868, for the graduation and masonry of that portion of the SOUTH PACIFIC RAILROAD, in the State of Missouri, between the present terminus of Little Piney and a point fifty miles southwest of said terminus. The work to be contracted for by sections according to the plans of the Chief Engineer.

Work to be commenced forthwith, and payments to be made monthly in cash.

The Company reserves the right to reject any and all bids.

Proposals to be directed to ANDREW PEIRCE, Jr., Managing Director at the office of the Company, corner of 6th and Walnut streets, St. Louis, Missouri, where all profiles will be exhibited and information given by T. W. KISSOCK, Chief Engineer, or C. B. FISK, Vice President.

FRANCIS B. HAYES, President.

42 Exchange Place, New York,

are prepared, as Sole Agents in the United States for the Prussian Mining and Iron Co., of Duisburg, Westphalia, to contract or sell in quantities to suit purchasers (delivered in either New York or Philadelphia) the celebrated

V. H. SPIEGELEISEN

used so extensively for the manufacturing of

Bessemer Steel.

This iron is free from Sulphur and Phosphorous, and contains a heavy percentage of Manganese. The above are also ready to contract for, or sell to arrive,

STEEL RAILS

Manufactured by

G. ARNDT & CO.,

of Dortmund, for which latter firm they also have the Sole Agency in the United States.

For particulars, samples, prices, or chemical analysis will be promptly forwarded on application. 3m32

VAN ANDEN RAIL CHAIR COMPANY,

359 MAIN STREET,
POUGHKEEPSIE, N. Y.,

By their improved Machinery are enabled to offer

Swaged Wrought-Iron Rail Chairs

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

American Railroad Journal.

New York Saturday, September 12, 1868.

Baltimore and Potomac Railroad.

A meeting of the stockholders of this road was held at Upper Marlboro', Prince George's County, Md., on the 2d inst. Hon. Samuel H. Berry in the chair. The report of the directors was presented by Hon. Oden Bowie, President of the company. It is stated that the general condition of the affairs of the company is at this time much better than ever before, and the immediate completion of the whole road to the Potomac River is claimed to be assured. The difficulties encountered in the last twelve months are said to have been permanently relieved. Mr. Bowie states that no route has been selected for the road through Charles County to the Potomac, there being two under consideration, and he suggests that "the constitution having conferred upon the three lower counties five hundred thousand dollars for internal improvements, it is suggested to, and urged upon, the people of Charles County to appropriate their third of this amount to the building of this road *within their county limits.*" It is also stated that in Charles County "several gentlemen have each offered, in addition to the right of way, all the necessary land for depot grounds, sidings, switches, wharfage, &c., free of cost, to the extent, in some cases, of ten acres, if their property shall be selected as the terminal point."

Since the last annual report the engineering corps has been kept engaged in preliminary surveys and location, or divided into resident construction corps in charge of such sections of the work as were under contract and being graded. Of those gentlemen having contracts for grading, Mr. E. G. W. Hall, and Heistend & Co., have nearly finished the different sections for which they had contracted in Prince George's County, both on the main stem and Washington branch. Messrs. Hammond & Co. were making excellent progress in Anne Arundel County, but were recently compelled to stop further work because of difficulties about right of way on sections for which they had the contract. But those difficulties having been satisfactory settled, they will actively and immediately resume work. The right of way from the Annapolis and Elk Ridge road to the Patuxent River has all been secured either by gift, purchase, arbitration or condemnation, which also enables Criswell & Co. to resume work, which they, too, had been compelled for a like reason to suspend. Arrangements have been made for all other parties having contracts of last year to vigorously prosecute their work, and subcontracts are now ready to be awarded on the whole main stem from Baltimore to Marlboro', and the branch to Washington on which work will be immediately commenced.

The stockholders elected the following directors for the ensuing year: Governor Oden Bowie, Colonel William D. Bowie, of Prince George's County, Md.; Hon. James C. Clarke, of Baltimore County, Md.; Capt. Samuel Cox, of Charles County, Md.; Hon. Eli J. Henkle, of Anne Arundel County, Md.; George W. Miller, Esq., of Buffalo, New York, and Wm. T. Walters, Esq., of Baltimore City.

Intercolonial Railway.

"If the Railway Commissioners are appointed next week, it is expected they will be ready by the first of November to call for tenders for the construction of such portions of the Intercolonial Railway as Mr. Sanford Fleming shall have reported on, and as may be approved by the Privy Council. The number of miles of contract to one individual will, it is said, not exceed 25 miles. As the contract will not be given out until the beginning of December, there will be really no work done this year, except in the way of preparation for next summer's operations. It is said the Railway Commissioners will first hold their meetings at Ottawa, but that when the railway works are commenced they will sit at Quebec."—*Toronto Globe.*

Solid Lever Bridge Co.

This company have just completed a Solid Lever Bridge for the European and North American Railroad Company, whose road will connect St. John and Bangor, Me. This bridge is designed to span the Costigan Brook. It is the first of the kind ever manufactured; has a span of 50 feet, is 15 feet wide, and contains but a little more than 5 tons of iron. It is composed of two levers which join in the centre and are held in position by means of weight or balance power on the abutments. Upon these is then put a common truss-arch, whose heel centres on or strikes the lever back of the fulcrum, which has the effect of balance power or raising the lever in the centre. While on exhibition, 27 tons weight were placed upon it, covering a space of 9 or 10 feet, which would be equal to 86 tons or more distributed over the whole space. The bridge was built by projection, without staging, and is furnished at about one-third the cost of other iron bridges. It is considered by competent judges to be a perfect success. CHARLES PARKER, engineer of the company designed and superintended the building of this bridge.

Union of Lakes Huron and Ontario.

It is stated the project of uniting Lake Huron and Lake Ontario bids fair to be a reality. Able engineers have decided that the work is feasible and that it will not cost more than $40,000,000. It was proposed to raise $20,000,000 of this in the United States, and $20,000,000 in England. These loans were to be secured by a grant of 10,000,000 acres of land by the Canadian government. Mr. Frederick Capreol, of Toronto, has undertaken the financial management of the enterprise. Some time ago he succeeded in obtaining guarantees from American capitalists that they would furnish $20,000,000 if the balance should be subscribed in Europe and the land secured. For several months he has been in England, and it is said that his prospects of success in securing the other $20,000,000 are very satisfactory. When that is secured it will only be necessary to obtain the land grant before work can be commenced.—*Cleveland Leader.*

Flour and Grain Trade of Buffalo.

The receipts of flour and grain at Buffalo by Lake and Grand Trunk Railway for the month of August, 1866, 1867 and 1868, have been as follows:

	1866.	1867.	1868.
Flour, bbls....	102,558	161,938	161,001
Wheat, bush...	484,885	890,420	1,077,779

Total, bush....	51,331,370	38,656,577	46,975,133

Platteville and Calamine Railroad.

The Grant County (Wis.) *Witness* says that a meeting of the stockholders in this road was held on the 24th ult., for the purpose of adopting measures to complete the railroad to Platteville by the 1st of January. The agent, Mr. Sam Moore, stated that the grading was finished to within six and a half miles of Platteville, and that means were provided to complete the road up to the Belmont Station, but that would exhaust all that was due of the first installment of the preferred stock. He proposed that if the stockholders would pay up the second installment in four equal monthly payments that he would have the road graded and ready for the cars to run upon by the first day of January next. A motion was made to that effect and it was voted unanimously that the money should be so paid.

About forty thousand dollars will be needed to complete the grading and furnish the fish plate, ties, spikes, etc., for the remaining six and a half miles. The second installment of stock subscribed amounts to about nineteen thousand dollars. To raise the balance besides what can be raised on the town orders, a committee was appointed for the purpose of canvassing and procuring such additional aid as may be obtained. One hundred additional men will be put on the work and the road pushed forward with all possible speed.

Boston and Maine Railroad.

The earnings of this road for the years ending May 31, 1867 and 1868, were as follows:

	1867.	1868.
From passengers.....	$976,683 97	$907,133 23

Leaving a balance of.....		923 89
To which add balance from previous year.....		975,093 72
Total, as in General Balance Sheet.		$976,017 10

The above balance of $976,017 10 is invested as follows: in Newburyport Railroad bonds, $300,000; in Danvers Railroad bonds, guaranteed by this corporation, $73,000; in the Danvers Railroad contract and stock, $27,330—and the remainder in expenditures on the road, rolling stock, etc. It is, therefore, only an element indicating, in some measure, the value of the stock above par; but it is not available for the payment of debts or dividends. The report says:

It will be perceived that the receipts have been $55,214 28 less than in the previous year. By deducting the sum of $10,000, received from the Portland, Saco and Portsmouth Railroad, in the former but not in the latter year, the actual receipts from the same elements will appear to have decreased only $45,214 28.

The amount received from passengers is $69,550 74 less, and from freight $21,359 34 more than in the former year.

The diminution in passenger receipts is mostly from the regular local business. This is accounted for, in a great measure, by the reduction of fares from the basis of three and one half cents per mile, alluded to in the last Annual Report.—

It may be proper to remark here, that the number of our season ticket passengers is steadily on the increase.

We have now more than 2,250 such, who have the right to be carried on the road, once each way, daily.

The expenses attending the operations of the road exceeded those of the previous year by the sum of $38,497 09.

The principal cause of the increased expenditure last year was the article of rails. The outlay on that account was $87,400. This is $35,000 more than for any preceding year. During the last ten years we have laid down 9,470 tons of rails, costing, after deducting the value of old rails exchanged or sold, $355,900,—averaging 947 tons, and costing $35,590 per annum.

In no one year, of the first six of the above named term, did the expenditure for rails exceed the sum of $28,000, while the increase for the last four years has been very great. During the last year there were laid down more than 2,000 tons (including 100 tons of steel rails) at an expense of $87,400, as above stated.

Several causes have contributed to produce this result. We have had in use, until recently, considerable iron that was laid when the road was first constructed. It was found necessary to replace that with new iron. This has been done to a considerable extent.

Another cause has been the poor quality of the rails laid down for a few years past.

Furthermore, the great increase in the quantity of freight carried, and also, in the aggregate amount of miles run by the trains, during the past few years, have very materially increased the wear of the rails. These last remarks will apply equally to the sleepers, wheels, axles, tires, &c., all of which need repairs and replacing in nearly the exact ratio to the service rendered.

During the last year, the wooden freight house in Boston, opposite the Fitchburg Depot, has been raised, repaired, and extended in length. A new wooden freight house, extending from Travers to Causeway Street, has been erected. This is principally used as a depot for hay. These have added to our facilities in Boston for transacting the large and constantly increasing freight traffic over our road.

A new passenger depot, at Highland Station, in Melrose, has been built.

The passenger depot at Andover has been raised, thoroughly repaired and painted. The arrangements at Haverhill have been completed. The new station buildings at Exeter, consisting of a brick passenger depot, containing a spacious and elegant dining room, a brick freight house, a brick building for the water tank, steam engine, &c., a wood shed, and a coal shed, together with facilities for the supply of wood and water to passing engines, have all been finished. These buildings are abundantly ample and convenient.

They give great satisfaction to the travelling public and to the patrons and friends of the road in Exeter.

The shops at Lawrence have been so far rebuilt, that all necessary repairs upon the cars are made with expedition and economy. Many new four-wheel freight cars have been built there for the coal and brick traffic especially, which will keep up our rolling stock in that department.

The bridge over Charles street, in Dover, has been finished and covered. The improvement here gives perfect satisfaction.

Contracts have been executed for reconstructing and extending the Passenger Depot in Boston. It is an important work, and considerable time will be required to accomplish the undertaking.

New station buildings have been erected at Rochester, both for passengers and freight. They are built of brick, and slated, and are ample for the accommodation of the business of that flourishing place.

Considerable has been done at Alton Bay in erecting a new passenger depot, and in other alterations and improvements.

A line of telegraph has been erected over the Dover and Winnipiscogee Railroad.

This has been long needed, and will prove to be very beneficial in operating that road in connection with the main line.

In carrying out your views, as expressed at the last annual meeting, the directors have caused surveys to be made, with a view of avoiding Ward Hill, or lessening the grades over it, in anticipation of completing the double track between North Andover and the bridge over the Merrimac. The results of the surveys, thus far, have not been perfectly satisfactory, and no progress has yet been made in construction.

There has been no change in our relations with the Portland, Saco and Portsmouth Railroad Company. We have not received any remittance from that road during the past year. All the surplus earnings have been laid out in the permanent improvements upon that road, that were referred to in our last annual report.

The amount credited to us on the books of that corporation, on the 31st of May, 1868, was $179,-237 82. This sum, together with the amount due the Eastern road, is an acknowledged debt due from the Portland, Saco and Portsmouth Road. These amounts will be considerably increased before the improvements, begun at Portland, and in contemplation, shall have been finished. In view of this fact, measures were taken by the directors of that road to meet the subject in such a manner as would be agreeable to the Boston and Maine and Eastern Railroad Companies. An act was obtained from the Legislature of Maine, authorizing an increase of the capital stock from its present amount of $1,500,000 to $2,000,000. This matter was brought before the stockholders at their last annual meeting, and they voted to accept the act, and authorized their directors, "with the consent of the Eastern Railroad Company and the Boston and Maine Railroad Company, to issue, from time to time, so many shares as may be necessary to pay for permanent improvements, made and to be made, in the erection of structures, increasing the equipment of the road, and putting it in the working condition of a first class railroad, so as to furnish accommodations for the increasing demands of the public; that such new shares, with the consent aforesaid, shall be disposed of by the directors of this corporation, in accordance with the terms of said act, and shall have the same rights as those already issued."

This subject, which is of great importance to the stockholders of this corporation, will come before the annual meeting for their corporate action.

It was stated in the last annual report, that there was a discrepancy between our accounts in respect to the haulage of freight between Boston and Portland.

This has not yet been adjusted. The action commenced against us, to which reference was made in the same report, has been tried before a single Justice. The questions of law, which are to determine the issue, are reserved for the decision of the full Bench.

During the last two years we have added to our rolling stock 6 new locomotives, 12 new passenger cars, of elegant style and workmanship, 175 new freight, and several baggage cars, at an expense of $275,000.

In addition to this, many of our cars of the old pattern have been refinished in the modern style. We have now more than 40 with the Monitor top, so called.

The tables in the appendix will well repay a careful perusal. By examining them you will perceive, that more service has been accomplished —more freight hauled and more miles run—than in any previous year.

The road has been kept in good running order, notwithstanding the severity of the past season. The usual examination of the treasurer's accounts has been made, under the direction of a committee. The Auditor reports them to be correct.

The new stock, authorized to be issued at the last annual meeting, has generally been taken by the stockholders.

The company have 43 locomotives, 73 passenger, 21 baggage, 869 merchandise and 107 gravel, hand, and other cars. Miles run by passenger trains, 581,058; by freight trains, 288,125; by gravel trains, 15,442; by extra trains, 9,036—total miles run, 893,661. Number of passengers carried, 3,148,988; do., carried one mile, 42,096,255. Tons of merchandise carried, 344,136; do., carried one mile, 12,886,085.

President.—F. COGSWELL.

Directors.—Francis Cogswell, Peter T. Homer, Nathaniel G. White, E. J. M. Hale, George C. Lord, Amos Paul and John E. Bickford.

Treasurer.—A. BLANCHARD, JR.

Superintendent.—WILLIAM MERRITT.

Reverse Repeater Rails.

Mr. C. H. James, of Cornwall, Canada, has taken out a patent for a new and useful machine which he calls the "Dominion Reverse Repeater Rail." It is to be used for assisting and conducting engines and railroad carriages back to the rail when they jump off or are pulled off by accident.

Mr. James proposes that his Rail will return the cars back to the rail in eight or ten minutes. This will be a great saving both in time and money to the railroad companies and the travelling public. The Reverse Repeater Rail can be carried on every train, as two men can move it to any point required.

☞ A correspondent of the Baltimore *Sun* writing from Annapolis, Sept. 7th, says: In a few days work will begin on that part of the Baltimore and Potomac Railroad that intersects the Annapolis and Elk Ridge. This intersection is made about fourteen miles from Annapolis, and when the Potomac road is completed the distance to Baltimore from this city will be twenty-six miles. It is now thirty-eight.

The Public Debt.

The following is a comparative statement of the Public Debt of the United States August 1, and September 1, 1868:

DEBT BEARING COIN INTEREST.

	August 1, 1868.	Sept. 1, 1868.
Five per cent. bonds	$221,588,400.00	$221,588,400.00
Six per cent. bonds of 1881	283,677,300.00	283,677,300.00
Six per cent. Five-twenty bonds	1,583,106,100.00	1,591,226,050.00
Total	$2,088,371,800.00	$2,096,491,750.00

DEBT BEARING CURRENCY INTEREST.

Six per cent. Pacific R. R. bonds	$32,210,000.00	$35,314,000.00
Three-year compound interest notes	21,604,890.00	10,595,410.00
Three per cent. certificates	50,000,000.00	62,205,000.00
Navy pension 3 p. ct.	13,000,000 00	13,000,000.00
Total	$116,814,890.00	$121,114,410.00

MATURED DEBT NOT PRESENTED FOR PAYMENT.

Three years Seven-thirty notes, due Aug. 1, 1867, June and July 15, 1868	$3,433,800.00	$4,650,000.00
Compound interest notes matured June 10th, July 15, Aug. 15, Oct. 15, and Dec. 15, 1867, and May 15, 1868	6,013,910.00	5,033,490.00
Bonds (Texas indemnity)	256,000.00	256,000.00
Treasury notes, (acts July 17, 1861, and prior thereto)	154,511.64	154,111.64
Bonds April 15, 1842, Jan. 28, 1847, and March 31, 1848	1,925,941.80	1,258,200.00
Treasury notes, March 3, 1863	555,492.00	555,492.00
Temporary loan	746,520.00	744,920.00
Certificates of indebtedness	13,000.00	13,000.00
Total	$18,099,175.44	$12,665,213.64

DEBT BEARING NO INTEREST.

United States notes	$356,021,073.00	$356,021,073.00
Fractional currency	31,867,818.37	31,902,218.37
Gold certificates of deposit	22,414,000.00	25,161,620.00
Total	$410,302,891.37	$412,984,911.37
Total debt	$2,633,588,756.81	$2,643,256,285.01

AMOUNT IN THE TREASURY.

Coin	$83,409,917.93	$92,570,901.21
Currency	26,644,358.21	15,071,070.77
Total	$110,054,276.14	$107,641,971.98
Debt less cash in the Treasury	$2,523,534,480.67	$2,535,614,313.03

By comparing this with the statement of August 1, it is shown that the debt bearing coin interest has increased $8,119,950; the debt bearing currency interest has increased $4,299,520; the matured debt not presented for payment has decreased $5,433,961 80; and the debt bearing no interest has increased $2,682,020—making the increase in the total debt since August 1, 1868, $9,667,528 20. The amount of coin in the Treasury during the same period has increased $9,160,983 28, and the amount of currency has decreased $11,573,287 44—leaving the amount of debt less cash in the Treasury September 1, $12,079,-832 36 more than on August 1st.

McGregor and Sioux City Railway.

The Minneapolis *Tribune* says that the Milwaukee and St. Paul Railway Company are about commencing the construction of the line known as the McGregor and Sioux City Railway, which runs across the State of Iowa a distance of 175 miles. The entire length of the road is located, and from Calmar to Charles City, 47 miles, is under contract, to be completed within a year.

American Railroad Journal.

Saturday, September 12, 1868.

Stock Exchange and Money Market.

There has been more activity in money. There has been a partial revival of the Western demand for currency, which has had the effect of diminishing the legal tender reserve of the city banks. The local speculative inquiry has been quite brisk, chiefly for Stock Exchange purposes. There has likewise been a more animated mercantile call for aid. The available supply of money, however, has been quite liberal at from 3@5, generally at 4 @5 per cent. in a temporary form, and 6@7, mostly 7 per cent. per annum, in the discount line. The Sub-Treasury disbursements, during the week, were nearly 4¾ millions heavier than the receipts of the office from all sources. The city banks have reported some further adverse changes in their footings, but these changes have been of less importance than those on the two preceding weekly exhibits. They lost about 2½ millions of deposits, and about 1¾ millions of legal tender, which losses represent pretty nearly the outflow of currency, during the week. The U. S. Treasury Department held, on the 1st inst., a cash balance of $107,641,972, against $110,054,276, and, this too, after making full provision for the payment of the Alaska purchase money. Of the cash balance on the 1st of September, $92,570,901 were in coin, against $83,409,917 in coin on Aug. 1, and $15,071,071 in currency, against $26,644,358 in currency on the 1st of August. In consequence of the liberal yield of the customs revenues of the Government, (always in the form of coin,) during the month of August, notwithstanding the coin disbursements of the Treasury Department, on account of the interest and principal of the public debt, the hoard in the vaults of the Treasury, and in the absolute ownership of the Department, showed an *increase of some six and a half millions* as the result of the past month's business. Government now holds a coin reserve of 67½ millions in its own right, and a little over 25 millions to the credit or private depositors.

The specie reserve of the city banks is now $16,815,778, against $7,967,619 same time last year. The city bank deposits are now $207,854,341, against $195,182,114 week ending Sept. 7, 1867. The legal tender reserve amounts to $65,983,778, against $69,657,445 same time last year. The circulation now stands at $34,170,419, against $33,708,172 same time last year. The loans are now $271,830,696, against $250,224,560 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $78,339,346 a day, against a daily average of $80,130,844 the preceding week, and $101,718,092 the week ending with Aug. 20, 1868. The current week's exchanges average about $83,750,000 a day. The city banks, last week, lost $133,330 of specie, $1,773,608 of legal tender, and $2,480,305 of deposits. They increased their loans, $49,970; and their circulation, $58,280.

The New York Gold Exchange Bank reports for the week ending Saturday, the 5th day of Sept., 1868, the average amount of loans and discounts as $1,225,131; average amount of specie, $653,707; average amount of deposits, $1,275,116.

The Philadelphia Bank movement the past week shows an increase in loans of $428,594; an increase of $40,632 in specie; a decrease in legal tenders of $741,416; a decrease of $436,992 in deposits; and a decrease of $265 in circulation. The Bank Clearings show an increase of $2,334,012, and the balances, a decrease of $2,852.

The outstanding amount of coin certificates on the 1st of Sept., was $25,161,620, against $22,414,000 on the 1st of Aug., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $512,000, and retired $2,771,544 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during August, reached $9,075,920.

The U. S. Sub-Treasury receipts, week ending with Sept. 5, were $10,453,903, including $2,880,544 from customs duties; payments, $15,178,272, including $2,152,000 of coin interest; balance at the close of the week, $87,439,483, against $92,163,852, at the close of the preceding week, showing a decrease of $4,724,369. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $4,621,166 including $385,000 from customs; and payments, $4,638,089; on Tuesday, receipts, $1,208,936 including $552,000 from customs, and

payments, $735,433. The balance at the close of business on Tuesday stood at $87,896,063, against $87,298,778, a week previous; and $90,-416,660, on Aug. 26, 1868. The aggregate receipts of the office from all sources in August, were $81,253,235; aggregate payments, $78,830,968. The balance on the 1st inst., was about 7¼ millions more than on the 1st ult., which amounted to $80,133,186.

National Bank notes to the amount of $139,420 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,605,026, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,737,518, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,867,508. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,611,-300; and for the public deposits, $38,052,350—making a total of $379,663,650. The Treasury Department last week redeemed and destroyed $345,900 of worn and mutilated fractional currency, and issued $504,023 of new. The outstanding amount of fractional currency on the 1st of September was $31,802,218, against $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,-450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been on a moderate scale, since our last. They have recently fallen short of the expenditures of the Department, and thus within a month, a small addition has been made to the public indebtedness. The excises, last week, yielded some 3 millions; customs at the port of New York, $2,880,544, and at the outports about $875,000 (in coin) more, making the grand total income for the week equal to about $8,445,547 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,-000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $37,000,000.

The gold speculation has been comparatively tame, throughout the week. There has been a less active customs and export inquiry for coin. The speculative demand has been less confident. The offerings of Gold have been more liberal, partly in consequence of the Government disbursements of over two millions of coin interest on the Ten-forty loan. The extremes of the week have been from 143⅝@145⅛, and the closing quotation on Wednesday was 144¼. The specie exports from this port last week were only $643,-387, thus far this week the shipments have been confined to $215,000. The receipts of California gold, through the week, under review, were over a million dollars. The customs revenue of the port has been on a slightly reduced scale, thus far, in the current week.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $5,635,710, against $2,226,175 same time last year. The customs demand for Gold last week, averaged $480,100 a day; thus far, this week, it has been equal to $468,-500 a day, or equal to a weekly aggregate of $2,811,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $679,601 and from California, $1,080,756 The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $80,950,810, against $85,989,655 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $29,883,-180, against $21,042,842 in 1867, showing an increase thus far in 1868, of $8,840,338. The exports of specie, from this port, last week, were $643,-387, against $1,013,959 same week last year; total, since Jan. 1, 1868, $65,022,531, against $40,-989,922 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,152,000; since Jan. 1, 1868, $62,348,027, against $42,754,765. The specie exports from San Francisco, from Jan. 1, to Aug. 23, 1868, were $26,-327,385, against $27,500,548 same time last year.

Government received $5,173,736 from customs at the port of San Francisco, from Jan. 1, to Aug. 13, against $4,612,598 same time in the preceding year.

The demand for foreign exchange has been quite moderate, since our last, but as the supply of prime bills has been less extensive, prices have been quoted a shade higher for sterling drafts. Bankers' prime sixty day bills on London closed on Wednesday at 109@109⅜, and on Paris to 5.20c.@5.17½; sight bills on London to 108⅛@108¾, and on Paris to 5.16¼c.@5.15. The offering of produce bills has been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,074,642, against $1,789,059, same week last year; total, since Jan. 1, 1868, $114,532,742, against $120,767,697 in 1867.

Government securities have been more freely offered, since our last, and prices have declined, in some instances, ¼@⅝ per cent. At the reduced figures, purchases have been made largely by the prominent dealers, who look for an early rally in values. On Tuesday and Wednesday of the current week, the market was depressed mainly by speculative offerings, and on Wednesday, it closed in favor of buyers, who were availing themselves of the low currency for the coin bearing bonds to "load up," especially with the later issues of the Five-twenty bonds. The last debt statement from the Treasury Department showed an aggregate increase of $12,079,832; but this was accounted for by the disbursement of $7,200,-000 on account of the Alaska purchase, and by the issue of $3,104,000 of six per cent. currency bonds as a loan, to the several Pacific Railroad Companies. Some four millions of internal revenue were not collected in August, which could have been so collected but for the failure to appoint the new revenue officials, provided for by the amended revenue law. To the coin-bearing debt, were added in August some $8,119,960 of Five-Twenties. About eleven millions of matured Compound Interest Notes were paid off in August; while $12,205,000 of three per cent. legal tender certificates were issued, chiefly in redemption of the compound notes. The past due obligations of the Government were reduced nearly 6½ millions. About 6½ millions were added to the coin reserve in the ownership of the Treasury Department. Some 2¾ millions were also added to the deposits of coin in the Treasury on private account.

The general disbursements of the Government in August were $37,730,000, including an account of civil, miscellaneous and foreign intercourse, including Alaska purchase, $13,000,000; interest on the public debt, $4,830,000; war, $11,800,000; navy, $1,600,000; interior, pension and Indian, $6,500,000.

U. S. sixes of 1881 closed here on Wednesday at 113½@114; U. S. Five-twenties of 1862, 113½@113⅝; U.S. Five twenties of 1864 at 109⅛@109⅜; U. S. Five-twenties of 1865 at 111@111⅛; U. S. Five-twenties of 1865, consolidated, 108⅜@108⅝; U. S. Five-twenties of 1867, 108⅛@108¼; U. S. Five-twenties of 1868, 108⅜@108⅝; U. S. Ten forties at 104½@104¼; U. S. Six per cent. currency bonds, 100@101. The brokers are buying the outstanding compound interest notes at the following rates.

September, 1865..118¾ | October, 1865....118¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 26.	Sept. 2.	Sept. 9.
Consols.....	94⅛	94	94⅛
U.S. 5-20's of 1862...	71¾	71⅝	72
Erie.....	32	31	30½
Ill. Central.....	91¾	91½	91

The railway and miscellaneous share market has been quite active, but very irregular as to prices, all through the week, closing heavily and feverishly on Wednesday, partly through the pressure of speculative operations for lower figures, in view of the possibilities of a dearer and more stringent Money Market.

Business has been less aciive in Domestic Cotton and Breadstuffs have generally favored purchasers. Provisions have been quoted firmer. Middling upland cotton closed tamely and heavily on Wednesday at 28@28½ cents per lb. The stock of cotton now here is estimated at about 20,000 bales. The receipts at the port this week, have averaged only about 500 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,-228,194 bales, against 1,892,000 bales same time last year; exports, same time 1,676,000 bales, against 1,556,000 bales same time last year; stock on hand at latest dates, 47,500 bales, against 75,-000 bales same date last year. At the Live Stock market, this week, Beeves have been less active at from 11@17c. per lb.; week's receipts, 5,590. Veal calves have been in moderate request at from 7@12c. per lb.; receipts, 1,549. Sheep and lambs in fair demand, ranging from 4@7c., and 7@9c., respectively; receipts, 29,070. Swine have been less active at from 8¾@11c. per lb., all live weight; receipts, 16,754. There has been more movement in foreign merchandise, and desirable lots of the more active commodities have shown more firmness as to prices. The total imports of foreign dry goods, last week, were $2,862,700, and the total amount marketed $2,717,221. The value of foreign merchandise imported last week, was $2,222,071—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,584,771, against $5,408,-276 same week last year; from Jan. 1, 1868, $175,-249,989, against $184,724,724 same time in 1867. The freight market has been less active, and rates have been quoted heavy. For Liverpool we quote flour at 1s. 4½d. by sail, and 1s. 6d.

@1s. 7½d. by steamer, per bbl.; grain at 3d. by sail, and 3½@4d. by steamer, per bushel; cotton at ⅛d.@$\frac{3}{32}$d. by sail, and $\frac{3}{16}$d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 461.

The New York exports, exclusive of specie, for the week ending Sept. 8, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$1,789,059	$3,074,642
Prev. reported	124,978,938	111,458,100
Since January 1	$126,767,997	$114,532,742

The imports for the week ending September 5, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$2,213,065	$2,362,700
Gen. merchandise	3,195,211	2,222,071
Total for the week	$5,408,276	$4,584,771
Previously reported	171,178,058	168,375,322
Since January 1	$176,586,334	$172,960,093

The balance in the Sub-Treasury on Wednesday was $87,800,792 63.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ CENTRAL PACIFIC RAILROAD SIX PER CENT. THIRTY-YEAR GOLD BONDS.—A limited quantity of these bonds will be disposed of at 103 and accrued interest from July 1, in currency. The road will be completed within twelve months, and is now earning, above operating expenses, more than double its current interest liabilities. Principal and interest payable in United States gold coin. Government securities received at market rates in exchange.

FISK & HATCH,

Bankers and Dealers in Government Securities, No. 5 Nassau-st., New York.

Portland and Rutland Railroad.

We learn from the Portland *Argus* that measures have been put in progress in Vermont to secure the building of the line from Rutland to White River Junction and to a point of connection with the Northern Railroad of New Hampshire.

From White River Junction, thirty-one miles of the Northern Railroad is to be used as far as Danbury. From Danbury to the boundary of Maine the line is to be built under the charter of the New Hampshire Central Railroad Co., organized at Centre Harbor on the 8th inst. The only link to be provided for is that from the State line of New Hampshire to Portland, a distance of thirty-eight miles, in case no portion of the Portland and Rochester Railroad is made use of. But it is believed that by using the line of the Portland and Rochester Railroad, a short link of new road only will be required to complete the chain of railroads from Portland to the West.

Emmittsburg Railroad.

A meeting of the friends of this road was held at Emmittsburg, Md., on the 5th inst. This road is intended to run from Emmittsburg to the Western Maryland railroad, forming a junction with it at the Rocky Ridge, 1½ miles west of the Monocacy. The meeting being called to order, Joseph Byers was chosen president; John Witheron and James Troxel, vice-presidents, and Edward McIntyre, secretary. Messrs Robert Irwin, Son & Co., railroad builders, of Baltimore, presented the report of their engineer, Wm. Glenn, on the surveys of the road, which the president ordered to be read. The report shows that the length of the road will be seven miles, the grades and curvature exceedingly easy, and the entire cost of the road when ready for the locomotive, will be about $110,000. The president called on the people to come forward and subscribe, which they did so liberally that the building of the road was put beyond question.

☞ The Cambridge (Md.) *Democrat* says that iron in sufficiently quantity has been received to lay the track of the Dorchester and Delaware Railroad to New Market, and that a large force of men will now be put to work. The contractor is determined that he will have the cars running before Christmas.

payments, $735,483. The balance at the close of business on Tuesday stood at $87,896,063, against $87,298,778, a week previous; and $90,-416,660, on Aug. 26, 1868. The aggregate receipts of the office from all sources in August, were $81,253,235; aggregate payments, $73,830,968. The balance on the 1st inst., was about 7¼ millions more than on the 1st ult., which amounted to $80,133,186.

National Bank notes to the amount of $139,420 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,605,026, against $282,-555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,737,518, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,867,508. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341,611,-300; and for the public deposits, $38,052,350—making a total of $379,663,650. The Treasury Department last week redeemed and destroyed $345,900 of worn and mutilated fractional currency, and issued $504,023 of new. The outstanding amount of fractional currency on the 1st of September was $31,802,218, against $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,-450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

Government revenues have been on a moderate scale, since our last. They have recently fallen short of the expenditures of the Department, and thus within a month, a small addition has been made to the public indebtedness. The excises, last week, yielded some 3 millions; customs at the port of New York, $2,880,544, and at the outports about $875,000 (in coin) more, making the grand total income for the week equal to about $8,445,547 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,-000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $37,000,000.

The gold speculation has been comparatively tame, throughout the week. There has been a less active customs and export inquiry for coin. The speculative demand has been less confident. The offerings of Gold have been more liberal, partly in consequence of the Government disbursements of over two millions of coin interest on the Ten-forty loan. The extremes of the week have been from 143⅝@145⅛, and the closing quotation on Wednesday was 144¼. The specie exports from this port last week were only $648,-387, thus far this week the shipments have been confined to $215,000. The receipts of California gold, through the week, under review, were over a million dollars. The customs revenue of the port has been on a slightly reduced scale, thus far, in the current week.

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $5,635,710, against $2,226,175 same time last year. The customs demand for Gold last week, averaged $480,100 a day; thus far, this week, it has been equal to $468,-500 a day, or equal to a weekly aggregate of $2,811,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $679,601 and from California, $1,080,756 The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $80,950,810, against $85,989,655 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $29,883,-120, against $21,042,842 in 1867, showing an increase thus far in 1868, of $8,840,338. The exports of specie, from this port, last week, were $643,-387, against $1,013,959 same week last year; total, since Jan. 1, 1868, $65,022,531, against $40,-989,922 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $2,152,000; since Jan. 1, 1868, $62,348,027, against $42,754,765. The specie exports from San Francisco, from Jan. 1, to Aug. 23, 1868, were $26,-827,385, against $27,500,548 same time last year.

Government received $5,173,736 from customs at the port of San Francisco, from Jan. 1, to Aug. 13, against $4,612,598 same time in the preceding year.

The demand for foreign exchange has been quite moderate, since our last, but as the supply of prime bills has been less extensive, prices have been quoted a shade higher for sterling drafts. Bankers' prime sixty day bills on London closed on Wednesday at 109@109⅜, and on Paris to 5.20c.@5.17½; sight bills on London to 108⅛@108¾, and on Paris to 5.16¼c.@5.15. The offering of produce bills has been fair this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,074,642, against $1,789,059, same week last year; total, since Jan. 1, 1868, $114,532,742, against $126,767,197 in 1867.

Government securities have been more freely offered, since our last, and prices have declined, in some instances, ¼@⅝ per cent. At the reduced figures, purchases have been made largely by the prominent dealers, who look for an early rally in values. On Tuesday and Wednesday of the current week, the market was depressed mainly by speculative offerings, and on Wednesday, it closed in favor of buyers, who were availing themselves of the low currency for the coin bearing bonds to "load up," especially with the later issues of the Five-twenty bonds. The last debt statement from the Treasury Department showed an aggregate increase of $12,079,832; but this was accounted for by the disbursement of $7,200,-000 on account of the Alaska purchase, and by the issue of $3,104,000 of six per cent. currency bonds as a loan, to the several Pacific Railroad Companies. Some four millions of internal revenue were not collected in August, which could have been so collected but for the failure to appoint the new revenue officials, provided for by the amended revenue law. To the coin-bearing debt, were added in August some $8,119,960 of Five-Twenties. About eleven millions of matured Compound Interest Notes were paid off in August; while $12,205,000 of three per cent. legal tender certificates were issued, chiefly in redemption of the compound notes. The past due obligations of the Government were reduced nearly 6½ millions. About 6½ millions were added to the coin reserve in the ownership of the Treasury Department. Some 2¾ millions were also added to the deposits of coin in the Treasury on private account.

The general disbursements of the Government in August were $37,730,000, including an account of civil, miscellaneous and foreign intercourse, including Alaska purchase, $13,000,000; interest on the public debt, $4,830,000; war, $11,800,000; navy, $1,600,000; interior, pension and Indian, $6,500,000.

U. S. sixes of 1881 closed here on Wednesday at 113½@114; U. S. Five-twenties of 1862, 113½@113⅝; U.S. Five twenties of 1864 at 109⅛@109⅜; U. S. Five-twenties of 1865 at 111@111⅛; U. S. Five-twenties of 1865, consolidated, 108⅜@108⅝; U. S. Five-twenties of 1867, 108⅛@108¼; U. S. Five-twenties of 1868, 108⅜@108⅝; U. S. Ten-forties at 104½@104¼; U. S. Six per cent. currency bonds, 100@101. The brokers are buying the outstanding compound interest notes at the following rates.

September, 1865..118¾ | October, 1865....118¼

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 26.	Sept. 2.	Sept. 9.
Consols	94¼	94	94⅛
U.S. 5-20's of 1862	71¾	71⅝	72
Erie	32	31	30½
Ill. Central	91¾	91½	91

The railway and miscellaneous share market has been quite active, but very irregular as to prices, all through the week, closing heavily and feverishly on Wednesday, partly through the pressure of speculative operations for lower figures, in view of the possibilities of a dearer and more stringent Money Market.

Business has been less active in Domestic Cotton and Breadstuffs have generally favored purchasers. Provisions have been quoted firmer. Middling upland cotton closed tamely and heavily on Wednesday at 28@28½ cents per lb. The stock of cotton now here is estimated at about 20,000 bales. The receipts at the port this week, have averaged only about 500 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,-228,194 bales, against 1,892,000 bales same time last year; exports, same time 1,676,000 bales, against 1,556,000 bales same time last year; stock on hand at latest dates, 47,500 bales, against 75,-000 bales same date last year. At the Live Stock market, this week, Beeves have been less active at from 11@17c. per lb.; week's receipts, 5,590. Veal calves have been in moderate request at from 7@12c. per lb.; receipts, 1,549. Sheep and lambs in fair demand, ranging from 4@7c., and 7@9c., respectively; receipts, 29,070. Swine have been less active at from 8¾@11c. per lb., all live weight; receipts, 16,754. There has been more movement in foreign merchandise, and desirable lots of the more active commodities have shown more firmness as to prices. The total imports of foreign dry goods, last week, were $2,362,700, and the total amount marketed $2,717,221. The value of foreign merchandise imported last week, was $2,222,071—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,584,771, against $5,408,-276 same week last year; from Jan. 1, 1868, $175,-249,989, against $184,724,724 same time in 1867. The freight market has been less active, and rates have been quoted heavy. For Liverpool we quote flour at 1s. 4½d. by sail, and 1s. 6d.

@1s. 7½d. by steamer, per bbl.; grain at 3d. by sail, and 3½@4d. by steamer, per bushel; cotton at 1/8d.@3/16d. by sail, and 3/16d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 461.

The New York exports, exclusive of specie, for the week ending Sept. 8, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week.....	$1,789,059	$3,074,642
Prev. reported.....	124,978,938	111,458,100
Since January 1.....	$126,767,997	$114,532,742

The imports for the week ending September 5, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$2,213,065	$2,362,700
Gen. merchandise.....	3,195,211	2,222,071
Total for the week.....	$5,408,276	$4,584,771
Previously reported....	171,178,058	168,375,322
Since January 1.....	$176,586,334	$172,960,093

The balance in the Sub-Treasury on Wednesday was $87,800,792 63.

Portland and Rutland Railroad.

We learn from the Portland *Argus* that measures have been put in progress in Vermont to secure the building of the line from Rutland to White River Junction and to a point of connection with the Northern Railroad of New Hampshire.

From White River Junction, thirty-one miles of the Northern Railroad is to be used as far as Danbury. From Danbury to the boundary of Maine the line is to be built under the charter of the New Hampshire Central Railroad Co., organized at Centre Harbor on the 8th inst. The only link to be provided for is that from the State line of New Hampshire to Portland, a distance of thirty-eight miles, in case no portion of the Portland and Rochester Railroad is made use of. But it is believed that by using the line of the Portland and Rochester Railroad, a short link of new road only will be required to complete the chain of railroads from Portland to the West.

Emmittsburg Railroad.

A meeting of the friends of this road was held at Emmittsburg, Md., on the 5th inst. This road is intended to run from Emmittsburg to the Western Maryland railroad, forming a junction with it at the Rocky Ridge, 1½ miles west of the Monocacy. The meeting being called to order, Joseph Byers was chosen president; John Witheron and James Troxel, vice-presidents, and Edward McIntyre, secretary. Messrs Robert Irwin, Son & Co., railroad builders, of Baltimore, presented the report of their engineer, Wm. Glenn, on the surveys of the road, which the president ordered to be read. The report shows that the length of the road will be seven miles, the grades and curvature exceedingly easy, and the entire cost of the road when ready for the locomotive, will be about $110,000. The president called on the people to come forward and subscribe, which they did so liberally that the building of the road was put beyond question.

☞ The Cambridge (Md.) *Democrat* says that iron in sufficiently quantity has been received to lay the track of the Dorchester and Delaware Railroad to New Market, and that a large force of men will now be put to work. The contractor is determined that he will have the cars running before Christmas.

Increase $44,968 45

Milwaukee and St. Paul Railroad.

This company have become the owners of the Milwaukee and Prairie du Chien Railway with which they had previously consolidated earnings. For the first and second preference shares of the Prairie du Chien—the common stock having heretofore been exchanged into St. Paul stock—the company have executed a mortgage for the purchase money, $5,000,000 in amount, to Messrs. Charles Moran, Russell Sage and William H. Neilson, Trustees, under very secure and stringent terms. This arrangement is followed by the issue first, of 8 per cent. bonds in payment of the first preference shares, and secondly, 7-30 per cent. in payment of the second preference shares. The latter are convertible into the preferred stock of the St. Paul Company.

Toledo, Peoria and Warsaw Railway.

It is stated that the Western Division of this line will be completed by the 15th inst., and the trains will then run through to the Mississippi River at Warsaw, Illinois, and at Keokuk, Iowa. This will complete the shortest continuous line from New York to the Upper Mississippi *via* New Jersey Central and Pennsylvania Railroads, to Pittsburg, and thence *via* Pan-Handle route through Ohio, Indiana and Illinois. An arrangement has been completed between this company and the Illinois Central for a continuous local business between Chicago and Keokuk—81 miles down the Chicago branch of the Illinois Central to Gilman, on the Peoria road, and thence 200 miles over that road to Keokuk—without change of freight and passenger equipment, and under single tariff.

☞ The St. John *Telegraph* says that work upon the Intercolonial Railway will be commenced at three places, Riviere du Loup, Metapedia and Truro, on the Nova Scotia boundary.

☞ The Taunton Locomotive Manufacturing Company has sent forward another powerful locomotive for the Union Pacific Railroad, the seventh it has built for that line.

INTRODUCTION OF CHEAP STEEL IN AMERICA.—COMPLETION OF THE GREAT WORKS AT TROY.—DESCRIPTION OF THE VARIOUS BESSEMER WORKS IN THIS COUNTRY.—THE NATURE AND VALUE OF THE IMPROVEMENT.

Continued from page 865.

The arrangement of all the Bessemer works in this country, excepting the works at Lewistown, and the experimental works at Wyandotte, is substantially in accordance with the plans of Mr. Holley. These plans preserve all the old features and proportions affecting the process, but especially as carried out in the second works built by him at Harrisburg, they considerably increased the convenience of manufacture and repairs, and the capacity for product. In the English works, as designed by Bessemer, and blindly followed there, the converters stand at opposite sides of the casting-pit, thus narrowing by half the casting-room as compared with the Troy works, where the available space for moulds is over seventy feet in length. In England, the working space around the pit and under the converters is sunk below the general level, which is inconvenient and wasteful of room. At Troy the converters are set at a height which not only provides a continuous working space upon the general level, but allows another new feature—a second floor extending around the converters, standing upon which workmen get at all parts of the converter, put materials into it, dress the spouts for conveying melted iron, and work upon the converter bottoms when they are run out for repairs.

The tuyeres, or blocks of fire-brick, pierced with holes, through which the air is blown up into the iron, last but six to eight heats, and their renewal has hitherto caused much delay. In these works the converter-bottom is removed by means of a hydraulic lift and a carriage running out at the side of the converter, where it can be conveniently got at. The bottom may be replaced when required, by a duplicate bottom, previously furnished with new tuyeres, dried and heated. In the English works the crane capacity is inadequate to rapid working. In the Troy works, the ingot cranes are three instead of two in number, the ladle-crane is arranged for more motions of the ladle, and all the cranes are lightened and cheapened by means of top supports. Various novelties and conveniences have been added to the regulating apparatus, ladle-stopper and other parts. The cupola furnace has been adapted to melting iron for conversion by employing a ladle on a scale to weigh the metal, and has thus superseded the air furnace, saving cost and facilitating manufacture.

Mr. Holley introduced at Troy, and perfected at Harrisburg a method of casting a number of ingots at one pouring, thus saving scrap and wear of moulds, and producing better ingots of more definite weight. The moulds are set upon an iron bottom or flask lined with loam. The steel, let into the central mould, passes through runners in the flask into the bottoms of the surrounding moulds, and all the moulds are filled together. Mr. Durfee has since perfected another apparatus for bottom casting—a substitution of removable runners of cast-iron instead of loam, between the bottoms of the moulds—and is obtaining excellent results.

The perfection of the Bessemer process in England, left much to be learned in America. New irons, new refractory materials, different coals, and unaccustomed labor had to be tested and adapted, and various different conditions and requirements of manufacture had to be considered. When the ingots were produced, there was little suitable skill and machinery in this country to work them properly; and so, although an excellent quality of steel was produced at Troy, at the first blow in 1865, all these new labors were vigorously undertaken, at great expense. As a result, the quality of American materials is now well understood, the various requirements of machinery and treatment are well developed, and various improvements and economies in construction and manufacture are fully established.

[illegible] except [illegible] ment, where irons are peculiarly adapted to Bessemerizing, it is probable that no better or more uniform steel is produced anywhere in the world, than at Troy.

THE RAIL MILL.

The new rail mill of Messrs. John A. Griswold & Co. has been completed and will be started upon a large order for steel rails, during the present week.

This establishment (Rensselaer Iron Works) is situated between the Hudson river and the Hudson river railway, within the city of Troy, and a mile above the steel works. The yard next the river, is two hundred and fifty feet wide, with a wharf one thousand feet long. The railway yard is sixty feet wide, and of the same length.

The new mill built by Col. George Babcock, superintendent—Robert P. Banfield, master mechanic—is a rectangular brick structure, four hundred by one hundred feet in plan, and twenty-five feet high, with a continuous lantern roof eighteen feet wide by six feet high. The walls are sixteen inches thick, with pilasters thirteen feet apart, upon which the roof trusses rest. The trusses are of wood; the covering of slate. The doors slide vertically in heavy iron frames built into the walls. Gothic windows alternate with the doors, and above these the walls are pierced with round windows.

The end of the mill next the old rail mill, contains eight heating furnaces—two pairs at the end, and a pair at each side. The engine stands at one end of the train, the saws are near the centre of the building with hot beds on each side. The Northern portion of the mill is devoted to a steel bar train and iron merchant train.

The rail train engine, by Starbuck Brothers, Troy, is a particularly well built and smoothly working machine. It stands on ten feet depth of brick masonry, resting on six feet of stone and concrete, which is supported by twenty feet of solid piling. The engine is of the "steam-hammer" pattern, vertical, condensing, and directly connected to the train. A solid bed plate supports two side frames, upon which there stands a fifty-four inch cylinder, and between which work the cross-head (thirty-six inch stroke) and the beam for driving a thirty-inch air pump (eighteen-inch stroke) situated at the end of the bed plate. The connecting rod (seven and a half long) and the piston rod, and other parts are of Bessemer steel. The fourteen inch shaft (twenty-four inch length of journals) is cranked, so as to be connected to trains at either end. The fly-wheel is of twenty-five feet diameter, with a seventeen by twenty inch rim, and weighs sixty tons. The valve is Davis's piston, made double, or, in fact, two eight inch valves side by side, to get ample port area. The packing of these valves is solid, but may be set out at will; the valve is the equivalent of a slide and perfectly simple. The steam pressure comes only on the ends of the two pistons forming the valve and the exhaust pressure between them so that there is constant equilibrium, and the valve is easily worked under steam by the starting bar. Snow's governor is attached to the cut-off. The engine may be changed to non-condensing by opening a valve in the exhaust pipe. The engine runs at seventy revolutions, for a twenty-one inch train.

The fan engine, standing near the other, and of similar pattern, has a fifteen by twenty-two inch cylinder, and is belted to a line of shafting above, which drives two overhead six feet Stortevant blowers on either side of the mill, at eight hundred revolutions. An air pipe runs around over the furnaces, from blower to blower, with branches down to the ash pits.

The rail train is a twenty-one inch three-high train of the Fritz pattern, standing on a brick foundation, with a heavy oak cushion between. Steel rails are bloomed from nine inch ingots, and then roughed down and finished at a reheat. This is done in three sets of rolls; with twenty-one to twenty-five passes, according to the pattern. At present a top and bottom train is attached to the end of the steel rail train, but it will ultimate-

ly be replaced by the ordinary roughing and finishing rolls for iron rails; and the old rail mill will then be devoted to all top and bottom, puddle, breaking down, and preparatory rolling for iron rails.

Instead of the saw carriage running up to the saws, as usually practised, the saws are hung upon frames, which swing up to the rails as they lie on a fixed way, and are driven by belts from an overhead shaft that is supported by stands moveable on a bed-plate. The engine is fixed to the same bed-plate.

The hot beds are seventy feet long, with a straightening plate in the middle, and a short raised table at either end. The rails forming the hot bed lie on rollers working in the tops of iron posts set upon masonry, and can thus expand without buckling.

At each end of the hot beds there is a straightening press, with a bell crank straightening lever worked by means of an eccentric and a geared shaft by a steam engine attached to a bed plate. Behind the hot bed are two punching machines of similar construction, driven by separate engines, and each arranged to make the fish bolt holes and the spike slot, by means of a horizontal and a vertical punch. The rails are taken out of the mill to the wharf or to the railway, by means of cars running on tracks with suitable turn-tables.

The water works consist of a 50,000 gallon iron tank, sixteen feet in diameter, forming the top of an octagonal brick building twenty-four feet high, in which there is a duplex Worthington pump, taking water from the river, and driven by a sixty-horse power tubular boiler in a wing of the building. The feed pipes to the mill boilers are of wrough iron, and may be warmed in freezing weather by steam. The boilers may be fed either by the Worthington pump or by Giffard injectors, one of which is attached to each boiler, or by the main engine. The blow-off pipes from the boilers enter a large brick underground sewer, which also drains the boshes, the roll pit and the air pump.

The heating furnaces and the boilers over them are well constructed, and are furnished with every appurtenance for convenience and safety. The flame from the furnace passes under and through the boiler to a chimney standing on iron columns outside the building. The ash pit, opening out of doors under the chimney, is covered with a brick arch, shutting it off from the interior of the mill. There is an upper and a lower ash pit door. The furnace plates are perforated, or rather they are heavy cast-iron spiders, securing the brick work, but leaving it well uncovered. A water door frame, got up at these works, is employed, and there are cast-iron boshes by each furnace. The boilers are thirty feet long by fifty-four inches diameter, with three thirteen-inch flues. The lower half of the end of the boiler, over the throat of the furnace is recessed, so as to form a crown sheet for the flame to strike upon, and a chamber into which the flues open. A damper under the other end regulates the flow of flame under and through the boiler. Suitable air admission into the chamber under the boiler promotes combustion. The steam domes are three feet diameter by four feet high. A fourteen inch wrought-iron steam pipe, with disc expansion joints, leads from the domes to the engine, and by a ten inch branch to the merchant mill furnaces at the other end of the building. These pipes are throughly lagged. Besides the ordinary safety valves, there are lock-up safety valves provided by law; there are also float water gauges and gauge cocks. The boiler is enclosed in a chamber composed of cast iron bottom plates and brick side walls, supported by trusses resting on columns. The floor of the mill is well covered with hexagonal plates. The maximum capacity is one hundred and twenty tons of rails per day.

The merchant end of the mill is furnished with a double billet shears and a merchant bar shears, each driven by separate engines. The condensing beam engine, forty-eight inches by seven feet, runs at twenty-five revolutions, and drives on either side a geared train, five rolls long, running two hundred and eighty revolutions, for small iron, and a sixteen inch geared train, three rolls long, running fifty revolutions, for steel. Adjacent to the iron train are two heating furnaces with boilers, built upon the general plan above described. The steel is heated by a Siemens' furnace, supplied with gas by two producers. The capacity of these trains is thirteen of small iron bars and rods, and fifteen to twenty-five tons of half inch to five inch steel bars and shapes per day.

The old rail mill is a brick structure, averageing three hundred and twenty by one hundred and twenty-five feet in plan. A condensing beam engine (the engine of the old steamboat "Swallow"), with a sixty inch by ten feet cylinder, drives four two-high geared trains of eighteen inch rolls, two for balls, one for breaking down, one top and bottom, and one (at present) for iron rails. The mill contains fourteen double puddling furnaces, four top and bottom furnaces, and the necessary heating furnaces and apparatus for one hundred and twenty tons per day of iron rails. The adjoining machine and smith shop is a brick building, thirty by one hundred and fifty feet, and a building thirty by one hundred feet is employed for storage and miscellaneous purposes.

To be continued.

Commerce of New York.

The foreign imports at New York for the month of July, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$11,036,960	$12,193,589
Do. for warehousing	11,226,514	10,573,083
Free goods	766,786	1,094,543
Specie and bullion	56,606	126,442
Total entered at port...	$23,086,866	$23,987,657
Withdrawn fr. wareh'use	7,560,396	6,829,796

The foreign imports at New York for the seven months from January 1st, were:

	1867.	1868.
Entered for consumpt'n.	$76,009,575	$71,118,430
Do. for warehousing...	75,297,805	70,296,156
Free goods	6,742,477	6,048,592
Specie and bullion.....	1,613,302	4,165,342
Total entered at port..	$159,663,159	$151,628,520
Withdrawn fr. wareh'se	67,048,287	58,752,011

The revenue from customs at New York, were:

	1867.	1868.
In July	$9,505,432 94	$9,237,920 50
Previous 6 mos.	59,354,688 90	55,450,748 65
Tot. since Jan. 1	$68,860,121 84	$64,688,669 15

The exports from New York to foreign ports in the month of July, were:

	1867.	1868.
Domestic produce	$13,666,098	$10,538,848
Foreign free goods.....	20,168	37,975
Do. dutiable.....	382,595	444,735
Specie and bullion	13,519,894	10,584,558
Total exports.....	$27,588,755	$21,606,116
Do. exclusive of specie.	14,068,861	11,021,558

The exports from New York to foreign ports for seven months from January 1st, were:

	1867.	1868.
Domestic produce.....	$104,813,956	$89,640,160
Foreign free goods....	307,406	442,224
Do. dutiable	4,594,139	4,354,208
Specie and bullion.....	38,115,556	59,688,158
Total exports	$147,831,057	$154,124,750
Do. exclusive of specie	109,715,501	94,436,592

☞ The directors of the New York and Oswego Midland Railroad have awarded the contracts for the Middletown Division of the road, and the branch to Ellenville, and also the Showangunk Tunnel. The tunnel was awarded to Hitchcock & Co., and the grading and masonry to Jackson & Macdonald.

AS GOOD AS THE BEST.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

The Rockford, Rock Island and St. Louis Railroad Company offer a limited amount only of their First Mortgage Bonds at 95, and accrued interest in currency.

The bonds pay seven per cent. interest—February 1, and August 1—in gold coin, *free of Government tax*. The principal also is payable in gold. They have fifty years to run, and are convertible into stock at the option of the holder. A sinking fund is provided sufficient to pay off the whole mortgage at maturity.

Each bond is for $1,000, or £200 sterling. Interest is payable in New York or London, at the option of the holder.

These bonds are amply secured, being a first and only lien upon the Company's entire line of road—which traverses the finest district of Illinois—upon its franchises, rolling stock, and other property, and upon all its coal lands, of which it now controls over 20,000 acres, estimated to contain 100,000,000 tons of coal. These lands, on the completion of the railroad, would probably sell for a sum sufficient to retire the whole mortgage.

For all the coal the Company can produce there is a ready market; 1,000 miles of railway and the population of 30,000 square miles of territory can be supplied with fuel from its mines more readily and cheaply than from any other quarter.

A large part of the means required in the construction is derived from stock subscriptions. Over $1,500,000 has been already expended upon the line from this source alone, and subscriptions to the capital stock are now pledged sufficient to pay the whole cost of the road with the exception of superstructure and rolling stock, leaving the proceeds of the bonds to be applied to these purposes and to the purchase of coal lands.

Of the entire line 165 miles are now graded. The work is proceeding rapidly and successfully. It is intended to have the first division of fifty miles, giving an outlet to the coal, in operation by January 1, and the whole line within one year.

The estimated earnings of the road, with its coal business, are threefold what will be required to pay interest on its bonds.

The trustee for the bondholders is the Union Trust Company of New York.

At the present price of gold the bonds pay an income of over ten per cent. in currency.

For sale at the office of this Company, No. 12 Wall street. Governments and other securities received in exchange at market rates.

H. H. Boody, Treasurer.

☞ The Treasury Department has issued to the Union Pacific Railroad Company, 1,280 bonds of $1,000 each, for the completion of sections 26 and 27 of their road, extending from the 720th to the 760th mile post west from Omaha.

☞ At a meeting of the Governor and Council, on the 7th inst., the contract for completing the Hoosac Tunnel was awarded to Messrs. Odiorne, Gardiner & Co., on condition that they deposit with the State Treasurer the sum of $500,000, in bonds, on or before the 12th inst.

The [illegible] Western Union Railroad for the 1st week in Sept., 1868..... $38,228 57
Corresponding week previous year..... 33,096 52

Increase..... $5,133 05

The earnings of the Marietta and Cincinnati Railroad the 1st week in Sept., 1868.. $41,855 00
Corresponding week previous year..... 39,896 00

Increase..... $1,959 00

The earnings of the Chicago and Alton Railroad for the 1st week in Sept., 1868.. $127,310 00
Corresponding period previous year . 103,993 00

Increase..... $23,317 00

The earnings of the Detroit and Milwaukee Railroad for the first week in Sept., 1868, were..... $41,401 77
Corresponding week of 1867..... 40,574 86

Increase..... $826 91

The earnings of the Michigan Southern and Northern Indiana Railroad for the 1st week in Sept., 1868, were..... $109,118 00
Corresponding week of 1867..... 97,211 00

Increase..... $11,902 00

The earnings of the Chicago and Northwestern Railroad for the 1st week in Sept., 1868. $348,570 95
Corresponding week previous year .. 303,602 50

Increase..... $44,968 45

Milwaukee and St. Paul Railroad.

This company have become the owners of the Milwaukee and Prairie du Chien Railway with which they had previously consolidated earnings. For the first and second preference shares of the Prairie du Chien—the common stock having heretofore been exchanged into St. Paul stock—the company have executed a mortgage for the purchase money, $5,000,000 in amount, to Messrs. Charles Moran, Russell Sage and William H. Neilson, Trustees, under very secure and stringent terms. This arrangement is followed by the issue first, of 8 per cent. bonds in payment of the first preference shares, and secondly, 7-30 per cent. in payment of the second preference shares. The latter are convertible into the preferred stock of the St. Paul Company.

Toledo, Peoria and Warsaw Railway.

It is stated that the Western Division of this line will be completed by the 15th inst., and the trains will then run through to the Mississippi River at Warsaw, Illinois, and at Keokuk, Iowa. This will complete the shortest continuous line from New York to the Upper Mississippi *via* New Jersey Central and Pennsylvania Railroads, to Pitsburg, and thence *via* Pan-Handle route through Ohio, Indiana and Illinois. An arrangement has been completed between this company and the Illinois Central for a continuous local business between Chicago and Keokuk—81 miles down the Chicago branch of the Illinois Central to Gilman, on the Peoria road, and thence 200 miles over that road to Keokuk—without change of freight and passenger equipment, and under single tariff.

☞ The St. John *Telegraph* says that work upon the Intercolonial Railway will be commenced at three places, Riviere du Loup, Metapedia and Truro, on the Nova Scotia boundary.

☞ The Taunton Locomotive Manufacturing Company has sent forward another powerful locomotive for the Union Pacific Railroad, the seventh it has built for that line.

PRODUCTION OF CHEAP STEEL IN AMERICA.—COMPLETION OF THE GREAT WORKS AT TROY.—DESCRIPTION OF THE VARIOUS BESSEMER WORKS IN THIS COUNTRY.—THE NATURE AND VALUE OF THE IMPROVEMENT.

Continued from page 865.

The arrangement of all the Bessemer works in this country, excepting the works at Lewistown, and the experimental works at Wyandotte, is substantially in accordance with the plans of Mr. Holley. These plans preserve all the old features and proportions affecting the process, but especially as carried out in the second works built by him at Harrisburg, they considerably increased the convenience of manufacture and repairs, and the capacity for product. In the English works, as designed by Bessemer, and blindly followed there, the converters stand at opposite sides of the casting-pit, thus narrowing by half the casting-room as compared with the Troy works, where the available space for moulds is over seventy feet in length. In England, the working space around the pit and under the converters is sunk below the general level, which is inconvenient and wasteful of room. At Troy the converters are set at a height which not only provides a continuous working space upon the general level, but allows another new feature—a second floor extending around the converters, standing upon which workmen get at all parts of the converter, put materials into it, dress the spouts for conveying melted iron, and work upon the converter bottoms when they are run out for repairs.

The tuyeres, or blocks of fire-brick, pierced with holes, through which the air is blown up into the iron, last but six to eight heats, and their renewal has hitherto caused much delay. In these works the converter-bottom is removed by means of a hydraulic lift and a carriage running out at the side of the converter, where it can be conveniently got at. The bottom may be replaced when required, by a duplicate bottom, previously furnished with new tuyeres, dried and heated. In the English works the crane capacity is inadequate to rapid working. In the Troy works, the ingot cranes are three instead of two in number, the ladle-crane is arranged for more motions of the ladle, and all the cranes are lightened and cheapened by means of top supports. Various novelties and conveniences have been added to the regulating apparatus, ladle-stopper and other parts. The cupola furnace has been adapted to melting iron for conversion by employing a ladle on a scale to weigh the metal, and has thus superseded the air furnace, saving cost and facilitating manufacture.

Mr. Holley introduced at Troy, and perfected at Harrisburg a method of casting a number of ingots at one pouring, thus saving scrap and wear of moulds, and producing better ingots of more definite weight. The moulds are set upon an iron bottom or flask lined with loam. The steel, let into the central mould, passes through runners in the flask into the bottoms of the surrounding moulds, and all the moulds are filled together. Mr. Durfee has since perfected another apparatus for bottom casting—a substitution of removable runners of cast-iron instead of loam, between the bottoms of the moulds—and is obtaining excellent results.

The perfection of the Bessemer process in England, left much to be learned in America. New irons, new refractory materials, different coals, and unaccustomed labor had to be tested and adapted, and various different conditions and requirements of manufacture had to be considered. When the ingots were produced, there was little suitable skill and machinery in this country to work them properly; and so, although an excellent quality of steel was produced at Troy, at the first blow in 1865, all these new labors were vigorously undertaken, at great expense. As a result, the quality of American materials is now well understood, the various requirements of machinery and treatment are well developed, and various improvements and economies in construction and manufacture are fully established.

If we except a few of the works on the Continent, where irons are peculiarly adapted to Bessemerizing, it is probable that no better or more uniform steel is produced anywhere in the world, than at Troy.

THE RAIL MILL.

The new rail mill of Messrs. John A. Griswold & Co. has been completed and will be started upon a large order for steel rails, during the present week.

This establishment (Rensselaer Iron Works) is situated between the Hudson river and the Hudson river railway, within the city of Troy, and a mile above the steel works. The yard next the river, is two hundred and fifty feet wide, with a wharf one thousand feet long. The railway yard is sixty feet wide, and of the same length.

The new mill built by Col. George Babcock, superintendent—Robert P. Banfield, master mechanic—is a rectangular brick structure, four hundred by one hundred feet in plan, and twenty-five feet high, with a continuous lantern roof eighteen feet wide by six feet high. The walls are sixteen inches thick, with pilasters thirteen feet apart, upon which the roof trusses rest. The trusses are of wood; the covering of slate. The doors slide vertically in heavy iron frames built into the walls. Gothic windows alternate with the doors, and above these the walls are pierced with round windows.

The end of the mill next the old rail mill, contains eight heating furnaces—two pairs at the end, and a pair at each side. The engine stands at one end of the train, the saws are near the centre of the building with hot beds on each side. The Northern portion of the mill is devoted to a steel bar train and iron merchant train.

The rail train engine, by Starbuck Brothers, Troy, is a particularly well built and smoothly working machine. It stands on ten feet depth of brick masonry, resting on six feet of stone and concrete, which is supported by twenty feet of solid piling. The engine is of the "steam-hammer" pattern, vertical, condensing, and directly connected to the train. A solid bed plate supports two side frames, upon which there stands a fifty-four inch cylinder, and between which work the cross-head (thirty-six inch stroke) and the beam for driving a thirty-inch air pump (eighteen-inch stroke) situated at the end of the bed plate. The connecting rod (seven and a half long) and the piston rod, and other parts are of Bessemer steel. The fourteen inch shaft (twenty-four inch length of journals) is cranked, so as to be connected to trains at either end. The fly-wheel is of twenty-five feet diameter, with a seventeen by twenty inch rim, and weighs sixty tons. The valve is Davis's piston, made double, or, in fact, two eight inch valves side by side, to get ample port area. The packing of these valves is solid, but may be set out at will; the valve is the equivalent of a slide and perfectly simple. The steam pressure comes only on the ends of the two pistons forming the valve and the exhaust pressure between them so that there is constant equilibrium, and the valve is easily worked under steam by the starting bar. Snow's governor is attached to the cut-off. The engine may be changed to non-condensing by opening a valve in the exhaust pipe. The engine runs at seventy revolutions, for a twenty-one inch train.

The fan engine, standing near the other, and of similar pattern, has a fifteen by twenty-two inch cylinder, and is belted to a line of shafting above, which drives two overhead six feet Sturtevant blowers on either side of the mill, at eight hundred revolutions. An air pipe runs around over the furnaces, from blower to blower, with branches down to the ash pits.

The rail train is a twenty-one inch three-high train of the Fritz pattern, standing on a brick foundation, with a heavy oak cushion between. Steel rails are bloomed from nine inch ingots, and then roughed down and finished at a reheat. This is done in three sets of rolls; with twenty-one to twenty-five passes, according to the pattern. At present a top and bottom train is attached to the end of the steel rail train, but it will ultimate-

ly be replaced by the ordinary roughing and finishing rolls for iron rails; and the old rail mill will then be devoted to all top and bottom, puddle, breaking down, and preparatory rolling for iron rails.

Instead of the saw carriage running up to the saws, as usually practised, the saws are hung upon frames, which swing up to the rails as they lie on a fixed way, and are driven by belts from an overhead shaft that is supported by stands moveable on a bed-plate. The engine is fixed to the same bed-plate.

The hot beds are seventy feet long, with a straightening plate in the middle, and a short raised table at either end. The rails forming the hot bed lie on rollers working in the tops of iron posts set upon masonry, and can thus expand without buckling.

At each end of the hot beds there is a straightening press, with a bell crank straightening lever worked by means of an eccentric and a geared shaft by a steam engine attached to a bed plate. Behind the hot bed are two punching machines of similar construction, driven by separate engines, and each arranged to make the fish bolt holes and the spike slot, by means of a horizontal and a vertical punch. The rails are taken out of the mill to the wharf or to the railway, by means of cars running on tracks with suitable turn-tables.

The water works consist of a 50,000 gallon iron tank, sixteen feet in diameter, forming the top of an octagonal brick building twenty-four feet high, in which there is a duplex Worthington pump, taking water from the river, and driven by a sixty-horse power tubular boiler in a wing of the building. The feed pipes to the mill boilers are of wrough iron, and may be warmed in freezing weather by steam. The boilers may be fed either by the Worthington pump or by Giffard injectors, one of which is attached to each boiler, or by the main engine. The blow-off pipes from the boilers enter a large brick underground sewer, which also drains the boshes, the roll pit and the air pump.

The heating furnaces and the boilers over them are well constructed, and are furnished with every appurtenance for convenience and safety. The flame from the furnace passes under and through the boiler to a chimney standing on iron columns outside the building. The ash pit, opening out of doors under the chimney, is covered with a brick arch, shutting it off from the interior of the mill. There is an upper and a lower ash pit door. The furnace plates are perforated, or rather they are heavy cast-iron spiders, securing the brick work, but leaving it well uncovered. A water door frame, got up at these works, is employed, and there are cast-iron boshes by each furnace. The boilers are thirty feet long by fifty-four inches diameter, with three thirteen-inch flues. The lower half of the end of the boiler, over the throat of the furnace is recessed, so as to form a crown sheet for the flame to strike upon, and a chamber into which the flues open. A damper under the other end regulates the flow of flame under and through the boiler. Suitable air admission into the chamber under the boiler promotes combustion. The steam domes are three feet diameter by four feet high. A fourteen inch wrought-iron steam pipe, with disc expansion joints, leads from the domes to the engine, and by a ten inch branch to the merchant mill furnaces at the other end of the building. These pipes are throughly lagged. Besides the ordinary safety valves, there are lock-up safety valves provided by law; there are also float water gauges and gauge cocks. The boiler is enclosed in a chamber composed of cast iron bottom plates and brick side walls, supported by trusses resting on columns. The floor of the mill is well covered with hexagonal plates. The maximum capacity is one hundred and twenty tons of rails per day.

The merchant end of the mill is furnished with a double billet shears and a merchant bar shears, each driven by separate engines. The condensing beam engine, forty-eight inches by seven feet, runs at twenty-five revolutions, and drives on either side a geared train, five rolls long, running two hundred and eighty revolutions, for small iron, and a sixteen inch geared train, three rolls long, running fifty revolutions, for steel. Adjacent to the iron train are two heating furnaces with boilers, built upon the general plan above described. The steel is heated by a Siemens' furnace, supplied with gas by two producers. The capacity of these trains is thirteen of small iron bars and rods, and fifteen to twenty-five tons of half inch to five inch steel bars and shapes per day.

The old rail mill is a brick structure, averageing three hundred and twenty by one hundred and twenty-five feet in plan. A condensing beam engine (the engine of the old steamboat "Swallow"), with a sixty inch by ten feet cylinder, drives four two-high geared trains of eighteen inch rolls, two for balls, one for breaking down, one top and bottom, and one (at present) for iron rails. The mill contains fourteen double puddling furnaces, four top and bottom furnaces, and the necessary heating furnaces and apparatus for one hundred and twenty tons per day of iron rails. The adjoining machine and smith shop is a brick building, thirty by one hundred and fifty feet, and a building thirty by one hundred feet is employed for storage and miscellaneous purposes.

To be continued.

Commerce of New York.

The foreign imports at New York for the month of July, are officially stated as follows:

	1867.	1868.
Entered for consumpt'n.	$11,036,960	$12,193,589
Do. for warehousing	11,226,514	10,573,083
Free goods	766,786	1,094,643
Specie and bullion	56,606	126,442
Total entered at port...	$23,086,866	$23,987,657
Withdrawn fr. wareh'use	7,560,396	6,829,796

The foreign imports at New York for the seven months from January 1st, were:

	1867.	1868.
Entered for consumpt'n.	$76,009,575	$71,118,430
Do. for warehousing...	75,297,805	70,296,156
Free goods.....	6,742,477	6,048,592
Specie and bullion.....	1,613,302	4,165,342
Total entered at port..	$159,663,159	$151,628,520
Withdrawn fr. wareh'se	67,048,287	58,752,011

The revenue from customs at New York, were:

	1867.	1868.
In July.....	$9,505,432 94	$9,237,920 50
Previous 6 mos.	59,354,688 90	55,450,748 65
Tot. since Jan. 1	$68,860,121 84	$64,688,669 15

The exports from New York to foreign ports in the month of July, were:

	1867.	1868.
Domestic produce	$13,666,098	$10,538,848

☞ The directors of the New York and Oswego Midland Railroad have awarded the contracts for the Middletown Division of the road, and the branch to Ellenville, and also the Showangunk Tunnel. The tunnel was awarded to Hitchcock & Co., and the grading and masonry to Jackson & Macdonald.

AS GOOD AS THE BEST.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

The Rockford, Rock Island and St. Louis Railroad Company offer a limited amount only of their First Mortgage Bonds at 95, and accrued interest in currency.

The bonds pay seven per cent. interest—February 1, and August 1—in gold coin, *free of Government tax*. The principal also is payable in gold. They have fifty years to run, and are convertible into stock at the option of the holder. A sinking fund is provided sufficient to pay off the whole mortgage at maturity.

Each bond is for $1,000, or £200 sterling. Interest is payable in New York or London, at the option of the holder.

These bonds are amply secured, being a first and only lien upon the Company's entire line of road—which traverses the finest district of Illinois—upon its franchises, rolling stock, and other property, and upon all its coal lands, of which it now controls over 20,000 acres, estimated to contain 100,000,000 tons of coal. These lands, on the completion of the railroad, would probably sell for a sum sufficient to retire the whole mortgage.

For all the coal the Company can produce there is a ready market; 1,000 miles of railway and the population of 30,000 square miles of territory can be supplied with fuel from its mines more readily and cheaply than from any other quarter.

A large part of the means required in the construction is derived from stock subscriptions. Over $1,500,000 has been already expended upon the line from this source alone, and subscriptions to the capital stock are now pledged sufficient to pay the whole cost of the road with the exception of superstructure and rolling stock, leaving the proceeds of the bonds to be applied to these purposes and to the purchase of coal lands.

Of the entire line 165 miles are now graded. The work is proceeding rapidly and successfully. It is intended to have the first division of fifty miles, giving an outlet to the coal, in operation by January 1, and the whole line within one year.

The estimated earnings of the road, with its coal business, are threefold what will be required to pay interest on its bonds.

The trustee for the bondholders is the Union Trust Company of New York.

At the present price of gold the bonds pay an income of over ten per cent. in currency.

For sale at the office of this Company, No. 12 Wall street. Governments and other securities received in exchange at market rates.

H. H. Boody, Treasurer.

☞ The Treasury Department has issued to the Union Pacific Railroad Company, 1,280 bonds of $1,000 each, for the completion of sections 26 and 27 of their road, extending from the 720th to the 760th mile post west from Omaha.

☞ At a meeting of the Governor and Council, on the 7th inst., the contract for completing the Hoosac Tunnel was awarded to Messrs. Odiorne, Gardiner & Co., on condition that they deposit with the State Treasurer the sum of $500,000, in bonds, on or before the 12th inst.

United States Securities.

A German paper, published in New York, thus estimates the amount of U. S. bonds held in Europe, and by Savings Banks, and Insurance and Trust Companies on this side of the Atlantic:

We have heard of late frequently the opinion expressed that United States bonds, like gold, are made scarce by artificial means to keep up the price, and some of the speculators and their organs in this interest endeavor to give substance to this view. The following figures will show the error of such a supposition, and although they are partially derived from official sources, they will, we think, furnish the proof that under ordinary circumstances the floating stock of government bonds in our market can never be very large:

The total issue of government gold-bearing bonds of all denominations amounted, according to the last monthly statement of the public debt, to	$2,088,000,000
Of this amount the national banks have deposited as security for circulation and government deposits	380,000,000
Leaves	$1,708,000,000
The savings banks in the State of New York, as the Comptroller in Albany informs us, hold $58,225,300; and until we can ascertain the exact amount held by all the savings banks in the United States, we believe to be within bounds if we estimate it at	258,000,000
Leaves	$1,450,000,000
By insurance and trust companies there is at least held a further amount of $200,000,000, and the permanent investments of capitalists and all other classes of our population will certainly amount to $500,000,000, together	700,000,000
Leaves	$750,000,000
If we deduct from this the minimum amount held in Europe, say	600,000,000
There remains a total of	$150,000,000

Of which a large part is held by banks and the numerous dealers in government securities, who are obliged to keep constantly a certain amount of bonds on hand.

Illinois Central Railroad.

The statement of this Company for the month ending August 31, 1868, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	11,158.00 for	$110,349 45
Acres Int. Fund Lands sold	412.54 for	7,051 60
Acres Free Lands sold	1,826.92 for	25,365 59
Total sales during month of August, 1868	13,397.46 for	$142,766 64
To which add Town Lot Sales		255 00
Total of all	13,397.46 for	$143,021 64
Cash collected in August		$257,869 60

TRAFFIC DEPARTMENT.

Receipts from Freight		$467,435 00
do. Passengers		128,202 10
do. Mails		6,358 33
do. Rent of Road		4,000 00
do. Other Sources		70,000 00
Total Receipts in August, 1868		$675,995 43
Total Receipts in August, 1867		$684,018 78
Estimated earnings in the month of August, on the D. & S. C. R. R., not included above		$88,142 23

☞ The progress of the Mont Cenis Tunnel in July was 123 metres, 60 from the Modane end, and 63 the Italian. Length driven at Modane to July 31, 3,528 metres, do., Bardonneche, 5,119, total, 8,647. Length remaining to be driven, 3,573 metres; total length of tunnel, 12,220.

☞ The Memphis and Little Rock Railroad has been opened for business as far as Madison, whence stages will make direct connection with cars at Duvall's Bluff. The journey from Memphis to Little Rock now occupies 46 hours.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our

LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

S. W. HOPKINS & CO.,
69 & 71 Broadway, New York,
and 58 Old Broad St., London.

780 MILES

OF THE

UNION PACIFIC

RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **103**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 30 Nassau St.,

AND BY

John J. Cisco & Son, Bankers,
No. 59 Wall St.,

And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.

TO RAILWAY CONTRACTORS.

THE GRADUATION, MASONRY AND BALLASTING of the following enumerated sections of the

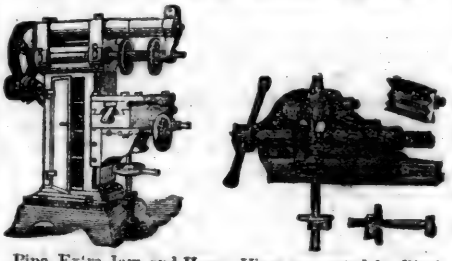
Pittsburgh and Connellsville Railroad,

Are advertised for contract, and proposals for the same will be received at the Company's Office, in Pittsburgh, up to

30th of SEPTEMBER, inclusive.

Commencing at the Uniontown Branch Junction, about a mile east of Connellsville, Sections 59 to 64 inclusive. Then Sections 65, 73, 74, 76, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 106, 110, 112, 115, 116, 117, 118, 119, 122, 128, 129, 130, 133, 140. All of these Sections are in the valley of the Youghiogheny River, up to Section 112 inclusive. Sections 115, 116, 117 are on the Summit, and embrace the Sand Patch Tunnel; and the remainder are in the valley of Wills Creek, Section 140 being about 5 miles from Cumberland.

Specifications of the work on the above Sections will be ready for delivery on the 1st of September, at the offices of the Company, at Pittsburgh and Cumberland, where contractors will obtain all necessary information to enable them to examine the line.



The Company reserves the right to reject all or a part of each bid.

POUGHKEEPSIE, N. Y.,
By their Improved Machinery are enabled to offer

Swaged Wrought-Iron Rail Chairs

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

American Railroad Journal.

New York Saturday, September 19, 1868.

Baltimore and Ohio Railroad.

The regular monthly meeting of the directors of this company was held in Baltimore on the 9th inst. J. W. Garrett, Esq., President in the chair.

In connection with the report of the committee of finance in reference to the Pittsburg and Connellsville Railroad Company, the President stated that the two millions of dollars of the first mortgage bonds of that company required to be taken in order to make effective the ordinance adopted by the city councils of Baltimore had been subscribed for, and that arrangements had been perfected by that company for the rapid prosecution of the heavy work upon their line. The bonds are first mortgage bearing seven per cent. interest, and have been disposed of at the uniform rate of 90 per cent. with accrued interest. The superior character of the investment has been shown by the capitalists of Baltimore, Pittsburg, Cumberland and Frederick generally subscribing promptly and largely for these bonds. The prospect is favorable that the remainder of the bonds will be negotiated in advance of the requirements of the company for the purposes of rapid construction.

A correspondence with the North German Lloyds was submitted, in which it was stated that that company had determined to place upon the line betwixt Baltimore and Bremen, not later than April next, two additional first class iron steamers of somewhat larger dimensions than the Baltimore and Bremen, with all the latest improvements. These steamers are now being constructed by the eminent builder Laird upon the Clyde. A communication from President Garrett to President Meier in connection with the proposed increased facilities stated "that the marked success of the line from its commencement is very gratifying, but does not exceed our expectations. The immense facilities of the Baltimore and Ohio Railroad Company combined with the palpable geographical advantages of Baltimore and its railways and connections must lead as soon as these great economies and facilities are properly understood and appreciated in Europe to a permanent transfer of a large portion of the business for the West from New York to Baltimore. The careful management of the interests of the line which distinguishes your administration and which your skill and experience insure, combined with the advantages of the route, cannot fail at an early day to lead, we trust, to the use of eight steamers between Baltimore and Bremen instead of four as you now contemplate. The line is growing daily throughout our country in popularity, strength and reputation."

After the usual routine business the President addressed the board as follows:

Gentlemen:—In consequence of a quorum not being present at the meeting in August, the chair had not the opportunity of making a statement to the board in reference to the serious damage which occurred upon the line during the preceding month. As very exaggerated and absurd statements were published, chiefly, however, at other points than Baltimore, it is proper that the facts connected with the freshet should be submitted. During the thirty six years since the line between Baltimore and the Monocacy River has been constructed, no freshets or difficulties upon the Patapsco or the waters in the vicinity have occurred to affect the working of the road to any serious extent, except in a single instance. In that case, in 1866, a freshet occurred of unusual severity, by which the bridge at Ilchester was swept off, and some detention of trains ensued. The entire loss, however, to the company on that occasion, in connection with the structures upon the road, did not exceed $20,000. In the recent case the region affected by the flood embraced a distance of thirty seven miles of the Main Stem, viz: from Ilchester to Monrovia. You will observe, therefore, that no damage resulted to the company from the condition of the Monocacy River, and that the Potomac was not affected. The whole loss and interference with the line arose from the condition of the Patapsco and its affluents. Whilst the damage was undoubtedly great, yet by the thorough and accurate report from the road department it is found that the full estimate of the entire losses upon the line, including the restoration of the embankments, bridges, culverts, and all other structures, not only to the condition in which the road was prior to the flood, but to a condition materially improved, will amount to $142 450, instead of the two or three millions of dollars as alleged by parties who apparently have other than public interests to subserve. The damage did not prove to be without compensation, or to involve much absolute loss. On the contrary, as the road was interrupted so as to prevent the passage of trains for twelve days, the company took advantage of the opportunity to make large and important improvements upon the line. In five cases of magnitude and special importance, the most difficult curves upon the Patapsco have been relieved and the line so straightened as to add materially to economy and facility in working. Advantage was taken of the opportunity to effect desirable changes afforded by the cessation of running of trains, and wherever experience showed that curvatures etc., could be improved, the necessary cost was incurred to secure such permanent benefits. Three iron bridges were lost, viz., one at Ilchester and two at Elysville. The Ilchester bridge was new, having been erected within the past twelve months, and was a superior structure. The chief cost in restoring it is in replacing that part of the masonry swept out. The material of the bridge was but slightly damaged. The cost of this structure, with the masonry enlarged and strengthened, will not exceed $18,000.

The board will remember that the line was straightened at Elysville, by crossing the stream twice at that point, instead of pursuing the original route. The bridges erected for that purpose were those swept off, and were the last of those first erected by the company when the locomotives and trains were of much less weight than at present. It was contemplated to substitute at an early period for those the modern and heavy bridges now used, with all improvements. These bridges, therefore, will not be restored, but in their stead new and still stronger bridges of the very best class will be erected. The cost of the new structures, after the deduction of the value of the material recovered, will be $50,000. At

that point absolute safety exists in running the trains, as, to meet immediate requirements, the former line has been restored.

The chair feels assured that it will gratify the board and the community to learn the untruthfulness of the statements published regarding a vast decrease in revenue.

The company urged the use of the road and branches during the period that the through trains ceased to run to meet and to anticipate all local requirements for fuel, timber, &c. The course desired was generally adopted. The results are such that the difference in revenue will be much less than was expected.

For July, 1867, the aggregate revenue of the road and branches was $812,371 04. For the same month in 1868, $770,698 29. In August, 1867, the aggregate revenue was $810,616 92, and in August, 1868, $782,092 57, making the aggregate difference for the two months of but $70,197 10. Thus the entire difference in the revenue, combined with the cost of the restoration and marked improvement of the line and bridges, will be less than $213,000, a result that makes quite ridiculous the assertion uttered by rival and adverse interests that the Baltimore and Ohio Company would be compelled to abandon its line on the Patapsco.

The history of American railways shows that no important line can present a better comparative result than that, in thirty-six years, the entire losses arising from high water should be so limited.

It is, therefore, in the judgment of the chair, clear that those parties upon the line of the road who have invested largely, who have built mills and factories and other costly improvements, need have no apprehension that the present road will be ever abandoned; on the contrary, increased facilities will be afforded and additional arrangements made to attract capital to continue and to increase the use of the magnificent water power of the Patapsco. Certainly the embarrassments caused by two such freshets in upwards of forty years, are not sufficient to justify the abandonment of the vast advantages of so valuable a stream.

It has been stated that the Baltimore and Ohio Company would not only be compelled to abandon this line, but that it would adopt a materially different line for its general business. The fact is, by comparison for the series of years, the Baltimore and Ohio Company presents a route subject to as little interruption, and with as many advantages, as any line upon the continent.

But, gentlemen, there is such a future before the Baltimore and Ohio Company and the city of Baltimore—such a present, indeed—pressing its vast business upon the road, that it becomes wise and proper to anticipate a state of things that may require not a double track only for the approaches to Baltimore, but probably *four tracks*—and that contingency is the more probable with the rapidly improving relations of the company through the Orange, Alexandria and Manassas road, and through the Valley of the Virginia with the South; through the Parkersburg Branch with the Southwest; through the Central Ohio with the Central West, through the Pittsburg and Connellsville road with the Northwest, and through the Washington County road with the Cumberland Valley of Pennsylvania.

Not in connection with the freshets on the Patapsco, but prior to that event, with a comprehensive view of these great interests, and the probable early requirements of increased facilities upon a road constantly becoming more national and important in its character and connections, it was deemed judicious to detail a corps of engineers to examine a line which would open an additional section of our own State, and which would furnish *a second double track* when required to Baltimore.

During the past season a route which would branch from the Metropolitan line near Gaithersburg, and extend to Laurel, has been examined. It has been ascertained that this route will be about four miles shorter to Baltimore, and that it affords other advantages. It may, therefore, become the policy of the company, when more urgent and pressing enterprises are accomplished, and as the traffic develops, to build that line as an additional route for the vast business between the South, Southwest, West, and Northwest and Baltimore.

The work upon the heaviest sections of the Metropolitan Branch, in accordance with the fixed policy of this company, is progressing satisfactorily. As soon as the more difficult work is in a sufficient state of forwardness to enable the company, by throwing a suitable force upon those portions of that line, which will require a relatively brief time to construct, the entire work will be prosecuted to completion as rapidly as it can be judiciously effected.

The President has deemed these remarks due to the gravity of the subjects, to the importance of a correct knowledge regarding the policy of the company at different points at a distance from Baltimore, and to correct the misrepresentations that have been made, as well as for the relief of property holders and others who have expressed anxiety as to an alleged change of policy—such as would involve them in great losses.

The report of the road department, to the 31st of August ultimo, regarding arching the tunnels on the Parkersburg Branch, shows that there are now employed at that work 1,058 men, that 787 feet were arched during the month of August, and that of 17,986 feet, the entire length of the twenty-three tunnels, 16,330 feet are now completed, leaving to be finished but 1,656 feet—about double the quantity that was completed during the last month. This statement exhibits the fact that the large expenditure for construction on that road of about $50,000 per month will soon cease, and that that great, direct and valuable line will soon become effective and reliable.

Heretofore the company could not invite travel upon that branch because of occasional difficulties in the tunnels, which delayed trains. It was wise, therefore, to meet the requirements of the public interests by expending the million dollars requisite to arch these tunnels. Twenty of the twenty-three tunnels on that road are now practically completed.

The bridge work in the Ohio River, during the period of low water, has progressed rapidly and satisfactorily. It is the design of the company to complete and open these bridges, if practicable, for the business of the fall of the next year—1869. It is due to the master of road, Mr. John L. Wilson, and the officers and men of this department, to state that during the recent calamity they exhibited an energy, skill and effectiveness which were not surpassed even by their great and successful efforts in reconstructing the road when destroyed during the war. The work accomplished embraced a certain degree of danger also.

The chair feels it proper to thus recognize the persistent determination and thorough devotion to the interests of the company so effectively displayed in restoring to the public our great avenue of commerce in so brief a period.

The business upon the road at present is enormous. The immense power of the company is taxed to meet the great pressure upon the line. The crops throughout the entire regions penetrated by and connected with the road are heavy, and the traffic promises throughout the season to be continuously great. The entire equipment for the coal trade is being used to its utmost capacity, and the pressure for this article promises to continue during the fall.

The revenue for September, 1867, was $908,047 53, and although the rates for coal and much other heavy business are very low, and indeed scarcely remunerative, yet, with the general increase in the business upon the main stem and branches, it is expected that the revenue, compared with the same month of the preceding year, will be exceeded.

Large numbers of the description of cars required have been added, and the machinery and road are in improved and superior condition. No effort has been spared in view of the character of the harvests and the large requirements of trade, especially in transporting the vast increase of goods directly imported from foreign ports into Baltimore—to accomplish an aggregate of business greater than has ever been done in any preceding season.

S. W. Hopkins & Co.

The attention of railroad companies and contractors is invited to the advertisement of this firm in another column. Having superior facilities for executing orders at manufacturers prices for all descriptions of American and foreign railroad iron, they are always in a position to furnish all sizes, patterns and weight of rail for both steam and horse roads, and in any quantities desired, either for immediate or remote delivery, at any port in the United States or Canada, at the lowest market prices. They are also prepared to supply Bessemer Steel Rails, of American and foreign manufacture, of any pattern and weight. They will also, when desired, contract to supply roads with their monthly or yearly requirements of rails, taking in exchange their old rails, and allowing the highest market price therefor. Orders for foreign rails taken for transmission by mail or through the cable to their London house. Address S. W. Hopkins & Co., 69 and 71 Broadway, N. Y., or 58 Old Broad st., London.

North Carolina Railroad.

The gross earnings of this road for the years ending May 31, 1867 and 1868, compare as follows:

	1867.	1868.
From passengers	$201,761 82	$172,774 83
" freight	301,930 87	844,359 28
" mails	14,866 66	16,725 00
Total	$518,558 85	$533,859 11
The expenditures for the same years were—		
Old	$244,323 49	$97,130 79
New	446,132 84	411,895 64
Total	$690,456 33	$508 526 43
Excess of expenditure	$171,897 48	.....
Excess of earnings	.....	$25,322 68

In expenses, the word "old" means interest on old debts and debts made and not entered on the book previous to each fiscal year. The word "new" means actual current expenses. Of the above "old," for the fiscal year 1867–'68, $44,694 42 is for interest, and $52,436 37 for other debts. Excluding the "old" entries, the net earnings would be for 1866–'67' $72,426 01, and for 1867–'68, $122,463 47 respectively.

Of the current expenditures for 1867–'68, ($411,895 64), the following are regarded as extraordinary:

New railroad iron, 1,073 tons	$90,515 63
Buildings and bridges	17,796 58
Three 1st class passenger cars	12,000 00
One mail car	1,800 00
Cost of completing new locomotives	8,111 15
Thirteen new box and six flat cars	8,900 00
Twenty flat cars and trucks framed	3,500 00
Total	$142,623 36

—leaving the actual current expenses for the year at $268,623 36, and the actual net earnings at $265,235 75, an amount sufficient to pay the interest on the bonded debt and a dividend of 5¼ per cent. on the capital stock.

As appears from the above statement the gross earnings of the road for 1867–'68, as compared

with those of the previous year, show an increase in the aggregate of $15,290 26. This may be regarded as a good result when taken in connection with the fact that the tariffs, local and through alike, were reduced from 20 to 40 per centum in the latter year.

The transportation account for 1867–'68 shows as follows: passengers—through 1,776 and local 79,286, total 81,062, or 12,390 over previous year. The tonnage for the same year is as follows:

Through freight—	Tons.
Sent out *via* W. & W. R.R. to Portsmouth.	8,192½
Received *via* W.& W.R.R. from Portsmouth	9,211½
Sent out *via* R. & G. R. R. to Portsmouth.	5,366½
Received *via* R. & G. R.R. from Portsmouth	4,345½
Total to and from Portsmouth	27,116
Through freight carried to all points	43,155
Local freight east and west	22,679
Grand total, east and west	65,834

The equipment of the road consists of 24 locomotives, 8 first-class and 10 second-class passenger cars, 8 baggage, 5 mail, 139 box and 176 flat cars. The total mileage of engines during the year has been 350,960.

The general income accounts for the years 1866–'67 and 1867–'68 compare as follows:

	1866–'7.	1867–'8.
Earnings, as above	$518,558 85	$533,859 11
Old iron sold	46,936 02	32,562 82
Other property	13,838 82	1 423 87
Rents	5,865 70	5,711 73
Shop account	5,363 70	3,227 14
Interest	.....	1,153 98
Mileage of cars	.....	4,080 92
Miscellaneous	7,635 91	3,391 52
Total receipts	$598,199 00	$585,411 09
Expenditures, viz:		
Transportation	$130,339 65	$117,308 32
Maintenance of road	124,408 23	118,165 76
Maintenance of motive power	122,391 55	75,293 62
Salary account	30,280 95	.....
Loss and damage	28,421 00	1,769 67

Purchase of R. R. iron.	92,850 75	113,522 29
New engines and cars.	16,623 20	.....
Incidentals	.....	5,674 77
Total expenditures	$690,456 33	$508,526 43
Excess of expenditures	$92,257 33	.....
Excess of receipts	.....	$76,884 66
Included in the expenditures were "old" as follows	244,323 49	97,130 79
Excess of rec'pts over "new" or current expenses	$152 066 16	$174,015 45

The following is a condensed exhibit of the fiscal business of the company for the years ending May 31, 1867 and 1868:

	1867.	1868.
Assets on hand at commencement of year	$145,579 11	$69,834 94
Old debt collected	405 05	476 47
Real estate sold	.....	160 00
Claims passed to profit and loss	24,820 24	28,624 86
Receipts as above	598.199 00	585,411 09
Increased liabilities	27,401 67	.....
Total	$1,096,405 07	$684,497 36
Expenses as above	$690,456 33	$508,526 43
Counterfeit money to profit and loss	.....	10 00
Old construct'n account	2 381 85	.....
Right of way	1,000 00	.....
Old debts passed to profit and loss	246,565 51	.....
Balance on cotton account passed to profit and loss	86,166 94	.....
Assets, as per general ledger	69,834 94	62,264 11
Decrease of liabilities	.....	113,696 82
Total	$1,096,405 07	$684,497 36

The financial condition of the company as of May 31, 1867 and 1868, is thus stated in the general ledger balances:

	1867.	1868.
Capital stock	$4,000,000 00	$4,000,000 00
8 p. ct. loan due Mar. 1, 1867	339,000 00	144,000 00
Interest due on same.	19,820 00	4,860 00
8 p. c. mort. loan due Nov. 1, 1872	.....	142,500 00
Interest due on same.	.....	40 00
8 p. c. mort. loan due Nov. 1, 1877	.....	146,500 00
Interest due on same.	.....	20 00
Temporary loans at 8 p. c. on demand.	172,639 00	12,676 53
Bills payable	20,774 25	20,992 12
Due on dividends	919 00	898 00
Due other companies	10,126 56	9,209 80
Due on individual accounts	16,807 88	40.078 69
Due on pay-rolls	31,701 68	14,432 78
Due for negro hire 1864 and 1866	79,743 67	43,927 00
U. S. income tax retained	2,999 70	.....
Profit and loss	596,603 32	782,834 87
Total stock and liabilities	$5,290,435 06	$5,312,969 79
Road, equipment and real estate	$4,950,755 68	$4,950,605 68
Sinking fund	204,000 00	204,000 00
Stock of Chatham R. R. Co	44,444 44	74,700 00
Stock of N. Car. R.R. Co.	21,400 00	21.400 00
Due from station agts	8,646 41	5.226 52
Due from other companies	10.243 26	5.195 99
Due from individuals	15 223 96	13,796 69
Due from frgt charges	1,717 77	2,106 44
Due from U. States	4,155 00	14,371 09
Due from U. S. Post Office dept	2,787 50	2,787 50
Bills receivable	6,357 37	5,610 55
Due from Southern Express Co.	2,076 49	600 10
Cash on hand	18,627 15	12,569 23
Total property and resources	$5,290,435 06	$5,312,969 79
The debt reported to the stockholders at their annual meeting in 1867 amounted to	$693,831 74	
Add debt arising on confederate transactions for iron, damages in burning cotton, interest, &c., not then fully ascertained.	97,130 79	
	$790.962 53	
Present debt of the company	580,134 92	
Reduction of debt in 1867–'8	$210,827 61	

Most of the funded debt due May 31, 1867, and temporary loans have been funded in the new 8 per cent. 5 and 10 years bonds of November 1, 1867. The total amount of these bonds provided for in the mortgage is $1,500,000 but of these only $800,000 are authorized to be issued without the express sanction of the stockholders in general meeting. The issue will be made in four series running respectively 5, 10, 15 and 20 years from date. After taking up the outstanding overdue bonds and interest, and the balance of the temporary loans, the remainder of the $800,000 ordered for issue will be applied to new works and the improvement of the property.

The president states the profits of the year 1867–'8 as follows:

Receipts from all sources	$585,411 09
Expenses of operating the road	268,772 28
Net profit over operating expenses	$316,638 81
Net profits over ordinary and extraordinary expenses	$174,015 45

In view of this favorable result of the year's business the board of directors at their meeting in July last, resolved that a dividend of six per cent. upon the capital stock of the company be declared payable at the company's office on the 1st October in mortgage bonds (as above described) running 15 and 20 years, or in scrip convertible into said bonds when presented in sums of five hundred dollars.

The names of the present officers of the company are as follows:

President—W. A. Smith.
Superintendent.—Albert Johnson.
Treasurer.—G. M. Lea.
Secretary.—F. A. Stagg.

Pittsburg, Ft. Wayne & Chicago Railway.

The following is a statement of the approximate earnings and expenses of this company during the month of August, as compared with the same period of the year 1867:

	1868.	1867.
From freight	$410,729 71	$374,449 24
" passengers	216.391 81	204.144 81
" express matter	10.257 00	8,550 68
" mail	7,825 00	7.825 00
" rent of railway	7,083 33	7,083 33
" miscellaneous	1,000 00	4,164 50
Total	$653,286 85	$606,217 62
Expenses	395,650 18	388.172 00
Net earnings	$257,656 67	$218,045 62

This shows an increase in earnings of $47,089 23; with an increase in expenses of $7,458 18—making the increase in net earnings, $39,611 05.

The earnings and expenses from January 1 to August 31, compare as follows:

	1868.	1867.
Earnings	$5,007.372 97	$4,523,963 63
Expenses	3,176,789 89	3.212 999 64
Net earnings	$1,830,583 08	$1,310,963 99

This shows an increase in earnings of $483,409 34; with a decrease in expenses of $36.209 75—making the increase in net earnings, $518,619 09.

New Hampshire Central Railroad.

This company was organized at Centre Harbor, N. H., on the 8th inst., by the election of the following board of directors: Hon. O. F. Fowler of Bristol, Wm. Dyer of New Hampton, John W. Beede of Meredith, Dr. W. H. H. Mason of Moultonboro', William M. Weed of Sandwich, Hon. Larkin D. Mason of Tamworth, and Henry J. Banks of West Ossipee. At a subsequent meeting of the Directors, Hon. O. F. Fowler was elected President; S. K. Mason of Bristol, Clerk, and Cyrus Taylor of Bristol, Treasurer. A public meeting of the friends of this enterprise will be held at West Ossipee on the 22d inst.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, September 19, 1868.

Stock Exchange and Money Market.

The Money Market has been comparatively easy all through the week, and was particularly so toward the close, the offerings of capital, especially in a temporary form, having been considerably in excess of the requirements of borrowers, whose wants, though fair for the season, have not been urgent. There has been some further outflow of currency to the West, but the amount has not been notably heavy, and has not perceptibly lessened the available supply of money at this point. The local speculative and mercantile demand has been on the increase, but has been quite promptly responded to by lenders, especially on private account, at 3@4 per cent. on call, and 6@7, generally 7 per cent. per annum in the discount form. The U. S. Sub-Treasury has added about 2½ millions its cash reserve, since our last, while the city banks, in their last weekly exhibit, show a decrease of $2,554,435 in legal tender, $2,365,271 in deposits, and $664,836 in specie; with an increase of $224,994 in loans, as the results of the past week's business. The circulation has been reduced $30,503. The city banks now hold a legal tender reserve of $63,429,337, against $74,051,548 on the 8th of August. Their specie hoard is now $16,150,942, against $24,784,427 on the 8th ult. Their deposits amount to $205,489,070, against $231,716,942 six weeks since. The loans of the banks are $272,055,690, against $284,147,708 August 8th. Their deposits are down to $205,489,070, against $231,716,492 on the 8th of August.

The specie reserve of the city banks is now $16,150,942, against $8,184,946 same time last year. The city bank deposits are now $205,489,070, against $193,081,775 week ending Sept. 14, 1867. The legal tender reserve amounts to $63,429,337, against $65,176,903 same time last year. The circulation now stands at $34,139,926, against $34,015,228 same time last year. The loans are now $272,055,690, against $254,160,587 at this date last year. The Bank Exchanges at the Clearing House through the past week, averaged $82,198,512 a day, against a daily average of $78,339,346 the preceding week, and $80,130,844 the week ending with Aug. 27, 1868. The current week's exchanges average about $77,500,000 a day. The city banks, last week, lost $664,836 of specie, $2,554,436 of legal tender, and $2,365,271 of deposits. They increased their loans, $224,994; and reduced their circulation, $30,493.

The New York Gold Exchange Bank reports for the week ending Saturday, the 12th day of Sept., 1868. the average amount of loans and discounts as $1,282,656; average amount of specie, $785,163; average amount of deposits, $1,431,908.

The Philadelphia Bank movement the past week shows a decrease in loans of $37,328; a decrease of $13,847 in specie; a decrease in legal tenders of $564,844; a decrease of $316,158 in deposits; and a decrease of $8,642 in circulation. The Bank Clearings show a decrease of $8,257,511 and the balances, a decrease of $178,171.

The outstanding amount of coin certificates on the 1st of Sept., was $25,161,620, against $22,414,000 on the 1st of Aug., 1868. The Sub-Treasurer at this port issued, last week, coin certificates to the amount of $473,000, and retired $2,990,961 through the receipts for customs. The coin certificates issued by the Sub-Treasury office, during August, reached $9,075,920.

The U. S. Sub-Treasury receipts, week ending with Sept. 12, were $11,708,789, including $3,112,961 from customs duties; payments, $9,846,084, including $495,318 of coin interest; balance at the close of the week, $89,302,188, against $87,439,483, at the close of the preceding week, showing an increase of $1,862,705. The business of the Office during the first two days of the current week, was as follows: Receipts on Monday, $1,938,590 including $422,000 from customs; and payments, $1,335,778; on Tuesday, receipts, $1,465,788 including $890,000 from customs, and payments, $1,108,951. The balance at the close of business on Tuesday stood at $90,261,836, against $87,896,063, a week previous; and $90,416,660, on Sept. 2, 1868. The aggregate receipts of the office from all sources in August, were $81,253,285; aggregate payments, $78,880,968. The balance on the 1st inst., was about 7¼ millions more than on the 1st ult., which amounted to $80,133,186.

National Bank notes to the amount of $98,850 were issued last week by the Treasury Department, making the total issue to 1,673 banks thus far, amount to $309,698,876, against $282,555,440 at the close of the fiscal year ending June 30, 1866. From the total issue is to be deducted the currency returned, including worn out notes, amounting to $9,823,918, leaving, with the existing 1,639 banks, (having an aggregate capital of $419,806,511,) an actual circulation at this date, of $299,874,958. The United States bonds held by Treasurer Spinner in trust for National Banks as security for circulating notes amount to $341 889,700; and for the public deposits, $38,052,350—making a total of $379,942,050. The Treasury Department last week redeemed and destroyed $435,900 of worn and mutilated fractional currency, and issued $697,215 of new. The outstanding amount of fractional currency on the 1st of September was $31.802,218, against $31,867,818 on the 1st of August; $32,531,590 on the 1st of June, $32,450,490 on the 1st of May, and $32,588,690 on the 1st of April, 1868.

A liberal customs revenue has been reported by the Treasury officials, for the past week. The excises have yielded only moderately, however. The excises, last week, yielded some four millions; customs at the port of New York, $3,112,961, and at the outports about $1,050,000 (in coin) more, making the grand total income for the week equal to about $10,036,300 in currency. The total receipts of the National Treasury, from excises, during the fiscal year ending with June 30, 1868, were about $193,000,000. The receipts from the same source, thus far in the current fiscal year, commencing with July 1, 1868, have been about $41,000,000.

The extremes of gold, since our last, have been 143½@145, and the latest figures on Wednesday were 144⅝@144¾. The speculation was rather spiritless up to the closing day, on which the dealings were quite animated, stimulated in part, by rumors of a warlike tenor from Europe, which led to a considerable increase of the demand from all sources largely from the *short* interest, thus strengthening the price in the open market. The export call, last week, was confined to $329,525; and thus far, this week, it has taken off only about $220,000; while the receipts of treasure from California have been over a million dollars. The amount of gold in the Treasury on the 1st of of September, was $92,570,901, of which the Government owned $67,409,281
Since for custom, New York. $5,576,770
At outports 2,500,000
8,076,770
Total $75,486,051
Gold interest paid, N. York. $2.647,318
Other offices 1,200,000
3,847,318
Gold now at disposal of Treasury $71,638,733

The total imports of specie at this port from Europe, and other foreign ports since Jan. 1, 1868, have been $5,748,917, against $2,281,000 same time last year. The customs demand for Gold last week, averaged $518,827 a day; thus far, this week, it has been equal to $606,000 a day, or equal to a weekly aggregate of $3,636,000. The arrivals of specie from Europe, Havana and other foreign ports, during the week were $32,525 and from California, $1,026,048

The total customs revenue of the Government, in coin, at this port, since Jan. 1, 1868, has been $84,136,580, against $88,640,655 same time in 1867. The total receipts of California gold at this port, since Jan. 1, 1868, have been $30,909,228, against $21,254,504 in 1867, showing an increase thus far in 1868, of $9,654,724. The exports of specie, from this port, last week, were $329,525, against $325,328 same week last year; total, since Jan. 1, 1868, $65,348,052, against $41,340,548 same time in 1867. Government disbursed last week through the U. S. Sub-Treasury here, on account of the coin interest on the public debt $495,318; since Jan. 1, 1868, $62,843,345, against $43,037,765. The specie exports from San Francisco, from Jan. 1. to Aug. 23, 1868, were $26,327,385, against $27,500,548 same time last year.

Government received $5,381,120 from customs at the port of San Francisco, from Jan. 1, to Aug. 22, against $4,890,948 same time in the preceding year.

Foreign exchange has been quoted a fraction cheaper, on a moderate offering, and a light inquiry from all sources. At the close, the market though dull, was steady. Bankers' prime sixty day bills on London closed on Wednesday at 108⅞@109⅛, and on Paris to 5.21¼c.@5.17½; sight bills on London to 109¼@109½, and on Paris to 5.16¼c.@5.15. The offering of produce bills has been more liberal this week. The week's exports of domestic produce and miscellaneous goods from this port have been to the currency value of $3,163,024, against $3,378,820, same week last year; total, since Jan. 1, 1868, $117,695,766, against $130,146 817 in 1867.

Government securities have been in much more general demand and prices have improved. The home and foreign investment inquiry has been quite active. There has not been a great deal doing on speculative account. The later issues of the Five-twenties have been the favorites with buyers. Old Five-twenties of 1862 have been the next in public favor. The 1881 bonds, and the Ten-forties have been relatively less sought after. A limited demand prevailed for the U. S. six per cent. currency Pacific R. R. aid bonds. Compound Interest Notes have nearly disappeared from the open market. The last of them will mature on the 15th of the coming month of October.

U. S. sixes of 1881 closed here on Wednesday at 114@114¼; U. S. Five-twenties of 1862, 113⅝@113¾; U.S. Five twenties of 1864 at 109¾@109⅞; U. S. Five-twenties of 1865 at 110⅞@111⅛; U. S. Five-twenties of 1865, consolidated, 109@109⅛; U. S. Five-twenties of 1867, 109@109⅛; U. S. Five-twenties of 1868, 109@109¼; U. S. Ten-forties at 104¾@104⅞; U. S. Six per cent. currency bonds, 100⅛@100⅝. The brokers are buying the outstanding October 1865 compound interest notes at 118¾. The September 1865 compounds matured on the 15th inst., and are no longer quotable.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 2.	Sept. 9.	Sept. 16.
Consols	94	94⅛	94⅛
U.S. 5-20's of 1862...	71⅝	72	72¼
Erie	31	30½	30¼
Ill. Central	91½	91	91

Railway and miscellaneous share property has been decidedly brisker and firmer. The speculative demand has been animated, and the dealings have been on a more extensive scale, having been well distributed through the active list. Prices closed buoyantly.

General business has been fairly active in the produce line; but at, in most instances, easier prices particularly for cotton, breadstuffs, provisions and petroleum. Middling upland cotton ruled quite heavily up to Wednesday when it closed more buoyantly at 25½@26 cents per lb. The stock of cotton now here is estimated at about 15,000 bales. The receipts at the port this week, have averaged only about 1,000 bales a day. The receipts at all the ports, since Sept. 1, 1867, have been 2,240,300 bales, against 1,892,000 bales same time last year; exports, same time 1,657,000 bales, against 1,556,000 bales same time last year; stock on hand at latest dates, 45,000 bales, against 66,000 bales same date last year. At the Live Stock market, this week, Beeves have been quiet and heavy at from 11@16½c. per lb.; week's receipts, 5,438. Veal calves have been in good request at from 7½@12c. per lb.; receipts, 1,545. Sheep and lambs have been fairly active at 4@7c., and 7½@9c., respectively, per lb.; receipts, 30,361. Swine have been firm but dull at 9½@11¼c. per lb., all live weight; receipts, 40,181. An improved trade has been reported in foreign goods, particularly in groceries and dry goods, at generally buoyant rates. The total imports of foreign dry goods, last week, were $1,857,313, and the total amount marketed $2,304,205. The value of foreign merchandise imported last week, was $2,364,942—making the grand total specie value of last week's imports of dry goods and merchandise, equal to $4,222,255, against $4,583,556 same week last year; from Jan. 1, 1868, $179,472,244, against $191,784,058 same time in 1867. The freight market has been rather more active, and rates have been quoted firmer. For Liverpool we quote flour at 1s. 6d. by sail, and 1s. 9d. by steamer, per bbl.; grain at 3⅛s. 4d. by sail, and 4½@5d. by steamer, per bushel; cotton at $\frac{1}{8}$d.@$\frac{5}{32}$d. by sail, and $\frac{3}{16}$d. by steamer, per lb.; and heavy goods at 12s. 6d.@25s. by sail, and 15s.@30s. steamer, per ton. Total number of vessels in port on Wednesday, 525.

The New York exports, exclusive of specie, for the week ending Sept. 15, and since the beginning of the year, compare as follows:

	1867.	1868.
For the week	$3,378 820	$3,163,024
Prev. reported	126,767,997	114,532,742
Since January 1.....	$130,146,817	$117,695,766

The imports for the week ending September 12, and since the beginning of the year, have been as follows:

	1867.	1868.
Dry goods	$2,096,237	$1,857,313
Gen. merchandise	2,487,319	2,364,942
Total for the week.....	$4,583,556	$4,222,255
Previously reported....	176,586,334	172,960 093
Since January 1.....	$181,169,890	$177,182,348

The balance in the Sub-Treasury on Wednesday was $90,283,707 04.

☞ The first street railroad in Stutgardt, Wurtemberg, was only inaugurated on the 28th of July last.

☞ The Paterson and Newark Railroad has been leased in perpetuity to the Erie Railway Company.

☞ CENTRAL PACIFIC RAILROAD SIX PER CENT. THIRTY YEAR GOLD BONDS.—A limited quantity of these bonds will be disposed of at 103 and accrued interest from July 1, in currency. The road will be completed within twelve months, and is now earning, above operating expenses, more than double its current interest liabilities. Principal and interest payable in United States gold coin. Government securities received at market rates in exchange.

FISK & HATCH.

Bankers and Dealers in Government Securities, No. 5 Nassau-st., New York.

AS GOOD AS THE BEST.

PRINCIPAL AND INTEREST PAYABLE IN GOLD.

The Rockford, Rock Island and St. Louis Railroad Company offer a limited amount only of their First Mortgage Bonds at 95, and accrued interest in currency.

The bonds pay seven per cent. interest—February 1, and August 1—in gold coin, *free of Government tax.* The principal also is payable in gold. They have fifty years to run, and are convertible into stock at the option of the holder. A sinking fund is provided sufficient to pay off the whole mortgage at maturity.

Each bond is for $1,000, or £200 sterling. Interest is payable in New York or London, at the option of the holder.

These bonds are amply secured, being a first and only lien upon the Company's entire line of road—which traverses the finest district of Illinois—upon its franchises, rolling stock, and other property, and upon all its coal lands, of which it now controls over 20,000 acres, estimated to contain 100,000,000 tons of coal. These lands, on the completion of the railroad, would probably sell for a sum sufficient to retire the whole mortgage.

For all the coal the Company can produce there is a ready market; 1,000 miles of railway and the population of 30,000 square miles of territory can be supplied with fuel from its mines more readily and cheaply than from any other quarter.

A large part of the means required in the construction is derived from stock subscriptions. Over $1,500,000 has been already expended upon the line from this source alone, and subscriptions to the capital stock are now pledged sufficient to pay the whole cost of the road with the exception of superstructure and rolling stock, leaving the proceeds of the bonds to be applied to these purposes and to the purchase of coal lands.

Of the entire line 165 miles are now graded. The work is proceeding rapidly and successfully. It is intended to have the first division of fifty miles, giving an outlet to the coal, in operation by January 1, and the whole line within one year.

The estimated earnings of the road, with its coal business, are threefold what will be required to pay interest on its bonds.

The trustee for the bondholders is the Union Trust Company of New York.

At the present price of gold the bonds pay an income of over ten per cent. in currency.

For sale at the office of this Company, No. 12 Wall street. Governments and other securities received in exchange at market rates.

H. H. BOODY, Treasurer.

Canada Central Railroad.

At a recent meeting of the shareholders of this company at Ottawa, (Ca.) the following officers were elected: John G. Richardson, President; H. Habbott, Vice President; and Messrs. Scott, Powell, Ashworth, Lowe and Rivers, Directors. Subsequently the ceremony of turning the first sod was performed by the president, at the west end of the city. This road, which is destined ultimately to connect Montreal with Georgian Bay, has been definitely located between Ottawa and Carlton Place, and the work of construction will be proceeded with at once. The distance by the Canada Central to Ottawa from Toronto *via* Brockville is only seven miles further than by the Ottawa and Prescott Railroad, and as this line is of the same gauge as the Grand Trunk, it is intended by the company, the principal stockholders in which are largely interested in the Brockville and Ottawa Railway, to bid largely for western traffic, and to set down passengers from Toronto every day at not later than eight o'clock at night. As an evidence that this railroad is to be proceeded with at once, a large sum has been paid for the site of the railway station within the limits of the city of Ottawa.

Boston and Maine Railroad.

The annual meeting of this company was held at Lawrence, Mass., on the 9th inst. Francis Cogswell, Esq., President in the chair. Mr. James C. Merrill was re-elected clerk for the ensuing year. The annual report of the directors, an abstract of which was published in our last issue, was presented and accepted. The meeting then proceeded to vote for directors, which resulted in the re-election of the following gentlemen: Francis Cogswell, Andover; Peter T. Homer, Boston; Nathaniel G. White, Lawrence; E. J. M. Hale, Haverhill; Geo. C. Lord, Boston; Amos Paul, South Newmarket, N. H.; John E. Bickford, Dover, N. H.

The matters on which the meeting was called to act were then taken up. The first was whether the act authorizing change of location of road in North Andover and Bradford, and authorizing increase of capital should be accepted. It was explained that it was not proposed to vote upon increase of capital at this meeting, but simply to vote whether the authority would be accepted. The act was accepted.

The second question was whether the stockholders of this road would accept the act allowing the Eastern Railroad to extend their Salem and Lawrence branch into Lawrence. The third section provides that their consent must be had before the law can be of effect. It was voted to accept the third section.

The question of accepting the act of the Maine Legislature in allowing the Portland, Saco and Portsmouth Railroad Company to increase its capital was discussed. The act is of no effect unless the consent of the Boston and Maine and Eastern Railroads is obtained. It was finally decided to refer the whole matter back to the directors, with instructions to call a special meeting to act upon the subject when they thought the proper time had come.

The matter of opening communication with deep water had the same reference.

The amendment proposed to the bye-laws were adopted.

The Bessemer Process.

PRODUCTION OF CHEAP STEEL IN AMERICA.—COMPLETION OF THE GREAT WORKS AT TROY.—DESCRIPTION OF THE VARIOUS BESSEMER WORKS IN THIS COUNTRY.—THE NATURE AND VALUE OF THE IMPROVEMENT.

Continued from page 889.

The Pennsylvania Steel Works were the third Bessemer works started in the United States, and are in present extent of plant, as well as in proposed capacity, the largest in America. They were organized under the presidency of S. M. Felton, Esq., late President of the Philadelphia, Wilmington and Baltimore railway, and under the direction and auspices of prominent railway men and engineers, such as Mr. Thomson of the Pennsylvania railway; Nathaniel Thayer, M. W. Baldwin, & Co., Wm. Sellers & Co., Bement & Dougherty, R. P. Parrott, H. R. Worthington, Merrick & Sons, Morris Tasker & Co., etc. They were built upon the plans, and started under the superintendence of Mr. A. L. Holley, now Chief Engineer. H. S. Nourse, late Assistant, is Superintendent, and John B. Pearse is Manager of the Bessemer department and Chemist.

The Bessemer department was started in June, 1867, and has been in constant operation. The ingots produced were mostly rolled into rails, at the Cambria Iron Works, Johnstown, Pa., until the starting of the Pennsylvania Steel Company's Rail Mill in May, 1868. The annual capacity of the present Bessemer Plant (two five-ton converters,) is about ten thousand tons, and of the Rail Mill, thirty thousand tons. Additional converters will be erected from time to time.

The Pennsylvania Steel Works are situated in the heart of the iron and coal regions of the state, at Baldwin, a suburb of Harrisburg, which is a junction of canals and railways running in eight different directions. Upon a rectangular, high, level plat, one hundred acres in extent, lying upon the banks of the Susquehanna, between the Pennsylvania railway and canal, the company's buildings are arranged with reference to *systematic* growth. Room is left for the indefinite enlargement of each department with reference to ample yard room and economical intercommunication by railway. These railways are of standard gauge, and of such curvature that cars from any of the lines radiating from Harrisburg can enter any building or yard. With such facilities for transportation, the present considerable distances between some of the buildings hardly amount to an inconvenience, and the great inconvenience so generally arising from huddling together the early buildings of growing works will be avoided.

The ground is a deep, solid gravel bank, well adapted to foundations, and its general level is twenty-five feet above low water, and three feet above the highest flood on record.

BUILDINGS.

The Bessemer building is probably the largest of the kind, being one hundred and fourteen feet long by one hundred feet wide, and twenty five feet high in the clear, for one pair of five-ton converters. A lantern twenty-five feet wide and six feet high extends the entire length. The adjoining melting building is eighty-one by fifty-two and a half feet, and thirty-nine feet high, with a hipped roof, and a lantern eighteen by forty-four feet; and the attached engine and boiler building is one hundred and thirty-three by fifty-two feet, and fifteen feet high. They are solidly built of blue limestone from the adjacent quarries. The walls are eighteen inches thick, and twenty-four inches through the pilasters. The windows and doors are arched with brick. The roof trusses are of wood (for greater convenience of giving a top support to the cranes,) and in the Bessemer building a sheet iron sheathing or internal roof is suspended beneath them. The covering of all the roofs is slate.

The rail mill is two hundred and seventy-five feet by ninety-two and a half feet, with two wings, ninety-two and a half by forty-nine and a half feet each, and twenty-eight and a half feet high in the clear. It consists of a hipped wooden truss roof and a continuous lantern (twenty-six feet wide by four feet high) covered with slate and resting on wooden posts (ten by twelve inches, fourteen by fourteen inches, and four posts twenty-eight by twenty-eight inches,) supported by stone piers. A permneant siding of wood, battened, and having a continuous line of fourteen feet, semi-circular windows all around, extends from the eaves down to within nine and a half feet of the ground; but below this point the siding is formed of balanced doors opening upward, so that the building can be entirely closed in Winter, while it may be turned into a mere shed in Summer, and may be opened at any point for ventilation or for entrance and exit of vehicles.

The machine shop is of wood, battened seventy-five by seventy-five feet, and twenty and a half feet high, with a lantern eighteen by seventy-two feet, and six feet high, and slate roof. One end is temporary, for enlargement. The line shafting is driven by a ten by eighteen-inch Hoadley portable engine, and the shop is completely furnished with roll and other lathes, planers, bolt-cutters, drill presses, a fifteen ton Bement crane, a Bement end-lathe, etc.

The smith shop is fifty by fifty feet, and eighteen feet high, with a continuous lantern and slate roof, and is also arranged for enlargement. It has a central crane swinging over six double fires (without chimneys,) and a Davy seven hundred weight steam hammer for forging test ingots and other work. Extensive store sheds for fire materials, etc., are erected at a convenient distance from the converting works. Water is carried to the machine and smith shops under the head of rail mill tank. All the buildings are drained by a three-feet brick sewer running to the river.

The company's boarding house is a brick building seventy by thirty-three feet, and three stories high, with twenty-six sleeping rooms. The workmen's houses are built of wood, on streets one hundred feet wide, with a thirty-foot alley between each pair. Each double tenement, or pair of houses, is twenty-eight by thirty feet, and two stories high, with two attached one-story kitchen buildings, and eight rooms with closet accommodation. The residence for the officers is a neat and commodious wooden villa, situated on an eminence over-looking the works and the river valley for many miles.

Plans are in hand, and proper places are left for the erection of extensive tyre, plate and merchant mills.

The Bessemer Plant is precisely like that at Troy, as to sizes and positions of converters and converter lifts, cars and platform, ingot pit and cranes, except that the central ingot crane is as large as the others, viz., twenty-two feet jib, nine feet lift. Two ovens with top entrances are sunk in the floor under the side ingot cranes. The flues of these ovens pass under brick bins for fire materials, to prevent their freezing in Winter. The regulator, from which the hydraulic machinery and the cranes are worked, is the same as at Troy, although differently situated. The large converting house affords ample room for the storage of moulds, and the dressing of ladles and vessel bottoms, and for bins containing fire materials, charcoal, etc., and for a floor and a hand crane for moulding flasks, etc. Two ovens, eighteen feet long each, with end entrances and railways running out under the side ingot cranes, open into the converting room from the lower story of the cupola building. From a turn-table under the central ingot crane, railways run in five directions out of the building, and under the other two ingot cranes. The railway to the rail mill passes over a ten ton scale, and a two-ton platform scale is placed under one of the cranes, so that ingots can be weighed, assorted and distributed with the greatest convenience and despatch. Upon the roof-trusses there is a hydraulic cylinder, operated from the regulator, which raises a one-ton drop (twenty-five feet fall) outside the building. The chain that raises the drop also unloads from cars the skulls, etc., to be broken up, and places them in position under the drop. The hydraulic machinery was built by H. R. Worthington, in New York.

At the front of the cupola building (opposite the converting building) there is a double two-ton verticle lift, operated by a line of shafting overhead, with openings to the stock-shed and yard. Coal wagons for a charge each, and iron wagons for a ton of pig each, are run upon the stock-house scale, loaded, run upon the lift, and hoisted to the ample cupola-charging floor, seventeen by twenty-five feet, and twenty-nine and a half feet high, or to the air-furnace floor, eleven and a half feet high. Two gangways, ten and a half feet wide, run through the cupola building from the front to the converting room. Between these gangways are the lift, a mixing floor for vessel linings, the pit into which the cupolas as dumped, and an ample space behind the converters. At the sides of these gangways are racks for tuyeres, weighmaster's office, bins for fire materials (which are ground on the floor above), a cinder mill convenient to the cupola dumping pit, a fifty-horse oscillating engine to drive the line shafting in the top of the building, and the ovens opening to the converting room. The next floor is eleven and a half feet high, formed of iron beams, arched between with brick, and reached by the lifts and by two stairways. Centrally upon this floor stand three No. 6 Mackenzie cupolas in line (with space left for a fourth), and two twelve ton ladles standing on platform scales, and arranged with worm-wheels to tip out the melted iron from the cupolas into spouts leading to the converters. This floor is connected with the converting-room by wide arches. An ample space is left upon it for getting at the converter bottoms. In one front corner of this floor is a building containing a five-feet Dimpfel fan for blowing the air and spiegel furnaces, and a No. 6 Root pressure-blower for driving the cupolas. In the opposite front corner is a building containing a Blake crusher and a Bogardus mill for preparing fire materials. The two large spaces at the sides of the cupolas are occupied, the one by two reverberatory spiegel furnaces, worked from behind and tapped in front, and the other by a large reverberatory melting furnace similarly worked (with room left for another), capable of melting five-ton charges of iron for conversion. Wide gangways are left between all the furnaces.

The blowing engine room is sixty-six by fifty feet; the engine occupies a space of sixty by twenty-two feet, and consists of a pair of fifty-four-inch air cylinders, water jacketed, a pair of forty-inch steam cylinders, five feet stroke, directly connected and horizontal, and a pair of eighteen by twenty-four-inch vertical air-pumps, worked by bell cranks. The valve motion is the long slide with adjustable slide cut off valve. The foundations are of heavy dressed stone, leaving a counterarched water tight pit under and between the engines. The air receiver is eighteen feet high by eight feet diameter. These engines were built by Merrick & Sons, in Philadelphia, and are a strong and excellent job.

The water supply for the whole works is from an unfailing well, twelve feet in diameter, at one corner of the engine-room. A Worthington duplex pump, capable of throwing twelve hundred gallons per minute, and arranged to connect with a ten-inch suction pipe from the river, when required, delivers the water through a ten-inch main into an iron tank twenty-feet in diameter and ten feet high, standing on an octagonal brick building twenty-one feet by eighteen and a half feet high, near the rail mill. The tank is covered, and is surrounded by a circular brick wall, with an air space between. From the main, water is carried yb underground pipes to the pressure pump and to the feed pumps for the converting and rail mill boilers, to the machine and smith shops, and to the office and hotel. The overflow from the air pumps runs to a shallow pond five hundred by two hundred feet, behind the rail mill, and when it is cooled runs back into the well. The rail train pit and boshes are drained to the pond. The pressure pump for driving the cranes is of the same size and make as that at Troy, and discharges into an accumulator which also acts as a regulator upon the steam valve. The feed pump for the converting boilers is of the Henderson pattern. These pumps are in the blowing engine room. The rail mill feed pump is a Worthington duplex. By means of an underground connection the fire hose (always connected) either in the Bessemer works or rail mill, and the cranes, and the boilers in either building, can be supplied from either one of the three last-named steam pumps.

The converting boilers, seven in number, are fifty-four inches by thirty feet, and two seventeen-inch return flues, and form a battery forty-eight by sixty feet in plan, with an ample space all around it. They are enclosed in brickwork, supported by iron staves. The blow-off pipes in the rear lead to the main sewer. The water-supply arrangement, safety apparatus, etc., are very complete. The flues from the boilers lead to a brick stack one hundred and ten feet high by five feet and a half square within. A nine-inch wrought-iron steam pipe runs underground, in an enclosed air space, from these boilers to the main steam pipe of the rail mill.

RAIL MILL.

The striking feature of this mill is its ample floor, space, and height. It is the only mill in this country built especially for steel, and the arrangement and strength of machinery are designed accordingly. The furnaces, eight in number (with room for more), are arranged in pairs, at one end and in one wing, with boilers over them, and sheet-iron chimneys outside the building. The furnaces do not front each other; and the smallest space in front of a furnace is twenty-one feet; the mill is consequently cool. In the centre of the space between the furnaces and the rolls, there is ample room for piling ingots, and a hydraulic crane for unloading them from the converting-room cars, and loading them on the furnace buggies. The rail train is near the centre of the building, with the engine at one end, directly connected; the saw carriage in the rear of it is arranged to receive rails from either of two sets of finishing rolls. The hot bed, laid on posts and rollers, is forty-eight feet long, with a twenty four feet table at one end and a straightening plate at the other. Beyond it is a ten-feet gangway, with a railway running from a turntable in the main siding to the other wing of the mill, in which there are two steam hammers. Beyond this gangway there is a cold bed seventy-two feet long, with a straightening press at one end and punching and drilling machines at the other. Outside of this end of the mill are tables for finished rails, ample yard room, and a siding with a twenty-five ton track scale, leading to the main siding.

The furnaces and boiler setting are of the Fritz pattern, built by Matthews & Moore, in Philadelphia. The furnace plates are corrugated, to prevent cracking by expansion. The boilers are thirty feet long by four and a half feet diameter, with two seventeen inch flues, twenty-one by twenty-four inch domes, and eighteen by twenty-one inch feed chambers below. The flame passes through the flues and under the boiler, in the same direction. The boiler-setting is similar to that in the Troy mill. The feed pipes are wrought iron, the main being five inches in diameter. The main steam pipe is fourteen inches diameter, of wrought iron, and the branches are five inches diameter, with S expansion joints. A seven inch wrought iron feed pipe connects the hammer boilers in the wing, with the others. All the steam pipes are thoroughly lagged with paper, hay, rope, and plaster—a thorough non-conductor, and very inexpensive.

The rail-train engine is of the Fritz pattern, vertical and noncondensing, and was built by Pusey, Jones & Co., at Wilmington, Del. The cylinder stands on four piers, bolted to a solid heavy bed plate, twenty-four inches high. It is forty inches diameter by sixty inches stroke, and developes three hundred to five hundred horse power at the different passes. The cross head is above the cylinder, and a forked connecting rod (thus very long) passes down both sides of it to the crank underneath. The valve motion is the Fritz revolving cam, with two double steam and two double exhaust puppet valves. The cut-off is performed by the regulator in the steam pipe. The shaft journals are seventeen inches in diameter and thirty-six inches long. The fly wheel is thirty feet in diameter and weighs fifty three tons.

The rail-train is the heaviest in this country, and consists of four sets of three-high twenty-three inch rolls—one set for blooming ten inch ingots, one for roughing, one for finishing, and one for either finishing rails of another pattern or for rolling beams or blooms. All parts of the train are stronger by some fifty per cent. than similar trains for iron. Each shoe stands on a foundation of heavy dressed stone, fourteen feet deep and four and a half feet thick at the bottom. This train has already run some three months on steel rails, with remarkable smoothness. It was built by Matthews & Moore, in Philadelphia.

The fan engine (fourteen by fifteen inches), fan and feed pump, stand near the main engine at one side of the main building. The fan was built by Morris, Tasker & Co., and is eight feet in diameter, by three feet nine inches face, and delivers to an underground brick air-duct six feet deep by four feet wide, with sixteen inch branches to each pair of furnaces. The saw apparatus, and the straightening and punching machines are driven by separate engines, and were built by Matthews & Moore. There is no line-shafting in the mill.

In the hammer wing, before referred to, there is a five ton Thwaites & Carbutt vertical steam hammer with a forty ton block, a fifteen ton crane, and a heating furnace and boiler similar to the others described, and adapted to cogging ingots and to miscellaneous forging. There is also a one and a half ton Morrison hammer by Sellers, with a two ton crane and a similar heating furnace and boiler. This makes a very complete forge, capable of working up all ingots of unsuitable size for rails, and of producing every class of forging, up to say ten inches.

The present products of these works are steel rails, hammered and rolled blooms, and forgings.

To be continued.

North Carolina Railroad.

We give elsewhere an abstract of the Report of this company for the fiscal year ending May 31 1868. By way of comparison, most of the statements are placed side by side with similar ones from the report of the preceding year. It will be seen that while the excess of expenditures in 1866-'67, was $92,257 33, the excess of receipts in 1867-'68, was $76,884 66—an improvement of $169,141 99. The excess of receipts over "new" or current expenses for the past year shows an increase over the preceding year of $22,949 29. The earnings for the months of June and July, 1868, were $69,629 52, against $61,007 61 in 1867—an increase of $8,621 91. The expenses during the same months were $57,464 82, and $62,115 74 respectively—a decrease of $4,650 92. This shows an improvement in the two months named of $13,272 83. We are informed that none of the mortgage bonds have been sold at less than par.

☞ The work of staking out the Suncook Valley Railroad, in New Hampshire, is being pushed forward, and Pittsfield, the terminus of the road, will probably be reached by the 20th.

☞ A large number of workmen are employed in grading the track for the Belfast and Moosehead Lake Railroad, and the work is going forward as rapidly as could be desired.

☞ The name of the proposed railroad from Tomah to Black River Falls, and so on, has been changed from "Tomah and St. Croix" to West Wisconsin.

Pittsburg and Connellsville Railroad.

We learn from the Cumberland (Md.) *Civilian* that the preliminary arrangements for the resumption of work on this road are now being made, and that there is a flattering prospect that the construction of the road will be put under contract at an early day, and vigorously prosecuted to a speedy completion. On the 1st instant specifications were placed in the hands of contractors desirous of proposing for work, and facilities are afforded them gratuitously by the company for an examination of the line. The work to be placed under contract, running from a westwardly to an easterly direction, commences about a mile above Connellsville, on the north bank of the Youghiogheny river, at the beginning of the branch railroad to Uniontown, and pursues the same shore of the river, passing the Ohiopile Falls, to Turkeyfoot on section 84, about twenty-seven miles from Connellsville. Here the line crosses Laurel Hill Creek, and ascends its northern slope some four miles to the "Brook Tunnel," on section 88 by which it passes from Laurel Hill Creek over to Casselman's river, and thence follows the north bank of the latter to the "Pinkerton Tunnel," on section 92; thence still pursuing the same bank of the river to Meyers' Mills, section 110; thence leaving Casselman's river, the line ascends Flaugherty Creek, through the Alleghany Mountain Gap, to the "Sandpatch Tunnel," section 115; thence descending Will's Creek, sometimes on either bank, to Krigbaum's at the junction with the Mount Savage Railroad, at the end of section 144, 87 miles from Connellsville, and 4 miles from Cumberland. Proposals will be received up to the 20th instant, inclusive, after which due notice of the award of the work will be given to the successful bidders. A circular to contractors, issued by Benjamin H. Latrobe, Esq., Chief Engineer, informs those who may have work allotted to them that they will be expected to begin it within a month after being notified of the allottment, and to complete it at such times in the years 1869 and 1870, as will allow the road to be opened through from Connellsville to Cumberland, not later than the autumn of 1870.

Vermont and Massachusetts Railroad.

A special meeting of the stockholders of this company will be held in Boston on the 19th inst., for the following purposes, viz:

1st. To see if this corporation will accept a lease or transfer for a limited time or perpetually from the Turner's Falls Branch Railroad Company of all their property, right and franchise under acts of the Commonwealth of Massachusetts of 1866, ch. 41, and acts of 1868, ch. 33, and to make arrangements therefor.

2d. To see if they will build a railroad under the authority of said acts, and to determine how they will raise means therefor.

3d. To see if they will subscribe for and hold shares in the capital stock of the Mansfield and Framingham Railroad Company to an amount not exceeding twenty five thousand dollars, under authority of acts of 1868, ch. 189.

☞ A correspondent of the Milwaukee *Wisconsin*, writing from La Crosse, September 2, says the Tomah and St. Croix Railroad, or West Wisconsin Railroad, as it is now called, is still progressing. The iron for the track from Tomah to the Falls has already arrived in New York and been reshipped for Tomah, together with a locomotive and several construction cars.

☞ At the annual meeting of the stockholders of the Boston, Hartford and Erie Railroad Company, in Boston, on the 9th inst., the following gentlemen were elected directors: John S. Eldridge, Mark Healey, Henry N. Farwell, Joseph W. Clark, James S. Whitney, James W. Converse, Henry Thompson, Edward Harris, O. J. Rathburn, Geo. M. Bartholemew, Edmund G. Howe, Thos. Tallman, and Wm. H. Chandler. H. N. Otis, Esq., was elected Secretary for the ensuing year.

☞ The Vermont and Massachusetts Railroad has surveyed a route to Turner's Falls, which will probably be adopted, beginning about 200 feet east of the Connecticut River Bridge, and running north through Montague City. The New London road is surveying a route from the same point, south, through the centre of Montague Town, which probably will also be built, if the Vermont and Massachusetts connection north to the Falls is, thus giving Montague Centre and the New London road a direct connection with the Falls.

☞ The Secretary of the Treasury has issued $1,280,000 bonds to the Central Pacific railroad of California, for an additional forty miles completed to the 255th mile post east of Sacramento.

☞ The Union Pacific Railroad is reported complete up to the 800th mile post west from Omaha, and about 300 miles this side of Great Salt Lake City.

To Railroad Companies.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices for all descriptions of both AMERICAN and FOREIGN

RAILROAD IRON.

We are always in a position to furnish all sizes, patterns and weight of Rail for both Steam and Horse Roads, and in any quantities desired, either for IMMEDIATE or REMOTE delivery, at any port in the United States or Canada, and always at the very lowest current market prices. We are also prepared to supply

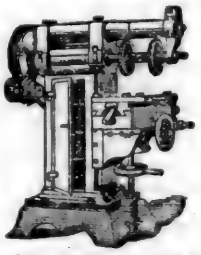
BESSEMER STEEL RAILS,

of American and Foreign manufacture, rolled to any desired pattern and weight per lineal yard, and of approved lengths. Contracts for both IRON AND STEEL RAILS will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign; when desired, we will contract to supply roads with their monthly or yearly requirements of STEEL OR IRON RAILS, taking their

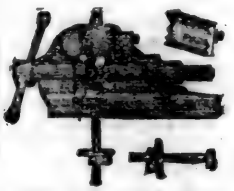
OLD RAILS IN TRADE FOR NEW

furnished, receiving the difference in cash, and allowing the highest market price for their Old Rails, and, if necessary, receiving the latter after the delivery of the New Rails.

Orders for Foreign Rails, both Steel and Iron, will be taken for transmission by Mail or through the Cable to our



LONDON HOUSE,
58 OLD BROAD STREET,



for execution at a fixed price in Sterling, or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America, and at the lowest possible rates of freights. Address

S. W. HOPKINS & CO.,
69 & 71 Broadway, New York.

UNION VISE COMPANY,

A. H. BRAINARD, Supt.

Godeffroy Brancker & Co.

42 Exchange Place, New York,

are prepared, as Sole Agents in the United States for the Prussian Mining and Iron Co., of Duisburg, Westphalia, to contract or sell in quantities to suit purchasers (delivered in either New York or Philadelphia) the celebrated

V. H. SPIEGELEISEN

used so extensively for the manufacturing of

Bessemer Steel.

This iron is free from Sulphur and Phosphorous, and contains a heavy percentage of Manganese. The above are also ready to contract for, or sell to arrive,

STEEL RAILS

Manufactured by

G. ARNDT & CO.,

of Dortmund, for which latter firm they also have the Sole Agency in the United States.

For particulars, samples, prices, or chemical analysis will be promptly forwarded on application. 3m33

800 MILES
OF THE
UNION PACIFIC
RAILROAD

Are now finished and in operation. Although this road is built with great rapidity, the work is thoroughly done, and is pronounced by the United States Commissioners to be first class in every respect, before it is accepted, and before any bonds can be issued upon it.

Rapidity and excellence of construction have been secured by a complete division of labor, and by distributing the twenty thousand men employed along the line for long distances at once. It is now probable that the

Whole Line to the PACIFIC will be Completed in 1869.

The Company have ample means of which the Government grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; also United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built, for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, etc.

THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Business only, during the year ending June 30th, 1868, amounted to over

Four Million Dollars,

which, after paying all expenses was much more than sufficient to pay the interest upon its Bonds. These earnings are no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they certainly prove that

First Mortgage Bonds

upon such a property, costing nearly three times their amount,

Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's office in the City of New York, at the rate of six per cent. in gold. The principal is payable in gold at maturity. The price is **103**, and at the present rate of gold, they pay a liberal income on their cost.

A very important consideration in determining the value of these bonds is *the length of time they have to run.*

It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate of interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this result, and as the issue of a private corporation, they are beyond the reach of political action.

The Company believe that their bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved. Subscriptions will be received in New York

At the Company's Office, No. 20 Nassau St.,
AND BY
John J. Cisco & Son, Bankers,
No. 59 Wall St.,
And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised agents.

JOHN J. CISCO, Treasurer, New York.
SEPT. 14, 1868.

TO RAILWAY CONTRACTORS.

THE GRADUATION, MASONRY AND BALLASTING of the following enumerated sections of the

Pittsburgh and Connellsville Railroad,

Are advertised for contract, and proposals for the same will be received at the Company's Office, in Pittsburgh, up to

20th of SEPTEMBER, inclusive.

Commencing at the Uniontown Branch Junction, about a mile east of Connellsville, Sections 59 to 64 inclusive. Then Sections 65, 73, 74, 76, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 106, 110, 112, 115, 116, 117, 118, 119, 122, 128, 129, 130, 133, 140. All of these Sections are in the valley of the Youghiogheny River, up to Section 112 inclusive. Sections 115, 116, 117 are on the Summit, and embrace the Sand Patch Tunnel; and the remainder are in the valley of Wills Creek, Section 140 being about 5 miles from Cumberland.

Specifications of the work on the above Sections will be ready for delivery on the 1st of September, at the offices of the Company, at Pittsburgh and Cumberland, where contractors will obtain all necessary information to enable them to examine the line.

The Company reserves the right to reject all or a part of each bid.

B. H. LATROBE,

Swaged Wrought-Iron Rail Chairs

WITH CONTINUOUS BASE AND LIPS

☞ The grain of the iron running across the line of the Rail, which gives them great additional strength over all others, and no liability to split. The Spike Holes being Punched within the Edge of the Lip, admits of one-half the Spike being recessed back in the solid metal, which cannot be done in the Rolled Chair.

☞ *All orders will receive prompt attention. Samples sent on application.*

PATENTED SEPT. 18th, 1866.

Safety Railroad Switch.

MAIN TRACK UNBROKEN.

I AM NOW PREPARED TO FURNISH RAILROADS throughout the United States with my Patent Railroad Switches, by the use of which the *MAIN TRACK IS NEVER BROKEN*, and it is impossible for any accident to occur from the misplacement of switches.

The saving in rails, and the great saving in the wear of rolling stock, which is by this means provided with a level, smooth and firm track at switches, in place of the usual movable rails, and the consequent severe blows caused by the open joints and battered ends, is a matter deserving the especial attention of all railroad companies.

AS A MATTER OF ECONOMY ALONE this invention needs only to be tried to insure its adoption; but beyond the economy THE PERFECT IMMUNITY FROM ACCIDENT caused by misplaced switches is a subject not only of importance in respect to property saved from destruction, but it concerns *The Life and Limb of all Travelers upon Railroads.*

I refer to the Philadelphia and Reading Railroad Company, and to the New York and Harlem Railroad Company.

I am now filling orders for various other Railroad Companies, and I will gladly give any information in detail that may be desired.

☞ LOUISVILLE AND NASHVILLE RAILROAD FIRST MORTGAGE 30-YEAR 7 PER CENT. BONDS, INTEREST PAYABLE APRIL AND OCTOBER, AT THE BANK OF AMERICA, IN NEW YORK.

INCOME ACCOUNT NO. 7, FISCAL YEAR ENDING 30TH JUNE, 1868:

Gross earnings		$2,228,609 44
Running expenses	$1,309,514 83	
Int. account same time	227,203 21	
		1,536,718 04
Net earnings		$691,891 40

Road and branches finished and running 367 miles, with monthly increasing earnings, and a mortgage debt of only $2,450,000.

For the purpose of retiring the above OLD indebtedness, and of extending its connections Southward, this Corporation has executed a mortgage to JAMES PUNNETT and JUNIUS B. ALEXANDER, of the city of New York, as Trustees, upon its entire lines of Road, with all its rolling stock, property, franchise and INCOME, to secure the prompt payment of its bonds for eight millions of dollars, in denominations of one thousand each, payable thirty years from 1st of April, 1868, and bearing seven per cent. interest—Coupons payable April and October, at the Bank of America, in New York. This mortgage provides for the *registering* of these bonds on the books of the Company, and at its agency in New York, by any holder who may desire this security against loss by theft or otherwise; and also that $2,500,000 of the Bonds shall be set apart for the *express purpose* of retiring at maturity the present indebtedness—thereby making this the *only* and *first* mortgage, on a road costing *double the amount.*

There is no Railroad Corporation in America whose bonds should more fully command the entire confidence of capitalists than this, which has never faltered in the payment of its obligations, of every description.

The net earnings of the Road are more than fourfold the interest on its present bonded indebtedness, and the stockholders have received eight per cent. cash dividends.

It is the purpose of the Company to issue, at present only a small portion of their Bonds secured under this mortgage, which we are now authorized to sell, in lots to suit purchasers, at ninety and accrued interest. Personal knowledge of this property, and its management, fully warrant us in unhesitatingly recommending these Bonds as in *all respects* a *first-class* security.

J. B. ALEXANDER & CO.,
No. 19 Nassau Street.

New York, September 16, 1868.

Kalamazoo, Allegan & Grand Rapids R.R.

The location of the route of this road from Grand Rapids to Allegan has been made, and the contract for preparing it for the iron has been let to Messrs. Goss, Warren & Co., who also have the contract for grading and furnishing the ties for the road from Kalamazoo to Allegan. It is expected that the contractors will put on all the men they can employ, and push the road to completion as fast as possible. Trains are to run to Allegan by October 15, and the contractors hope to complete the line to Grand Rapids by the first of January next.

☞ The directors of the Worcester and Somerset Railroad have decided to proceed with the construction of the road at once. They are to hire their own engineer and laborers, and are to commence the survey on the 28th of this month and the grading about the 1st of October.

Commerce of the United States.

The Director of the Bureau of Statistics has issued his regular monthly report of the import and export trade of the United States, which completes the record of the fiscal year, ending June 30th. According to Mr. Delmar's figures, the total value of import entries and the re-exports, and the resulting net imports of the United States, during the fiscal years 1860 to 1868, inclusive, specie and bullion included, were:

Years.	Import Entries.	Re-exports. Specie.	Net Imports.
1860..	$362,166,254	$26,933,022	$335,238,232
1861..	352,739,387	20,645,427	332,093,960
1862..	275,446,939	14,145,973	261,300,966
1863..	252,919,920	23,406,832	229,513,088
1864..	329,565,134	18,684,317	310,880,817
1865..	248,595,652	26,110,773	222,444,879

1867..	411,733,309	20,106,820	391,626,489
1868..	370,559,737	21,832,479	348,727,258

The following table exhibits the receipts from customs, imports, tonnage, &c., during each fiscal year since 1860:

1860 ...	$53,187,511 87	1865 ...	$84,928,260 60
1861 ...	39,582,125 64	1866 ...	179,046,651 58
1862 ...	49,056,397 62	1867 ...	176,417,810 88
1863 ...	69,059,642 40	1868 ...	164,464,599 56
1864 ...	102,316,152 99		

The total specie value of the domestic exports of the United States, during the fiscal years 1860 to 1868, inclusive, (specie and bullion included,) is shown in the following table:

1860	$373,189,274	1865	$196,235,455
1861	382,836,474	1866	417,142,084
1862	213,253,560	1867	334,350,653
1863	240,407,512	1868	352,389,639
1864	241,967,048		

York River Railroad.

The Richmond *Whig* says that a preliminary contract has been entered into between the York River Railroad Company and a party of Northern capitalists, which will secure its completion to West Point by the 1st of January, 1869. All of the remaining sixteen miles, from the White House, its present terminus, to West Point, is graded, and to lay the track ought not to require over sixty days. The work will be commenced about the 1st of October. It is stated that Joseph R. Anderson & Co., of the Tredegar Iron Works, Richmond, has the contract for the iron.

Mctchell, Bloomfield and Terre Haute R.R.

Articles of association have been filed in the office of the Secretary of State, at Indianapolis, Ind. The capital stock of the company is $2,000,000, divided into 40,000 shares, of $50 each. The directors for the first year are James Lyons, Jason N. Conly, John Jones, Henry Irons, Henry Vandike, Wm. Mason, and Marcus H. Scheicer. The proposed road will commence at Mitchell, Lawrence county, and run through the counties of Lawrence, Green, Clay and Vigo, to Terre Haute, a distance of about eighty miles.

Louisville, Cincinnati and Lexington Railroads.

We have been favored with a copy of the Second Annual Report of the "Louisville, Cincinnati and Lexington Railroads," being the Twentieth Annual Report of the *Louisville and Frankfort* and *Lexington and Frankfort* Railroad Companies. The former road is 65 miles in length, and the latter 29—together, 94 miles. These roads are operated as one, under the control of an executive committee, consisting of W. A. Dudley, Norvin Green, C. N. Warren, F. K. Hunt, J. Guthrie Coke, J. W. Kalfus and M. C. Johnson, of which W. A. Dudley, President of the Lexington and Frankfort Railroad Company, is chairman.

The receipts from operations of these roads for the years ending June 30, 1867 and 1868, have been as follows:

	1867.	1868.
From passengers	$283,612 64	$277,702 59
" freight	202,137 92	187,247 74
" express	12,881 65	15,437 14
" mail	9,400 00	9,400 00
" telegraph	1,249 74	1,111 27
" miscellaneous	837 07	2,320 19
	$510,319 02	$493,218 93
Expenses, viz:		
Conducting transp	$83,222 14	$71,610 54
Motive power	98,585 62	77,641 95
Maintenance of way	122,901 88	139,566 41
" cars	41,415 68	38,977 50
General expenses	10,976 58	13,175 47
	$357,101 90	$335,971 87
Net earnings	$153,217 12	$157,247 06

Compared with the previous year, the gross earnings of 1867–'68 show a decrease of $17,100 09, with a decrease in expenses of $21,130 03—making the increase in net earnings, $4,029 94.

The receipts and expenses from all sources for the year ending June 30, 1868, were as follows:

RECEIPTS.

Transportation receipts, as above	$493,218 93
Discount on loans and interest on investments	40,358 53
Sales of first mortgage bonds	1,283,000 00

Supplies on hand July 1, '68	$59,456 08	
Paid to Cincinnati Br. fund.	35,822 38	
		95,278 48
Total, as above		$589,689 15

We give elsewhere statements showing the financial condition of the respective companies July 1, 1868. The most noticeable changes since the last report are a reduction of $12,000 in the debt of the Louisville and Frankfort, and $19,000 in that of Lexington and Frankfort Railroad Companies. In addition, the latter company had on hand cash means applicable to the reduction of its debt to the amount of $12,000. Practically, therefore, the aggregate debt of these companies may now be stated as $43,000 less than the sums named in their last reports. Excluding their joint engagements, contracted on account of the Cincinnati Branch, the general condition of each company is as follows:

	Lou. & Frank.	Lex. & Frank.
Capital stock	$1,109,594 40	$514,646 42
Debt secured by mort.	208,000 00	32,000 00
Debt unsecured—perpetual loan	74,519 50	.....
Cost of road	1,532,644 99	654,265 37

The aggregate cost of both roads has been $2,186,910 36; represented by: Capital stock, $1,624,240; 82 debt secured by mortgage, $240,000; unsecured debt, $74,519 50—total, $1,938,760 32.

The net earnings of the road from Louisville to Lexington during the year were $157,247 06. Out of this there was paid:

To the Louisville & Frankfort Railroad Co:		
In preferred joint stock	$66,405 00	
In cash	37,433 73	
		$103,838 73
To the Lexington & Frankfort Railroad Co:		
In preferred joint stock	$30,878 76	
In cash	14,821 24	
		45,700 00

These payments are not exactly in the proportion fixed by the operating agreement between the two companies. The difference is due to an error in the payments of the preceding year, through which the Louisville Company received $1,406 70 less than the sum to which it was entitled, and that deficit is made good in the payment of the last year.

A balance of $7,708 33 remains undivided in the hands of the joint companies. The Report says:

The condition of your roads is steadily improving. A large quantity of new ballast is annually placed in the road-bed to supply original deficiencies; the cost of which is, for the present, charged to operating expenses, as has been our habit for several years past.

The net earnings are slightly in excess of those of the preceding year, notwithstanding the payment of several thousand dollars in compromise of the suits instituted against us for injuries to persons by the explosion of the locomotive *Scott*, in the month of June, 1865. These are the only suits of any consequence in which the company has been engaged for many years. We have pursued the policy of settling without suit all claims against us which were *colored* with justice, even when, as in the instances in question, we have not regarded the companies as subject to any legal liability.

Our continued freedom from accident is a subject for congratulation. On few, if any, of the roads in this country have trains been run with greater safety and regularity—a result principally attributable to the watchful fidelity of the men in your employment.

CINCINNATI BRANCH.

At the date of our last report the construction of this Branch had just been fairly commenced. Since then the work has been steadily prosecuted, and now approaches completion.

In November, through the agency of A. S. Hewitt, Esq., of New York, I negotiated the purchase of 8,000 tons of rails, and the joint fastenings for half that quantity of rails, from Messrs. Guest & Co. and Bolckow, Vaughan & Co., leading English manufacturers. In February following, Messrs. Guest & Co. accepted an order for an additional thousand tons. The sad exprience of other companies had shown the purchase of *cheap* rails to be false economy. Our original estimate, therefore, contemplated the payment of an extra price, with a view to secure a really good rail, and Mr. Hewitt was authorized and agreed to pay, for rails manufactured under inspection, upon specification furnished by himself, about twenty per cent. more than was asked for ordinary Welsh rails made for the American market. Mr. C. P. Sandberg, an engineer of distinction, was employed to make the inspections. The larger portion of the rails have been received, and, in justice to the manufacturers and the inspector, I should add that, from such examination as we have been able to make, we are satisfied that their quality will be found fully to justify the extra price paid for them.

Our first estimates were for about 8,300 tons of rails, at a cost of $95 per ton, delivered on the line of the road. The actual purchase, as above stated, is 9,000 tons; the cost of which, delivered on the line of the road, will not exceed $86.50 per ton. Notwithstanding the purchase of 700 tons more than was estimated for, the aggregate amount paid will fall short of the estimated cost by several thousand dollars. The new rails not required to lay the Cincinnati Branch will be used in relaying the road between Lagrange and Louisville. The old iron thus replaced will be used for repairs of the line between Lagrange and Lexington, and in laying the sidings upon the Cincinnati Branch.

The purchases of rails were made on credits of one, two, and three years from the several dates of shipments. The notes of the companies, bearing interest at the rate of seven per cent. per annum, were given in settlement, and our bonds deposited (at the rate of eight dollars of bonds to each pound sterling of the notes) as collateral security for their payment. The item "Bills Payable," in the generel balance-sheet, of course includes only the notes given for that portion of the rails for which shipping documents had been received prior to the 1st July.

The adoption of a less expensive form of joint fastening than was originally proposed, coupled with the decline in prices, has enabled us to effect a saving of nearly $40,000 from our estimate of the cost of that item. All of these have now been purchased.

Ten locomotives for passengers and freight and two for switching purposes have been contracted for with the Rogers Locomotive Works. One switching engine has been delivered, and the remaining number will be ready when needed. This purchase also was made upon satisfactory credit—the payments being secured by a deposit of bonds, as collateral, at the rate of 85 cents to the dollar. Owing to the decline of prices since our estimate was made two years since, we were able to secure the locomotives at an average reduction

of more than $5,000 each from our estimate of their cost.

All the iron spikes have been purchased and paid for at prices less than our estimate. Cross-ties have been contracted for and are being rapidly delivered. Their cost will not exceed the estimate.

Our charter authorizes the issue of three millions of mortgage bonds. These have been disposed of as follows:

Amount issued and paid for as per general balance-sheet	$2,116,000
Amount subscribed but not yet paid	162,000
Amount deposited as collateral on purchase of rails	552,000
Amount retained as collateral for purchase of locomotives	170,000
Total	$3,000,000

We were also authorized to issue one million of preferred joint stock. Of this there has been paid for from the net earnings of the road, and issued for dividends during the years 1867–'68,

The sum of	$145,921 94
And sold for cash	65,200 00
Making amount actually issued	$211,121 94
To which add amount subscribed but not yet paid	77,000 00
Leaves for future disposition	711,878 06
Total	$1,000,000 00

The amount necessary to place the Cincinnati Branch in operation was originally estimated at $3,459,011. Three fourths of the graduation and masonry are now complete. The iron rails, joint fastenings, spikes, cross-ties, and locomotives have been purchased or contracted for at fixed prices; and we are now satisfied that the original estimates will be reduced rather than exceeded by the actual result. The means to meet that expenditure are as follows:

Proceeds of $3,000,000 of mortgage bonds at 85	$2,550,000
Proceeds $1,000,000 preferred stock at par	1,000 00
Total	$3,550,000

Which gives an excess of means over estimated expenditure of $90,989.

In this statement it will be observed that the $722,000 of hypothecated bonds are supposed to yield us no more than those which have already been disposed of, although since the success of our enterprise has been established, and we have ceased to offer the bonds for sale, there has been a marked advance in their market value, and a still further advance may be confidently expected upon the opening of the road before we shall be required to offer them for sale. Nor is any deduction made from the estimated cost of the road, although large savings have been effected in several of the most important items.

The company have 14 locomotives, 13 passenger, 5 baggage, 24 freight, 74 stock, 51 platform, 38 ballast, 38 hand and 1 boarding-house cars. Miles run by locomotives with passenger trains, 144,473; with freight trains, 74,474; distributing trains, 25,087—total, 244,034, against 248,321 in 1867, and 239,626 in 1866. Total cost per mile run, 83.15 cents, against 42.28 cents in 1867. The total mileage of cars was 1,520,384.

The number of passengers carried was 328,803. Number carried one mile, 7,078,999. Average distance traveled by each passenger, 21.53 miles. Earnings per passenger per mile, 3.92 cents. Miles run by passenger trains, 137,839. Earnings per mile run by passenger trains, 219.49 cents.

Number of tons of freight hauled 68,510. No. of tons hauled one mile, 3,181,380. Average distance hauled, 46.44 miles. Earnings per ton per mile, 5.88. Miles run by freight trains, 63,604. Earnings per mile run by freight trains, 294.40 cents. Total earnings per train mile, 244.95 cents.

The gross cash receipts of the joint roads for two years ending June 30, 1868, were $1,003,537 95; and the actual cash expenditures, $637,888 97—leaving a balance of $365,648 98. Of which there has been paid to the Louisville and Frankfort Railroad Company $122,313 77; and to the Lexington and Frankfort Railroad Company, $52,690 80—total $175,004 57. The balance ($190,644 41) has been paid to Cincinnati Branch Fund, and is thus accounted for: proceeds of three preferred stock dividends, $145,921 94; dividends on preferred stock, $8,900 09; balance, to credit side of income account, $35,822 38. Of the $190,644 41 paid to Cincinnati Branch Fund, $71,691 75 has been paid for interest on bonds to the close of the fiscal year, leaving a balance of $118.952 66 still on hand to be applied to the payment of interest on the mortgage debt for the ensuing year.

GENERAL ACCOUNT, JUNE 30, 1868.

Construction acc't—Cincinnati Br.		$2,107,196 57
Discount on bonds		317,400 00
Interest on bonds		71,691 75
Due from sundry individuals		26,898 37
Real estate		59,456 08

Unpaid coupons		12,110 00
Unpaid dividends		7,578 00
Due sundry individuals		1,830 44
Balance to credit side of income account		95,278 46
		$2,995,845 38

Superintendent.—SAMUEL GILL.
Chief Engineer Cin. Br.—I. M. ST. JOHN.
Secretary and Treasurer.—W. H. BEYNROTH.
Auditor.—WILLIAM MAHL.

☞ Geo. W. Lefevre has been elected president of the Doe Run and White Clay Railroad Company, and Levis Pennock, Martin Landenberger, Levis Barnard; George B. Sharp, Cyrus Hoopes, John M. Pomeroy, Nelson P. Boyer and Aaron Baker, directors. The road will run from Parkersburg to Delaware City, following Brick Run and White Clay Creek. It is proposed that the citizens along the line shall grade the road, and the Pennsylvania Railroad will lay the rails, and equip the road as a coal road, to Delaware City as a shipping point.

☞ Twenty five miles of the projected Belfast and Moosehead Lake Railroad have been surveyed.

☞ Work on the Boyertown and Pottstown Railroad is progressing rapidly. A large force is at work, and already over a mile of the grade is ready for the rails.

Central Pacific Railroad.

This road is now within 300 miles of Salt Lake, and extending eastward very rapidly. The continuous rail will be completed by July next. The business for the month of July last was as follows:

Gross earnings	$259.590 89
Operating expenses	80,352 72
Net earnings	$179,238 17

This result was upon less than 200 miles opened for business, with insufficient rolling stock, and was derived from legitimate commercial business only—being altogether independent of the transportation of the immense amounts of men, subsistence and materials required for grading and extending the track nearly 100 miles eastward during the same period.

The Funcke & Elbers Steel & Iron Works, Hagen, Prussia.

Our advertising columns contain to day the card of the above company, which, to judge from numerous certificates of German Railways, has manufactured puddled steel and steel headed rails with remarkable success for upwards of seven years. The prospectus of the company gives detailed accounts of the manner in which these rails are made, the main novel feature being the peculiar method of piling, viz: Instead of rolling out solid ingots, as in the Bessemer process, or five flat bars (tops and bottoms) as is usually done with common iron rails, the pile is composed of two rows of thirteen flat bars (more or less) standing on top of each other, the lower row, or part of it, consisting of fine fibrous iron if steel headed rails are to be made.

This pile is hammered down under a five-ton steam hammer to the requisite size for the rollers, and when the rail is finished thirteen welding-joints run nearly parallel from the rail-top down into the flanges or feet of the rails.

Messrs. Funcke & Elbers claim, that so far no kind of steel, except puddled steel, can be perfectly welded in the aforesaid manner, and also, that these rails are superior to Bessemer rails, because the tread-piece demands a very hard and the bottom of the rails a very tough substance; these two qualities are combined in the former, hence freedom from breakage, while the Bessemer rails are rolled out of a solid, uniform mass, which obviously must be deficient in one of the aforesaid qualities. Funcke & Elbers' rails are now in use on six American Railroads, and on the way for other companies, so that their practical value will be soon ascertained.

The reputation of their American agents, Messrs. Hermann Boker & Co., who are established in this city over forty years, is too well known to require any comment.

☞ Trains have commenced running through to Charlotte from Jackson, on the Grand River Valley Railroad. A daily line of stages connects Charlotte and Hastings.

☞ The work on the Kent (Md.) Railroad is making considerable progress. The wharf on Chester River, at Chestertown, is now nearly completed.

☞ Passenger trains are now running on the Perkoimen Railroad from the Junction to Skippack, a distance of ten miles.

Imports of Dry Goods.

☞ The Cecil *Whig* says there are indications that the Columbia and Port Deposit Railroad Co. are about to make a move towards finishing the road to the Octoraro Creek. A few days since a train arrived bringing one hundred tons of railroad iron, and they report more on the way. The prospect now is that some of the rails will be laid before Christmas.

Union Pacific Railroad.

THE COST IT SAVES, AND THE PROFIT IT MAKES TO THE GOVERNMENT.

The prospective value of the Union Pacific Railroad, as a promoter of emigration and of increased production of the minerals of the West, is beyond question. But its value and profit as a national undertaking are by no means confined to the future. Each year of its operation, even in its unfinished state, ensures direct, unequivocal profit to the National Treasury, as the following figures, furnished by Gen. M. C. Meigs, U. S. Quartermaster-General, abundantly prove.

Previous to the building of this continental railroad, all Government freight, consisting chiefly of supplies for the troops upon the frontier, was carried by wagons under contracts given to the lowest responsible bidders. At the time of the Mormon War, the annual expense of maintaining troops upon the Plains amounted to about $1,000 per man, most of this sum being chargeable to transportation. In 1866, wagon transportation upon "Route No. 1" (the route now occupied by the Union Pacific Railroad,) cost an average of 28.4 cents per ton per mile. In 1867, an average of 39.4 cents was paid for similar service, while, on account of the increased distance, for the season from January 1, 1868, to March 31st, the lowest contract that could be made was for 50 cents per ton per mile.

The average tariff of Government transportation over the Union Pacific Railroad is 10.61 cents per ton per mile, but even this is in excess of the actual cost, as may be seen by the following extract from a letter from Quartermaster-General Meigs, under date of September 1, 1868:

"It may properly be assumed that the average rate per ton per mile charged by your company, (10.61 cents,) being based upon your published tariff rates, is somewhat in excess of the actual average rate paid by this department for its transportation, owing to the fact that the greater portion of the freight carried for it is comprised under the lower classes, and that 10.5 cents per ton per mile would approximate the rate actually paid."

The amount paid by the Quartermaster-General to the Union Pacific Railroad in 1867, for Government transportation, was $699,698 81. Had this same freight been transported by wagons, at the contract price for that year (39.4) cents,) the cost would have been $2,625,536 41. In other words, the money actually saved, in one year, in the transportation of Government freight, with the road in operation for an average distance of but 386 miles, was $1,925,837 60. As has been stated, one-half the Company's charges against the Government for transportation are paid in cash, the balance being credited toward the payment of the United States Bonds and their interest. The U. S. Treasury Department officially reports that the total amount of interest which had been paid by Government upon bonds issued to the company up to June 30th, 1868, was $764,655 75. The amount paid by the company on account of the above charge to the same period, was $615,914 58, with a balance then due from the War Department, of $55,229 42, one-half of which was applicable to the payment of the interest account. It will therefore be seen that the Government has actually paid out only $121,126 46 (which itself will probably be more than paid by Government transportation during the present year,) while its actual saving in one years' transportation was almost two million dollars. As the railroad is rapidly carried forward, the amount of its Government service and the corresponding saving to the treasury will increase even more rapidly, while in other respects the national gain will be equally manifest. By the building of the road and the emigration which it renders possible and profitable, the value of all Government lands along its line will be increased beyond present computation. Lands which before were entirely inaccessible, and therefore worthless, are now brought into direct connection with markets whose demand for all productions of the soil will steadily increase, while those situated near the town sites established by the company will at once become of very great value. The population thus supported and encouraged by the railroad will not only swell our agricultural and mineral productions, but, if the present ratio of national taxation be kept up, the people along the line of the Pacific road will, in ten years time, pay not less than ten million dollars as annual taxes into the U. S. Treasury. In short, it is safe to assert that this railroad will prove by far the most profitable of all the internal improvements ever aided by Government.

THE WAY BUSINESS—ACTUAL EARNINGS.

As no one has ever expressed a doubt that as soon as the road is completed, its through business will be abundantly profitable, it becomes interesting to know, not only what may be expected, but what has actually been earned, by the way or local business, so far as it has been opened. It should be remembered that, although settlements are being rapidly made along the line, until recently the road has run through a wilderness for almost its entire length; but as every year brings an influx of population, this local traffic will have a steadily increasing value. At present, its transportation for the Government and for the mining regions is the chief source of its already large revenue. As these mining regions are penetrated, the earnings will be greatly increased, and the various branch lines that will soon be constructed will be most valuable feeders of the main trunk.

The following are the earnings of the Union Pacific Railroad for the year ending June 30, 1868:

From passengers		$888,335 05
" freight		3,238,371 61
" express....		30,954 79
" mails....		66,800 00
" miscellaneous.....		26,579 28
		$4,246,040 73
Expenses:		
Conducting transp.....	$517,802 86	
Motive power.....	977,010 62	
Maintenance of cars...	209,150 57	
Maintenance of way...	831,537 66	
General expenses.....	149,255 43	
		2,684,757 14
Net earnings to balance		$1,561,283 59

The average length of road in operation for the same time was 472 miles.

The amount of first mortgage bonds the company can issue on this 472 miles is $7,520,000.

Gold interest for one year, at the rate of 6 per cent., is....	$451,200
Add 40 per cent. premium for gold.....	180,480
	$631,680

Surplus for the year, after paying interest on first mortgage bonds, $929,603 59.

We will now add to the account the interest on the U. S. second mortgage bonds, and it will stand as follows:

Net earnings for one year....		$1,561,283 59
Interest on first mortgage bonds, reduced to currency.....	$631,680	
Interest on second mortgage bonds, in currency.....	451,200	
		1,082,880 00
Surplus after paying all interests....		$478,403 59

The earnings for the first half of the financial year were so large that the company reduced their charges twenty-five per cent. If the way or local business produces such results, what may we expect from the traffic that must pass over it from the two sides of the whole North American continent?

THEIR SECURITY AND VALUE.

As before stated, the Union Pacific Railroad Company are authorized by Congress to issue their first mortgage bonds in the same amounts as

are issued by the Government to the company on the various sections of the road *as they are completed*, viz:

On the first 517 miles at $16,000 p. m.	$8,272,000
On the Rocky Mountain region, 150 miles, at $48,000 per mile.....	7,200,000
On 433 additional miles at $32,000 per mile.....	13,856,000
Total for 1,100 miles.....	$29,328,000

All these bonds are for $1,000 each, and have coupons attached. They have thirty years to run, and bear interest at the rate of six per cent. per annum *in gold*, payable on the first days of January and July, at the company's offices in the city of New York.

PRINCIPAL AS WELL AS INTEREST PAYABLE IN GOLD.

While the company have never supposed that the principal of their bonds would be paid otherwise than in gold, yet, to put all question on this subject at rest, at a meeting of the directors held on the 12th of March, 1868, it was unanimously

Resolved, That the President and Treasurer are authorized and directed to enter into a covenant with the Trustees of the first mortgage bonds of this company, to pay the principal of said bonds, at maturity, in United States gold coin.

In accordance with this resolution, the President and Treasurer made the following

COVENANT.

Know all men by these presents, *that whereas*, the Union Pacific Railroad Company heretofore executed to Edwin D. Morgan and Oakes Ames, Trustees, a certain indenture of mortgage bearing date the first day of November, one thousand eight hundred and sixty-five, mortgaging thereby the railroad of the said company to the said Trustees to secure the payment of the said company's first mortgage bonds, and the said indenture of mortgage was duly recorded; *And whereas*, the said company have issued divers of the said first mortgage bonds, and intend hereafter to issue divers others of said first mortgage bonds mentioned in and provided for by the said indenture of mortgage; *And whereas*, by the tenor of said bonds the principal sum payable thereon at maturity is to be paid in lawful money of the United States; *Now*, in consideration of the premises, and of one dollar to the said company in hand paid, the receipt whereof is hereby acknowledged, and for divers other good and valuable considerations the said company thereunto moving, the said company hereby covenant and agree to and with the said Edwin D. Morgan and Oakes Ames, as Trustees, for the benefit of all who are or shall be holders of said bonds, and to and with the successors of said Trustees in the trust created by the said indenture of mortgage, that the principal of all the said first mortgage bonds, being one thousand dollars each, as well such as have been issued hitherto as such as shall be issued hereafter, shall and will be paid by the said company whensoever the same respectively become payable according to the tenor thereof, in the gold coin of the United States at par, that is to say, one thousand dollars of such coin for each of the said bonds.

In witness whereof, the said company have caused these presents to be sealed with their corporate seal, and to be subscribed by their President and Treasurer, this twelfth day of March, one thousand eight hundred and sixty-eight.

Sealed and delivered in the presence of BENJAMIN F. HAM. } OLIVER AMES, *President*. JOHN J. CISCO, *Treasurer*.

It will be noticed, that this covenant applies to all the first mortgage bonds of the company without exception, including those that have been heretofore issued as well as those which may be issued hereafter. We now come to the first question which will be asked by every investor, viz:

ARE THE BONDS SECURE?

ANS.: Congress has taken an especial care that the interests of the bondholders of this road shall be secured, that has never before been shown towards a similar enterprise. The mortgage is made to Hon. E. D. Morgan, U. S. Senator from New York, and Hon. Oakes Ames, Member of U. S. House of Representatives from Massachusetts, who alone can deliver the bonds to the company, and who are responsible for their delivery in strict accordance with the terms of the law.

The President of the United States appoints five Government directors who cannot be stockholders, who take part in the direction of all its affairs, and one of whom is to be on every committee of the company. It is the duty of these directors so see that all the business of the company is properly managed, and to report the same to the Secretary of the Interior, who reports, through the President, to Congress.

The President of the United States also appoints three Commissioners to inspect the work as it progresses, in sections of twenty miles, to see that it is in all respects a first class road, and that it is suitably provided with depots, stations, &c., and all the rolling stock necessary for its business. The U. S. bonds are issued to the company only as each section of twenty miles is accepted by the U. S. Commissioners, and the Trustees of the first mortgage bondholders deliver the company's own first mortgage bonds to the company only on the same conditions, except that the company are permitted to issue their bonds for one hundred miles in advance of the completed line, to cover a part of the cost of grading, &c.

To give every facility for the negotiation of the company's first mortgage bonds, the Government makes its own bonds issued to the company a *second lien*, and it will be noticed that the Union Pacific Railroad is, in fact, a Government work, built under the supervision of Government officers, and to a large extent with Government money. We may say, without danger of contradiction, that no bonds issued by any other company in this country, or, so far as we know, in the world, are made so secure by a responsible Government, as the first mortgage bonds of the Union Pacific Railroad Company. They are not only a first mortgage upon a property that costs three times their amount, but upon a property of daily increasing value, and whose income is already much more than their interest. First mortgage bonds, whose principal is so thoroughly secured, and whose interest is so liberal and so amply provided for, must be classed among the very safest and best securities.

A PERMANENT VALUE.

The recent movements in Congress in favor of redeeming the Government bonds in currency, or taxing them directly or indirectly so as to reduce the rate of interest, and practically compel the holders to fund them at 4 or 4½ per cent., have induced many careful investors to exchange their Government securities, as a whole or in part, for Union Pacific First Mortgage Bonds. There are others who always prefer a first mortgage upon such a great, valuable, and productive real estate, to the obligations of any State or nation, which are subject to the vicissitudes of political action.

WHAT ARE THEY WORTH AS AN INVESTMENT?

ANS.: Other conditions being the same, securities are valuable *according to their rate of interest*. The recent average quotations for U. S. 10-40 bonds, bearing only 5 per cent. gold interest, redeemable by the Government in six years, have been 105 to 106, and the U. S. sixes of '81, gold six per cents which may be redeemed in thirteen years, have been at from 113 to 115½. The best first mortgage six per cent. railroad currency bonds range at about par, and the seven per cents run to a considerable premium, while the Union Pacific First Mortgage Bonds are sure to pay six per cent. in gold, which, with the premium at 40, (where it has stood upon the average for about three years,) pay 8 2-5 per cent.

It will be noticed that a very important consideration in determining the value of these bonds is *the length of time they have to run*.

It is safe to assume, that during the next thirty years, the rate of interest in the United States will decline as it has done in the old countries of Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which, in 1857, were bought in at from 20 to 28 per cent. above par.

There is no doubt that the Union Pacific bonds will become a favorite investment abroad, for although the company have made no effort to sell them, except at home, considerable amounts have been voluntarily taken on foreign account, and it is probable, that as soon as the road is completed, a very large proportion of the whole issue will be taken out of the country.

It should be remembered, that the whole issue of these bonds will be only about thirty million dollars, of which over eighteen millions have already been sold; and while subscriptions are now received at 102, it is expected that, with a favorable money market, the price may be further advanced at an early day.

In addition to their safety and profit, these bonds offer every convenience of a convertible investment. The gold coupons will be cashed by bankers in any part of the country, and the bonds themselves are taken as security for loans at the lowest current rates.

JOHN J. CISCO, Treasurer,
Union Pacific Railroad Co.
NEW YORK, Sept. 20th, 1868.

Debt of Tennessee.

The following is a statement of the debt of Tennessee as recently reported to the Legislature of that State:

BONDED DEBT OF THE STATE.

State debt proper to Jan. 1, 1866...		$3,334,606 66
Int. on same funded to Jan. 1, 1866.		743,553 60
Total.....		$4,078,160 26
State b'ds loaned to railroads to Jan. 1, 1861.....	$21,465,000 00	
Interest funded to Jan. 1, 1866.....	3,732,343 10	
State bonds loaned railr'ds since Jan. 1, 1861.....	4,438,000 00	
		$29,635,343 10
State bonds loaned to turnpike companies to Jan. 1, 1861.....	$490,000 00	
Interest on same, funded to Jan. 1, 1868...	102,060 00	
		592,060 00
State bonds loaned to Agricultural Bureau to Jan. 1, 1861.....	30,000 00	
Int. funded Jan. 1, 1866	7,200 00	
		37,200 00
Total.....		$34,342,772 76
State bonds cancelled.....		71,006 00
Aggregate state debt.....		$34,271,762 76

BONDS ENDORSED BY THE STATE.

Nashville and Chattanooga R. R.....	$1,650,000
East Tennessee and Virginia R. R.....	200,000
East Tennessee and Georgia R. R.....	150,000
Memphis and Little Rock R. R.....	350,000
Total.....	$2,315,000
Of this amount there has been cancelled by sinking fund.....	143,000
Balance.....	$2,172,000

☞ Work has been commenced on the Cheyenne end of the Denver Branch of the Union Pacific Railroad.

☞ The track on the Maryland and Delaware Railroad is laid to within three-quarters of a mile of Tuckahoe creek, near Hillsborough.
